LABORERS (Cont'd)  
Building Construction

GROUP DESCRIPTION FOR ALL COUNTIES

- Group 1: Watchmen tending Heaters and Pumps
- Group 2: Building Construction Laborer
- Group 3: Laborers - Underpinning and Shoring eight (8) feet or more below working surface.  
Power Tool Operators of all mechanical, air, gas and electrical tools, including Self-propelled Buggies and Cement Finishers Tenders. Laborers preparing and placing of stone or any other Aggregate in sand bed to be used as exposed face of tilt-up panels.  
Burners on Demolition and Welders, Gunmite Nozzlemen and Sandblasters.
- Group 4: Pipelayers on Building Construction
- Group 5: Jackhammer Operator for Underpinning and Shoring over twelve (12) feet below working surface, Bellers and Stemmers on Caisson Work.
- Group 6: Tender, Mason and Plaster

DECISION NO. C076-5045

LABORERS  
(Heavy Construction)

Group 1: Minimum Labor, including Calissons to 8'; Carrying Reinforcing Rods; Work on Cross Culverts, connections and side drains in connection with highway work, whether corrugated metal or concrete pipe; Fence Erectors; Metal Mesh; Dowel Bars; Tia Bars and Chairs in concrete paving; Flagman directing traffic; Nursery Man including seeding, mulching and planting of trees, shrubs and flowers; Stake Chaser; Gabion Baskets and Reno Mattresses; Pipe plants and yards, stringing of pipe or skids, handling and signaling on pipe line work

Group 2: Chuck Tenders, Nippers, Core and Diamond Drill Helpers, Powdermen Helpers; Hot Asphalt Labor, Rakers, Boxtenders, Asphalt Curb Machines, Potmen (not mechanical); Multi-plate Culvert Pipe; Air, gas and electrical Tool Operators; Barco Hammers; Spaders, electric hammers; Air Tampers; Cutting Torches on demolition work; Calissons 8' to 12'; Cofferdams; Power operated Concrete Buggies; Operators of concrete saws on pavement (other than gang saws); Timber and Chain Saws; Stresser or Stretcherman on Post Tension or Prestressed Concrete on or off jobsite; Tool Room Man and Checkers; Cement Finisher Helper; Sand Blaster; Sand Blaster Helper; Concrete processing material; Monitor; Spotters; Signalmen; Dumpmen; Transverse Concrete Conveyor Operator; Mechanical Grouters; Boring Machine (air hydraulic); Automatic Concrete Power Curbing Machine; Jack Hammer; Vibrators; Paving Breakers; Frostproofing; Any laborer performing bridge work over 40' above the ground or above a floor and working from a Bos'n Chair; Swing Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laus; Gunitting and Shotcrete Helpers; Calissons over 12'; Scaletts; Timbermen, streets and airport runways; Distribution, placing and hooking of landing mats; Bull Float (hand operated) and Center Expansion Machines; Grade Checkers if required by employer; Pipe Wrappers; Dopers; Jeep Holiday Detector Men; Bandage Makers; Laborers working in trenches on all pipe lines, sewer, water, gas, oil, telephone conduit, Pen Stock, Siphons, drainage line, Caulkers, Yarners, Fine Graders, air, gas, electric, and hydraulic tools, Boring Machines, Hydraulic Jacks, Drills, Tampers, and similar operative tools; Wiping of Joint Concrete Pipe, inside and out; Labor, applicable to pipe coating or wrapping, plants and yards; Enamellers of pipe, inside and out

NOTICES

LABORERS (Cont'd)

Group 3: Powdermen and Blasters; Gunitte Nozzlemen; Shotcrete Operator; Pipe layer on truck pipe lines in connection with highway work Relining Pipe; Mixer Man; Pipelayer; Hydro-bloom

Group 4: Wagon Drills and Air Tracks; Jack Hammer Operators in Calissons over 12'; Bellers and Stemmen; Licensed Powdermen; Diamond and Core Drills powered by air.

Group 5: Any work, other than on bridges, performed by laborers working from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laus; Plugs and Calleys in Dams

LABORERS (Tunnels)

Group 1: Outside Labor

Group 2: Minimum Tunnel Labor, Dry Houseman

Group 3: Cable or Hose Tenders, Chuck Tenders, Concrete Laborers, Dumpmen, Whirley Pump Operators

Group 4: Helpers on Shotcrete, Gunitting and Sand Blasting; Helpers, Core and Diamond Drills; Pot Tenders

Group 5: Cement Finisher Helper, applying of concrete processing materials

Group 6: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Tunnel Liner plate Setters, Vibrator Men; Internal and External; Unloading, stopping and starting of Motor Agitator Cars; Diamond and Core Drill Operators; Cement Finisher (Underground); Shotcrete Operator; Gunitte Nozzlemen, Sand Blasters, Pump Concrete Placement Men

(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 1: Laborers, Topmen, Bottommen and Cagers

Group 2: Chucktenders, Concrete Laborers, Whirley Pump Operators

DECISION NO. C076-5045-  
LABORERS (Cont'd)

(SHAFTS, RAISES, MISSILE SILOS and all UNDERGROUND WORK OTHER THAN TUNNELS)

Group 3: Helpers in Shotcrete Gunitting and Sand Blasting; Helpers on Core and Diamond Drills; Pot Tenders; Cement Finisher Helpers, applying of concrete processing material

Group 4: Collapsible form movers and setters, Miners, Machine Men and Bit Grinders, Nippers, Powdermen and Blasters, Reinforcing Steel Setters, Timbermen (Steel or wood tunnel support, including the placement of sheeting when required) and all cutting and welding that is incidental to the Miner's work; Liner Plate Setters; Vibrator Men, Internal and external

Group 5: Diamond and Core Drill Operators; Cement Finisher (Underground); Gunitte Nozzlemen; Shotcrete Operators; Sand Blasters and Pump Concrete Placement Men

Group 6: Any employee performing work underground from a Bos'n Chair, Swinging Stage, Life Belt or Block and Tackle as a safety requirement. All lines and safety belts used shall be of a type approved by State and Federal laus

## CLASSIFICATION DEFINITIONS

**LABORERS - ZONE 1**  
 GROUP 1 - Building and labor construction  
 GROUP 2 - Stone mason helpers; mechanical tool operators; sewerman (bottom men, caulkers, tenders, joint wrappers, hot pot, grade carriers, layers and ditchers 4 feet or over); tender of all crafts; sandblaster (nozzlemen); sandblaster (pot tender); laying non-metallic pipe over 4 feet deep, including sewer pipe, drain pipe, and underground tile; septic tank diggers and installers, over 4 feet deep; gas & oil pipeline laborers and wrappers  
 GROUP 3 - Gunite tool operators

FEDERAL REGISTER, VOL. 41, NO. 100—FRIDAY MAY 21, 1976

DECISION NO. LA76-4091

**LABORERS - ZONE 2**  
 GROUP 1 - Building laborers; rotary drill laborers; foundation drill crewmen  
 GROUP 2 - Mason mixers; plaster mixers; mechanical tool operators; sandblasters; laying concrete pipe, clay pipe, plastic pipe, asbestos cement pipe, casing pipe and corrugated metal pipe, as sewer pipe, drain pipe, and underground tile (caulkers, joint wrappers, hot pot and pipe layers); gas and oil pipe-line laborers, wrappers and dopers  
 GROUP 3 - Mortar mixers and jackhammer operators  
 GROUP 4 - Blasters  
 GROUP 5 - Blaster helpers; concrete cutters behind paving machine and puddlers; form setters and lines asphalt worker  
 GROUP 6 - Tipping joints, laying pipe and tile from pumpcrete  
 GROUP 7 - Interior of closed tanks and vessels manually

**LABORERS - ZONE 3**  
 GROUP 1 - Building and general laborers; tenders (carpenter, plaster, cement finisher, mason); tank and vessel cleaners  
 GROUP 2 - Air tool operator (except jackhammer); interior of closed tanks and vessels power equipment  
 GROUP 3 - Mortar mixers and jackhammer operators  
 GROUP 4 - Blasters  
 GROUP 5 - Blaster helpers; concrete cutters behind paving machine and puddlers; form setters and lines asphalt worker  
 GROUP 6 - Tipping joints, laying pipe and tile from pumpcrete  
 GROUP 7 - Interior of closed tanks and vessels manually

**LABORERS - ZONE 4 & 5**  
 GROUP 1 - Building and general laborers; carpenter tenders  
 GROUP 2 - Power tool operators (hammer men, tapper, vibrators, power buggies, concrete chipper or cutters, chain saw operators, etc.); pipelayers (non-metallic)  
 GROUP 3 - Mason tenders, plaster tenders, cement mix (wet or dry) tenders, hot carrier tender; mortar mixers & cement mixers (wet or dry)  
 GROUP 4 - Building laborers  
 GROUP 5 - Laborers handling steel pans, stone masons helpers, mechanical tool operators, sewer (bottom men), caulkers, tenders, joint wrappers, hot pot, grade carriers, layers and ditchers 4 feet and over, and blaster (nozzlemen) and pot tenders, laying non-metallic pipe over 4 feet deep, septic diggers and installers over 4 feet deep, gas and oil pipeline laborers and wrappers  
 GROUP 6 - Gunite tool operators  
 GROUP 7 - Bricklayers tenders and mason tenders  
 GROUP 8 - Bricklayers using prime mover to serve a bricklayer; mortar mixers

**LABORERS - ZONE 6**  
 GROUP 1 - Common laborers  
 GROUP 2 - Jackhammermen, sewermen, mason tenders, plasterer tenders, stone masons helpers, vibrators  
 GROUP 3 - Mortar mixers

**LABORERS - ZONE 7**  
 GROUP 1 - Common laborers; carpenter helpers; mason tenders (other than cement); plasterers' tenders; stone mason helpers; concrete workers; scaffold builders  
 GROUP 2 - Air tool operators (jackhammer, vibrator, and tapper), sewer pipe joiners and setters; concrete cutters; hot carriers; concrete materials handler; acid worker; mason tenders (cement); mortar mixer (wet or dry); motorized buggy operator; water proofers (mastic); form setters (steel paving forms)  
 GROUP 3 - Chain saw operator  
 GROUP 4 - Asphalt raker, tapper, smoother and shovelers; sewer pipe layers; blaster helpers  
 GROUP 5 - Powdermen

DECISION NO. LA76-4091

**LABORERS - ZONE 9**  
 GROUP 1 - Building laborers  
 GROUP 2 - Mason tenders, plasterer tenders; asphalt rakers, asphalt smoothers  
 GROUP 3 - Mortar mixers  
 GROUP 4 - Air jack operators, vibrator operators; sewer pipe layers, sewer pipe wipers

**LABORERS - ZONE 10**  
 GROUP 1 - Laborers, tenders (brickmasons, stonemasons, cement masons, carpenter, plasterers); stripping & dismantling; concrete form work; loading, unloading, carrying & handling steel & steel mesh; assisting to the setting of cut stone, granite or artificial stone; building scaffolds; shoring  
 GROUP 2 - Mechanical tool operator (air, electric, motor, engine, etc.); sewer pipe layers; mortar mixers (hand or machine); gunite operator  
 GROUP 3 - Pipe dopers & burners

## AREA COVERED BY LABORERS (BUILDING CONSTRUCTION) ZONES

**ZONE 1** - St. Tammany (as far south as Bayou LaCambre and east to the Mississippi State Line at Pearl River), Tangipahoa (except that portion south of a line running due east from the western boundary of Tangipahoa Parish which follows the northern city limits of Independence, Louisiana to 20 miles east of U.S. Highway 51, then running south paralleling Highway 51 at a 23 mile distance to Lake Pontchartrain) & Washington Parish

POWER EQUIPMENT OPERATORS - ZONE 5

GROUP 1 - Scale operator; Oilier-driver on Motor Crane; Hatch Plant Operator

GROUP 2 - Pumps under 3 inch suction; Mechanic Helper

GROUP 3 - Oilier

GROUP 4 - Scaleman

GROUP 5 - Combination Oilier-Compressor; Combination Oilier-Mixer; Asphalt Spreader; Hackhoe (all types); Bulldozers; Cableways; Cherry Pickers (all types); Concrete Mixers (over 1 sack); Cranes; Deck Winch (2 drums or over); Front End Loaders (except farm type); Grease Serviceman; Hoist (1 drum, 4 stories, or 40 feet) on construction other than buildings; Hoist (2 drums or over); Locomotives (all types); Mechanic; Mixer Plant Operator; Central Mix; Motor Patrols; Derricks; Ditching or Pump Crane, 6" and over discharge; Push Cat; Road Pavers; Dredges; Fork Lifts (other than farm type) outside warehouses (riding type); Draglines; Dredges; Fork Lifts (other than farm type) outside warehouses; Foundation Drill; Rollers (plant mix asphalt); Scrapers; Shovels; Sidebooms; Unit Operator; Welder, Journeyman; Well Point System; Winch Trucks; Winch Cuts (Cat D-4 and over); Winch Trucks with A-Frame (5 tons and over); Work Boats requiring licensed operator

GROUP 6 - Rush Hog; Compressor; Concrete Pumps, under 6" discharge; Concrete Saw; Kolum Huff Machines; Mixers (1 sack and under); Motorized street sweepers self-propelled; Pumps (3 inch and over); Deck Winch (1 drum); Distributors; Dowel Bar Machines; Farm-type tractors (when used to pull discs, grass cutters, etc.); Test Pump, Internal, combustion engine powered; Ditching or Trenching Machines (non-riding type); Water Blast Pumps; Hoist, 1 drum under 4 stories on buildings; Hoist, 1 drum (40 feet or under on structures other than buildings)

GROUP 7 - Asphalt Plant Operator; Boom Trucks; Bullfloats; Concrete Spreader; Farm Type Front End Loaders; Rollers (other than plant mix asphalt); Straddle Buckles; Winch Truck with A-Frame (under 5 tons); Work Boat, not requiring licensed operator; Finishing Machines

CLASSIFICATION DEFINITIONS

POWER EQUIPMENT OPERATORS - ZONES 1, 2, 3 & 4

GROUP 1 - Oilier

GROUP 2 - Mechanic helper

GROUP 3 - Oilier-driver

GROUP 4 - Scaleman

GROUP 5 - Air compressor; Asphalt Plant Operator; Bulldozers, D-4 and equivalent 6 under; Bullfloats; Concrete Spreader; Finishing Machines; Concrete Mixer (16-s or less); Concrete Saw; Distributors (Mixer Surface); Dowel Bar Machine; Farm-type tractor (with all attachments except backhoe); Pileman; Fork Lifts (other than setting steel, machinery or pipe); Hoist, 4 drum or less than 4 stories; Kolum Huff Machine; Pull Cat; Pump (3 and over); Pump, concrete (under 6"); Rollers, except on asphalt or brick; Straddle Buckles; Sweepers (except 6" roads (motorized)); Winch Truck, A-Frame (other than handling steel or pipe)

GROUP 6 - Asphalt Spreader; Hackhoe, bulldozer, over D-4 and equivalent; Cableways; Concrete Mixer, over 16-s; Cranes; Derricks; Ditching or Trenching Machines (except lines); Fork Lifts (setting steel, machinery or pipe); Front-End Loaders (except Farm-type tractors); Grease Serviceman; Hoist, 1 drum, 4 stories or more; Hoist, 1 drum (40 feet or under on structures other than buildings); Hoist, 2 drums and over; Hydraulic; Heavy Duty Mechanic; Motor Patrols; Piledrivers; Pump, concrete (6" & over); Road Paver; Rollers on asphalt or brick; Scoopmobiles; Scrapers; Sideboom Cuts; Shovels; Tractorvators; Welder, Journeyman; Well Point System; Winch Cuts (hoisting); Winch Truck, A-Frame (handling steel or pipe)

POWER EQUIPMENT OPERATORS - ZONE 6

GROUP 1 - Snatch Cat; Pump, 3 inch suction or more

GROUP 2 - Pumps, under 3 inch suction; Mechanic Helper

GROUP 3 - Oilier

GROUP 4 - Hatch Plant Operator

GROUP 5 - Air Compressor; Asphalt Plant Engineer; Blade Grader; Distributor (Bitum Surface); Finishing Machine (Concrete, Paving); Hoist, 1 drum, less than 4 stories; Concrete Mixer under 16s; Oilier Driver; Pump Crane; Street and Road Sweeper; Roller (except on asphalt or brick); Roller, asphalt or brick (under 5 tons); Post-Hole Digger; Tractor operated Bush Hog and similar grass or brush cutting equipment

GROUP 6 - A-Frame Truck; Bulldozer, under 6; Crew Boat Operator; Fireman; Fork Lift; Straddle Buggy; Tractorvator, Scoopmobile and similar front-end loading equipment with Scoopmobile or Bucket under one (1) cubic yard capacity; Locomotive; Well Point System; Unit Operator; Hoist, 1 drum, 4 stories or over

GROUP 7 - Backhoe; Cableway; Concrete Mixer, 16s & up; Crane; Derrick; Dragline; Dredge; Equipment Maintenance Mechanic; Hoist, 2 drum; Locomotive Crane; Paving Mixer; Piledriver; Road Paver; Roller on Asphalt or Brick (5 tons & over); Shovel; Sideboom Cat; Bulldozer, 6 and over; Motor Patrol; Scraper; Hydraulic Crane; Hydro-Lift Truck; Yard Crane; Cherry Picker, etc.; Foundation Boring and Reaming Machine; Cement Stabilizer; Trenching Machine; Asphalt Spreader; Tractorvator and similar front-end loading equipment with scoop or bucket of one (1) cubic yard or more capacity; Tug Boat Operator; Turnpull; Euclid, D4-10 and other similar self-loading earth moving equipment; Concrete Pump (not Pump Crane)

POWER EQUIPMENT OPERATORS - ZONE 6 (CONT'D)

GROUP 8 - Crane Operator, 65 tons & over; Crane Operator, Room 100 feet & over; Piledriver Operator, Leads 100 feet & over

GROUP 9 - Crane Operator, 100 tons & over; Crane Operator, Room 150 feet & over; Piledriver Operator, Leads 150 feet & over

GROUP 10 - Crane Operator, Room 25 feet & over; Piledriver Operator, Leads over 250 feet

POWER EQUIPMENT OPERATORS - ZONE 7

GROUP 1 - Assistant Master Mechanic

GROUP 2 - Master Mechanic

GROUP 3 - Oilier

GROUP 4 - Batch Plant Operator; Mechanic Helpers; Oilers (Drivers)

GROUP 5 - A-Frame truck, except when working with ironworkers or pipefitters; Air Compressor; Asphalt Plant Engineer; Asphalt Finisher, Scraped Men; Blade Graders; Boat Operator; Bullfloats; Concrete Joining Machines; Concrete Mixers, 16s and under; Concrete Spreader; Crusher Operator; Deck Winch Operator (1); Distributors, asphalt "Pitch Witch" and similar equipment; Electric Elevators (inside); Finishing Machine; Fireman; Form Graders; Fork Lifts; Hoist, 1 drum, under 4 stories; Power Subgrader; Pup Mill Operators; Pull Tractors; Pump, Pump Crane; Rubber Tired Front End Loader, with or without attachments, 1 cu. yd. or without blade attachments) less than 1 cu. yd. capacity; Scale Operator; Scoopmobile; Snatch Cuts; Spray Machines; Stabilizers, less than 3 drums; Straddle-Buggy; Track Machines and equivalent Machines; Tractors or Bulldozers smaller than D-6

GROUP 6 - A-Frame Truck, when working with ironworkers and pipefitters; Bulldozers D-6 and larger; Cable Ways; Concrete Mixers, over 16-s paving machines; Cranes, Derricks; Draglines and Clam Shells; Deck Winches (2); Gradealls; Hi-Ho and similar type equipment; Hoist, 1 drum, 4 stories and over; Hoists, 2 drums or more; Hydro cranes; Mechanic; Motor Patrols; Piledrivers; Rollers on brick and asphalt; Rubber Tired Front End Loader, with or without attachments, 1 cu. yd. capacity or more; Scrapers; Shovels; Hackhoes (all types); Sideboom Cuts; Stabilizers, 3 drums or more; Tractorvators; Trenching Machines; Unit Operator; Welder, Journeyman; Well Point Systems (gas, diesel, electric, etc.); Concrete Pump/Room Combinations

ZONE 7		4.63			

CLASSIFICATION DEFINITIONS

- GROUP 1 - One ton and under; Warehouseman, material checker, receiving clerk, spotter and dumper
- GROUP 2 - One and one-half (1½) tons to and including two (2) tons (exclusive of dump trucks); truck mechanic helper
- GROUP 3 - Single axle dump trucks, single axle water trucks
- GROUP 4 - Heavy equipment, tandem axle dump and tandem axle water trucks, winch lift, transit mix, floats, pole trailers, four axle trailers and truck mechanics
- GROUP 5 - Special equipment, euclids and five axle moving equipment
- AREA COVERED BY TRUCK DRIVERS (HIGHWAY CONSTRUCTION) ZONES**
- ZONE 1 - Jefferson, Orleans, Plaquemines, St. Bernard & St. Charles Parishes
- ZONE 2 - East Baton Rouge Parish
- ZONE 3 - Bossier & Caddo Parishes
- ZONE 4 - Calcasieu Parish
- ZONE 5 - Lafayette, Ouachita & Rapides Parishes
- ZONE 6 - Acadia, Assumption, Bienville, Cameron, DeSoto, Iberia, Iberville, Jefferson Davis, Livingston, Red River, Richland, St. James, St. John the Baptist, St. Landry, St. Martin (north of Iberia Parish), St. Mary, St. Tammany, Vermilion, Washington, West River & West Baton Rouge Parishes
- ZONE 7 - Allen, Assumption, Avoyelles, Bossier, Calcasieu, Calumet, Claiborne, Concordia, East Carroll, East Feliciana, Evangeline, Franklin, Grant, Jackson, Lafayette, Lasalle, Lincoln, Madison, Morehouse, Natchitoches, Orleans, Ouachita, Sabine, St. Helena, St. Martin (south of Iberia Parish), Tensas, Terrebonne, Union, Vermilion, West Carroll, West Feliciana & Winn Parishes
- WELDERS - receive rate prescribed for craft performing operation to which welding is incidental

## CLASSIFICATIONS

**LABORERS:**  
**GROUP I** - Car loader, choker setter, concrete crewman, crushed feeder, demolition laborer (including salvaging all material, loading and cleaning up), wrecking, driller helper, dumpman, flagman, fence erector and installer (including installation and erection of fence, guard rails, median rails, reference posts, guide posts and right-of-way markers), form stripper, general laborer, railroad track laborer, riptap man, scale man, stake jumper, structure mover (includes foundation, separation, preparation, cribbing, shoring, jacking and unloading of structures), water nozzleman, timber bucket and filler, truck loader, water boys, tool room men  
**GROUP II** - Combined air and water nozzleman, cement handler, dope pot fireman (nonmechanical), form cleaning machine, mechanical railroad equipment (includes spilar, pulley, tie cleaner, tamper pipe wrapper, power driven wheelbarrow, operators of hand derricks, tomsters, scooters, buggymobiles and similar equipment), tamper or rammer operator, prestite scaffold builders over one tier high, power tool operator (gas, electric or pneumatic), sandblaster or gunnite tailhouse man, scaffold erector (steel or wood), vibrator operator (up to 4'), asphalt cutter, mortar men, shorer and laggers, creosote material handler, corrosive enamel or equal, paving breaker and jackhammer operators  
**GROUP III** - Multi-section pipe layer, non-metallic clay and concrete pipe layer (including caulker, collarman, joiner, rigger and jacker) thermite welder and corrugated metal culvert pipe layer  
**GROUP IV** - Asphalt block pneumatic cutter, asphalt roller, walking chain-saw with attachment, concrete saw (walking), high scalers, jackhammer (using over 6' of steel), vibrator (4' and over), well point installers, air-trac operator  
**GROUP V** - Asphalt screeder, big drills, cut of the hole drills (1 1/2 piston or larger) down the hole drills (3 1/2" piston or larger), gunnite or sandblaster nozzleman, asphalt taker, asphalt tamper, form setter, demolition torch operator, shotcrete nozzleman and potman  
**GROUP VI** - Powderman, marker form setters  
**GROUP VII** - Brick paver (asphalt block paver, asphalt block saw man, asphalt block grinder, hastings block or similar type)

## TUNNELS, RAISES AND SHAFTS - FREE AIR

**GROUP I**  
 Brakeman, bull gang, dumper, trackman, concrete man  
**GROUP II**  
 Chuck tender, powderman in prime house, form setters and movers, nippers, cableman, hoistman, groutman, bell or signalman, top or bottom vibrator operator, caulkers' helpers  
**GROUP III**  
 Miner, rodmn, re-bar underground, concrete or gunnite nozzleman, powderman, timberman and re-timberman, wood steel including liner plate or any other support, material, motorman, caulkers, diamond drill operators, riggers, cement finishers - underground, welders and burners, shield driver, air trac operator, shotcrete nozzleman and potman.  
**GROUP IV**  
 Trucking machine operator (air)

## LABORERS

(Clark, Esmeralda, Lincoln and Nye Counties)

Group 1: Debris Handler; Dry Packing of Concrete and Filling of Form-bolt  
Holes; Dumping; Gas and Oil Pipeline Laborers; Demolition Laborers; General  
or Construction Laborers; Spotter; Window Cleaner

Group 2: Gutting Torch Op. (Demolition); Tarman and Motorman.

Group 3: Guinea Chaser

Group 4: Fine Grader, highway and street paving, airport, runways and similar  
type heavy construction; Landscape Gardener and Nursery-Man

Group 5: Laborers - packing rod steel and pans

Group 6: Underground Laborer including caisson bellowers

Group 7: Chucktender (except tunnels); Scaler; Septic Tank Digger and  
Installer (lead man); Tank Scaler and Cleaner

Group 8: Cesspool Digger and Installer

Group 9: Concrete Curer-impervious membrane and Oilier of all materials; Making  
and caulking of all non-metallic pipe joints; Riprap Stonepaver; Sandblaster  
(pot tender)

Group 10: Asphalt Ironer, Raker, Spreader; Buggy-Mobile Man; Cement Dumper (on  
1 yd. or larger mixers and handling bulk concrete); Cement Grinding Machine Op.;  
Concrete Core Cutter; Concrete Saw Man, excluding tractor type; Gas and Oil Pipe-  
line Wrapper Pot Tender and Form Man; Tree Climber, faller, chain saw operator;  
Pittsburgh Chipper and similar type; Vibrators and all pneumatic gas, electric,  
and similar mechanical tools not separately classified herein; Roto Scraper

Group 11: Rock Slinger; Scaler, using bosun chair, safety belt or power tools

Group 12: Driller and/or Pavement Breaker

Group 13: Laying of all Non-metallic Pipe (including sewer pipe, drain pipe and  
underground tile)

Group 14: Gas and Oil Pipeline Wrapper - 6 inch pipe and over

POWER EQUIPMENT OPERATORS (Cont'd)  
(Except Piledriving and Steel Erection)  
(Remaining Counties)

GROUP 11: Automatic Asphalt or Concrete Slip Form Paver; Automatic  
cranes (over 25 tons); Highline cableway operator; Loader (over 4 yds.  
up to and including 12 cu. yds.); Multi-engine earthmoving equipment  
(up to and including 75 cu. yds.); "struck" M.R.C.; Power shovels, clam-  
shells, draglines, Backhoes, Grade-allis (over 1 yd. and up to and  
including 7 cu. yds. M.R.C.); Self-propelled compactor (with multiple  
propulsion power units); Single engine rubber tired earth-moving  
machine (with tandem scraper); Slip form paver (concrete or asphalt);  
Tandem cats and scrapers; Tower crane mobile; Universal Liebherr and  
Tower cranes (and similar types); Wheel excavator (up to and including  
750 cu. yds. per hour); Whirley cranes (over 25 tons)

GROUP 11-A: Band Wagons (in conjunction with wheel excavators); Loader  
(over 12 cu. yds.); Multi-engine earth moving equipment (over 75 cu.  
yds. "struck" M.R.C.); Operator of helicopter (when used in construc-  
tion work); Power shovels and Draglines (over 7 cu. yds. M.R.C.); Remote  
controlled earth moving equipment; Wheel excavator (over 750 cu. yds.  
per hour)

NEVADA AREA DEFINITIONS FOR POWER EQUIPMENT OPERATORS  
(Remaining Counties)

AREA 2: All areas not included within Area 1 as defined below.  
AREA 1: All of Northern Nevada within the following lines:

Commencing at the N.W. corner of township 22N, range 18E, Mount Diablo  
Baseline and Meridian at the California-Nevada border;  
Thence Easterly to the N.E. corner of township 22N, range 22E;  
Thence Southerly to the N.E. corner of township 20N, range 22E;  
Thence Southerly to the N.W. corner of township 20N, range 26E;  
Thence Northerly to the N.W. corner of township 22N, range 29E;  
Thence Northerly to the N.W. corner of township 22N, range 29E;  
Thence Northerly to the N.W. corner of township 30N, range 29E;  
Thence Easterly to the N.E. corner of township 30N, range 33E;  
Thence Southerly to the S.E. corner of township 24N, range 33E;  
Thence Southerly to the S.E. corner of township 24N, range 31E;  
Thence Southerly to the S.E. corner of township 16N, range 31E;  
Thence Southerly to the S.E. corner of township 16N, range 30E;  
Thence Southerly to the S.E. corner of township 15N, range 30E;  
Thence Southerly to the S.E. corner of township 15N, range 27E;  
Thence Southerly to the S.E. corner of township 14N, range 27E;  
Thence Southerly to the S.E. corner of township 13N, range 23E;  
Thence Southerly to the S.E. corner of township 13N, range 22E;  
Thence Southerly to the N.E. corner of township 10N, range 22E;  
Thence Southerly to the N.E. corner of township 10N, range 23E;  
Thence Southerly along the Easterly line of range 23E to the  
intersection of the California-Nevada border;  
Thence North-Westerly, then Northerly following the California-  
Nevada border to the point of beginning.

Area 1 also includes that portion of Northern Nevada included within the  
following line:

Commencing at the S.W. corner of township 37N, range 52E;  
Thence Easterly to the S.E. corner of township 37N, range 52E;  
Thence Northerly to the N.E. corner of township 37N, range 58E;  
Thence Easterly to the N.W. corner of township 37N, range 58E;  
Thence Southerly to the S.W. corner of township 37N, range 58E;  
Thence Easterly to the S.E. corner of township 37N, range 58E;  
Thence Southerly to the N.W. corner of township 31N, range 58E;  
Thence Southerly to the N.W. corner of township 31N, range 58E;  
Thence Southerly to the S.W. corner of township 31N, range 58E;  
Thence Northerly to the N.E. corner of township 31N, range 52E;  
Thence Northerly to the S.E. corner of township 32N, range 51E;  
Thence Northerly to the point of beginning.

TRUCK DRIVERS' CLASSIFICATION DEFINITION AND AREA COVERED (cont'd)

ZONE 3 (Cont'd)

CLASS IX - Earth Moving Equipment over 35 Ton (Belly Dump, Side Dump, End Dump, etc.)

CLASS X - A-Frame and Winch Trucks (when used for hauling material on bed of truck)

CLASS XI - Distributor Truck (Oil, Tar, Asphalt, etc.)

ZONE 4

CLASS I - Truck Drivers

WELDERS - receive rate prescribed for craft performing operation to which welding is incidental.

NOTICES

PAID HOLIDAYS:  
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:

a. Holidays A through F, plus Washington's Birthday and Good Friday, providing the employee has worked 45 full days for the employer during the 120 days prior to the holiday, and is available for work the day preceding and following the holiday.

b. Paid Holidays: Labor Day, provided the employee has worked six calendar months and appears on the payroll during the pay period in which the holiday occur.

c. \$59.90 per month

d. \$14.00 per week

e. Paid Holidays: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, Christmas Day and Veterans Day and Good Friday, provided the employee is available for work the day before and the day after the holiday and has been employed by the employer a minimum of 40 hours each calendar month for two consecutive months.

f. Employer contributes \$69.94 per month to a Health and Welfare Fund.

g. Employer contributes \$14.00 per week.

h. One(1) week vacation after one year's work; two(2) week vacation after five(5) years of service.

## CLASSIFICATIONS

LABORERS:

GROUP I - Carloader, choker setter, concrete crewman, crushed feeder, demolition laborer (including salvaging all material, loading and cleaning up), wrecking, drillier helper, dumpman, flagman, fence erector and installer (including installation and erection of fence, guard rails, median rails, reference posts, guide posts and right-of-way markers), form stripper, general laborers, railroad track laborer, riprap man, scale man, stake jumper, structure mover (includes foundation, separation, preparation, cribbing, shoring, jacking and unloading of structures), water nozzleman, timber buckler and faller, truck loader, water boys, tool room man

GROUP II - Combined air and water nozzleman, cement handler, dope pot firman (nonmechanical), form cleaning machine, mechanical railroad equipment (includes spikes, pulley, tie cleaner, tamper pipe wrapper, power driven wheelbarrow, operators of hand derricks, towmasters, scooters, buggies, automobiles and similar equipment), tamper or rammer operator, trestle scaffold builders over one tier high, power tool operator (gas, electric or pneumatic), sandblast or gunnite tailpiece man, scaffold erector (steel or wood), vibrator operator (up to 4'), asphalt cutter, mortar men, shorer and lagger, concrete material handler, corrosive enamel or equal, paving breaker and jackhammer operators

GROUP III - Multi-section pipe layer, non-metallic clay and concrete pipe layer (including caulker, collarman, joiner, rigger and jacker) thermite welder and corrugated metal culvert pipe layer

GROUP IV - Asphalt block pneumatic cutter, asphalt roller, walking chain-saw with attachment, concrete saw (walking), high scalers, jackhammer (using over 6' of steel), vibrator (4' and over), well point installer, air-trac operator

GROUP V - Asphalt screeder, big drills, cut of the hole drills (1 1/2 piston or larger) down the hole drills (3 1/2" piston or larger), gunnite or sandblaster nozzleman, asphalt raker, asphalt tamper, form setter, demolition torch operator, shotcrete nozzleman and porman

GROUP VI - Powderman, master form setter

GROUP VII - Brick paver (asphalt block paver, asphalt block saw man, asphalt block grinder; Hastings block or similar type)

GROUP VIII - Miners

# reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

## Rules Going Into Effect May 22, 1976

DOT/CG—Site evaluation of potential offshore oil port location and related onshore terminal facilities..... 16799; 4-22-76  
FAA—Agricultural aircraft operations; clarification of aircraft inspection requirements ..... 16796; 4-22-76  
USDA/AMS—U.S. standards for grades of frozen field peas and frozen black-eye peas ..... 16811; 4-22-76

## List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

## AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

Ten agencies have agreed to a six-month trial period based on the assignment of two days a week beginning February 9 and ending August 6 (See 41 FR 5453). The participating agencies and the days assigned are as follows:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
	CSC			CSC
	LABOR			LABOR

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this trial program are invited. Comments should be submitted to the Director of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

**ATTENTION:** Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202-523-5284. For information on obtaining extra copies, please call 202-523-5240. To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202-523-5022.

federal register

Phone 523-5240  
Area Code 202

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

## HIGHLIGHTS—Continued

### FEDERAL SAVINGS AND LOAN SYSTEM

FHLBB adopts amendment on withdrawals and transfers through automated clearinghouses; effective 6-25-76.... 21180

### MEETINGS—

Commerce/DIBA: Computer Systems Technical Advisory Committee, Hardware Subcommittee, 7-16-76 ..... 21211  
Computer Systems Technical Advisory Committee, Technology Transfer Subcommittee, 7-15-76 ..... 21211  
DOD/Army: Army Financial Management Advisory Committee, 6-15 and 6-16-76..... 21208  
DOT/FRA: Railroad Operating Rules Advisory Committee, 6-8 and 6-9-76..... 21216  
FS: Samuel R. McKelvie National Forest Livestock Advisory Board, 6-5-76..... 21209  
HEW/OE: National Advisory Council on Adult Education, Program Planning and Development Committee, 6-11-76..... 21214  
Interior: National Petroleum Council, Future Energy Prospects Committee, 6-11-76..... 21229  
National Advisory Council on Economic Opportunity: 6-17, 6-18, and possibly 6-19-76..... 21224  
NSF: Advisory Panel for Economics, 6-10 and 6-11-76 ..... 21228  
Advisory Group on Contributions of Technology to Economic Strength, Regulation Subgroup, 6-11-76 ..... 21228

State: Shipping Coordinating Committee, Subcommittee on Safety of Life at Sea (3 documents), 6-15, 6-16, and 6-17-76..... 21207  
USDA/AMS: Shipper's Advisory Committee on Oranges, Grapefruit, Tangerines, and Tangelos grown in Florida, 6-8-76 ..... 21209  
VA: Station Committee on Educational Allowances, 6-17-76 ..... 21228

### POSTPONED MEETING—

DOT/NHTSA: Effect of catalytic converters on motor vehicle safety, originally scheduled for 5-26-76, indefinitely postponed..... 21217

### PART II:

#### HEAVY DUTY ENGINES

EPA proposes revised air pollution standards for 1979 and later model years; comments by 8-23-76..... 21291

### PART III:

#### DOMESTIC CRUDE OIL ALLOCATION PROGRAM

FEA publishes March 1976 entitlement list..... 21315

### PART IV:

#### PRIVACY ACT OF 1974

HEW publishes additions to systems of records..... 21319

## contents

### THE PRESIDENT

Memorandums  
Bangladesh; sale of agricultural commodities ..... 21171  
Egypt; sale of wheat and wheat flour ..... 21168  
Morocco; sale of wheat and wheat flour ..... 21168  
Portugal; sale of agricultural commodities ..... 21170  
Portugal; sale of rice ..... 21167

Antidumping:  
Power transformers from Italy --- 21208  
Turners from Japan --- 21207

## VETERANS ADMINISTRATION

### Rules

Authority to bar advance payments --- 21190

### Notices

Meetings:  
Station Committee on Educational Allowances --- 21228

list of cfr parts affected in this issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month. A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

## Title 3—The President

Memorandum of February 3, 1976

**Finding and Determination Under Section 103(d)(3) of the Agricultural Trade Development and Assistance Act of 1954, as Amended—Portugal**

[Presidential Determination No. 76-7]

Memorandum for the Secretary of State, the Secretary of Agriculture

THE WHITE HOUSE,  
Washington, February 3, 1976.

Pursuant to the authority vested in me under the Agricultural Trade Development and Assistance Act of 1954, as amended (hereinafter "the Act"), I hereby:

Find, pursuant to Section 103(d)(3) of the Act, that the making of an agreement with the Government of Portugal for the sale, under Title I of the Act, of 50 thousand metric tons of rice is in the national interest of the United States.

This Determination shall be published in the FEDERAL REGISTER.

*Gerald R. Ford*

STATEMENT OF REASONS THAT A SALE TO PORTUGAL UNDER TITLE I OF THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954, AS AMENDED (PUBLIC LAW 480), IS IN THE NATIONAL INTEREST

In response to current Portuguese food import needs, it is proposed to export to that country 50 thousand metric tons of rice financed under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (P.L. 480).

The United States has consistently supported the efforts of the moderate Pinheiro Azevedo government to restore political stability to Portugal. Beset with enormous economic problems, exacerbated by the influx of more than 300,000 refugees, Portugal needs urgent economic assistance. Concessional sales of agricultural commodities to Portugal will constitute a tangible demonstration of our willingness to help provide this assistance.

Portuguese nationalized firms exported to Cuba in 1975, and it is likely they will do so again this year. Therefore, in order to enter into an agreement with the Government of Portugal for such a sale under Title I, it is necessary that the President find and determine that such sales would be in the national interest of the United States. Section 103(d)(3) of P.L. 480 prohibits the sale of agricultural commodities under Title I of the Act to any nation which sells or furnishes or permits ships or aircraft under its registry to transport to or from Cuba or North Vietnam any equipment, materials, or commodities, so long as those countries are governed by Communist regimes. However, under Section 103(d)(3), as amended by Section 203 of P.L. 94-161, the President is authorized to waive this prohibition "if he determines that such a waiver is in the national interest."

The considerations noted above make the proposed sale important to the national interest of the United States.

Memorandum of February 17, 1976

**Finding and Determination Under Section 103(d)(3) of the Agricultural Trade Development and Assistance Act of 1954, as Amended—Morocco**

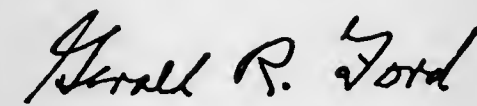

[Presidential Determination No. 76-8]

Memorandum for the Secretary of State, the Secretary of Agriculture

THE WHITE HOUSE,  
Washington, February 17, 1976.

Pursuant to the authority vested in me under the Agricultural Trade Development and Assistance Act of 1954, as amended (hereinafter "the Act"), I hereby:

Determine, pursuant to Section 103(d)(3) of the Act, that the making of an agreement with the Government of Morocco for the sale, under Title I of the Act, of 100 thousand metric tons of wheat/wheat flour (wheat grain equivalent) is in the national interest of the United States.

STATEMENT OF REASONS THAT A SALE TO MOROCCO UNDER TITLE I OF THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954, AS AMENDED (PUBLIC LAW 480), IS IN THE NATIONAL INTEREST

In response to current Moroccan needs, it is proposed to export to that country 100 thousand metric tons of wheat/wheat flour (wheat grain equivalent) financed under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (P.L. 480).

The United States and Morocco have traditionally enjoyed cordial relations. The strategic importance of Morocco is evident from its geographical position at the entrance to the Mediterranean along the Atlantic. The Government of Morocco is stable and moderate and in international fora exercises a positive influence on other non-aligned Arab and African states. This year Morocco has a much larger than usual food import requirement due to a severe drought which adversely affected domestic grain production. A concessional wheat sale will help Morocco cover its grain shortfall without excessively overburdening its foreign exchange reserves and will demonstrate U.S. support for this moderate and friendly country.

Foreign trade statistics indicate Morocco is exporting substantial quantities of phosphate to Cuba through a state-owned corporation. Therefore, in order to enter into an agreement with the Government of Morocco for such a sale under Title I, it is necessary that the President find and determine that such sale would be in the national interest of the United States. Section 103(d)(3) of P.L. 480 prohibits the sale of agricultural commodities under Title I of the Act to any nation which sells or furnishes or permits ships or aircraft under its registry to transport to or from Cuba or North Vietnam any equipment, materials, or commodities, so long as those countries are governed by Communist regimes. However, under Section 103(d)(3), as amended by Section 203 of P.L. 94-161, the President is authorized to waive this prohibition "if he determines that such a waiver is in the national interest."

The considerations noted above make the proposed sale important to the national interest of the United States.

[FR Doc.76-15226 Filed 5-20-76;3:52 pm]

Memorandum of March 2, 1976

**Determination Under Section 103(d)(3) and (4) of the Agricultural Trade Development and Assistance Act of 1954, as Amended—Egypt**

[Presidential Determination No. 76-9]

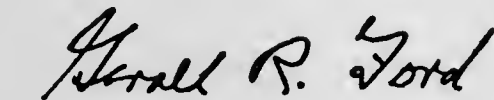

Memorandum for the Secretary of State, the Secretary of Agriculture

THE WHITE HOUSE,  
Washington, March 2, 1976.

Pursuant to the authority vested in me under the Agricultural Trade Development and Assistance Act of 1954, as amended (hereinafter "the Act"), I hereby:

(a) Determine, pursuant to Section 103(d)(3) of the Act, that the making of an agreement with the Government of Egypt for the sale, under Title I of the Act, of 500,000 metric tons of wheat/wheat flour (wheat grain equivalent) is in the national interest of the United States; and

(b) Determine, pursuant to Section 103(d)(4) of the Act, that the sale to Egypt of 500,000 metric tons wheat/wheat flour is in the national interest of the United States.

STATEMENT OF REASONS THAT SALES UNDER TITLE I OF THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954, AS AMENDED (PUBLIC LAW 480) TO EGYPT ARE IN THE NATIONAL INTEREST

In response to current Egyptian needs, it is proposed to export to that country 500,000 metric tons of wheat/wheat flour (wheat grain equivalent) under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (P.L. 480). Added to a previous allocation, the total amount of wheat/wheat flour (wheat grain equivalent) provided to Egypt under Title I in FY-1976 will be one million metric tons. This amount is based on Egypt's needs for not more than one fiscal year.

Egypt continues to be central to our efforts to achieve a just and lasting peace in the Middle East. Our ultimate success will depend in part on Egyptian confidence in our intention to develop a broad and constructive bilateral relationship with that country. Continuation of a program for concessional sales of agricultural commodities to Egypt will constitute a tangible demonstration of our intended role.

In order to enter into an agreement with the Government of Egypt for such sales under Title I, it is necessary that the President determine that such sales would be in the national interest of the United States. Section 103(d)(3) of P.L. 480 prohibits the sale of agricultural commodities under Title I of the Act to any nation which sells or furnishes or permits ship or aircraft under its registry to transport to or from Cuba or North Vietnam any equipment, materials, or commodities (so long as those countries are governed by Communist regimes). Egyptian governmental entities maintain trade with Cuba. However, under Section 103(d)(3), as amended by Section 203 of P.L. 94-161, the President is authorized to waive this prohibition if he determines that such a waiver is in the national interest. Section 103(d)(4) specifically prohibits sales of commodities under Title I to Egypt unless the President determines such sales are in the national interest of the United States.

The considerations noted above make the proposed sales important to the national interest of the United States.

Memorandum of April 27, 1976

**Determination Under Section 103(d)(3) of the Agricultural Trade Development and Assistance Act of 1954, as Amended (Public Law 480)—Portugal**

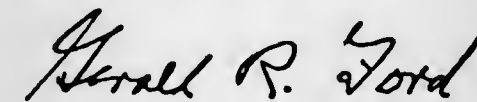

[Presidential Determination No. 76-13]

Memorandum for the Secretary of State, the Secretary of Agriculture

THE WHITE HOUSE,  
Washington, April 27, 1976.

Pursuant to the authority vested in me under the Agricultural Trade Development and Assistance Act of 1954, as amended (hereinafter "the Act"), I hereby:

Determine that for Portugal the waiver of the exclusion provided for by Section 103(d)(3) of the Act, for the purpose of selling up to \$5 million of agricultural commodities under Title I, is in the national interest of the United States.

STATEMENT OF REASONS THAT A WAIVER UNDER SECTION 103(d)(3) OF THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954, AS AMENDED (PUBLIC LAW 480), IS IN THE NATIONAL INTEREST

In response to current Portuguese import needs, it is proposed to export to that country an additional five million dollars of agricultural commodities bringing the total assistance provided in fiscal year 1976 under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (P.L. 480) to \$20 million.

The United States has consistently supported the efforts of the moderate Pinheiro Azevedo government to restore political stability to Portugal. Beset with enormous economic problems, exacerbated by the influx of thousands of refugees, Portugal needs urgent economic assistance. Concessional sales of agricultural commodities to Portugal constitute a tangible demonstration of our willingness to help provide this assistance.

Portuguese nationalized firms exported to Cuba in 1975, and it is likely they will do so again this year. Therefore, in order to enter into an agreement with the Government of Portugal for such a sale under Title I, it is necessary that the President determine that such sales to Portugal would be in the national interest of the United States. Section 103(d)(3) of P.L. 480 prohibits the sale of agricultural commodities under Title I of the Act to any nation which sells or furnishes or permits ships or aircraft under its registry to transport to or from Cuba or North Vietnam any equipment, materials or commodities, so long as those countries are governed by Communist regimes. However, under Section 103(d)(3), as amended by Section 203 of P.L. 94-161, the President is authorized to waive this prohibition "if he determines that such a waiver is in the national interest."

The considerations noted above make the proposed sale of agricultural commodities to Portugal and the necessary waiver important to the national interest of the United States.

[FR Doc.76-15228 Filed 5-20-76;3:53 pm]

Memorandum of May 10, 1976

**Determination Under Section 103(d)(3) of the Agricultural Trade Development and Assistance Act of 1954, as Amended (Public Law 480)—Bangladesh**

[Presidential Determination No. 76-14]

Memorandum for the Secretary of State, the Secretary of Agriculture

THE WHITE HOUSE,  
Washington, May 10, 1976.

Pursuant to the authority vested in me by Section 103(d)(3) of the Agricultural Trade Development and Assistance Act of 1954, as amended (hereinafter "the Act"), I hereby determine that the waiver of the exclusion of the Government of Bangladesh from the definition of "friendly country" for the purpose of agricultural commodity sales to it under Title I of the Act is in the national interest of the United States and I do hereby waive such exclusion.

STATEMENT OF REASONS THAT A WAIVER FOR BANGLADESH UNDER SECTION 103(d)(3) OF THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954, AS AMENDED (PUBLIC LAW 480), IS IN THE NATIONAL INTEREST

In response to Bangladesh needs, the United States is providing agricultural commodities under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (Public Law 480). Current Title I allocations for Bangladesh for FY 1976 include 550,000 metric tons of wheat, 240,000 metric tons of rice, and 40,000 metric tons of edible oil.

Bangladesh is one of the world's poorest and least developed countries. Since Bangladesh's independence, the United States has joined other donor countries in helping Bangladesh deal with its development problems, particularly in promoting social and economic progress for all Bengalees. The Bengalee foodgrain import requirement has averaged about 2 million tons per year, and food has constituted a significant element of the Aid Group's assistance. In the short term, food assistance is necessary in order to reduce malnutrition and starvation and to contribute toward economic development. The food assistance donors are working with the Bangladesh Government in directing food assistance to uses that foster development as well as meeting essential requirements. In particular, programs are being carried out in which food assistance would 1) support increased domestic agricultural production and 2) contribute to the building of an adequate national food reserve system.

Bangladesh has meager financial resources. Jute exports are its major foreign exchange earner. The Government is seeking new and larger outlets for jute and may renew its exports to Cuba, a substantial potential market for jute exports. Restrictions in Section 103(d)(3) of PL 480, would bar Title I food assistance for Bangladesh should it again begin exporting goods to Cuba, unless such restrictions are waived by the President. This Section of Public Law 480 prohibits, inter alia, the sale of agricultural commodities under Title I of the Act to any nation which sells or furnishes or permits ships or aircraft under its registry to transport to or from Cuba or North Vietnam any equipment, materials, or commodities, so long as those countries are governed by Communist regimes. However, under Section 103(d)(3), as amended by Section 203 of Public Law 94-161, the President is authorized to waive this prohibition if he determines that such a waiver is in the national interest.

In light of the above considerations it is in the national interest not to exclude Bangladesh from concessional sales under PL 480.

Memorandum of May 10, 1976

**Determination Under Section 103(d)(3) of the Agricultural Trade Development and Assistance Act of 1954, as Amended (Public Law 480)—Syria**

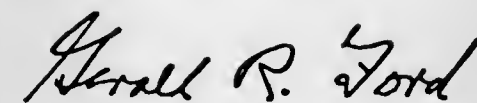

[Presidential Determination No. 76-15]

Memorandum for the Secretary of State, the Secretary of Agriculture

THE WHITE HOUSE,  
Washington, May 10, 1976.

Pursuant to the authority vested in me under the Agricultural Trade Development and Assistance Act of 1954, as amended (hereinafter "the Act"), I hereby:

Determine that for Syria the waiver of the exclusion provided for by Section 103(d)(3) of the Act, for the purpose of selling up to \$4.3 million of agricultural commodities within the previously approved program of \$19.2 million, is in the national interest of the United States and I do hereby waive such exclusion.

STATEMENT OF REASONS THAT A WAIVER UNDER SECTION 103(d)(3) OF THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954, AS AMENDED (PUBLIC LAW 480), IS IN THE NATIONAL INTEREST

Syria is a key to our efforts to achieve a just and lasting peace in the Middle East. Our success will depend in part on Syrian confidence in our intention to develop a broad and constructive bilateral relationship with that country. Concessional sales of agricultural commodities to Syria constitute a tangible demonstration of our intended role in that regard.

Section 103(d)(3) of P.L. 480 excludes from eligibility for concessional sales under Title I any country which sells or furnishes or permits ships or aircraft under its registry to transport to or from Cuba or North Vietnam any equipment, materials, or commodities, so long as those countries are governed by Communist regimes. Syria has been trading with Cuba in recent years. However, under Section 103(d)(3), as amended by Section 203 of P.L. 94-161, the President is authorized to waive this exclusion if he determines that such a waiver is in the national interest.

The considerations noted above make the proposed sales of agricultural commodities to Syria and the necessary waiver important to the national interest of the United States.

[FR Doc.76-15230 Filed 5-20-76;3:54 pm]

## rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

## Title 7—Agriculture

**CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE**

[Navel Orange Regulation 380, Amendment 1]

**PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA**

## Limitation of Handling

This regulation increases the quantity of California-Arizona Navel oranges that may be shipped to fresh market during the weekly regulation period May 14-20, 1976. The quantity that may be shipped is increased due to improved market conditions for Navel oranges. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 907.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 901), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for an increase in the quantity of oranges available for handling during the current week results from changes that have taken place in the marketing situation since the issuance of Navel Orange Regulation 380 (41 F.R. 19647). The marketing picture now indicates that there is a greater demand for Navel oranges than existed when the regulation was made effective. Therefore, in order to provide an opportunity for handlers to handle a sufficient volume of Navel oranges to fill the current market demand thereby making a greater quantity of Navel oranges available to meet such increased demand, the regulation should be amended, as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5

U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of Navel oranges grown in Arizona and designated part of California.

(b) *Order, as amended.* The provisions in paragraph (b)(1)(i) of § 907.680 (Navel Orange Regulation 380 (41 F.R. 19647)) are hereby amended to read as follows: "(i) District 1: 1,200,000 cartons;"

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: May 19, 1976.

CHARLES R. BRADER,  
Deputy Director, Fruit and  
Vegetable Division, Agricultural  
Marketing Service.

[FR Doc.76-15064 Filed 5-21-76;8:45 am]

[Plum Regulation 12]

**PART 917—FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA**

## Regulation by Grades and Sizes

This regulation, effective during the period June 1 through July 20, 1976, requires that California plums grade U.S. No. 1 grade except that additional tolerances for defects not considered serious, including healed cracks, and gum spots, are permitted for specified varieties. It also establishes minimum size requirements for certain specified varieties in terms of the maximum permissible number of plums in an eight-pound sample. This action is necessary to assure that the plums shipped will be of suitable quality and size in the interest of consumers and producers.

*Findings.* (1) Pursuant to the amended marketing agreement and Order No. 917, as amended (7 CFR Part 917; 41 F.R. 17528), regulating the handling of fresh pears, plums, and peaches grown in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations of the Plum Commodity Committee, established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that regulation of shipments of plums, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) This regulation is based upon an appraisal of the current and prospective market conditions for California plums. The committee estimates that 9,317,000

packages of plums will be available for shipment in the 1976 season compared to actual shipment of 8,800,000 packages last season. Industry reports indicate that 1976 shipments of fresh California peaches will total 9,655,000 packages, 657,000 packages more than last year. California nectarine shipments during 1976 are estimated at 9,957,000 packages, 362,000 packages more than last year. Such peaches and nectarines provide strong competition to California fresh plums. The grade and size requirements hereinafter set forth are necessary to prevent the handling of California plums of a lower grade or smaller size than specified herein for such plums so as to provide good-quality fruit in the interest of producers and consumers pursuant to the declared policy of the act.

(3) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that, as hereinafter set forth, the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective not later than June 1, 1976. A reasonable determination as to the supply of, and the demand for, such plums, which are currently regulated pursuant to Plum Regulation 11 (40 F.R. 22534, 28601) must await the development of the crop thereof, and adequate information thereon was not available to the Plum Commodity Committee until April 30, 1976, on which date an open meeting was held, after giving due notice thereof, to consider the need for, and the extent of, regulation of shipments of such plums. Interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified was promptly submitted to the Department on May 3, 1976; shipments of the current crop of such plums are expected to begin on or about the effective date hereof; this regulation should be applicable to all such shipments during the period hereinafter specified in order to effectuate the declared policy of the act; the provisions of this regulation are identical with the aforesaid recommendation of the committee; information concerning such

provisions and effective time has been disseminated among handlers of such plums; and compliance with the provisions of this regulation will not require of handlers any preparation therefor which cannot be completed by the effective time hereof.

#### § 917.441 Plum Regulation 12.

Order. (a) During the period June 1, 1976, through July 20, 1976, no handler shall ship any lot of packages or containers of any plums, other than the varieties named in paragraph (b) hereof, unless such plums grade at least U.S. No. 1.

(b) During the period June 1, 1976, through July 20, 1976, no handler shall ship:

(1) Any lot of packages or containers of Tragedy or Kelsey plums unless such plums grade U.S. No. 1, with a total tolerance of 10 percent for defects not considered serious damage in addition to the tolerances permitted by such grade; or

(2) Any lot of packages or containers of Angeleno, Andy's Pride, Bee Gee, Casselman, Empress, Fresno Rosa, Grand Rosa, Improved Late Santa Rosa, Late Santa Rosa, Linda Rosa, Red Rosa, Rosa Grande, Roysum, and Swail Rosa plums unless such plums grade U.S. No. 1, except that healed cracks emanating from the stem end which do not cause serious damage shall not be considered as a grade defect with respect to such grade; or

(3) Any lot of packages or other containers of Late Tragedy plums unless such plums grade U.S. No. 1, except that gum spots which do not cause serious damage shall not be considered as a grade defect with respect to such grade.

(c) During the period June 1, 1976, through July 20, 1976, no handler shall ship any package or other container of any variety of plums listed in Column A of the following Table I unless such plums are of a size that an eight-pound sample, representative of the sizes of the plums in the package or container, contains not more than the number of plums listed for the variety in Column B of said table.

(d) When used herein, "U.S. No. 1" and "serious damage" shall have the same meaning as set forth in the United States Standards for Fresh Plums and Prunes (7 CFR 51.1520-1538); and all other terms shall have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated, May 18, 1976, to become effective June 1, 1976.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.76-15066 Filed 5-21-76; 8:45 am]

[Avocado Reg. 24]

### PART 944—FRUITS; IMPORT REGULATIONS Avocados

Avocado Regulation 24 prescribes during the period May 31, 1976, through April 30, 1977, the same grade requirement for imported avocados as that applicable, pursuant to Order No. 915 (7 CFR Part 915), to avocados grown in South Florida. The maturity regulation applies the same minimum size or weight requirements to imported avocados of the Pollock, Catalina, and Trapp varieties as are applicable to Florida avocados of the same varieties. All other imported avocados are required to meet minimum size or weight requirements comparable to those for similar types grown in Florida as variations in characteristics make application of identical requirements impractical. This import regulation is effective pursuant to section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

On April 27, 1976, notice of proposed rulemaking was published in the FEDERAL REGISTER (41 F.R. 17558) inviting written comments for consideration in connection with a proposed regulation which would establish requirements for importation of avocados into the United States, during the period May 31, 1976, through April 30, 1977, pursuant to Part 944—Fruits; Import Regulations (7 CFR Part 944). None were received.

It is hereby found that good cause exists for not postponing the effective time of the regulatory provisions of this regulation, as hereinafter set forth, beyond that hereinafter specified (5 U.S.C. 553) in that (a) the requirements of this import regulation are imposed pursuant to section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), which makes such requirements mandatory; (b) such regulation imposes the same grade and comparable maturity requirements on imports of avocados as are being made applicable to the shipment of avocados grown in Florida under Avocado Regulation 18, which becomes effective May 31, 1976; (c) such domestic and import regulations should become effective at as near the same time as is reasonably practicable; (d) notice hereof in excess of three days, the minimum prescribed by said section 8e, is given with respect to this import regulation; and (e) such notice is hereby determined, under the circumstances, to be reasonable.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, and other available information, it is hereby found that the grade, size, and maturity restrictions that are the same as or are comparable to those to be in effect pursuant to the said amended marketing order shall apply to avocados to be imported.

#### § 944.16 Avocado Regulation 24.

(a) On and after the effective time of this section, the importation into the United States of any avocados is prohibited unless such avocados are inspected and meet the following requirements:

(1) All avocados imported during the period May 31, 1976, through April 30, 1977, shall grade not less than U.S. No. 3.

(2) Avocados of the Pollock variety shall not be imported (i) prior to July 5, 1976; (ii) from July 5, 1976, through July 18, 1976, unless the individual fruit in each lot of such avocados weighs at least 18 ounces or measures at least 3 3/8 inches in diameter; and (iii) from July 19, 1976, through August 1, 1976, unless the individual fruit in each lot of such avocados weighs at least 16 ounces or measures at least 3 3/8 inches in diameter.

(3) Avocados of the Catalina variety shall not be imported (i) prior to September 13, 1976; (ii) from September 13, 1976, through September 19, 1976, unless the individual fruit in each lot of such avocados weighs at least 24 ounces; and (iii) from September 20, 1976, through October 3, 1976, unless the individual fruit in each lot of such avocados weighs at least 22 ounces.

(4) Avocados of the Trapp variety shall not be imported (i) prior to August 16, 1976; (ii) from August 16, 1976, through August 29, 1976, unless the individual fruit in each lot of such avocados weighs at least 14 ounces or measures at least 3 3/8 inches in diameter; and (iii) from August 30, 1976, through September 12, 1976, unless the individual

fruit in each lot of such avocados weighs at least 12 ounces or measures at least 3 3/8 inches in diameter.

(5) Avocados of any variety other than Pollock, Catalina, and Trapp varieties, of the West Indian varieties not listed elsewhere in this regulation, shall not be imported (i) prior to July 5, 1976; (ii) from July 5, 1976, through August 1, 1976, unless the individual fruit in each lot of such avocados weighs at least 18 ounces; (iii) from August 2, 1976, through September 5, 1976, unless the individual fruit in each lot of such avocados weighs at least 16 ounces; (iv) from September 6, 1976, through October 3, 1976, unless the individual fruit in each lot of such avocados weighs at least 14 ounces; *Provided*, That any lot of such avocados may be imported without regard to the date or minimum weight requirements of this paragraph if such avocados, when mature, normally change color to any shade of red or purple and any portion of the skin of the individual fruit has changed to the color normal for that fruit when mature.

(6) Avocados of any variety of the Guatemalan type, including hybrid type seedlings, unidentified Guatemalan and hybrid varieties, and Guatemalan and hybrid varieties not listed elsewhere in the regulation shall not be imported (i) prior to September 20, 1976; (ii) from September 20, 1976, through October 17, 1976, unless the individual fruit in each lot of such avocados weighs at least 15 ounces; and (iii) from October 18, 1976, through December 19, 1976, unless the individual fruit in each lot of such avocados weighs at least 13 ounces.

(7) Notwithstanding the provisions of subparagraphs (2) through (6) of this paragraph regarding the minimum weight or diameter for individual fruit, not to exceed 10 percent, by count, of the individual fruit contained in each lot may weigh less than the minimum specified and be less than the specified diameter: *Provided*, That such avocados weigh not over 2 ounces less than the applicable specified weight for the particular variety specified in such subparagraphs. Such tolerances shall be on a lot basis, but not to exceed double such tolerances shall be permitted for an individual container in a lot.

(b) The Federal or Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, is hereby designated as the governmental inspection service for the purpose of certifying the grade, size, quality, and maturity of avocados that are imported into the United States. Inspection by the Federal or Federal-State Inspection Service with appropriate evidence thereof in the form of an official inspection certificate, issued by the respective service, applicable to the particular shipment of avocados, is required on all imports of avocados. Such inspection and certification services will be available upon application in accordance with the rules and regulations governing inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 51) but, since inspectors are not located in the immediate vicinity of some of the small ports of entry, such as those in southern California, importers of avocados should make arrangements for inspection, through the applicable one of the following offices, at least the specified number of days prior to the time when the avocados will be imported:

Port	Office	Advance notice (days)
All Texas points.	Leo M. Danbo, 506 South Nelrask Ave., San Juan, Tex. 75558, phone 512-767-4001.	1
	or Charles E. Parragon, 724 East Overland, El Paso, Tex. 79001, phone 915-543-7723.	1
All New York points.	Carmine J. Cavallo, Room 28A, Hunts Point Market, Bronx, N.Y. 10474, phone 212-991-7668 and 991-7669.	1
	or Charles D. Renick, 176 Niagara Frontier Food Terminal, Room 8, Buffalo, N.Y. 14206, phone 716-824-1585.	1
All Arizona points.	B. O. Morgan, 225 Terrace Ave., Nogales, Ariz. 85021, phone 602-287-2402.	1
All Florida points.	Lloyd W. Booney, 330 Northwest 12th Ave., room 530, Miami, Fla. 33136, phone 305-324-0118.	1
	or Ceel Brantley, 550 3d St., NW, Winter Haven, Fla. 33880, phone 813-294-3511.	1
	or Johnnie L. Corbett, Unit 46, 3335 North Edgewood Ave., Jacksonville, Fla. 32205, phone 904-354-5983.	1
All California points.	Daniel P. Thompson, 784 508th Central Ave., room 268, Los Angeles, Calif. 90021, phone 213-622-8756.	3
All Louisiana points.	Leonard E. Mixon, 5027 Federal Office Bldg., 701 Loyola Ave., New Orleans, La. 70112, phone 504-589-6741 and 589-6742.	1
All other points.	M. A. Castille, F. & V. Division, AMS-USA, Washington, D.C. 20550, phone 202-447-6870.	3

(c) Inspection certificates shall cover only the quantity of avocados that is being imported at a particular port of entry by a particular importer.

(d) The inspection performed, and certificates issued, by the Federal or Federal-State Inspection Service shall be in accordance with the rules and regulations of the Department governing the inspection and certification of fresh fruits, vegetables, and other products (7 CFR Part 51). The cost of any inspection and certification shall be borne by the applicant therefor.

(e) Each inspection certificate issued with respect to any avocados to be imported into the United States shall set forth, among other things:

- (1) The date and place of inspection;
- (2) The name of the shipper or applicant;

(3) The commodity inspected;

(4) The quantity of the commodity covered by the certificate;

(5) The principal identifying marks on the container;

(6) The railroad car initials and number, the truck and the trailer license number, the name of the vessel, or other identification of the shipment; and

(7) The following statement, if the facts warrant: Meets U.S. import requirements under Section 8e of the Agricultural Marketing Agreement Act of 1937, as amended.

(f) Notwithstanding any other provisions of this regulation, any importation of avocados which, in the aggregate, does not exceed 55 pounds may be imported without regard to the restrictions specified herein.

(g) It is hereby found that the application of the maturity restrictions being imposed, pursuant to Order No. 915 (7 CFR Part 915), upon avocados grown in South Florida to imported avocados, other than of the Pollock, Catalina, and Trapp varieties, is not practicable because of variations in characteristics between the domestic and imported avocados; and the maturity restrictions applicable to imported avocados, other than of the Pollock, Catalina, and Trapp varieties, are comparable to those imposed upon the domestic commodity. The quality restrictions for all imported avocados, and the maturity restrictions for imported avocados of the Pollock, Catalina, and Trapp varieties, are the same as those being imposed upon the domestic commodity.

(h) No provisions of this section shall supersede the restrictions or prohibitions on avocados under the Plant Quarantine Act of 1912.

(i) Nothing contained in this section shall be deemed to preclude any importer from reconditioning, prior to importation, any shipment of avocados for the purpose of making it eligible for importation.

(j) The terms relating to grade, as used herein, shall have the same meaning as when used in the United States Standards for Florida Avocados (7 CFR 51.3050-51.3069). "Diameter" shall mean the greatest dimension measured at right angles to a line from the stem to the blossom end of the fruit. "Importation" means release from custody of the United States Bureau of Customs.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Dated: May 20, 1976, to become effective May 31, 1976.

CHARLES R. BRADER,  
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

# CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

## SUBCHAPTER Q—ADMINISTRATION

### PART 2012—AUDITS AND INVESTIGATIONS

#### Subpart A—Audits

There is hereby established under Chapter XVIII, Title 7, a new Subchapter Q—"Administration, Part 2012, Audits and Investigations," Subparts A through D, in the Code of Federal Regulations. Subpart A, "Audits," (§§ 2012.1-2012.50) of this new Part outlines the procedure to use in handling and reports prepared and distributed by the Office of Audit on activities within Farmers Home Administration.

In as much as the Subpart involves internal operations of the Agency and is Administrative in nature, public notice and procedure thereon is unnecessary.

Accordingly, new Subpart A of new 7 CFR Part 2012 is set forth below:

#### Subpart A—Audits

- Sec.  
2012.1 Purpose  
2012.2 Policy  
2012.3 Scope  
2012.4 Frequency of audits  
2012.5 Distribution of report  
2012.6 Action on report  
2012.7 Restriction on distribution of report  
2012.8 Retention of report  
2012.9 General Accounting Office (GAO) audits  
2012.10-2012.50 [Reserved]

**AUTHORITY:** 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301 Sec. 10 P.L. 93-357, 88 Stat. 392 delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70; delegation of authority by Dir., OEO, 29 FR 14764, 33 FR 9850.

#### § 2012.1 Purpose.

This Instruction outlines the procedure to use in handling audit reports, prepared and distributed by the Office of Audit (OA), on the activities within the Farmers Home Administration (FmHA).

#### § 2012.2 Policy.

FmHA employees will ask for official identification from OA auditors before releasing information to them. FmHA employees will cooperate fully with OA by making available pertinent information, including files, records, and correspondence. Similar cooperation will be extended to authorized representatives of other Federal audit agencies.

#### § 2012.3 Scope.

(a) OA has authority to inquire into all program and administrative activities of the Department of Agriculture. All organizational units, programs, and operations are subject to audit at any time. An audit is designed to:

(1) Ascertain whether policy, plans, systems, and procedures are adequate, conform to applicable laws and regula-

tions, and whether these laws and regulations are complied with;

(2) Provide objective reviews of all departmental operations for effectiveness;

(3) Determine reliability and usefulness of records, data, and reports;

(4) Determine whether resources are managed and used in an economical and efficient manner; and

(5) Ascertain whether financial operations are properly conducted, and financial reports are accurate.

(b) Audit findings will not normally be the basis for formal adverse action (Fiscal charges and disciplinary, civil, or criminal actions) against parties involved. Irregularities involving such adverse actions will be handled as investigations. See FmHA 2012-B (FmHA Instruction 052.1), FmHA 2012-C (FmHA Instruction 052.2), and FmHA Instruction 2012-D (FmHA Instruction 052.3).

#### § 2012.4 Frequency of audits.

OA prepares an annual program showing audits planned for the following fiscal year. This program includes both audits considered necessary by OA and audits requested by agency officials.

(a) The FmHA Liaison Officer will send audit plans for each State to the State Director as soon as they are received from OA.

(b) A State Director may request a special audit at any time a justifiable need arises, or request changes in OA audit plans because of emergency or other special circumstances. Such requests should be made directly to the appropriate Regional Director, OA, with a copy to the FmHA Liaison Officer, National Office.

#### § 2012.5 Distribution of report.

(a) OA will distribute two copies of each audit report, including the transmittal memorandum, to the appropriate agency official (action addressee) responsible for taking action on reported matters (e.g., State Director or Director, Finance Office).

(b) The Regional Director, OA, will distribute one copy of each audit report to the National Office, Attention: Director, Program Evaluation Staff. If an audit report is identified as "Significant" on Form OA 7600-2, "Significant Audit Disclosure" and contains recommendations for the Administrator or for the State Director, or for both, the Regional Director, OA, will distribute two copies to the Director, Program Evaluation Staff.

#### § 2012.6 Action on report.

(a) *Immediate reply to report.* On receipt of an audit report, the State Director or Director, Finance Office, will take any necessary corrective action. In addition, the State Director will see that the problems disclosed in each audit are not occurring in other County Offices under his jurisdiction.

(1) If an audit report from the Regional Director contains recommendations for the Administrator or (2) for the State Director, and is addressed to the Director, Program Evaluation Staff, a reply to the audit report with two copies will be sent for review to the National Office, Attention: Director, Program Evaluation Staff. This reply should be sent to arrive in the National Office within 50 days after the report is issued.

(2) If the audit report transmittal memorandum is addressed to the State Director, a reply with one copy will be sent to the Regional Director, OA, and one copy will be sent to the National Office, Attention: Director, Program Evaluation Staff. This reply should be sent to arrive in the National Office within 60 days after the report is issued.

(3) Correspondence about reports and action taken will:

(i) Refer to the report number;  
(ii) Be marked, "For Official Use Only;"

(iii) Show the distribution of copies; and

(iv) Respond to the audit recommendations.

(4) The reply should indicate each item on which final action has been completed. For each item where action cannot be taken, the reply should state:

(i) Action taken to date;  
(ii) Additional action planned;  
(iii) Anticipated date for final action; and

(iv) Brief reason why final action cannot be completed until anticipated date.

(5) If there are significant audit disclosures, as indicated on Form OA 7600-2, the Director, Program Evaluation Staff, will notify the State Director or Director, Finance Office, of the issues involved. A reply with two copies stating the corrective action taken or planned will be sent to the National Office, Attention: Director, Program Evaluation Staff.

(6) All questions about or disagreements with the audit recommendations or any part of the audit that cannot be resolved between the action addressee and OA will be directed to the National Office, Attention: Director, Program Evaluation Staff.

(b) *Subsequent action.* The State Director or Director, Finance Office, will make subsequent progress reports at 60-day intervals or until final action on all items is completed.

(c) *No action required.* If the audit indicates no findings or recommendations, the Regional OA transmittal memorandum will state that no response is required from FmHA.

#### § 2012.7 Restriction on distribution of report.

(a) All OA audit reports are marked "For Official Use Only—Indefinite Retention" (1 AR Chapter 9, Section 4).

These reports are for official purposes only, and may not be released outside the agency. However, if required by law, directive, regulation, or applicable rule of practice in Federal or State Court, a determination of whether OA reports may be released outside the Federal Government may be made by OA or by the Office of the General Counsel (OGC) in its disposition of a case.

(b) Any requests for or questions about the release of an OA audit report or information in these reports will be directed to the National Office, Attention: Director, Program Evaluation Staff, for referral to OA.

(c) All correspondence to the National Office about audit reports will be addressed to the Director, Program Evaluation Staff. The correspondence will be forwarded in separate, sealed envelopes marked "For Official Use—Audit Report" in the lower left corner.

#### § 2012.8 Retention of report.

(a) A copy of the complete audit report, with all related correspondence to the Regional OA or the National Office, will be kept in the office audited for 5 years, as specified in FmHA 2033-A, (FmHA Instruction 151.1).

(b) Reports and related material with restrictive markings should be kept in locked cabinets or other locked repository when not in use.

#### § 2012.9 General Accounting Office (GAO) Audits.

GAO conducts audits and investigations independent of OA. State Directors will keep the National Office informed regarding GAO audits, investigations, and surveys within their States and will forward copies of all correspondence with GAO to the National Office, Attention: Director, Program Evaluation Staff.

#### §§ 2012.10-2012.50 [Reserved]

**Effective date.** This addition is effective on May 24, 1976.

Dated: May 12, 1976.

FRANK B. ELLIOTT,  
Administrator,  
Farmers Home Administration.

## Title 10—Energy

### CHAPTER I—NUCLEAR REGULATORY COMMISSION

#### PART 50—LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

#### PART 70—SPECIAL NUCLEAR MATERIAL

##### Preservation of Records; Correction

In FR Doc. 76-12851, appearing at page 18300 in the issue for Monday, May 3, 1976, make the following changes:

A. On page 18303, in the first column, the amendment of paragraph (p) of § 50.54, is corrected to read as follows:

15. Paragraph (p) of § 50.54 is amended by revising the last sentence to read as follows:

§ 50.54 Conditions of licenses.

(p) . . . The licensee shall maintain records of changes to the plan made without prior Commission approval for a period of two years from the date of the change, and shall furnish to the Director of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, with a copy to the appropriate NRC Regional Office specified in Appendix D of Part 20 of this chapter, a report containing a description of each change within two months after the change is made.

B. On page 18303, in the middle column, the amendment of paragraphs (c) and (e) of § 70.32 is corrected to read as follows:

19. Section 70.32 is amended by revising the prefatory language of the last sentence of paragraph (c) and revising the last sentence of paragraph (e) to read as follows:

§ 70.32 Conditions of licenses.

(c) . . . The licensee shall maintain records of changes to the material control and accounting program made without prior Commission approval, for a period of five years from the date of the change, and shall furnish to the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, with a copy to the appropriate NRC Regional Office shown in Appendix A of Part 73 of this chapter, a report containing a description of each change within:

(e) . . . The licensee shall maintain records of changes to the plan made without prior Commission approval, for a period of two years from the date of the change, and shall furnish to the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, with a copy to the appropriate NRC Regional Office shown in Appendix A of Part 73 of this chapter, a report containing a description of each change within two months after the change is made.

Dated at Bethesda, Maryland this 17th day of May 1976.

For the Nuclear Regulatory Commission.

LEE V. GOSSICK,  
Executive Director  
for Operations.

## CHAPTER II—FEDERAL ENERGY ADMINISTRATION

[Ruling 1976-1]

### ALLOCATIONS WITH RESPECT TO NEWLY CONSTRUCTED OR PURCHASED REFINERIES UNDER CRUDE OIL BUY/SELL PROGRAM

#### FEA Ruling

**Facts.** Refiner A (a refiner-buyer, as defined in 10 CFR 211.62) owned a refinery which became operational on September 1, 1974. Since a significant portion of the construction of the refinery had been completed prior to May 1, 1974, for purposes of receiving allocations of crude oil under the crude oil buy/sell program set forth in 10 CFR 211.65 (the "buy/sell program"), FEA determined that Refiner A's refinery qualified as "new refining capacity." Refiner A was therefore entitled to purchase crude oil under the buy/sell program for that refinery commencing with the September through November 1974 allocation quarter. On January 1, 1975, Refiner A sold the refinery to Refiner B, also a refiner-buyer, which thereafter continued to operate the refinery.

**Issue.** How is Refiner B's purchase opportunity under 10 CFR 211.65 calculated with respect to the refinery purchased by it from Refiner A?

**Ruling.** Refiner A's crude oil allocation for the refinery, which was based on the qualification on that refinery as "new refining capacity" as to Refiner A, is not carried over as to Refiner B upon its purchase of the refinery. Crude oil allocations under the buy/sell program would be made to Refiner B for the acquired refinery on the basis of the criteria for "future refining capacity" in accordance with the provisions of § 211.65(b).

FEA's buy/sell program was established in its present form effective June 1, 1974 to correct the imbalances in access to crude oil supplies which exist between major integrated refiners, on the one hand, and small and independent refiners, on the other.

Under the program, each small and independent refiner as defined in 10 CFR 211.62 (a "refiner-buyer") is generally entitled to purchase from one or more of the 15 largest integrated domestic refiners ("refiner-sellers") in each three-month allocation quarter an amount of crude oil equal to one-quarter of its crude oil runs to stills in 1972 less the volume of its runs to stills in the period February through April 1974, subject to certain adjustments.

For purposes of these calculations a refiner-buyer's 1972 refining capacity is termed "refining capacity," which is defined in § 211.62 to mean:

. . . for each refinery, the capacity reported to the Bureau of Mines as of January 1, 1973. . . .

In addition to an allocation entitlement based on 1972 crude oil runs, which would be directly related to the particular firm's 1972 refining capacity, the regulations provide for an increase in allocations to refiner-buyers to take into account expansion of refining facilities after 1972. Post-1972 refining capacity, the construction of which was substantially completed by May 1, 1974 ("new refining capacity"), is distinguished in the regulations from other more recently constructed refining capacity ("future refining capacity").

Section 211.62 provides that:

"New refining capacity" means, for each refiner, the sum of the capacity of its refineries not included within the definition of refining capacity and operated continuously in the normal course of such refiner's business, a significant portion of the construction of which has been completed prior to May 1, 1974 \* \* \*.

In accordance with § 211.65(a)(5), a refiner-buyer whose post-1972 refining capacity qualifies as new refining capacity is automatically entitled to an increase in its purchase opportunity under the buy-sell program by an amount necessary to permit that refiner-buyer to operate such new refining capacity at its 1972 supply-to-capacity ratio, giving effect to supplies available for such new refining capacity in excess of supplies included in that refiner-buyer's February through April, 1974 crude runs.

Future refining capacity is defined in § 211.62 as follows:

Future refining capacity means, for each refiner, the sum of the capacity of its refineries not included within the definitions of refining capacity and new refining capacity \* \* \*.

Under § 211.65(b), allocations for future refining capacity are to be specified by FEA upon consideration of the following factors:

- (i) The source and volume of anticipated crude oil supplies for such future refining capacity;
- (ii) The efforts made by that refiner-buyer to obtain or locate crude oil supplies for such future refining capacity;
- (iii) The projected ability of all refiner-sellers to obtain supplies of crude oil for their refinery capacity;
- (iv) The economic feasibility of operating such future refining capacity absent any allocations;
- (v) The extent to which such future refining capacity is designed to implement the national policies relating to protection of the environment; and
- (vi) The extent to which such future refining capacity incorporates high conversion facilities and the patterns of product yield conform to the anticipated national requirements for refinery products.

A detailed discussion of these criteria appears in the Appendix hereto, together with a description of FEA's current application thereof.

As set forth in the Appendix, it is the clear intent that the criteria governing allocations for further refining capacity be applied to prevent uneconomic new entrants into the refining industry from automatically receiving crude oil allocations, which allocations would tend to

reduce incentives for these firms to arrange for their own crude supplies. The regulatory distinction between allocations for new refining capacity and future refining capacity is designed primarily to avoid encouragement of firms to construct inefficient refineries for the sole purpose of receiving government-directed allocations.

The regulations thus limit automatic allocations for post-1972 refining capacity to new refining capacity, or capacity a significant portion of the construction of which was completed by May 1, 1974. FEA's rationale in this regard was that such capacity would have been planned and the necessary financial commitments therefor made by late 1973, with no knowledge of or intent to rely on a continuing government allocation program. Therefore, new refining capacity as so defined would in most cases be economically viable absent federal allocation programs, and allocations are made on the same basis as for 1972 capacity.

However, with respect to all other post-1972 refining capacity, i.e. future refining capacity, application of the factors set forth in § 211.65(b)(1) provides for allocations under the program only to firms that demonstrate an economically viable venture, which is generally evidenced by arrangements made by the particular firm for crude oil supplies and by the sophistication of its refinery.

In applying the policy considerations upon which the allocations under the buy/sell program are based for post-1972 capacity, it is clear that the criteria set forth in § 211.65(b)(1) should be equally as applicable to purchased refineries as to newly constructed refineries. A firm that decides to enter the refining industry, or to increase its refining capacity, has essentially two means of accomplishing this purpose. It may either construct a new facility (or an addition to one of its current facilities), or alternatively it may purchase an existing refinery owned by another firm. No public interest would be served if FEA were to encourage new entrants into the refining industry to purchase existing refinery capacity which is not economically viable by automatically granting crude oil allocations, while denying such allocations to newly constructed refinery capacity which is not economically viable. In fact, in order to best serve the needs of the nation, FEA should positively encourage the construction of new, technically sophisticated refineries which have made arrangements for crude oil supplies, rather than encourage the sale of less sophisticated refineries with no assured source of crude oil supplies. Thus, the criteria set forth in § 211.65(b)(1) which are used to evaluate the economic viability of future refining capacity are as germane to purchased refineries as to newly constructed refineries.

Finally, the implication of the defined terms "refining capacity" and "new refining capacity" is that the firm that had actually reported the capacity to the Bureau of Mines or that had completed a significant portion of the construction thereof prior to May 1, 1974 is

the firm as to which these respective classifications should apply, as opposed to a subsequent purchaser of the refinery in question. This analysis is consistent with the other provisions of § 211.65 fixing refiner-buyers' purchase opportunities, since the latter are generally determined by a particular refiner's 1972 and 1974 crude run levels, which in turn relate to the refinery capacity operated by that refiner in those periods. Therefore, the clear intent of the regulations is that the classification of a particular refinery under the buy/sell program as refining capacity or new refining capacity requires that the firm receiving the benefits of such a classification must have reported the capacity to the Bureau of Mines as of January 1, 1973 or have completed a significant portion of the construction thereof prior to May 1, 1974.

In summary, allocations under the buy/sell program pursuant to § 211.65 do not attach to particular refineries but rather to the firm that owned the refinery in the relevant period specified in the regulations. Thus, the purchase of a refinery on January 1, 1975 would not effect the transfer to the purchasing firm of any of the allocation rights under the buy/sell program attributable to the firm that previously owned that refinery. The allocation amount for the firm that has purchased the refinery would be fixed under the criteria for future refining capacity in § 211.65(b). This result would be the same if the refinery were purchased from a refiner-seller, where there would be no allocation rights attributable to the refinery.

DAVID G. WILSON,  
Acting General Counsel.

MAY 19, 1976.

#### APPENDIX—EVALUATION OF APPLICATIONS FOR FUTURE REFINING CAPACITY ALLOCATIONS UNDER 10 C.F.R. 211.65(b)

##### I. Introduction

The Emergency Petroleum Allocation Act of 1973 ("EPAA"), as amended, provides that the Federal Energy Administration ("FEA"), when developing regulations governing the allocation of crude oil and refined petroleum products, may take into consideration (1) market entry by independent and small refiners during or subsequent to calendar year 1972, and (2) expansion or reduction of refining facilities of such refiners during or subsequent to calendar year 1972 (EPAA § 4(c)(4)(B)).

Pursuant to this statutory authority, the FEA promulgated paragraph (b) of 10 C.F.R. § 211.65 (the Mandatory Crude Oil Allocation Program or "Buy/Sell Program"), in order to evaluate applications for an allocation of crude oil submitted by operators of newly developed or expanded refining capacity scheduled to be completed and to become operational subsequent to May 1, 1974. This capacity has been defined in the regulations as "future refining capacity" (10 C.F.R. § 211.62).

Under § 211.65(b), FEA is committed to fostering future refining capacity. This does not mean, however, that any future refining capacity is automatically eligible for allocations. Quite the contrary, FEA is prepared to provide buy/sell allotments only in those circumstances in which an applicant for an allocation satisfies the criteria enumerated in § 211.65(b)(1) concerning, inter alia, the crude oil supply arrangements and the eco-

nomie viability and operating flexibility of any future refining facilities. These criteria are designed in large part to encourage the construction of independent, viable refining facilities by granting these facilities allocations to supplement their own supply arrangements. FEA does not intend to foster (through the automatic award of allocations) the construction of future refining capacity which would not remain viable after the FEA's allocation and price regulations terminate.

Moreover, FEA does not intend to grant allocations for the operation of future refining capacity in cases where supplies of suitable crude oil are otherwise available, albeit at a price higher than that required to be charged for crude oil purchased under the Buy/Sell Program. The Buy/Sell Program is designed to correct supply imbalances between the major integrated refiners on the one hand and small and independent refiners on the other. Although the Buy/Sell Program was initially also relied upon to effectuate some degree of cost equalization, this subsidiary purpose is no longer essential, since cost equalization is now achieved to a considerable degree under the FEA's Crude Oil Entitlements Program in 10 C.F.R. § 211.67. Accordingly, FEA currently views the Buy/Sell Program, including allocations for future refining capacity, solely as a means of providing crude oil to small and independent refiners for supply purposes in appropriate circumstances.

Section 211.65(b)(1) sets forth six factors which FEA must consider when establishing an allocation level for future refining capacity under the Buy/Sell Program. In order for the FEA to ensure equitable and consistent treatment for all applications made pursuant to 10 C.F.R. § 211.65(b), a method of weighting these six factors has been developed. The FEA recognizes that information required for its consideration of these six factors may, in some cases, be overlapping and that conditions such as crude oil availability, local marketing conditions and independent, economic viability may vary considerably with each application. Consequently a range of points has been incorporated for each factor in recognition of the relative uniqueness of each case.

A total of one hundred points has been distributed among the factors to be considered under § 211.65(b)(1). For reasons explained within, the third and fifth factors have not been assigned any points, and, of the remaining four factors, not all have been assigned the same range of points. Points have been distributed among these factors on the basis of their relative importance to the underlying purposes of the Buy/Sell Program and the FEA's policies pertaining to the operation of future refining capacity.

The FEA is making its method of weighting the six factors available to the public in the interest of the fullest possible disclosure of the administrative decision-making processes and in compliance with 5 U.S.C. § 552(a)(2) (the Freedom of Information Act). Accordingly, set forth below is a discussion of each of the six factors listed in § 211.65(b)(1) of the regulations and the manner in which they will be evaluated and applied by FEA in determining allocation entitlements for future refining capacity:

##### II. Evaluation of the Factors in Section 211.65(b)(1)

(i) The source and volume of anticipated crude oil supplies for such future refining capacity.

The quantity of crude oil which has been secured by the refiner outside the Buy/Sell Program for the operation of future refin-

ing capacity is of prime importance in FEA's consideration of an allocation entitlement because it is convincing evidence that such future capacity represents an economically viable enterprise capable of functioning in the future without government assistance. The FEA's concern is that a refiner should have secured an adequate source of crude oil prior to making such additional capacity operational. The crude oil allocation program is not designed to become a sole source of supply for a refiner, except perhaps in circumstances where, due to a government program (such as the crude oil supplier/purchaser freeze in 10 C.F.R. § 211.63), a refiner is unable to obtain supplies that would otherwise have been available.

This factor is assigned a range of zero (0) to thirty (30) points. This is slightly greater than the range of points assigned to any of the other factors, principally because the FEA believes that securing an adequate supply of crude oil prior to operating future refining capacity is consistent with traditional industry practice and is the most convincing indication that such capacity represents a viable enterprise which will be capable of operating without government assistance after the FEA's allocation and price programs terminate. A refiner with future refining capacity will be assigned points as a function of the volume of anticipated crude oil supplies (other than under the Buy/Sell Program) available to the applicant for such future refining capacity.

(ii) The efforts made by that refiner/buyer to obtain or locate crude oil supplies for such future refining capacity.

To be considered for inclusion in the program each refiner is expected to exert the utmost effort to assure itself of a supply of crude oil for its future refining capacity. FEA, therefore, requires documentation setting forth in detail the efforts of the refiner to secure crude oil supplies on its own initiative and the net results of such efforts. It is recognized that, in some instances, through no lack of planning and effort on the part of the refiner, non-allocation crude oil of suitable grade and quality may not be available for practicable delivery to the refinery. Proof of the refiner's diligent efforts to locate crude oil and evidence of the difficulties encountered, however, are necessary before FEA will award any points for such efforts.

This factor is assigned a range of zero (0) points to twenty-five (25) points. A refiner with future refining capacity will be assigned points proportional to the efforts which it has made to obtain or locate crude oil supplies for such future refining capacity.

(iii) The projected ability of all refiner/sellers to obtain supplies of crude oil for their refinery capacity.

Under a situation of limited crude oil supplies this factor would be quite important because it relates to sharing crude oil supplies among existing facilities and additional ones to be constructed or under construction. However, in the aggregate, there is currently no shortage of crude oil available to refiner-sellers. Consequently, at the present time this factor is assigned zero (0) points.

(iv) The economic feasibility of operating such future refining capacity absent any allocation.

This factor is similar to factor (i) above in that it is intended to provide for an allocation of crude oil to a refiner which can demonstrate that it has an economically viable venture but, through no fault of its own, finds itself without a sufficient supply of crude oil to operate such future refining capacity. Here, however, FEA is concerned not with the availability of crude oil supplies absent government allocations but with the economic viability of the future re-

fining capacity, i.e., the ability of the refiner to operate such future capacity and to market its products without having to rely on the FEA's allocation and price programs. In this regard, it is important to emphasize that the Buy/Sell Program is concerned with ensuring that refiner-buyers receive adequate supplies of crude oil to operate their refineries. It is not FEA's intention, however, to substitute allocations under the program for supplies that could be obtained in the market at a higher price. FEA's Entitlements Program was implemented to reduce refiners' crude oil cost disparities to a competitive range, a function not currently within the scope of the Buy/Sell Program. Thus, an applicant under § 211.65(b)(1) must be able to demonstrate that its future refining capacity could be operated economically without allocations under the Buy/Sell Program, assuming that it had access to an adequate supply of suitable crude oil at market prices.

This factor is assigned (0) points to twenty-five (25) points. Points will be assigned in proportion to the applicant's ability to demonstrate that its future refining capacity would be economically feasible absent any allocations.

(v) The extent to which such future refining capacity is designed to implement the national policies relating to the protection of the environment.

The environmental impact of future refining capacity must be taken into account. While environmental matters are principally the responsibility of other federal and state regulatory agencies, the FEA believes it has an obligation to require each refiner to show evidence of compliance with applicable environmental regulations. It is highly improbable that new or expanded refining capacity could reach an operational stage without federal and state environmental regulatory bodies having first reviewed its impact on the environment and required the refiner to comply with applicable federal and state environmental regulations. Therefore, FEA merely requires a refiner to submit evidence of its ability to comply with such environmental regulations. This factor is not weighted, but rather is considered in order to insure compliance with such environmental requirements. It is therefore assigned zero (0) points.

(vi) The extent to which such future refining capacity incorporates high conversion facilities and the patterns of product yield conform to the anticipated national requirements for refinery products.

It is expected that a future refining facility will be sufficiently sophisticated to produce refined products of the type and quality required in the relevant marketing area. For instance, a simple topping plant located in a rural area and producing significant volumes of residual fuel oil is unlikely to meet local product needs. Gasoline production must be of sufficient quality (octane) to operate today's internal combustion engines. Home heating and residual fuel oils must have a sulfur content low enough to meet air pollution requirements. Consideration must also be given to the capability of the future refining capacity to process crude oils of varying gravities and sulfur contents.

This criterion is assigned zero (0) points to twenty (20) points. This is slightly less than the range of points assigned to other factors, principally because operating flexibility is not as indicative of the future refining capacity's ability to be self-sustaining absent government support, which is the FEA's primary concern in encouraging operation of such capacity pursuant to § 211.65(b). However, operating flexibility is still an important consideration because the FEA does not want the Buy/Sell Program to be

used to encourage the operation of unnecessary or outmoded refining capacity when the same resources could be used to operate more modern facilities capable of meeting current product demands. Points for this factor will be assigned to a refiner in proportion to its ability to refine a variety of crude oils and to produce finished products suitable for use in its relevant market area.

### III. Calculation of Allocation Level

Pursuant to the foregoing analysis, the FEA assigns each application for an allocation for future refining capacity a value that is equal to the sum of the points assigned for each factor evaluated. One hundred points is the maximum value that can be awarded. This value is expressed as a percentage (e.g., 65 points=65%).

Section 211.55(b) (2) requires the FEA to "endeavor to assure supplies to future refining capacity to enable such capacity to operate at the national supply to capacity ratio." However, as indicated above, the Buy/Sell Program is not intended to become a sole source of supply for a refiner but is intended only as a supplement to supplies which the refiner has been able to procure on its own. Therefore, except in the rare circumstance where a refiner can demonstrate that, irrespective of price, it has no other possible supply of crude oil available to it, FEA does not anticipate awarding an allocation equal to the national supply to capacity ratio.

In order to determine the appropriate volume of crude oil to be allocated to the future refinery capacity under consideration, in a manner consistent with § 211.55(b) (2), the following calculation is made:

1. The national supply to capacity ratio for 1972 (0.8725) is multiplied by the increment of future refining capacity (in barrels per calendar day).
2. This product is then multiplied by the number of days in an average calendar quarter (91.25).
3. From this result is subtracted the refiner's available crude oil for the future refining capacity. (Available crude oil is that which is obtained from outside the allocation program.)
4. The result obtained from the previous calculation is then multiplied by the composite point award (expressed as a percentage) that has been assigned after consideration of the refiner's application.

This calculation results in a volume of allocated crude oil to which a refiner becomes entitled for an allocation period, pursuant to § 211.55(b).

### Title 12—Banks and Banking CHAPTER V—FEDERAL HOME LOAN BANK BOARD SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

[No. 76-345]

### PART 545—OPERATIONS

Amendment Relating to Payments to  
Third Parties

#### SUMMARY

MAY 14, 1976.

The following summary of the amendment adopted by this resolution is provided for the reader's convenience and is subject to the full explanation in the following preamble and to the specific provisions of the regulation.

I. *Previous Regulation*—Restricted third party payment powers of Federal

association accountholders by requiring them to present a payment order or authorization to the association for payment to a third party.

II. *Present Amendment*—Permits Federal association accountholders to authorize payment from their accounts to third parties based on orders processed through automated clearing houses.

The Federal Home Loan Bank Board, by Resolution No. 76-142, dated February 25, 1976, proposed to amend § 545.4-1 of the Rules and Regulations of the Federal Savings and Loan System (12 CFR 545.4-1) to enable Federal associations to offer their accountholders a broadened range of third party payment services. Notice of such proposed rulemaking was published in the FEDERAL REGISTER on March 2, 1976 (41 F.R. 8980), with an invitation to interested persons to submit written comments by April 2, 1976. On the basis of its consideration of all relevant material presented by interested persons and otherwise available, the Board considers it desirable to amend § 545.4-1 as proposed.

Accordingly, the Board hereby amends § 545.4-1(a) (2) to read as set forth below effective June 25, 1976.

§ 545.4-1. Payments to third parties by withdrawals or transfer of savings accounts; checks and money orders.

#### (a) Withdrawals and transfers.

(2) *Restrictions.* An account holder shall not have a right to transmit or deliver any such order or authorization to a third party to whom a withdrawal is to be paid or transferred, and a Federal association shall not accept any such order or authorization which is received by it from or through such a third party except for orders or authorizations processed through an automated clearing house.

(Sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR 1943-48 Comp. 1071.)

By the Federal Home Loan Bank Board.

J. J. FINN,  
Secretary.

### Title 14—Aeronautics and Space CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 76-CE-17-AD; Amdt. 39-2616]

### PART 39—AIRWORTHINESS DIRECTIVES

Beech Models B19, C23 and B24R  
Airplanes

There has been a report of an unscheduled wing flap retraction during approach for landing on a Beech Model C23 airplane. This condition was caused by failure of rivets attaching the cable block to the flap torque tube. Since this condition is likely to exist or develop in other airplanes of the same type design an Airworthiness Directive (AD) is being issued, applicable to Beech Models B19, C23 and B24R airplanes, which will

require the installation of screws and nuts in place of rivets at those points where the flap cable block attaches to the flap torque tube.

Since a situation exists which requires expeditious adoption of the amendment, notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than thirty (30) days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator 14 CFR 11.89 (31 F.R. 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new AD.

BEECH. Applies to Models B19 (Serial Numbers MB-732 through MB-788), C23 (Serial Numbers M-1000 thru M-1769) and B24R (Serial Numbers MC-305 thru MC-398) airplanes equipped with mechanical flaps.

Compliance: Required as indicated, unless already accomplished.

To prevent unscheduled retraction of wing flaps, within the next 60 hours' time in service after the effective date of this AD, accomplish the following:

A. Pursuant to the procedures and instructions outlined in Beechcraft Service Instructions No. 0831-161 or later approved revisions:

(1) Using a flashlight and mirror, visually inspect the inside of the flap torque tube to determine if Beech P/N 169-524024-0 flap cable block is attached to the torque tube with rivets or with screws and nuts.

(2) If the flap cable block is attached to the torque tube with the screws and nuts identified in Paragraph (3) below, no further action is required.

(3) If the flap cable block is attached to the torque tube with rivets, drill out the three rivets (one at a time in accordance with the aforementioned service instructions) and replace with three each MS24694S58 screws, AN960-10 washers and MS21042L3 locknuts or Beech P/N 130909N29 locknuts.

B. Any equivalent method of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

This amendment becomes effective May 28, 1976.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 and 1423), and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Kansas City, Missouri, on May 13, 1976.

C. R. MELUGIN, Jr.,  
Director, Central Region.

[FR Doc. 76-14990 Filed 5-21-76; 8:45 am]

[Docket No. 76-CE-16-AD; Amdt. 39-2617]

### PART 39—AIRWORTHINESS DIRECTIVES

Beech 88, 90, 100 and 200 Series Airplanes

There have been reports of cabin doors opening in flight on Beech Model 90 airplanes. These incidents are attributable to improper closing of the door prior to flight or attempts to obtain satisfactory door latching during flight following a cabin door warning light indication. Such a condition, if not corrected, could result in cabin decompression and exposure of the occupants to unnecessary hazards. The manufacturer has issued

Beechcraft Service Instructions 0818-016, 0016-105 Revision 1, and 0043-104 recommending modifications and rigging checks of the door latching mechanism and warning system for proper operation, installation of improved cabin door instructions and appropriate flight manual revisions. The manufacturer has advised that parts needed to modify the door latching mechanism will not be available until after September 15, 1976. Accordingly, until the modification has been accomplished the agency believes that repetitive inspections of the door latching mechanism and warning system rigging are required to assure continued door latching integrity. Since the condition described herein is likely to exist or develop on airplanes of the same type design an Airworthiness Directive (AD) is being issued, applicable to Beech Model 88, 90, 100 and 200 series airplanes, making compliance with the aforementioned service instructions mandatory, and in addition requiring repetitive inspections of the door for proper operation and rigging until the door latching mechanism and warning system have been modified.

Since a situation exists which requires expeditious adoption of the amendment, notice and public procedure hereon are impracticable and good cause exists for making the amendment effective in less than thirty (30) days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator 14 CFR 11.89 (31 F.R. 13697), § 39.13 of Part 39 is amended by adding the following new AD.

BEECH. Applies to Models 65-88 (Serial Numbers LP-1 thru LP-47 except LP-27 and LP-29), 65-90, 65-A90, B90 and C90 (Serial Numbers LJ-1 thru LJ-676), E90 (Serial Numbers LW-1 thru LW-163), 100 and A100 (Serial Numbers B-1 thru B-225) and 200 (Serial Numbers BB-2 thru BB-111) airplanes.

Compliance: Required as indicated, unless already accomplished.

To preclude opening of the cabin door in flight, accomplish the following:

I. Within 50 hours' time in service after the effective date of this AD, and within each 50 hours' time in service thereafter, check the cabin door for proper operation and rigging in accordance with the applicable Beech Shop/Maintenance Manual. When all the items specified in Paragraph II have been complied with the requirements of this paragraph (I) are no longer applicable.

II. Within 50 hours' time in service after September 15, 1976, perform the following:

A. On Models 65-88 (Serial Numbers LP-1 thru LP-47 except LP-27 and LP-29) and 65-90, 65-A90, B90 (Serial Numbers LJ-1 thru LJ-361) airplanes, modify the cabin door installation in accordance with Beechcraft Service Instructions 0043-104 or 0016-105, Rev. I, or later approved revisions, as applicable.

B. On Models 65-88 (Serial Numbers LP-1 through LP-47 except LP-27 and LP-29), 65-90, 65-A90, B90 and C90 (Serial Numbers LJ-1 thru LJ-676), E90 (Serial Numbers LW-1 thru LW-163), 100 and A100 (Serial Numbers B-1 thru B-225), and 200 (Serial Numbers BB-2 thru BB-111) airplanes, perform

the following in accordance with Beechcraft Service Instruction 0818-016 or later approved revisions:

1. Install Beech P/N 101-420124-3 and/or 101-420124-1 decal on the existing cabin door instruction plate and operate the cabin door accordingly.
2. Check cabin door latching mechanism and warning system for proper operation and

rigging and rerig, if required, as instructed in the appropriate Beech Shop/Maintenance Manual.

C. On the airplane models and serial numbers listed below add the indicated part number FAA-approved Airplane Flight Manual Supplement/Revision to the existing airplane pilot's operating manual or FAA-approved airplane flight manual:

- | Models   |                         |
|--|-------------------------|

[Docket No. 76-SO-46; Amdt. 39-2615]

### PART 39—AIRWORTHINESS DIRECTIVES

Lockheed Model 382 Series Airplanes

Amendment 39-2601, AD 76-09-11 requires an inspection and, if necessary, replacement before further flight of the crank arm or servo valve assembly on the rudder, aileron and elevator control booster units. After issuing amendment 39-2601, the agency determined that some of the acceptable replacement cranks carry an identification mark not listed in the Lockheed Alert Service Bulletin A382-27-17.

Since this amendment provides an alternate means of compliance and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and the amendment may be made effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 F.R. 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39-2601, AD 76-09-11 is further amended as follows:

The Lockheed Alert Service Bulletin stated that acceptable replacement cranks were identified with a "V" index mark. However, some of the replacement cranks are being made from a different material than those identified with a "V" index mark. These new cranks are identified with a straight line index mark and either of the cranks identified with a "V" or a straight line index mark are acceptable.

Beech Part Number (P/N) of FAA-Approved Airplane Flight Manual Supplement Revision dated November 14, 1975, or Subsequent

### PART 39—AIRWORTHINESS DIRECTIVES

Hawker Siddeley Aviation Limited Model  
DH-104 Airplanes

#### Correction

In FR Doc. 76-14093, appearing on page 20160 in the FEDERAL REGISTER of Monday, May 17, 1976, the third line of the second column should read: "ston in accordance with FAR 43.13, and re-".

[Docket No. 15716; Amdt. 39-2619]

### PART 39—AIRWORTHINESS DIRECTIVES

Morane Saulnier (Socata) Model MS880B, MS892A-150, MS892E-150, MS893 A and E, and MS894 A and E Airplanes

There have been reports of wear occurring in the cowl locks and of improper latching of the cowl locks on certain Morane Saulnier (Socata) MS series

airplanes that have resulted in loss of engine cowling and which could have resulted in loss of control of an airplane. Since this condition is likely to exist or develop in other airplanes of the same type design, an airworthiness directive is being issued which specifies procedures for cowl latching and requires repetitive inspections, replacement of Dialatch locks, reinforcement of cowl pin brackets, and installation of a cowl stop on certain Morane Saulnier (Socata) MS series airplanes.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

(Secs. 313(a), 60, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

MORANE SAULNIER (Socata). Applies to Model MS880B, MS892 A-150 and E-150, MS893 A and E, and MS894 A and E airplanes, serial numbers 831 and above, certificated in all categories.

Compliance is required as indicated, unless already accomplished.

To prevent the possible loss of an engine cowl due to improper latching of locks and cowl lock wear, accomplish the following:

(a) For airplanes incorporating Socata-type engine cowl locks, within the next 10 hours time in service after the effective date of this AD, either incorporate the following cowl locking procedures in the Airplane Flight Manual immediately following Section 4.3.1, Step 3; or if an Airplane Flight Manual is not available, install a placard adjacent to one of the engine cowl locks which contains the following cowl locking procedures:

"Cowl Locking Procedures. (1) Raise latch locking lever to maximum travel to allow cowl upper catch to engage lower cowl catch. (2) Press latch locking lever to full down position until distinct snap is heard indicating completed locking. (3) Check the locking mechanism by pulling the lock latching lever with a force sufficient to overcome the weight of the lever and low friction forces."

(b) For airplanes incorporating Socata-type engine cowl locks, within the next 25 hours time in service after the effective date of this AD, and thereafter at intervals not to exceed 100 hours time in service from the last inspection—

(1) Visually inspect the engine lower cowl metal centering tabs and the upper cowl metal centering pins, for wear of the metal tab receiving holes and wear of the centering pins to assure proper mating of the upper and lower cowl. Replace the metal centering tabs and cowl centering pins, found to be worn; and

(2) Inspect the engine cowl locking mechanism and if deterioration in locking push force is evident as demonstrated by a lack of snap action on the latch locking lever, adjust the Socata type engine cowl lock by removing the cotter pin in the upper catch, threading the latch trunnion into the

upper catch a distance of one or more turns, and reinserting the cotter pin in accordance with the procedure described in paragraphs 1.2 and 3.1 of Socata Service Bulletin No. 107 Gr. 71-06, dated November 1972, or an FAA-approved equivalent.

(c) For MS880B airplanes, serial numbers 831 through 1604, equipped with Dialatch engine cowl locks—

(1) Within the next 50 hours time in service after the effective date of this AD, accomplish the following in accordance with Socata Service Bulletin No. 77/2, Gr. 71-03, dated May 1973, or an FAA-approved equivalent:

(i) Replace the Dialatch cowl locks with Socata-type engine cowl locks.

(ii) Install reinforcing angle plates on the engine cowl centering pin brackets.

(iii) Install engine cowl stops;

(2) Within the next 50 hours time in service after the effective date of this AD, revise the Airplane Flight Manual, or install a placard, as specified in paragraph (a) of this AD; and

(3) Within the next 100 hours time in service after the installation of the Socata type engine cowl lock in accordance with paragraph (c)(1)(i) of this AD and thereafter at intervals not to exceed 100 hours time in service from the last inspection, visually inspect the engine lower cowl metal centering tabs and the upper cowl metal centering pins, for wear of the metal tab receiving holes and wear of the centering pins to assure proper mating of the upper and lower cowl. Replace the metal centering tabs and cowl centering pins found to be worn.

This amendment becomes effective on June 7, 1976.

Issued in Washington, D.C., on May 18, 1976.

J. A. FERRARESE,  
Acting Director,  
Flight Standards Service.

# **PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

## **Alteration of Transition Area**

On page 12902 of the FEDERAL REGISTER for March 29, 1976, the Federal Aviation Administration published a proposed rule which would alter the Galeton, Pa., Transition Area (41 F.R. 499).

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulation is hereby adopted, effective 0901 GMT July 1, 1976.

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348), and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Jamaica, N.Y., on May 3, 1976.

L. J. CARDINALI,  
Acting Director, Eastern Region.

§ 71.181 [Amended]

1. Amend Section 71.181 of Part 71 of the Federal Aviation Regulations by

adding the following to the description of the Galeton, Pa. transition area: "; within 3.5 miles each side of the Slate Run, Pa. VORTAC 037° radial, extending from the 7-mile radius area to the Slate Run, Pa. VORTAC."

[FR Doc.76-14988 Filed 5-21-76; 8:45 am]

[Docket No. 75-EA-84; Amdt. 39-2598]

# **PART 39—AIRWORTHINESS DIRECTIVE** **Revocation of Airworthiness Directive**

The Federal Aviation Administration is amending § 39.13 of Part 39 of the Federal Aviation Regulations so as to revoke Docket No. 75-EA-84; Amendment 39-2598, Airworthiness Directive 76-09-09. This docket was inadvertently processed as an adopted rule instead of a notice of proposed rule making.

In consideration of the foregoing, AD 76-09-09 is herewith revoked.

Issued in Jamaica, N.Y., on May 12, 1976.

L. J. CARDINALI,  
Acting Director, Eastern Region.

[FR Doc.76-14886 Filed 5-21-76; 8:45 am]

[Airspace Docket No. 76-CE-5]

# **PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTE, CONTROLLED AIRSPACE, AND REPORTING POINTS**

## **Alteration of Transition Area**

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Kennett, Missouri, transition area.

The name of the Blytheville Air Force Base VOR, Blytheville, Arkansas, referenced in the Kennett, Missouri, transition area description, has been changed to Gosnell VOR. Accordingly, alteration of the Kennett Missouri, transition area is necessary to reflect this name change. Since this amendment is minor in nature and imposes no additional burden on any person, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended effective immediately as hereinafter set forth:

In Section 71.181 (41 F.R. 440), the following transition area is amended to read:

## **KENNETT, MISSOURI**

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Kennett Memorial Airport (latitude 36°13'50" N, longitude 90°02'05" W); and within 2 miles each side of the 346° radial of the Gosnell VOR extending from the 5-mile radius area to 18½ miles north of the VOR.

(Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Kansas City, Missouri, on April 29, 1976.

C. R. MELUGIN, Jr.,  
Director, Central Region.

[Airspace Docket No. 76-EA-8]

# **PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

## **Designation of Transition Area**

On page 12903 of the FEDERAL REGISTER for March 29, 1976, the Federal Aviation Administration published a proposed rule which would designate the Grove City, Pa., Transition Area over Grove City Airport, Pa.

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulation is hereby adopted, effective 0901 GMT July 23, 1976.

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348), and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Jamaica, N.Y., on May 6, 1976.

DUANE W. FREER,  
Director, Eastern Region.

1. Amend Section 71.181 of Part 71, Federal Aviation Regulations so as to add the Grove City, Pennsylvania 700 foot floor transition area as follows:

## **GROVE CITY, PENNSYLVANIA**

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the center, 41°08'42" N, 80°09'54" W, of Grove City Airport, Grove City, Pennsylvania, and within 2 miles each side of the Ellwood City, Pennsylvania VORTAC 004° radial, extending from the 5-mile radius area to 18.5 miles north of the VORTAC.

[Airspace Docket No. 76-EA-4]

# **PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

## **Designation of Transition Area**

On page 13951 of the FEDERAL REGISTER for April 1, 1976, the Federal Aviation Administration published a proposed rule which would designate a Point Pleasant, W. Va., Transition Area.

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulation is hereby adopted, effective 0901 GMT July 15, 1976.

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348); sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Jamaica, N.Y., on May 7, 1976.

L. J. CARDINALI,  
Acting Director, Eastern Region.

1. Amend Section 71.181 of Part 71 of the Federal Aviation Regulations by designating a Point Pleasant, W. Va. transition area as follows:

## **POINT PLEASANT, W. VA.**

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the center 38°54'53" N, 82°06'53" W, of Mason County Airport, Point Pleasant, W. Va., excluding the portion that coincides with the Gallipolis, Ohio transition area.

[Airspace Docket No. 75-SW-76]

# **PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

## **Designation of Transition Area**

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to designate the Crownpoint, N. Mex., transition area.

On November 20, 1975, a notice of proposed rule making was published in the FEDERAL REGISTER (40 FR 54007) stating the Federal Aviation Administration proposed to designate the Crownpoint, N. Mex., transition area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. No objections were received.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., July 15, 1976, as hereinafter set forth.

In § 71.181 (41 F.R. 440), the following transition area is added:

## **CROWNPOINT, N. MEX.**

That airspace extending upward from 11,500 feet MSL within an area bounded on the north by a line beginning at latitude 35°56'20" N, longitude 108°30'00" W, thence to latitude 36°11'00" N, longitude 107°45'30" W; bounded on the east by the west boundary of V-187; bounded on the south by the north boundary of V-62; and bounded on the west by the east boundary of V-421; excluding the portion which coincides with the Gallup, N. Mex., transition area.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Fort Worth, Tex., on May 11, 1976.

ALBERT H. THURBURN,  
Acting Director,  
Southwest Region.

# **PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS**

## **Bryant AAF Control Zone**

On February 27, 1976, a Notice of Proposed Rulemaking was published in the FEDERAL REGISTER (41 FR 9370) stating that the Federal Aviation Administration proposed to amend the Bryant AAF control zone to provide that the effective times of the control zone could be changed by issuance of a Notice to Airmen.

Interested persons were offered an opportunity to participate in the proposed

rulemaking through the submission of comments. The one public comment received was favorable. Therefore, in consideration of the foregoing Part 71 of the Federal Aviation Regulations is amended effective 0901 GMT, July 15, 1976, as hereinafter set forth.

In § 71.171 (41 F.R. 355) the Anchorage, Alaska (Bryant AAF) control zone is amended to read "This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the United States Government Flight Information Publication Supplement Alaska."

(Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Anchorage, Alaska, on May 12, 1976.

#### PART 201—RULES OF PRACTICE

##### Service of Pleadings

The Securities and Exchange Commission has amended Rule 23(b) [17 CFR 201.23(b)] of its Rules of Practice regarding service of pleadings, other than moving papers, to become effective immediately. This amendment deletes from Rule 23(b) the provision requiring service of pleadings to be made by airmail on persons located more than 500 miles from the point of mailing. The text of Rule 23(b) of the Commission's Rules of Practice, § 201.23(b) is amended, to read as follows:

§ 201.23 Service of pleadings, etc., other than moving papers.

(b) *How service made.* Service of such documents shall be made by personal service on, or by mail addressed to, the party or his attorney or other agent for service. Where the document being served is printed, 2 copies shall be served on each party or his attorney or other agent for service. Service shall be deemed made at the time of personal service or of deposit in the mails properly addressed and post-paid. Where a party makes service by mail any specific limitation on the time within which the person on whom such mail service has been made may respond thereto shall be increased by 2 days.

(Sec. 19, 48 Stat. 85, sec. 23, 48 Stat. 901, as amended, sec. 20, 49 Stat. 839, sec. 319, 53 Stat. 1173, sec. 38, 211, 54 Stat. 841, 855, (16 U.S.C. 77a, 77b, 79c, 77sec, 80a-37, 80b-11)).

By the Commission.

GEORGE A. FITZSIMMONS,  
Secretary.

MAY 12, 1976.

[FR Doc.76-15069 Filed 5-21-76;8:45 am]

\* Since Rule 23(b) is a procedural rule, the amendment of this rule is exempt from the publication of notice provisions of 5 U.S.C. § 553(b).

[Release No. 35-19392; File No. 87-553]

#### PART 250—GENERAL RULES AND REGULATIONS, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

##### Clarification of Distinction Between Insurance Companies and Investment Bankers; Correction

In FR Doc. 76-5721, appearing at page 8767 in the FEDERAL REGISTER of March 1, 1976, the text at the top of the middle column on page 8768 in § 250.70(c) (4) (ii) should read "other types of corporate securities, or (iii) \* \* \*". The deleted sentence reading "Investment banker" shall include a corporation a majority of whose stock having the unrestricted right to vote for the election of directors is owned by an investment banker" should be inserted at the end of § 250.70(c) (4) the paragraph beginning "As used in this subparagraph (c) (4), \* \* \*".

GEORGE A. FITZSIMMONS,  
Secretary.

#### Title 18—Conservation of Power and Water Resources

##### CHAPTER I—FEDERAL POWER COMMISSION

[Docket No. RM76-12]

#### PART 1—RULES OF PRACTICE AND PROCEDURE

##### PART 2—GENERAL POLICY AND INTERPRETATIONS

###### Date for Filing Comments

In the matter of public suggestions, comments and proposals concerning prospective regulatory policy issues and problems.

Notice setting date for filing comments pursuant to Order No. 547.

MAY 17, 1976.

On April 1, 1976, the Commission issued Order No. 547 (41 FR 15003) prescribing a new Section 2.1a of the Commission's general policy and interpretations and adding a new Section 1.7(e) of the Commission's rules of practice and procedure to encourage the submission by the public of suggestions, comments or proposals relating to substantial issues or problems which will face the Commission in future months.

The order contemplates that suggestions, comments or proposals may be submitted by the public at any time. Initially, the Commission wishes to consider any such suggestions as a group and to this end it would be useful if a deadline were established for the filing of such comments. In the future the Commission may consider public suggestions on an ad hoc basis or may again choose to consider them in groups and establish further deadlines. The establishment of a deadline in no way affects the right of a person to file suggestions at any time.

Notice is hereby given that any public suggestions, comments or proposals to be

considered by the Commission, initially, pursuant to Order No. 547, shall be filed on or before July 1, 1976. All such filings shall comply with the requirements set forth in Order No. 547.

KENNETH F. PLUMB,  
Secretary.

#### Title 19—Customs Duties

##### CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 76-142]

#### PART 1—GENERAL PROVISIONS

##### Ports of Entry—Customs Regulations Amendment

On March 1, 1976, a notice of a proposal to extend the port limits of Charleston, South Carolina, in the Charleston, South Carolina, Customs district (Region IV) was published in the FEDERAL REGISTER (41 FR 8800). No comments were received regarding the proposal.

Accordingly, by virtue of the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by Executive Order No. 10289, September 17, 1951 (3 CFR Ch. II), and pursuant to authority provided by Treasury Department Order No. 190, Rev. 10 (40 FR 2216), the port limits of Charleston, South Carolina, in the Charleston, South Carolina, Customs district (Region IV), are extended to include all the territory within the following boundaries:

From that point on the Atlantic Coast on Sullivan's Island, South Carolina, where Station 22½ Street, if extended, would intersect the Atlantic Ocean, northwest on Station 22½ Street, which becomes State Highway 703, to U.S. Route 17, then north on U.S. Route 17 to State Highway 41, then northwest on State Highway 41 to State Highway 33, then west on State Highway 33 to State Highway 98, then northwest on State Highway 98 to French Quarter Creek, then northwest along French Quarter Creek to the East Branch of the Cooper River, then west along the East Branch of the Cooper River until it becomes the West Branch of the Cooper River, then northwest along the West Branch of the Cooper River to the Seaboard Coast Line Railroad right-of-way, then southwest on the Seaboard Coast Line Railroad right-of-way to State Highway 9, then northwest on State Highway 9 to U.S. Route 17A, then west on U.S. Route 17A to Interstate Route 28, then northwest on Interstate Route 28 to State Highway 16, then southwest on State Highway 16 to State Highway 22, then west and south on State Highway 22 to State Highway 642, then southeast on State Highway 642 to State Highway 165, then south on State Highway 165 to State Highway 81, then southeast on State Highway 81 to State Highway 171, then south on State

Highway 171 to that point on Folly Island, South Carolina, where State Highway 171, if extended, would intersect the Atlantic Ocean, and from that point northeast along a line drawn to that point on Sullivan's Island, South Carolina, where Station 22½ Street, if extended, would intersect the Atlantic Ocean.

To reflect this change, the table in § 1.2(c) of the Customs Regulations (19 CFR 1.2(c)) is amended by deleting the language "(including territory described in T.D. 53994)." which appears after "Charleston" in the column headed "Ports of entry" in the Charleston, South Carolina, Customs district (Region IV) and adding in lieu thereof the language "(including the territory described in T.D. 76-142)."

(Sec. 1, 37 Stat. 434, sec. 1, 38 Stat. 623, as amended (19 U.S.C. 1, 2).)

Effective date: This amendment shall become effective June 23, 1976.

Dated: May 14, 1976.

DAVID R. MACDONALD,  
Assistant Secretary  
of the Treasury.

[FR Doc.76-15088 Filed 5-21-76;8:45 am]

[T.D. 76-144]

#### PART 10—ARTICLES CONDITIONALLY FREE, SUBJECT TO A REDUCED RATE, ETC.

##### Amendment of Instruments of International Traffic

On August 4, 1975, a notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 32751), which proposed to amend paragraph (d) of section 10.41a of the Customs Regulations (19 CFR 10.41a(d)) to provide that containers of United States origin, which have not been increased in value or improved in condition by any process of manufacture or other means while abroad and which are released upon arrival in the United States as instruments of international traffic, are not subject to entry and the payment of duty if they are thereafter withdrawn from use in international traffic for use in local traffic within the United States.

Under section 10.41a(d), if an instrument of international traffic of United States or foreign origin is diverted to point-to-point local traffic in the United States or is otherwise withdrawn in the United States from use as an instrument of international traffic, it becomes subject to entry and the payment of applicable duty. It has been determined that the provisions of section 10.41a(d) are unduly restrictive insofar as they subject United States containers released as instruments of international traffic to the same limitations on use in United States local traffic that apply to foreign containers so released. The amendments to section 10.41a will necessarily require an amendment of the Bond for the Control of Certain Instruments of International Traffic, Customs Form 7687, to provide that containers of United States origin are not subject to

entry and the payment of duty if they are withdrawn from use in international traffic after release under section 10.41a.

Interested persons were given 30 days from the date of publication of the notice to submit data, views or arguments with respect to the proposed amendment. After consideration of the comments received, it has been determined that the proposed amendment should be adopted as set forth in the notice of proposed rulemaking.

Accordingly, the proposed amendment is adopted as set forth below.

Effective date: This amendment shall become effective June 23, 1976.

VERNON D. ACREE,  
Commissioner of Customs.

Approved: May 18, 1976.

DAVID R. MACDONALD,  
Assistant Secretary  
of the Treasury.

Paragraph (d) of section 10.41a is amended to read as follows:

§ 10.41a Lift vans, cargo vans, shipping tanks, skids, pallets, and similar instruments of international traffic; repair components.

(d) If an instrument of foreign origin, or of United States origin which has been increased in value or improved in condition by a process of manufacture or other means while abroad, is released under this section and is subsequently diverted to point-to-point local traffic within the United States, or is otherwise withdrawn in the United States from its use as an instrument of international traffic, it becomes subject to entry and the payment of any applicable duties. An instrument of United States origin which has not been increased in value or improved in condition by a process of manufacture or other means while abroad and which is released under this section shall not be subject to entry or the payment of duty if it is so diverted or otherwise withdrawn.

(R.S. 251, as amended, sec. 624, 48 Stat. 759, 77A Stat. 14 (19 U.S.C. 60, 1202 (General Headnote 11, Tariff Schedules of the United States), 1624).)

[T.D. 76-143]

#### PART 153—ANTIDUMPING

##### Tuners (of the Type Used in Consumer Electronic Products) From Japan

On November 12, 1975, there was published in the FEDERAL REGISTER (40 FR 52747), a "Notice of Tentative Determination to Modify or Revoke Dumping Finding" with respect to tuners (of the type used in consumer electronic products) from Japan produced and sold for export to the United States by Tokyo Shibaura Electric Co., Ltd.

Reasons for the tentative determination were published in the above-mentioned notice, and interested persons were afforded an opportunity to make written submissions or request the opportunity to present oral views in connection therewith.

No written submissions or requests to present oral views having been received, I hereby determine that for the reasons stated in the above-mentioned notice, tuners (of the type used in consumer electronic products) from Japan are no longer being, nor are likely to be, sold in the United States at less than fair value by Tokyo Shibaura Electric Co., Ltd., and the above-mentioned finding of dumping is hereby modified to exclude tuners (of the type used in consumer electronic products) from Japan produced and sold by Tokyo Shibaura Electric Co., Ltd.

Accordingly, § 153.43 of the Customs Regulations (19 CFR 153.43) is hereby amended to show the exclusion from the finding of dumping of tuners (of the type used in consumer electronic products) from Japan produced and sold by Tokyo Shibaura Electric Co., Ltd.

Merchandise	Country	T.D.	Modified by—
Tuners (of the type used in consumer electronic products), except: (i) those produced and sold by Matsushita Electric Industrial Co., Ltd.; Matsushita Trading Co., Ltd.; (ii) those produced and sold by Victor Co. of Japan, Ltd.; and (iii) those produced and sold by Tokyo Shibaura Electric Co., Ltd.	Japan.....	76-257	76-80

This determination is published pursuant to § 153.41(d), Customs Regulations (19 CFR 153.41(d)).

(Secs. 201, 407, 42 Stat. 11, as amended, 18; 19 U.S.C. 160, 173.)

DAVID R. MACDONALD,  
Assistant Secretary  
of the Treasury.

MAY 18, 1976.

[FR Doc.76-15042 Filed 5-21-76;8:45 am]

#### Title 20—Employees' Benefits

##### CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Regulation No. 4]

#### PART 404—FEDERAL OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE

##### Retirement Test Monthly Exempt Amount

On September 17, 1975, there was published in the FEDERAL REGISTER (40 FR 42884) a revision to § 404.430 which relates to the method for determining an individual's excess earnings for years ending after December 1972. However, it has been brought to our attention that the wording of paragraph (a) of this section may be subject to misinterpretation. As it is currently stated, the regulation could be read to limit an individual's total exempt amount for a taxable year to one-half of his total earnings in

V  
4

U  
M  
I

excess of the monthly exempt amount multiplied by the number of months the worker's earnings exceeded the monthly exempt amount rather than the number of months in the taxable year.

The beneficiary's excess earnings on account of work directly affect the amount deducted from the monthly benefit amount. The method of determining the individual's excess earnings on account of work is prescribed in Section 203(f)(3) of the Social Security Act, as amended. The proposed amendment clarifies the existing regulation, which reflects this provision of the Act, to avoid a possible misunderstanding as to how the amount of a beneficiary's excess earnings in a given taxable year is figured. The Secretary thus finds that publication with Notice of Proposed Rule Making, as well as publication at least 30 days prior to the effective date, is unnecessary.

Although the Notice of Proposed Rule Making is being dispensed with for the above reasons, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in triplicate to the Commissioner of the Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Maryland 21203.

Copies of all comments received in response to this notice will be available for public inspection during regular business hours at the Washington Inquiries Section, Office of Information, Social Security Administration, Department of Health, Education, and Welfare, North Building, Room 4146, 330 Independence Avenue, S.W., Washington, D.C. 20201, until June 23, 1976.

(Sections 203, 204, and 1102 of the Social Security Act; 49 Stat. 623, as amended, 49 Stat. 624, as amended, 49 Stat. 647, as amended; 42 U.S.C. 403, 405, 1302.)

Effective date: These regulations shall be effective May 24, 1976.

(Catalog of Federal Domestic Assistance Programs Nos. 13.802, Social Security—Disability Insurance; 13.803, Social Security—Retirement Insurance; 13.805, Social Security—Survivors Insurance.)

Dated: April 16, 1976.

J. B. CARDWELL,  
Commissioner of Social Security.

Approved: May 18, 1976.

MARJORIE LYNCH,  
Acting Secretary of Health,  
Education, and Welfare.

Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

Section 404.430 is amended by revising the material in paragraph (a) preceding paragraph (a) (1) to read as follows:

§ 404.430 Excess earnings; defined for taxable years ending after December 1972.

(a) Method of determining excess earnings for years ending after December 1972. For taxable years ending after December 1972, an individual's excess earnings for a taxable year are 50 percent of his earnings (as described in

§ 404.429) for such year which are in excess of the product obtained by multiplying the number of months in such taxable year by the following applicable monthly exempt amount:

[FR Doc. 76-15060 Filed 5-21-76; 8:45 am]

#### Title 21—Food and Drugs

### CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

#### PART 510—NEW ANIMAL DRUGS

#### PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

##### Tylosin

The Food and Drug Administration has evaluated a supplemental new animal drug application (91-465V) filed by the Eugene Ingmand Co., Box 22, Red Oak, IA 51566, proposing revised labeling for the safe and effective use of a tylosin premix for the manufacture of swine feed. The application is approved, effective May 24, 1976.

The Commissioner of Food and Drugs is amending §§ 510.600 and 558.625 (21 CFR 510.600 and 558.625) to reflect this approval.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20852, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 510 and 558 are amended as follows:

1. In Part 510, § 510.600 is amended by adding a new sponsor, alphabetically to paragraph (c)(1) and numerically to paragraph (c)(2), to read as follows:

§ 510.600 Names, addresses, and code numbers of sponsors of approved applications.

(c) . . . . .  
(1) . . . . .

Firm name and address: . . . . . Drug listing No. . . . .

The Eugene Ingmand Co., Box 22, Red Oak, Iowa 51566 . . . . . 021533

(2) . . . . .

Drug listing No. . . . . Firm name and address . . . . .

021533 . . . . . The Eugene Ingmand Co., Box 22, Red Oak, Iowa 51566.

2. In Part 558, § 558.625 is amended by adding paragraph (b)(49) to read as follows:

#### § 558.625 Tylosin.

(b) . . . . .  
(49) To 021533: 10 grams per pound; paragraph (f)(1)(vi)(a) of this section.

Effective date: This regulation shall be effective May 24, 1976.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: May 17, 1976.

C. D. VAN HOUWELING,  
Director,  
Bureau of Veterinary Medicine.

[FRL 547-5; FAPSH5086/T14]

#### PART 561—TOLERANCES FOR PESTICIDES IN ANIMAL FEEDS ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

##### O-Ethyl S,S-diphenyl Phosphorodithioate

On September 9, 1975 the Environmental Protection Agency (EPA) announced (40 FR 41774) that in response to a petition (FAP 5H5086) filed by the Chemagro Agricultural Div., Mobay Chemical Co., PO Box 4913, Kansas City MO 64120, 21 CFR 561 was amended to permit the experimental use of the fungicide O-ethyl S,S-diphenyl phosphorodithioate on growing rice with a tolerance of 0.3 part per million (ppm) for residues of the fungicide in rice hulls in accordance with an experimental use permit that was issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

Chemagro Agricultural Div. has requested a one-year extension of this tolerance both to permit continued testing to obtain additional data and to permit the marketing of rice hulls treated in accordance with the experimental use permit which is to be extended concurrently under FIFRA.

The scientific data reported and other relevant material have been evaluated, and it has been determined that the fungicide may be safely used in accordance with the provisions of the experimental use permit issued under FIFRA. It has been further determined that since residues of the fungicide may result in rice hulls from the agricultural uses provided for by the experimental use permit, the one-year extension of the food additive regulation, 21 CFR 561.231, requested by the petitioner should include a tolerance limitation.

Accordingly, a food additive regulation is established as set forth below. Any person adversely affected by this regulation may, on or before June 23, 1976, file written objections with the Hearing Clerk, Environmental Protection Agency, East Tower, Room 1019, 401 M St. SW, Washington DC 20460. Such objections should be submitted in triplicate and should specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are

supported by grounds legally sufficient to justify the relief sought.

(Sec. 409(c)(1) and (4) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 345(c)(1) and (4)).)

Effective on May 24, 1976, § 561.231 is revised as set forth below.

Dated: May 17, 1976.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

Section 561.231 is revised to read as follows:

§ 561.231 O-ethyl S,S-diphenyl phosphorodithioate.

(a) A tolerance of 0.3 part per million is established for residues of the fungicide O-ethyl S,S-diphenyl phosphorodithioate in rice hulls resulting from application of the fungicide to growing rice. Such residues may be present therein only as a result of application of the fungicide in accordance with the provisions of an experimental use permit that expires May 13, 1977.

(b) Residues in rice hulls not in excess of 0.3 part per million resulting from use as described in paragraph (a) of this section remaining after expiration of the experimental use program will not be considered to be actionable if the fungicide is legally applied during the term of and in accordance with the provisions of the experimental use permit and feed additive tolerance.

(c) Chemagro Agricultural Div., Mobay Chemical Co. shall immediately notify the Environmental Protection Agency of any findings from the experimental use that have a bearing on safety. The firm shall also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the Environmental Protection Agency or the Food and Drug Administration.

[FR Doc. 76-14987 Filed 5-21-76; 8:45 am]

#### Title 24—Housing and Urban Development CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FI-1187]

#### PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

##### Suspension of Community Eligibility

The purpose of this notice is to list communities wherein the sale of flood insurance as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) will be suspended because of noncompliance with the program regulations (24 CFR Part 1909 et seq.)

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community identified by the Secretary of Housing and Urban Development.

The requirement applies to all identified special flood hazard areas within the United States, and no such financial assistance can legally be provided for acquisition or construction in these areas unless the community has entered the program and insurance is purchased. Accordingly, for communities listed under this Part such restriction exists as of the effective date of suspension because insurance, which is required, cannot be purchased.

Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities suspended in this notice no longer meet that statutory requirement. Accordingly, the communities are suspended on the effective date in the list below:

#### § 1914.4 List of Eligible Communities.

State	County	Location	Effective date of authorization of sale of flood insurance for area	Hazard area identified	Community No.
Kansas	Butler	El Dorado, city of	Apr. 21, 1972, emergency; May 3, 1976, regular; July 5, 1976, suspended.	May 10, 1974	200989A
Missouri	Gasconade	Hermann, city of	Aug. 13, 1971, emergency; Dec. 31, 1971, suspended; Apr. 24, 1974, reinstated; Mar. 5, 1976, regular; June 30, 1976, suspended.	May 3, 1974	230141A
Do.	St. Louis	Ladue, city of	Oct. 22, 1971, emergency; Mar. 10, 1976, regular; Sept. 12, 1976, suspended.	Mar. 15, 1974	240863B

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended, 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, Feb. 27, 1969) as amended 39 FR 2787, Jan. 24, 1974.

Issued: May 18, 1976.

HOWARD B. CLARK,  
Acting Federal Insurance Administrator.  
[FR Doc. 76-15124 Filed 5-21-76; 8:45 am]

#### PART 1916—CONSULTATION WITH LOCAL OFFICIALS

[Docket No. FI-1188]

#### Changes Made in Determinations of the Township of Clark, New Jersey, Base Flood Elevations

On January 8, 1976, at 41 FR 1475, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas. The list included Flood Insurance Rate Maps for portions of the Township of Clark, New Jersey.

The Federal Insurance Administration, after consultation with the Chief Executive Officer of the community, has determined that it is appropriate to modify the base (100-year) flood elevations of some locations in the Township of Clark. These modified elevations are currently in effect and amend the Flood Insurance Rate Map, which was in effect prior to this determination. A revised rate map will be published as soon as possible. The modifications are made pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234) and are in accordance with the Na-

tional Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968, P.L. 90-448) 42 U.S.C. 4001-4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 345290B, and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

From the date of this notice, any person has 90 days in which he can request through the community that the Federal Insurance Administrator reconsider the changes. Any request for reconsideration must be based on knowledge of changed conditions or new scientific or

technical data. All interested parties are on notice that until the 90-day period elapses, the Administrator's new determination of elevations may itself be changed.

Any persons having knowledge or wishing to comment on these changes should immediately notify:

Mayor Bernard G. Yarusavage  
315 Westfield Avenue  
Clark, New Jersey 07066

Also, at this location is the map showing the new base flood elevations. This map is a copy of the one that will be printed. The numerous changes made in the base flood elevations on the Township of Clark, New Jersey Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Township of Clark, New Jersey map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974)

Issued: May 4, 1976.

H. B. CLARK,  
Acting Federal  
Insurance Administrator.

[FR Doc.76-15090 Filed 5-21-76; 8:45 am]

[Docket No. FI-825]

#### PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for the City of Groves, Texas

On January 7, 1976, at 41 FR 1278, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in the City of Groves, Texas. Since that date, ninety days have elapsed, and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of November 28, 1975 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (P.L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90-448) 42 U.S.C. 4001-4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 485475 D and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out

the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Groves Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Groves map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: May 11, 1976.

H. B. CLARK,  
Acting Federal Insurance  
Administrator.

[FR Doc.76-15125 Filed 5-21-76; 8:45 am]

[Docket No. FI-831]

#### PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for the Town of Griffing Park, Texas

On January 7, 1976, at 41 FR 1278, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in the Town of Griffing Park, Texas. Since that date, ninety days have elapsed, and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of November 28, 1975, and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (P.L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90-448) 42 U.S.C. 4001-4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 485474 C and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Griffing Park Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Griffing Park map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: May 11, 1976.

H. B. CLARK,  
Acting Federal  
Insurance Administrator.

#### PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for the Town of Lakeview, Texas

On January 7, 1976, at 41 FR 1278, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in the Town of Lakeview, Texas. Since that date, ninety days have elapsed, and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of November 28, 1975, and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (P.L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90-448) 42 U.S.C. 4001-4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 485485 C and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Lakeview Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Lakeview map.

## RULES AND REGULATIONS

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: May 11, 1976.

[Docket No. FI-1189]

#### PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Changes Made in Determinations of the City of Lenoir City, Tennessee, Base Flood Elevations

On January 8, 1976, at 41 FR 1476, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas. The list included Flood Insurance Rate Maps for portions of the City of Lenoir City, Tennessee.

The Federal Insurance Administration, after consultation with the Chief Executive Officer of the community, has determined that it is appropriate to modify the base (100-year) flood elevations of some locations in the City of Lenoir City. These modified elevations are currently in effect and amend the Flood Insurance Rate Map, which was in effect prior to this determination. A revised rate map will be published as soon as possible. The modifications are made pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (P.L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968, P.L. 90-448) 42 U.S.C. 4001-4128; and 24 CFR Part 1916.

For rating purposes, the new community number is 475438A, and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

From the date of this notice, any person has 90 days in which he can request through the community that the Federal Insurance Administrator reconsider the changes. Any request for reconsideration must be based on knowledge of changed conditions or new scientific or technical data. All interested parties are on notice that until the 90-day period elapses, the Administrator's new determination of elevations may itself be changed.

Any persons having knowledge or wishing to comment on these changes should immediately notify:

Mayor Joe D. Grayson, P.O. Box 445, Lenoir City, Tennessee 37771.

Also, at this location is the map showing the new base flood elevations. This map is a copy of the one that will be printed. The numerous changes made in the base flood elevations on the City of Lenoir City Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the City of Lenoir City, Tennessee map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974)

Issued: May 11, 1976.

H. B. CLARK,  
Acting Federal  
Insurance Administrator.

[Docket No. FI-828]

#### PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for the City of Nederland, Texas

On January 7, 1976, at 41 FR 1279; the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in Nederland, Texas. Since that date, ninety days have elapsed, and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of November 28, 1975 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (P.L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90-448) 42 U.S.C. 4001-4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 485492 C and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Nederland Flood Insurance Rate Map make it administratively infeasible to publish in

this notice all of the base flood elevation changes contained on the Nederland map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: May 4, 1976.

#### PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for Pepin County, Wisconsin

On January 7, 1976, at 41 FR 1280, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in Pepin County, Wisconsin. Since that date, ninety days have elapsed, and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of January 2, 1976 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (P.L. 93-234) and are in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968, P.L. 90-448) 42 U.S.C. 4001-4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 555570 C and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the modified elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Pepin County Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Pepin County map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 F.R. 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's dele-

gation of authority to Federal Insurance Administrator 34 F.R. 2680, February 27, 1969, as amended by 39 F.R. 2787, January 24, 1974.)

Issued: May 4, 1976.

Title 38—Pensions, Bonuses, and  
Veterans' Relief

CHAPTER I—VETERANS  
ADMINISTRATION

PART 21—VOCATIONAL REHABILITATION  
AND EDUCATION

Subpart D—Administration of Educational  
Benefits; 38 U.S.C. Chapters 34, 35 and  
36

AUTHORITY TO BAR ADVANCE PAYMENTS

On page 7790 of the FEDERAL REGISTER of February 20, 1975, there was published a notice of proposed regulatory development to amend § 21.4136 to provide Directors of regional offices and VA centers with discretionary authority to bar advance payments at schools which are unable to comply with the legal requirements for delivery of the checks and certification of the enrollment or which cannot provide security for checks until delivery is made.

Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulation.

No written comments have been received and the proposed regulation is hereby adopted without change and is set forth below.

Effective date: This VA Regulation is effective May 18, 1976.

Approved: May 18, 1976.

By direction of the Administrator.

[SEAL] ODELL W. VAUGHN,  
Deputy Administrator.

In § 21.4136, paragraph (j)(2) (introductory portion preceding subdivision (4)) is revised to read as follows:

§ 21.4136 Rates, educational assistance allowance; 38 U.S.C. Ch. 34.

(j) Advance payment.

(2) Payment. Upon receipt of an application and if there is no evidence in the veteran's, serviceman's, or servicewoman's file showing that he or she is not eligible for such an advance the check for the allowance, made payable to the veteran, serviceman or servicewoman shall be mailed to the institution for delivery to the veteran, serviceman or servicewoman upon registration. No delivery by the institution shall be made more than 30 days in advance of commencement of his or her program. If delivery is not made within 30 days after commencement of the program, the institution shall return the check to the Veterans Administration. The director of the regional office or VA center of jurisdiction may direct that advance pay-

ments shall not be made to veterans and other eligible persons if the institution demonstrates an inability to comply with these requirements, if the institution fails to adequately provide for the safekeeping of the checks prior to delivery to the student or return to the Veterans Administration, or if he or she determines, based upon compelling evidence, that the institution demonstrates its inability to discharge its responsibilities under the advanced payment program.

Correction

In FR Doc. 76-14349 appearing at page 20408 in the issue for Tuesday, May 18, 1976, the following correction should be made. On page 20408, in the third column, the second full paragraph, the deadline for the receipt of comments, which reads "May 18, 1976" should read "June 17, 1976".

SUBCHAPTER E—PESTICIDE PROGRAMS

[PP6E1681/R05; FRL 547-1]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

2-Methyl-4-chlorophenoxyacetic Acid

On March 1, 1976, the Environmental Protection Agency (EPA) published a notice of proposed rulemaking in the FEDERAL REGISTER (41 FR 8798) to amend 40 CFR 180.339 to include tolerances for residues of the herbicide 2-methyl-4-chlorophenoxyacetic acid in or on the raw agricultural commodities sorghum grain at 0.1 part per million (ppm) and sorghum fodder and forage at 20 ppm resulting from application of the herbicide in its acid form or in its sodium salt, amine salt, or ester formulations. This notice of proposed rulemaking was published in response to a pesticide petition (PP 6E1681) submitted to the Agency by Dr. C. C. Compton, Coordinator, Inter-regional Research Project No. 4, State Agricultural Experiment Station, Rutgers University, New Brunswick NJ 08903, on behalf of the IR-4 Technical Committee and the State Agricultural Experiment Stations of Texas and Nebraska. No comments or requests for referral to an advisory committee were received in regard to this notice of proposed rulemaking.

Effective May 24, 1976, therefore, 40 CFR 180.339 is amended as proposed, with editorial corrections as noted. These tolerances will protect the public health.

Any person adversely affected by this regulation may, on or before June 23, 1976, file written objections with the Hearing Clerk, Environmental Protection Agency, Room 1019, East Tower, 401 M St. SW., Washington, D.C. 20460. Such objections should be submitted in quintuplicate and should specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective May 24, 1976, 40 CFR 180.339 is amended as set forth below.

Dated: May 18, 1976.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

(Sec. 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)).)

Part 180, Subpart C, § 180.339 is amended by adding tolerances for the raw agricultural commodities sorghum fodder, forage, and grain, by editorially restructuring the section into an alphabetized columnar format, and by inserting the negligible residue abbreviation (N) in lieu of the footnotes used in the notice of proposed rulemaking, to read as follows:

§ 180.339 2-methyl-4-chlorophenoxyacetic acid: tolerances for residues.

(a) Tolerances are established for residues of the herbicide 2-methyl-4-chlorophenoxyacetic acid from application of the herbicide in the acid form or in the form of its sodium, ethanolamine, diethanolamine, triethanolamine, isopropanolamine, diisopropanolamine, triisopropanolamine, or dimethylamine salts or its isooctyl or butoxyethyl esters in or on raw agricultural commodities as follows:

Commodity:	Parts per million
Barley, forage.....	20
Barley, grain.....	0.1 (N)
Barley, straw.....	2
Flax, straw.....	2
Flaxseed.....	0.1 (N)
Grasses, pasture.....	300
Grasses, rangeland.....	300
Grass, hay.....	20
Oats, forage.....	20
Oats, grain.....	0.1 (N)
Oats, straw.....	2
Peas.....	0.1 (N)
Peavines.....	0.1 (N)
Peavines, hay.....	0.1 (N)
Rice, grain.....	0.1 (N)
Rice, straw.....	2
Rye, forage.....	20
Rye, grain.....	0.1 (N)
Rye, straw.....	2
Sorghum, fodder.....	20
Sorghum, forage.....	20
Sorghum, grain.....	0.1
Wheat, forage.....	20
Wheat, grain.....	0.1 (N)
Wheat, straw.....	2

(b) Tolerances are established for combined negligible residues (N) of the herbicide 2-methyl-4-chlorophenoxyacetic acid and its metabolite 2-methyl-4-chlorophenol in or on the following raw agricultural commodities:

Commodity:	Parts per million
Cattle, fat.....	0.1 (N)
Cattle, mby.....	0.1 (N)
Cattle, meat.....	0.1 (N)
Goats, fat.....	0.1 (N)
Goats, mby.....	0.1 (N)
Goats, meat.....	0.1 (N)
Hogs, fat.....	0.1 (N)
Hogs, mby.....	0.1 (N)
Hogs, meat.....	0.1 (N)
Horses, fat.....	0.1 (N)
Horses, mby.....	0.1 (N)
Horses, meat.....	0.1 (N)
Milk.....	0.1 (N)
Sheep, fat.....	0.1 (N)
Sheep, mby.....	0.1 (N)
Sheep, meat.....	0.1 (N)

SUBCHAPTER N—EFFLUENT GUIDELINES  
AND STANDARDS

[FRL 546-8]

PART 440—ORE MINING AND DRESSING  
POINT SOURCE CATEGORY

Notice of Suspension

On November 6, 1975, notice was given that effluent limitations and guidelines for existing sources to be achieved by the application of best practicable control technology currently available as set forth in interim final form were promulgated by the Environmental Protection Agency (EPA). The regulation established Part 440—ore mining and dressing point source category and is applicable to existing sources for the iron ore subcategory (Subpart A), the base and precious metals subcategory (Subpart B), the bauxite subcategory (Subpart C), the ferroalloy ores subcategory (Subpart D), the uranium, radium and vanadium ore subcategory (Subpart E), the mercury ore subcategory (Subpart F), and the titanium ore subcategory (Subpart G) of the ore mining and dressing point source category pursuant to sections 301, 304 (b) (c), of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1311, 1314 (b), and (c), 86 Stat. 816 et seq.; P.L. 92-500) (the Act).

When 40 CFR 440 was promulgated in interim final form, comments on 40 CFR 440 and comments on the development document supporting the regulation were solicited.

A number of comments were received related to the adequacy of the data relied upon by the Agency as a basis for promulgating the base and precious metals subcategory (Subpart B), that portion of the ferroalloy ores subcategory (Subpart D) which is applicable to the quantity of pollutants or pollutant properties discharged from mills processing ferroalloy ores by leaching techniques (either acid or alkaline) and associated chemical beneficiation techniques, and the uranium, radium and vanadium subcategory (Subpart E). Additional data has been

supplied and additional data is to be made available to the Agency relative to these portions of the regulation.

In that serious questions have been raised concerning the adequacy of the data base used to support portions of this regulation, the Agency is reevaluating the technical and economic basis for these portions of the ore mining and dressing point source category. This need for reevaluation prompts the Agency to suspend the effectiveness of these portions of the regulation while these portions of the regulation are being reviewed by the Agency.

Interested persons are encouraged to submit written comments on the base and precious metals subcategory (Subpart B), that portion of the ferroalloy ores subcategory (Subpart D) which is applicable to the quantity of pollutants or pollutant properties discharged from mills processing ferroalloy ores by leaching techniques (either acid or alkaline) and associated chemical beneficiation techniques and the uranium, radium and vanadium subcategory (Subpart E). Comments should be submitted in triplicate to the Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, Attention: Distribution Officer, WH-552. All comments received before July 15, 1976, will be considered and included in the administrative record. Steps previously taken by the Environmental Protection Agency to facilitate public response within this time period are outlined in EPA's Advance Notice Concerning Public Review Procedures published on August 6, 1973 (38 FR 21202).

A copy of all public comments will be available for inspection and copying at the EPA Public Information Reference Unit, Room 2922 (EPA Library), Waterside Mall, 401 M Street, SW, Washington, D.C. 20460.

In consideration of the foregoing discussion, 40 CFR 440.22, 40 CFR 440.42(a) (5) and 40 CFR 440.52 are suspended until November 1, 1976. Prior to November 1, 1976, the Agency anticipates that these sections will be revised or amended.

Dated: May 17, 1976.

RUSSELL E. TRAIN,  
Administrator.

[FR Doc.76-14982 Filed 5-21-76;8:45 am]

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 160e—CONSUMERS' EDUCATION PROGRAM

Grants and Contracts

Notice of proposed rulemaking was published in the FEDERAL REGISTER on November 26, 1975 (40 FR 54805-54811) setting forth proposed regulations pursuant to Section 811 of the Elementary and Secondary Education Act, as amended by Pub. L. 93-380, 20 U.S.C. 887d.

The proposed regulations set forth rules and criteria governing grant and

contract awards by the Commissioner of Education to State educational agencies, local educational agencies, institutions of higher education, and other public and private agencies, organizations and institutions for projects designed to provide consumers' education to the public.

A. Summary of comments on the proposed regulation: changes in the regulation. Interested persons were invited to submit written comments, suggestions, or objections regarding the proposed rules. Pursuant to this invitation, the following comments were submitted to the Commissioner of Education regarding the proposed regulation. After consideration of each comment, a response is set forth stating the change which has been made, or the reasons why no change is deemed necessary. General responses precede those related to specific sections. The comments are arranged in order of the sections of the final regulation except where a general response was required.

GENERAL

1. Comment. One commenter suggested that provisions for direct awards by the Commissioner to local agencies and institutions were not conducive to the coordination of Federal, State, and local efforts in education and suggested that the Commissioner consider funding the program through the States.

Response. No change has been made in the regulation. The Commissioner of Education is committed to the proper and efficient administration of Federal aid to education programs on a State-administered basis when authorized by law. In this program, the statute provides for direct grants and contracts to eligible applicants, including State educational agencies. No provision is made for a State-administered plan. The requirement in section 811(b)(1)(C) of the Act and § 160e.7 of the regulation that local educational agencies submit applications to State educational agencies for review provides an opportunity for the State educational agency to note possible duplication of effort and make recommendations conducive to coordination within the State. Though the State educational agency is not given authority under the statute to approve or disapprove local educational agency applications, the State recommendations will be carefully considered by the Commissioner in reviewing applications against the evaluation criteria in this regulation.

2. Comment. One commenter suggested amendments to sections 160e.1, 160e.4, 160e.5, 160e.6, 160e.9, 160e.10, 160e.11, 160e.12, 160e.13, and 160e.14 designed to make express reference to consumers' education activities for adults as authorized activities, to include such adult education in the priority funding areas, and to make projects more responsive to the needs of adults.

Response. The concerns of the commenter that the regulation make specific reference to the eligibility of adult education activities in consumers' education are well-taken, and amendments have been made to this end in sections 160e.1

V  
4  
1  
1  
0  
1

I

(b)(2), 160e.4(a)(2), and 160e.10(a)(1). In addition, in accordance with the commenter's suggestions, § 160e.14(b) has been amended to indicate that the Commissioner's review of funded curricula and materials will be to ensure that they are non-discriminatory on the basis of age as well as race and sex. Adult education activities have not been added as a distinct priority area for funding since consumers' education for adults would certainly be a prominent aspect of any community consumers' education program, which receives priority consideration for grants as model projects under § 160e.4(c)(2)(i) or as the recipient of pre-service or in-service training under § 160e.4(c)(2)(ii). In addition, under § 160e.4(c)(2)(iii) priority is accorded to projects to develop programs, curricula, or materials designed to provide consumers' education to older persons (as well as to other groups of persons with special educational needs in the area of consumers' education). Other specific references to adults suggested by the commenter would not have involved any substantive change and would have required the addition of unnecessary detail to the regulation. Therefore, they were not added to the regulation.

3. *Comment.* One commenter suggested a number of amendments to sections 160e.3(d), 160e.4(a)(3), 160e.4(c)(2)(ii), 160e.13, and 160e.16(b) to highlight the eligibility of teacher trainers and counselors to participate as training recipients in pre-service and in-service training activities, and to include such persons in the priority funding area involving pre-service and in-service training.

*Response.* No change has been made in the regulation. Teacher trainers and counselors are eligible recipients of training under each of the subject provisions, which include as eligible recipients "teachers and other educational personnel" (among others). However, they would come within the priority funding area only if they were working at the elementary or secondary school levels or in community consumers' education programs.

#### § 160e.2 Definitions.

4. *Comment.* A commenter suggested that the term "consumers' education" be defined.

*Response.* No change has been made in the regulation. "Consumers' Education" already is effectively defined in § 160e.3(a)-(d) of the regulation.

#### § 160e.3 Nature of Consumers' Education.

5. *Comment.* One commenter stated that § 160e.3 does not adequately recognize the long-standing work of home economics in consumers' education.

*Response.* No change has been made in the regulation. This section lists examples of subject matter suitable for consideration under the Consumers' Education Program. The regulation has not enumerated specific disciplines related to consumers' education out of the Office of Education's concern not to create the inference that certain disciplines are favored.

6. *Comment.* A commenter expressed the view that the reference to programs with an interdisciplinary approach in § 160e.3(b) was too general. This commenter felt that the regulation did not encourage correlated and coordinated comprehensive models. The commenter specifically suggested that elementary, secondary, and adult programs should be coordinated to provide knowledge and skills which are ongoing and progressive.

*Response.* No change has been made in the regulation. The regulation provides that projects "may involve interdisciplinary educational approaches" in order to clarify that a program of consumers' education need not be limited within a specific subject matter or discipline. Attention to consumers' education cutting across age and grade levels is given in that part of the regulation authorizing and giving priority to community consumers' education programs designed to serve all age groups in a community. Apart from the community projects, the regulation does not impose requirements related to the development of comprehensive projects involving multi-level education. Program funds are too limited to support comprehensive institutional programs, and the regulation permits projects focusing on very specific or limited model programs or products which can be developed with limited funds and which will then be available for replication by others.

7. *Comment.* One commenter suggested that it be made clear that the concept of "preparing consumers for participation in the marketplace" encompassed education for consumption of public utility services such as electricity, gas, telephone service, or water. The same comment recommended that the regulation expressly include education for consumers with respect to governmental regulatory processes and the operation of public utilities.

*Response.* The Commissioner agrees with this comment and has accordingly amended § 160e.3.

#### § 160e.4 Types of projects; funding priorities.

8. *Comment.* One commenter expressed hope that activities supported under the program would include areas related to outdoor recreation such as the purchase of recreation subdivision properties, backpacking equipment, bicycles, motorcycles, campers, snowmobiles, and skiing equipment.

*Response.* No change has been made in the regulation. Consumers' education can include education with respect to major purchases (§ 160e.3(c)(5)), which might include purchases in the area of outdoor recreation, and purchases in outdoor recreation might therefore constitute part of the subject matter of a consumers' education program. However, an express reference to outdoor recreation in the regulation would be overly specific. If added, it would warrant the addition of countless other specific areas of purchases and might mislead applicants into focusing projects on the provision of consumers' information in specific areas rather than on consumers' education as defined in § 160e.3.

9. *Comment.* One commenter expressed the viewpoint that there is a need for further research (for example, into how economic insights may be effectively communicated) before substantial development is undertaken in the area of consumers' education. The comment articulated a hope that projects which embedded research into them would be funded.

*Response.* Research projects per se are authorized by both the statute and regulation. The regulation emphasizes research not in terms of the funding of specific research projects, but rather by the nature of the program strategy with its heavy emphasis on development and validation of exemplary materials and programs. Research components in the sense of evaluation of materials and programs are required in every grant project. In addition, in response to the comment, the regulation has been amended to clarify that research components are allowable under all of the grant areas (§ 160e.4(d)). The Consumers' Education Resource Centers described in § 160e.11 will be, in part, research operations designed to make existing research more available than it is presently.

The regulation thus reflects the importance of research connected with efforts in consumers' education but has not eliminated projects which include only an evaluation research component or projects which have not been designed by researchers.

10. *Comment.* A commenter asked what choices are available under contracts "to prepare and distribute consumers' education materials by mass media" under § 160e.4(c)(1)(i) and whether it would be possible for a local educational agency to contract with its own television station for this purpose.

*Response.* No change has been made in the regulation. A request for proposal (RFP) for a contract is solicited by the Office of Education through the Commerce Business Daily, published by the Department of Commerce. RFPs are targeted toward meeting specific goals that the Office of Education determines are necessary or desirable. An RFP includes pre-determined objectives and specifications which the prospective contractor is expected to meet. The contract is awarded to the contractor who designs the best project for meeting the stated objectives of the Office of Education. For this program, RFPs have not yet been issued. Activities described under § 160e.4(a)(6) related to the use of mass media for the preparation and distribution of consumers' education materials may also be included in grant applications, wherein applicants have considerable flexibility in describing project objectives and goals and how they will be carried out. Grant applications are of course subject to a competitive review in accordance with the evaluation criteria and priority areas specified in the regulation. Award recipients may carry out projects through their own staffs, and with the assistance of other organizations through service contracts, subject to the provisions of § 100a.30 of this Chapter.

11. *Comment.* A commenter asked whether a K-12 program may be conceptualized across the board under any of the three priorities listed in § 160e.4(c)(2).

*Response.* A program addressed to grade levels K-12 might fit within the paragraphs dealing with training (for example, if the project were to train personnel involved at the K-12 grade levels) (§ 160e.4(c)(2)(i)) and programs, curricula, and materials for special groups (§ 160e.4(c)(2)(iii)). However, a K-12 program would not meet the requirements for a model community education project (§ 160e.4(c)(2)(i)) which must have the potential for serving all age groups in the community served.

12. *Comment.* One commenter questioned whether local educational agencies are eligible to submit applications in the priority area of § 160e.4(c)(2)(i).

*Response.* Under § 160e.6, a local educational agency can submit an application for any activity described in the regulation, including all of the priority areas described in § 160e.4(c), except with regard to demonstration or pilot projects at the higher education level, where awards may be made only to institutions of higher education.

13. *Comment.* One commenter urged that activities carried on by alternative educational programs, such as day care centers and after-school programs be considered a priority. It was noted that such settings "are often better able to design programs to foster consumer education because of their non-traditional orientation."

*Response.* No change has been made in the regulation. The regulation is not designed to emphasize one type of eligible applicant over another. Priorities are framed in terms of types of project activities and the target populations addressed by those activities, and not in terms of eligible applicants. Both the priorities and the criteria are designed to insure that the most worthwhile and best designed project activities are funded. Non-traditional agencies and institutions can compete for funding on the same basis as their traditional counterparts.

14. *Comment.* A commenter suggested that in § 160e.4(c) a paragraph be added giving priority to applications approved by the State agency as described in § 160e.7 and which give proof of being part of a coordinated, statewide effort.

*Response.* No change has been made in the regulation. While it is hoped that many projects will be part of such coordinated efforts, it is believed that the suggestion might penalize high quality products or programs developed at a specific site which have the greatest promise of contributing to the statutory purpose. The focus of the regulation is on projects which develop model programs and products worthy of replication which can have a substantial national impact (§ 160e.3(f)). Given this approach and the limited program funds, it was felt that the suggested priority would not be appropriate. The opportunity for State review of local educational

agency applications will create one vehicle for State coordination.

15. *Comment.* A commenter inquired whether, under § 160e.4(c)(2)(i), a model community program could be carried out via television, with daytime viewing for elementary and secondary students and evening viewing (in two languages) for the rest of the community.

*Response.* A program of this type could qualify for funding if it otherwise meets the requirements of § 160e.12 and if it comports with the nature of consumers' education as imparting skills, attitudes, and understandings necessary for rational consumer decision-making and not merely consumer information.

16. *Comment.* Two commenters suggested the addition of pre-school and early primary school children to the list of groups with special needs which are accorded priority status under § 160e.4(c)(2)(iii). One identified the 2-5 age group as forming a major market for the toys and games industries, and the second cited the 5-9 age group as being especially accepting of television commercials and influencing numerous purchases.

*Response.* No change has been made in the regulation. The needs of pre-school and early primary children can be effectively addressed in community consumers' education programs, which ought to provide consumers' education activities for the children themselves and for their parents. In addition, priority is given to training for educational and noneducational personnel serving at the elementary school level or in community programs.

#### § 160e.6 Eligible applicants.

17. *Comment.* Three comments questioned whether schools operated by the Bureau of Indian Affairs (BIA) or by nonprofit organizations of Indian tribes would be eligible to apply for awards under the Consumers' Education Program.

*Response.* The authorizing statute for the Consumers' Education Program, section 811 of the Elementary and Secondary Education Act (ESEA), authorizes awards to institutions of higher education, State and local educational agencies (SEAs and LEAs), and other public and private agencies, organizations, and institutions (including libraries). In section 811(b)(1)(B)(iii), the statute provides that funds "shall be available for such activities as—in the case of grants to State and local educational agencies and institutions of higher education, for the support of education programs at the elementary and secondary and higher education levels."

Schools operated by the BIA would not be eligible for awards under this language because the Commissioner does not understand the term, "public agency" to encompass agencies of the Federal Government. Separate Federal appropriations are made for educational programs at BIA schools, and where Congress has intended to include such schools as eligible under categorical grant programs, it has done so by express reference to BIA schools in the statute.

On the other hand, schools operated by nonprofit organizations of Indian tribes are eligible under this language to receive grant awards under the program, except with regard to (1) projects which support education programs at the elementary and secondary level, with respect to which the statute would appear to limit eligibility to LEAs and SEAs and (2) projects which support education programs at the higher education level, with respect to which the statute would appear to limit eligibility to institutions of higher education.

The terms "local educational agency" and "State educational agency" are defined for purposes of the Consumers' Education Program in section 801 of the ESEA (20 U.S.C. 881 (f), (k)). In other programs authorizing awards to "local educational agencies" and "State educational agencies," including Title VII of the ESEA, Congress has expressly designated BIA and Indian-controlled schools as eligible where it intended them to be included. This indicates that Congress does not understand the terms "local educational agency" or "State educational agency" without more specific language to include BIA or Indian-controlled schools. Therefore, the statutory language in section 811 of the Elementary and Secondary Education Act which appears to limit eligibility for projects supporting education programs at the elementary and secondary levels to LEAs and SEAs would exclude BIA and Indian-controlled schools from eligibility for such projects.

On the other hand, it should be emphasized that Indian-controlled schools are eligible for all other projects authorized by the statute and regulation, including the priority activities of community consumers' education programs (which may include activities for elementary and secondary level students), in-service training and pre-service training for educational and non-educational personnel at the elementary and secondary school levels and in community consumers' education programs, curricular or materials development for Indians, and the development of non-elementary or secondary school programs for Indians.

It should also be noted that the regulation establishes an overall priority for grant applications to develop programs, curricula, or materials designed to provide consumers' education to Indians (and/or to other groups of persons with special educational needs in the area of consumers' education).

18. *Comment.* A commenter asked whether postsecondary vocational technical schools were eligible for funding under the proposed rules.

*Response.* A public or private nonprofit postsecondary vocational technical school would generally qualify for grant awards. Such a school would qualify for grants for demonstration or pilot programs at the higher education level if it satisfied the definition of an "institutions of higher education" contained in

Section 801(e) of the Elementary and Secondary Education Act, 20 U.S.C. 881 (e). A postsecondary vocational school may qualify for a contract award under § 160e.4(c)(1) as either a non-profit or profit-making enterprise.

19. *Comment.* One commenter urged that commercial firms in the field of education, such as educational publishers, be added to the eligibility list.

*Response.* No change has been made in the regulation. The legislation upon which this regulation is based does not authorize grants to commercial firms. However, the Commissioner may award procurement contracts to profit making enterprises, as reflected in § 160e.4(c)(1).

§ 160e.7 *State review of local educational agency applications.*

20. *Comment.* A commenter suggested amending § 160e.7 to require the Commissioner to notify State educational agencies of proposals which have been funded within their respective States.

*Response.* No change has been made in the regulation. The Commissioner does intend to provide the subject notification to the State educational agencies, but does not believe that a regulation provision on this would be appropriate.

21. *Comment.* A commenter suggested that § 160e.7(b), which states that a local educational agency must provide a copy of its application to the appropriate State educational agency concurrently with its submission to the Commissioner, be amended to provide for submission to the State educational agency 15 days prior to submission to the Commissioner. The purpose is to provide the State educational agency more time for review.

*Response.* No change has been made in the regulation. There is no requirement that State educational agencies submit their recommendations on applications by the same closing date for applicants to submit their applications to the Commissioner. If a separate cut-off date is established for State comments to be received by the Commissioner, it will afford the State educational agencies sufficient time for review and comment on the applications.

22. *Comment.* One commenter expressed concern with regard to § 160e.7(d)(1) and (2) which encourage State educational agencies to solicit views from diverse community groups in the area proposed to be served by the local educational agency submitting an application for review. The commenter found this to be impractical.

*Response.* Section 160e.7(d) has been deleted in accordance with the comment.

23. *Comment.* One commenter had difficulty distinguishing between § 160e.9(a)(1)(i) and § 160e.9(a)(1)(ii) of the general evaluation criteria.

*Response.* Section 160e.9(a)(1)(i) addresses the experience of personnel conducting the program, (i.e., the project director and staff) while § 160e.9(a)(1)(ii) is concerned with the experience and qualifications of the institution or organization proposing to implement the specific types of activities being proposed.

24. *Comment.* One commenter felt that the evaluation criteria in the proposed regulation, in § 160e.9(a)(1)(ii), gave too little weight to the extent and quality of the applicant's experience in consumers' education. The commenter urged that existing organizations with a history of consumer education activities be given preference.

*Response.* No change has been made in the regulation. Substantial weight (30 points) is given to the aggregate personnel and institutional experience and capacity of the applicant agency in § 160e.9(a)(1). These are appropriate indicators, among others, of the chances for funding the best quality projects. At the same time, it must be emphasized that the Consumers' Education Program is not intended to provide institutional support solely for ongoing agencies and established organizations, and it would not be appropriate to confer any additional, specific preference for existing organizations with a history of consumers' education experience.

§§ 160e.11, 12, and 13.

25. *Comment.* Two commenters recommended deletion of the requirements in §§ 160e.11(b)(2), 160e.12(f)(2), and 160e.13(d)(3), respectively that applicants commit themselves to continuation of activities supported under a grant after the expiration of Federal funding.

*Response.* In accordance with the comments, the requirements that activities funded under this program be continued after the expiration of Federal funding are eliminated. While it is hoped that activities can be continued for the communities originally served, the Commissioner agrees that a required commitment is inappropriate.

§ 160e.14 *Review of curricula and materials.*

26. *Comment.* One commenter recommended an amendment to § 160e.14 to require the Commissioner to act within 60 days on requests for review and approval of curricula or materials prior to their dissemination.

*Response.* The Commissioner intends to review and act upon such requests as expeditiously as possible but believes that a regulation provision on this would be inappropriate.

B. *Adoption of Regulation.* Accordingly, Part 160e of Title 45 of the Code of Federal Regulations is adopted to read as set forth below.

C. *Effective date.* Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232 (d)), these regulations have been transmitted to the Congress concurrently with the publication of this document in the *FEDERAL REGISTER*. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

(Catalog of Federal Domestic Assistance Number 13.564, Consumers' Education Program.)

Dated: April 15, 1976.

WILLIAM F. PIERCE,  
Acting U.S. Commissioner  
of Education.

Approved: May 18, 1976.

MARJORIE LYNCH,  
Acting Secretary of Health,  
Education, and Welfare.

Sec.	Purpose and scope.
160e.1	Definitions.
160e.2	Nature of consumers' education.
160e.3	Types of projects; funding priorities.
160e.4	Duration of projects.
160e.5	Eligible applicants.
160e.6	State review of local educational agency applications.
160e.7	Application and proposal requirements.
160e.8	General evaluation criteria for awards.
160e.9	Program, curriculum, and materials assessment.
160e.10	Consumers' education resource centers.
160e.11	Community consumers' education projects.
160e.12	Training projects.
160e.13	Review of curricula and materials.
160e.14	Federal share of projects.
160e.15	Allowable costs.

AUTHORITY: Sec. 811, the Elementary and Secondary Education Act of 1965, as enacted by section 505 of the Education Amendments of 1972, Pub. L. 92-318, and as amended (20 U.S.C. 887d).

#### § 160e.1 Purpose and scope.

(a) *Scope.* The regulations in this part govern projects awarded with funds appropriated pursuant to section 811 of the Elementary and Secondary Education Act of 1965, as amended, or with funds made available for purposes of the consumers' education program, as provided in section 811 of the Elementary and Secondary Education Act, as amended, pursuant to the Special Projects Act, as enacted by section 402 of Pub. L. 93-380.

(20 U.S.C. 887d, 1861)

(b) *Purpose.* The purpose of this part is to award grants and contracts for activities designed to support:

(1) The development, demonstration, evaluation, and dissemination of new and improved curricula in consumers' education;

(2) The initiation and expansion of consumers' education programs at the elementary, secondary, community, adult, and higher education levels;

(3) The training of teachers, other educational and public service personnel, community and labor leaders and employees, and government employees at the Federal, State and local levels in consumers' education; and

(4) Activities designed to provide consumers' education to the general public.

(20 U.S.C. 887d note)

(c) *Other pertinent regulations.*—(1) *Grant awards.* Grant awards under the part are subject to applicable provisions contained in:

(i) Subchapter A of this chapter (relating to fiscal, administrative, property management, and other matters), contained in Parts 100, 100a of this chapter and

(ii) Part 160 of this chapter relating to the Special Projects Act.

(2) *Contract awards.* Contract awards under this part are subject to applicable provisions contained in:

(i) 41 CFR Chapters 1 and 3 and (ii) Part 160 of this chapter relating to the Special Projects Act.

(20 U.S.C. 887d)

#### § 160e.2 Definitions.

As used in this part:

"Act" means section 811 of the Elementary and Secondary Education Act of 1965, as enacted by section 505 of the Education Amendments of 1972, Pub. L. 92-318, and as amended.

"Community consumer education program" means a program designed to provide consumers' education to the general public in one or more communities, as described in § 160e.12.

"Long-term training" means training for individual participants lasting one academic year or more.

"Short-term training" means training for individual participants lasting less than an academic year.

(20 U.S.C. 887d)

#### § 160e.3 Nature of consumers' education.

Consumers' education programs, curricula, or materials funded under this part:

(a) Must be designed to prepare consumers for participation in the marketplace (including their relationship to governmental regulatory processes and to public utilities) by imparting the understandings, attitudes, and skills which will enable persons to make rational and intelligent consumer decisions in the light of their personal values, their recognition of marketplace alternatives, and social, economic, and ecological considerations;

(20 U.S.C. 887d note)

(b) Must be problem- and issue-oriented and may involve interdisciplinary educational approaches;

(20 U.S.C. 887d (b)(1)(B)(1))

(c) May include, but need not be limited to, education in one or more of the following areas:

(1) Basic economics of the marketplace;

(2) Legal rights, redress, and consumer laws;

(3) Financial management and credit;

(4) Energy consumption and conservation, and public utilities;

(5) Major purchases (such as food, auto, insurance, medicine, housing);

(6) Special problems such as advertising and product safety;

(7) Federal assistance and services such as Medicare, social security, and Medicaid;

(8) Consumer representation; and

(9) Governmental regulatory processes in relationship to individuals and businesses.

(S. Rep. No. 346, 92d Cong. 1st Sess. 114 (1971); S. Rep. No. 763, 93d Cong. 2nd Sess. 77 (1974))

(d) Must be designed to prepare consumers for participation in the marketplace, rather than to prepare persons for employment in areas such as are described in paragraph (c) of this section; except that consumers' education programs or curricula may be designed to train teachers, other educational and public service personnel, community and labor leaders and employees, and government employees to plan, organize, implement consumers' education programs or to teach in subject matter areas associated with consumers' education;

(4) Projects designed to demonstrate, test, and evaluate the effectiveness of activities described in paragraphs (a) (1) through (3) of this section, whether or not these activities are assisted under this part;

(5) The dissemination of information and the provision of developmental and technical assistance to agencies and organizations planning, developing, and carrying out consumers' education programs; and

(6) The preparation and distribution of consumers' education materials by mass media.

(20 U.S.C. 887d(b)(1)(B), 787d note)

(e) Must provide for inclusion of bilingual educational activities and materials when the target population to be served directly by the project or to be benefited by the approaches or products developed by the project include a substantial number of persons whose dominant language is other than English; and

(20 U.S.C. 887d(b)(1)(B))

(f) (1) (i) Must contribute to capacity-building in the area of consumers' education by producing exemplary results and/or products to be utilized by organizations, agencies, and individuals other than the award recipient, and thereby to have a substantial national impact in providing consumers' education to the public; and

(ii) Must not be designed to benefit only particular organizations, agencies, or individuals.

(2) Compliance with the requirements of paragraph (f) (1) of this section must be reflected in the application or proposal:

(i) In the stated objectives and outcomes,

(ii) By the attention to planning, quality controls, and evaluation; and

(iii) By the emphasis on dissemination and utilization procedures.

(3) The cost to organizations, agencies, and individuals other than the award recipient of obtaining and using products developed under projects supported under this part may not be on a scale which would inhibit extensive utilization and replication of the products.

(20 U.S.C. 887d(b)(1)(C)(ii))

#### § 160e.4 Types of projects; funding priorities.

(a) The Commissioner will consider making grant and contract awards under this part to support research, demonstrations, and pilot projects designed to provide consumers' education to the public, including such activities as:

(1) Research, testing, and dissemination with respect to curricula and materials in consumers' education;

(2) The establishment of new, or the expansion of existing, pilot or demonstration consumers' education programs

in elementary and secondary schools, institutions of higher education, adult education centers, or in community programs potentially serving persons of all ages within the community;

(3) Short-term pre-service and in-service training programs designed to prepare teachers, other educational and public service personnel, community and labor leaders and employees, and government employees to plan, organize, and implement consumers' education programs or to teach in subject matter areas associated with consumers' education;

(4) Projects designed to demonstrate, test, and evaluate the effectiveness of activities described in paragraphs (a) (1) through (3) of this section, whether or not these activities are assisted under this part;

(5) The dissemination of information and the provision of developmental and technical assistance to agencies and organizations planning, developing, and carrying out consumers' education programs; and

(6) The preparation and distribution of consumers' education materials by mass media.

(20 U.S.C. 887d(b)(1)(B), 787d note)

(b) Long-term training and fellowship programs will not be funded pursuant to this part.

(c) In implementing activities authorized by the Act and described in paragraph (a) of this section, the Commissioner will:

(1) Solicit proposals for, and make awards of, procurement contracts;

(i) To prepare and distribute consumers' education materials by mass media;

(ii) To identify, evaluate, and disseminate effective consumers' education programs, curricula, and materials on the community, elementary, secondary, or higher education levels, as described in § 160e.10;

(iii) To establish and maintain resource centers in consumers' education which would collect, assess, and provide information on consumers' education research and activities and provide technical assistance to agencies, institutions, and groups interested in establishing, expanding, or improving program activities in consumers' education, as described in § 160e.11; and

(iv) In any other areas of consumers' education where the Commissioner determines that specific procurements would further the purposes of the Act, as described in § 160e.1(b).

(2) Accord priority to grant applications to:

(i) Develop and carry out model community education projects in consumers' education which have the potential for providing consumers' education to all age groups in a community or communities, as described in § 160e.12;

(ii) Provide short-term pre-service or in-service training for teachers and other educational and non-educational personnel at the elementary and secondary school levels and in community con-

sumers' education programs to prepare them to plan, organize, and implement consumers' education programs or to teach in subject matter areas associated with consumers' education, as described in § 160e.13; or

(iii) Develop programs, curricula, or materials designed to provide consumers' education to groups of persons with special educational needs in the area of consumers' education, including older persons, Indians, persons of low-income families, and persons of limited English-speaking ability. Grant applications within one of the priority areas described in paragraph (a) (2) (i) and (ii) of this section will be given special priority if they are also designed to provide consumers' education to groups with special educational needs in the area of consumers' education.

(d) Any project described in this section may include a research component as necessary.

(20 U.S.C. 887d, 887d, note)

#### § 160e.5 Duration of projects.

(a) While grant applications may be filed proposing multiyear projects, it is expected that a substantial proportion of projects funded by the Commissioner in any fiscal year will have a project duration of only one year.

(b) Applications proposing multi-year projects must be accompanied by an explanation of the need for multi-year support, an overview of the objectives and activities proposed, and budget estimates to attain these objectives in any proposed subsequent year.

(c) If the application demonstrates to the Commissioner's satisfaction that multi-year support is needed to carry out the proposed project, the Commissioner may, in the initial notification of grant award for the project, indicate an intention to assist the project on an appropriate multi-year basis through continuation grants.

(d) Continuation awards may be made to projects described in paragraph (c) of this section subject to the availability of funds and to the following provisions:

(1) Continuation applications will not be competitive with applications for new grant awards, but will be competitive with other applications for continuation awards; and

(2) Applications for continuation awards will be reviewed to determine:

(i) If the grantee has complied with the grant terms and conditions, the Act, and applicable regulations;

(ii) The project's effectiveness to date;

(iii) The extent to which the project is meeting applicable priorities; and

(iv) The extent to which continuation of Federal assistance to the project is in the best interests of the Government.

(20 U.S.C. 1221e-3 (a) (1), 887d)

#### § 160e.6 Eligible applicants.

Institutions of higher education, State and local educational agencies, and other public and private agencies, organizations, and institutions (including libraries) are eligible to receive grant and con-

tract awards pursuant to this part, except that:

(a) No grant may be made other than to a non-profit agency, organization, or institution;

(b) Grants for demonstration or pilot programs at the elementary and secondary levels may be made only to State educational agencies and local educational agencies; and

(c) Grants for demonstration or pilot programs at the higher education level may be made only to institutions of higher education.

(20 U.S.C. 887d(b) (1) (A), 887d(b) (1) (B) (iii))

#### § 160e.7 State review of local educational agency applications.

(a) The Commissioner will not approve an application submitted by a local educational agency under this part unless the State educational agency of the State in which that local educational agency is located has been given an opportunity to review and make recommendations on the application.

(b) A local educational agency must provide a copy of its application to the appropriate State educational agency concurrently with its submission of the application to the Commissioner.

(c) The Commissioner may establish a cut-off for submission of comments by State educational agencies on local educational agency applications. If the Commissioner establishes a cut-off date for submission of comments, failure by a State educational agency to submit comments to the Commissioner within the period specified shall be deemed a waiver of the State educational agency's opportunity to comment.

(20 U.S.C. 887d(b) (1) (C))

#### § 160e.8 Application and proposal requirements.

(a) *Submission.* A grant or a contract under this part will be awarded only upon a grant application (in accordance with § 100a.40 of this chapter) or a contract proposal submitted to the Commissioner.

(b) *Acceptable applications or proposals.* (1) (i) Grant applications will be accepted for review only if they are filed in response to a notice of closing date published in the FEDERAL REGISTER in accordance with § 100a.15 of this chapter concerning application submissions to the Commissioner.

(ii) Contract proposals will be accepted for review only if they are filed in response to a solicitation of proposals in accordance with the provisions of 41 CFR Chapters 1 and 3.

(2) An eligible applicant must file a single and separate application or proposal for each subparagraph of § 160e.4 (c) under which it seeks an award.

(3) Applicants are encouraged not to submit lengthy appendices or exhibits with their application or proposal.

(c) *Requirements.* An application or proposal under this part must:

(1) *Nature and purpose.* Provide sufficient information to satisfy the Commissioner that the proposed project holds promise of making a substantial contri-

bution to the purpose of providing consumers' education to the public and will comply with the provisions of § 160e.3;

(2) *Applicant qualifications.* Contain sufficient information about the applicant to enable the Commissioner to determine its qualifications for receiving an award, including information about:

(i) The applicant's experience in the area of consumers' education and the specific types of activities to be carried out under the proposed project (such as teacher training, materials development, and other activities);

(ii) The proposed staff, including their education, training, awards, publications, and experience in consumers' education and in the specific types of activities under the proposed project, and existing or planned commitments to other projects; and

(iii) Available facilities and other resources for the project;

(3) *Need and impact.* (i) Identify the need to be addressed by the proposed project and supply relevant documentation of that need. Where a general area of need has been set forth in this part or in contract specifications, the application or proposal must go beyond a general exposition of need to identify and document specific areas of need which the proposed project would address;

(ii) Specify the nature of the output, product, or final results of the proposed project;

(iii) Document how the project will contribute to capacity-building in the area of consumers' education as described in § 160e.3(f) including a description of likely users of the results, processes, and products of the project, and rough projections of the financial cost to others of implementing or using the products; and

(iv) Describe validation, dissemination, and utilization procedures to be used in the proposed project;

(4) *Plan of operation.* (i) Provide that all activities and services for which an award is sought will be administered by, or under the supervision of, the applicant;

(ii) Describe:

(A) Project objectives which state specific outcomes for the project;

(B) A project evaluation design which includes both product and process analysis to measure the extent to which the objectives are accomplished by the project;

(C) A budget, including that portion of the project to be contributed by the applicant; and

(D) A management design which:

(1) Includes objectives, operational activities, schedules, resources, products, and references to the evaluation design;

(2) Provides for the necessary fiscal control and fund accounting procedures to assure proper disbursement of and accounting for Federal funds paid to the applicant under this part; and

(3) Provides for making an annual report and such other reports, in a form and containing such information, as the Commissioner may reasonably require and for keeping records, and affording

access thereto as the Commissioner may find necessary to assure the correctness and verification of these reports; and

(iii) The evaluation and management designs need not be capable of being implemented instantly, but must be sufficiently described to indicate the approach, status of planning, methodology, extent of experience in the development and use of these designs, and need for procuring outside expertise;

(5) *Supplementary nature of projects.* Set forth policies and procedures which assure that Federal funds made available under this part for any fiscal year will be used to supplement and, to the extent practical, increase the level of funds that would, in the absence of these Federal funds, be made available by the applicant for the purposes described in this part and in no case supplant these funds; and

(6) *Additional information.* Applications or proposals must include other information responsive to applicable criteria and other provisions set forth in §§ 160e.9 through 160e.13, as applicable or to the specific criteria and other provisions contained in specifications for contract proposals.

(20 U.S.C. 887d(b) (1) (C), 887d(c))

#### § 160e.9 General evaluation criteria for awards.

(a) *Applicable criteria.* All applications for grants and proposals for contracts which meet the requirements in § 160e.8 will be evaluated on the basis of the following criteria, weighted according to the indicated points (maximum of 110 points):

(1) *Applicant qualifications.* (30 points) (i) The qualifications of the project director and staff, including demonstrated experience of high quality in the area of consumers' education and in the specific types of activities to be carried out under the project as evidenced in the application (10 points);

(ii) The extent and quality of the applicant's experience in the area of consumers' education and in the specific types of activities to be carried out under the project as evidenced in the application (10 points); and

(iii) The extent to which the applicant has the capability to conduct the proposed project, including necessary facilities and resources as evidenced in the application (10 points);

(2) *Need and impact.* (40 points) (i) The proposed project is likely to make a substantial qualitative contribution toward attaining the provision of consumers' education for the public and, to this end, clearly identifies the need to be addressed and specifies the substantive nature of the output, product, or final results of the proposed project (10 points);

(ii) The intended results of the proposed project can be used by others, and thus the application specifies well-designed validation, dissemination, and utilization procedures (10 points);

(iii) The project focuses on learning processes, as well as substantive content, with attention to such program aspects as student motivation, sequential lessons, and learning problems (10 points); and

(iv) The project involves new or improved techniques and materials which are sufficiently exemplary to be replicated by others (10 points).

(3) *Plan of operation.* (40 points) (i) The application sharply defines and clearly states objectives for the proposed project which can be achieved by the proposed procedures and can be assessed upon attainment (10 points);

(ii) The application ensures adequate evaluation of the activities through the description of a project evaluation design which would include both process and product analysis and would describe an eventual evaluation report to include sufficient data, information, and direction to permit and encourage replication (10 points);

(iii) The quality of the proposed management design that includes objectives, operational activities, schedules (including the amount of time to be spent on the project by the named proposed staff members), resources, products, and references to the project evaluation design (10 points); and

(iv) The application presents a budget that is reasonable in relation to anticipated results and reflects the management design (10 points).

(b) *General provisions criteria.* Evaluation criteria set forth in § 100a.26(b) of this chapter will not apply to applications or proposals submitted under this part.

(20 U.S.C. 887d(b), 887d note)

#### § 160e.10 Program, curriculum, and materials assessment.

(a) *Nature of projects.* Procurement contracts under this section will be for:

(1) A systematic search for and identification of effective programs, curricula, or materials in consumers' education designed for use in elementary and secondary schools, community consumers' education programs, adult education programs, or institutions of higher education;

(2) Final validation of the apparent success of these programs, curricula, and materials based on learning outcome measures, such as student test scores, and input measures, such as the resource requirements needed to achieve these measurable results (which may include a trial replication of the use of the programs, curricula, or materials through a field test in one or a limited number of additional sites); and

(3) Dissemination of information about the programs, curricula, and materials found to be effective.

(b) *Approaches to consumers education.* Consumers' education programs, curricula, or materials to be identified, validated, and disseminated under this section may be interdisciplinary and may involve either a comprehensive approach to consumers' education or a limited program in one or more specific subjects related to consumers' education, such as are described in § 160e.3(c).

(c) *Proposal requirements.* A proposal for a contract under this section must specify:

(1) The nature and substantive areas of the programs, curricula, or materials to be identified, validated, and disseminated;

(2) The potential uses and users of these programs, curricula, or materials;

(3) The results of a preliminary assessment by the applicant of available programs, curricula, or materials and of the need for high quality programs, curricula, or materials in the proposed areas of concentration;

(4) Procedures and arrangements for searching out, validating, and disseminating information on the programs, curricula, or materials;

(5) Criteria for selecting and testing effective programs, curricula, or materials; and

(6) Plans for selecting a limited number of the most successful programs, curricula, or materials for dissemination.

(d) *Multiplier effect.* Programs, curricula, or materials to be identified and validated under this section must be designed to be available for use by potential users at relatively low cost and without substantial dependence on consultative assistance.

(e) *Evaluation criteria.* Proposals for contracts under this section will be selected on the basis of (1) the criteria set forth in § 160e.9 (which will be weighted 110 points) and (2) the quality of the plan for identification, validation, and dissemination of information on the programs, curricula, or materials, including the applicants' access to existing networks of potential users, as well as access to a delivery system which is not dependent on external funding and would consequently operate after the expiration of support pursuant to this section (weighted 5 points).

(20 U.S.C. 887d(b) (1) (B) (i) & (ii))

#### § 160e.11 Consumers' education resource centers.

(a) *Purpose.* Procurement contracts under this section will have the purpose of establishing resource centers which will:

(1) Provide technical assistance, information, and informal, short-term training to agencies, institutions, and community groups in the development and carrying out of consumers' education programs; and

(2) Collect and disseminate information on research related to consumers' education and on effective consumers' education programs.

(b) *Application requirements.* Proposals under this section must meet the requirements in § 160e.8 and:

(1) Provide a general description of existing activities of the applicant related to consumers' education, facilities and resources available for these activities, institutions and programs which benefit from its activities, and the extent to which its present experience will contribute to the effectiveness of the proposed project;

(2) Name agencies and institutions to be served by the proposed project and indicate the general scope of services to

be provided to each agency and the technical assistance, training, and information needs of recipient agencies and how the project will respond to these needs.

(c) *Number of awards.* It is expected that a very limited number of contracts will be awarded pursuant to this section. (20 U.S.C. 887d)

#### § 160e.12 Community consumers' education projects.

(a) *Purpose.* Grants under this section will be for the purpose of planning, establishing, expanding, and/or improving model community education projects in consumers' education which are designed to provide consumers' education to the general public in one or more communities.

(b) *Target population.* Community consumers' education programs must have the potential for serving all age groups within the community or communities to be served and must focus on providing consumers' education to persons who are not otherwise served by the regular instructional programs of elementary and secondary schools and institutions of higher education within the community.

(c) *Community involvement.* The program must provide for the active and continuous involvement (1) on an advisory basis and (2) in terms of direct input into project activities, of institutions, groups, and individuals representative of the community or communities to be served, including but not limited to, schools, community groups, and other educational and cultural resources.

(d) *Communities served.* Projects under this section must serve specific and identified communities, but the communities need not be contiguous. For example, a non-profit institution may receive a grant under this section to establish model community consumers' education programs in a number of communities in different parts of the country.

(e) *Approaches to consumers' education.* Programs assisted under this part (1) must include innovative methods, materials, or approaches which are worthy of replication and (2) may involve a comprehensive approach to consumers' education covering a wide range of subject matter areas or may focus on one or more specific areas of consumers' education, such as are described in § 160e.3(c).

(f) *Application requirements.* Applications for grants under this section must meet the application requirements in § 160e.8 and the following additional requirements:

(1) The application must identify the specific areas to be served and which groups of persons in these areas will be benefited by the project; and

(2) The application must document that representative educational and cultural resources of the communities to be served have been involved on an advisory basis in the preparation of the application, including a description of procedures used (such as public notice and

hearings) to provide the public at large with an opportunity to have input in the preparation of the application.

(20 U.S.C. 887d(b)(1)(A))

#### § 160e.13 Training projects.

(a) *Purpose.* Grants under this section will have the purpose of providing short-term pre-service or in-service training for teachers and other educational and non-educational personnel at the elementary and secondary school levels and in community consumers' education programs to prepare them to plan, organize, and implement consumers' education programs or to teach in subject matter areas associated with consumers' education, such as those described in § 160e.3(c).

(b) *Nature of projects.* (1) The training must be designed to provide skills and understandings with reference to:

(i) A variety of the subject matter areas of consumers' education described in § 160e.3(c);

(ii) With respect to training for teachers of consumers' education: the selection of appropriate consumers' education curricula and materials, the integration of consumers' education into the regular classroom curriculum, the identification and use of resources within and outside of the school which would strengthen consumers' education activities, and the planning and carrying out of lessons and units of instruction in consumers' education which respond to the needs and interests of the students; and

(iii) With respect to training for educational and non-educational personnel responsible for planning, organizing, and implementing overall consumers' education programs: The involvement of appropriate public and private community resources in the planning and carrying out of consumers' education programs and knowledge of other consumers' education programs of an exemplary nature.

(2) The training must be short-term, and in-service training assisted under this section must be offered at times and in a manner to allow participation by training recipients on a basis which will cause minimum disruption to the carrying out of their responsibilities in planning, operating, and/or teaching in consumers' education programs.

(3) In-service training activities assisted under this section must be provided for eligible recipients in specific elementary, secondary, or community consumers' education programs on a continuing basis over the course of the grant period, with provisions for follow-up and reinforcement of specific training workshops or exercises.

(4) The development of training materials incidental to carrying out the project activities may be included in grants under this section.

(c) *Recipients of training.* Eligible recipients of training under grants awarded pursuant to this section include (1) persons in local educational agencies, State educational agencies, and other public and private non-profit agencies and in-

stitutions (including libraries) involved in the planning, administration, and/or teaching of consumers' education programs, including the chief executive officer of the State educational agency or local educational agency, leaders, coordinators, administrators, and other staff of consumers' education programs, and members of the community assisting in the planning and carrying out of these programs and (2) persons who are preparing to undertake these responsibilities.

(d) *Application requirements.* In addition to meeting the requirements of § 160e.8, applications for grants under this section must:

(1) Include a description of proposed workshops, conferences, seminars, or courses, including their locations, number of sessions planned, and approximate number of trainees;

(2) Provide a general description of any existing training activities of the applicant related to consumers' education, facilities and resources available for these activities, institutions and programs which benefit from its training activities, and the extent to which its present experience will contribute to the effectiveness of the proposed project;

(3) Name each agency or institution to be served by the proposed training project and indicate the general scope of services to be provided to each agency, the officials or groups to receive the training and how they will be selected, and the skill or competency needs of recipient agencies and how the project will respond to these needs; and

(4) Include a letter of commitment from each local educational agency, State educational agency, or other agency or institution to be served by the project, indicating its intention to participate in the project and certifying its need for the services which the application proposes to provide to it.

(e) *Evaluation criteria.* The Commissioner, in determining whether to approve an application for a grant under this section, will consider the criteria set forth in § 160e.9 (which will be weighted 110 points) and the following criteria weighted as indicated:

(1) The application reflects a knowledge of training needs in consumers' education, with specific reference to any agencies and institutions to be served in the project, and provides for responding to these needs (3 points);

(2) The proposed project is likely to build the capacity of the grantee to serve as a training resource for local educational agencies, State educational agencies, and other public and private non-profit agencies and institutions planning or carrying out consumers' education programs (3 points);

(3) The number of agencies and institutions to participate directly in, or benefit indirectly from, the proposed project (3 points); and

(4) Training provided by the project is likely to form a foundation from which training participants may pursue

long-term or formal degree training if they so desire (3 points).

(20 U.S.C. 887d(b)(1)(B)(iv))

#### § 160e.14 Review of curricula and materials.

(a) Projects funded under this part which are designed to develop, validate, and/or disseminate curricula and materials in consumers' education shall be subject to the condition that the contractor or grantee may not disseminate the curricula or materials until they have been reviewed and approved for dissemination by the Commissioner.

(b) In carrying out this section, the Commissioner will review curricula and materials for evidence of effectiveness and to ensure that they are non-discriminatory on the basis of race, sex, and age.

(20 U.S.C. 887d)

#### § 160e.15 Federal share of projects.

(a) For the purposes of funding grants and contracts under this part, the Federal share of the eligible costs of a project, including the costs of project administration, shall be determined as follows:

(1) Except as provided in paragraph (a)(2) of this section, Federal support under this part will be available to pay all or part of the eligible project costs.

(2) The Federal share will be no more than 80 percent of eligible project costs for projects which involve curriculum development or dissemination of curricular materials or which have the primary purpose to evaluate consumers' education activities whether or not assisted under this part.

(b) Contributions in kind are acceptable as applicant contributions to project costs.

(20 U.S.C. 887d(b)(2))

#### § 160e.16 Allowable costs.

(a) *General.* Allowable costs under projects to which funds are awarded pursuant to this part shall be determined in accordance with the cost principles provided for under Subpart G of Part 100a of this chapter.

(b) *Costs of short-term training components.* (1) Projects under § 160e.13 which are designed to provide in-service training may include in the grant a provision for payments to teachers, administrators, and other educational and non-educational personnel who receive this training and are not otherwise compensated for their time while receiving training.

(2) (i) Except as provided under paragraph (b)(1)(ii) of this section, payments under this subparagraph will be at the rate of \$30 for each full day of training, up to \$150 per week. If a day of training involves less than five hours, the payments for attendance will be at the rate of \$6 per hour, subject to the weekly limit of \$150.

(ii) Where the personnel participating in the training are ordinarily paid for their work at a salary scale determined by a collective bargaining agreement in which the minimum hourly rate for any individual is more than \$6 per hour, the

individual would be compensated at the minimum hourly rate provided under the collective bargaining agreement.

(3) Where a local educational agency or other educational agency or institution compensates teachers or other personnel whom it employs for their time in receiving training under this paragraph and must also hire a substitute for a participant in the training, reimbursement may be made under the grant which includes the training component to the local educational agency or other educational agency or institution for the costs of hiring the substitute.

(20 U.S.C. 887d(b))

#### CHAPTER XII—ACTION

##### PART 1228—CLEARINGHOUSE REQUIREMENTS AND PROCEDURES

##### Implementation of Office of Management and Budget Circular A-95

On March 1, 1976, a notice was published in the FEDERAL REGISTER (41 FR 8791) proposing to add a new Part 1228 to Title 45, Code of Federal Regulations, which would provide interim implementation procedures for Office of Management and Budget Circular No. A-95. Interested persons were given until March 29, 1976, to submit comments and views covering the proposed new Part. No significant comments were received. Accordingly, Chapter XII of Title 45 of the Code of Federal Regulations Part 1228 is adopted as follows:

Sec.  
1228.1 General.  
1228.2 Action programs covered.  
1228.3 Project notification and review system.  
1228.4 Clearinghouse functions.  
1228.5 Consultation and review.  
1228.6 Clearinghouse comments and recommendations.  
1228.7 Agency procedures for implementation of OMB circular A-95.  
1228.8 Roles and responsibilities.

##### APPENDIX—Clearinghouse Requirements.

AUTHORITY: Office of Management and Budget Circular A-95 Revised January 2, 1976.

##### § 1228.1 General.

Office of Management and Budget Circular No. A-95, *Evaluation, Review and Coordination of Federal and Federally Assisted Programs and Projects*, Part I, establishes a network of State and areawide planning and development clearinghouses which will aid in the coordination of Federal or federally assisted projects and programs with State, areawide, and local planning for orderly growth and development.

##### § 1228.2 ACTION programs covered.

The requirements of Circular A-95 apply to the following ACTION programs listed in the *Catalog of Federal Domestic Assistance*:

72.001 Foster Grandparents Program.  
72.002 Retired Senior Volunteer Program.  
72.008 Senior Companion Program.

##### § 1228.3 Project notification and review system.

Part I of Circular A-95 requires applicants for assistance under any of the above ACTION programs to comply with the provisions of the Project Notification and Review System in order to facilitate coordinated planning on an inter-governmental basis. The essential parts of the Project Notification and Review System are:

(a) *Notification of intent.* Any agency of State or local government or any organization undertaking to apply for assistance to a project or major substantive modification thereto under any of the above ACTION programs is required to notify both the State and areawide planning and development clearinghouses in the jurisdiction of which the project is to be located of its intent to apply for assistance at such time as it determines it will develop an application. Notification will include a summary description of the project for which assistance is sought. The summary description will contain the following information, as appropriate and to the extent available:

(1) Identity of the applicant agency or organization;

(2) The geographic location of the project to be assisted (A map should be provided, if appropriate);

(3) A brief description of the proposed project to be assisted (A map should be to scale, estimated cost, beneficiaries, or other characteristics which will enable the clearinghouses to identify agencies of State or local government having plans, programs, or projects that might be affected by the proposed project);

(4) The ACTION program title and number under which assistance is sought; and

(5) The estimated date the applicant expects to formally file an application.

(b) *Applicant responsibility.* Potential applicants are responsible for contacting the clearinghouses in their project location as early as possible to obtain forms and instructions for insuring expeditious clearinghouse review.

(c) *Federally recognized Indian tribes.* Applications from federally recognized Indian tribes are not subject to the requirements of Part I of Circular A-95. However, Indian tribes may voluntarily participate in the Project Notification and Review System and are encouraged to do so. ACTION will notify the appropriate State and areawide clearinghouses of any application from federally recognized Indian tribes upon their receipt.

##### § 1228.4 Clearinghouse functions.

Clearinghouse functions include, but are not limited to:

(a) Evaluating the significance of proposed Federal or federally assisted projects to State, areawide, or local plans and programs;

(b) Receiving and disseminating project notifications (the State clearinghouse notifies State agencies; the areawide clearinghouse notifies local agen-

I

cies) and providing liaison between such agencies and the applicant; and

(c) Providing public agencies charged with enforcing or furthering the objectives of State and local civil rights laws with opportunity to review and comment on the civil rights aspects of the project for which assistance is sought.

#### § 1228.5 Consultation and review.

(a) State and areawide clearinghouses may have 30 days after receipt of a project notification in which to inform State and local or regional governments or agencies that may be affected by the proposed project and arrange, as may be necessary, to consult with the applicant thereon. The review may be completed in this period and comments may be submitted to the applicant.

(b) If the review is not completed during this period, the clearinghouse may work with the applicant in the resolution of any problems raised by the proposed projects during the period in which the application is being completed.

(c) In cases where no project notification has been submitted and the clearinghouse receives only a completed application, it may have 60 days to review the completed application. If a completed application is submitted during the first 30 days after a notification has been submitted, the clearinghouse may have 30 days plus the number of days remaining in the initial 30 days to review a completed application. Where clearinghouses have not completed their review during the 30 day notification period, they are strongly urged to give the applicant formal notice to that effect. Where reviews have been completed prior to completion of an application, an information copy will be supplied to the clearinghouse, upon request, when the application is submitted to the funding agency. Analysis of the timing requirement for clearinghouse review discloses that such review consists of two stages:

(1) *Stage 1—When only a notification of intent is submitted to the clearinghouse.* (i) Clearinghouse has 30 days to review. Clearinghouse may complete review and send comments to applicant.

Upon completion of application, applicant will submit an information copy to the clearinghouse, upon request, when submitting the application to ACTION for funding.

(ii) *Clearinghouse does not complete review; notifies applicant; resolves problems, if any, with applicant; applicant completes application.*

(iii) *When a completed application is submitted during the first 30 days after a Notification of Intent has been submitted, clearinghouse has 30 days plus the number of days remaining in the initial 30 day notification period to complete review.*

(2) *Stage 2—When only a completed application is submitted to clearinghouse.* Clearinghouse has 60 days to review.

(d) Written comments submitted to the areawide clearinghouses by other jurisdictions, agencies, or parties will be included as attachments to the comments of areawide clearinghouses, when

they are at variance with the clearinghouse comments; and others from whom comments were solicited and received should be listed.

#### § 1228.6 Clearinghouse comments and recommendations.

(a) Applicants will include with the completed application submitted to ACTION:

(1) All comments and recommendations made by or through clearinghouses, along with a statement that such comments have been considered prior to submission of the application; or

(2) Where no comments have been received from a clearinghouse, a statement that the procedures outlined in §§ 1228.3 and 1228.5 have been followed and that no comments or recommendations have been received.

(b) The objectives of clearinghouse comments and recommendations are:

(1) To assure maximum consistency of the proposed project with State, areawide, and local comprehensive plans; and

(2) To assist ACTION in determining whether the project is in accord with Federal law, particularly those requiring consistency with State, areawide, or local plans. Comments or recommendations may include, but need not be limited to, information about the extent to which the proposed project:

(i) Duplicates, runs counter to, or needs to be coordinated with other projects or activities being carried out in or affecting the area; or

(ii) Might be revised to increase its effectiveness or efficiency in relationship to other State, area, or local programs and projects.

(c) Applications for continuation or renewal grants or applications not submitted to or acted upon by ACTION within one year after completion of clearinghouse review will be subject to re-review upon request of the clearinghouse.

#### § 1228.7 Agency procedures for implementation of OMB Circular A-95.

Part I of Circular A-95 requires ACTION to:

(a) Inform potential applicants for assistance under the programs indicated in paragraph 1228.2 above of the requirements of Part I (1) in program information materials, (2) in response to inquiries respecting application procedures, (3) in preapplication conferences, or (4) by other means which will assure earliest contact between applicant and clearinghouse;

(b) Assure that all applications for assistance under programs covered by Circular A-95 have been submitted to appropriate clearinghouses for review prior to their submission to ACTION for funding;

(c) Return applications to the applicant which do not carry evidence that both areawide and State clearinghouses have been given an opportunity to review the application, with instructions to fulfill the requirements of Part I;

(d) Insure that all applications contain a *State Application Identifier (SAI)*

number (This is mandatory for use in notifying clearinghouses of action taken on the application);

(e) Notify such clearinghouses within seven working days of any major action taken on such applications that have been reviewed by said clearinghouses; major actions will include awards, rejections, returns for amendment, deferrals, or withdrawals;

(f) Use Standard Form 424 for the Report of Federal Action to clearinghouses;

(g) Where a clearinghouse has recommended against approval of an application or approval only with specific and major substantive changes, and ACTION approves the application substantially as submitted, ACTION will provide the clearinghouse, along with the action notice, an explanation therefor; and

(h) Where a clearinghouse has recommended against approval of a project because it conflicts with or duplicates another Federal or federally assisted project, ACTION will consult with the agency assisting the referenced projects prior to acting, if it plans to approve the application.

#### § 1228.8 Rules and responsibilities.

(a) *State Program Director.* The State Program Director shall: (1) Inform potential applicants for assistance under such programs of the requirements of Part I (i) in program informational materials (See below, *Clearinghouse Requirements*, ACTION Form A-780), (ii) in response to inquiries respecting application procedures, (iii) in preapplication conferences, or (iv) by other means which will assure earliest contact between applicant and clearinghouses.

(2) Assure that all applications for assistance under programs covered by Part I have been submitted to appropriate clearinghouses for review prior to their submission to ACTION. In cases where applications are received by the State Program Office and the applicant has not submitted a Notification of Intent or an application to the State and areawide clearinghouses, the applicant should be notified to submit the application to the clearinghouses for review and that ACTION will not be able to take any funding action until the review has been completed. When the applicant receives the clearinghouse reviews, it will be necessary to complete a new application face page and forward it and any comments received to ACTION.

(3) Evaluate the comments furnished by the clearinghouses and forward his recommendation to the Project Review Board for final determination by the Regional Director.

(4) Furnish a copy of the face page of rejected, deferred, or withdrawn applications to the Grants Officer in time for him to comply with the requirement of notifying the clearinghouses within seven working days.

(b) *Regional Director.* (1) Where a clearinghouse has recommended against approval of an application or approval only with specific and major substantive

changes, and ACTION approves the application substantially submitted, the Regional Director will provide the clearinghouse an explanation thereof.

(2) Where a clearinghouse has recommended against approval of a project because it conflicts with or duplicates another Federal or federally assisted project, the Regional Director will consult with the agency assisting the referenced projects prior to funding the application.

(c) *Grants Officer.* The Grants Officer shall serve as the coordinating official for A-95 in the Regional Office and as such shall be responsible for notifying the clearinghouses within seven working days of any major action taken on applications which have been reviewed by the clearinghouses. Major actions will include awards, rejections, deferrals, or withdrawals. The face page of the application of SF 424 will be utilized for this purpose.

#### APPENDIX—CLEARINGHOUSE REQUIREMENTS

Office of Management and Budget Circular No. A-95, *Evaluation, Review, and Coordination of Federal and Federally Assisted Programs and Projects*, Part I, establishes clearinghouse procedures to be followed by applicants seeking Federal assistance under

the following programs: Foster Grandparent Program, 72.001; Retired Senior Volunteer Program, 72.002; and Senior Companion Program, 72.008.

In applying for assistance from ACTION for one of the programs listed above, you are requested to submit a *Notification of Intent* to the State and areawide clearinghouses no later than 175 days prior to the start date shown on the application.

Applicants are urged to contact the clearinghouses at the earliest possible time to obtain forms and instructions for insuring expeditious clearinghouse review.

Your Notification of Intent must contain at a minimum a summary description of the project for which you are seeking assistance and will include:

1. Identity of the applicant agency, organization, or individual.

2. The geographic location of the project to be assisted.

3. A brief description of the proposed project by type, purpose, general size or scale, estimated cost, beneficiaries, or other characteristics which will enable the clearinghouses to identify agencies of State or local governments having plans, programs, or projects that might be affected by the proposed project.

4. The ACTION program title and number under which assistance will be sought. (See program title and number above).

5. The estimated date by which you expect to formally file an application.

It is recommended that the enclosed SF-424 be utilized for your Notification of Intent, with the concurrence of the clearinghouses.

Clearinghouses have 30 days from receipt of your notice to inform appropriate agencies of your proposed project. The review may be completed in this period and comments submitted to you.

In cases where the clearinghouses have not completed their review within 30 days, you should forward your application for assistance to the clearinghouses no later than 145 days prior to the start date on the application.

Since ACTION cannot take any action on your application until the requirements of the Circular have been met, it is most important that you submit your notification to the clearinghouses at the earliest feasible time in order to assure maximum time for effective coordination and to avoid the delay of the submission of your application to ACTION.

You must include with your application any comments made by or through the clearinghouses and complete Item 22(b) on the face page of the application.

Approved: May 19, 1976.

Dated: May 19, 1976.

JOHN L. GANLEY,  
Deputy Director, ACTION.

# proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF TRANSPORTATION

### Coast Guard

#### [ 33 CFR Part 165 ]

(COD 75-208)

### VAPOR RECOVERY SYSTEM IN CARGO TRANSFER OPERATIONS

#### Extension of Comment Deadline

The Coast Guard published an Advance Notice of Proposed Rule Making in the April 5, 1976 issue of the FEDERAL REGISTER (41 FR 14391). This Advance Notice solicited comments on vapor recovery systems.

Comments have been received requesting that the comment deadline be extended due to the complexity of the issues involved and the desire to submit extensively researched comments. Since this is a reasonable request, the comment deadline for this Advance Notice is hereby extended until June 21, 1976.

Dated: May 19, 1976.

W. M. BENKERT,  
Rear Admiral, U.S. Coast Guard,  
Chief, Office of Merchant  
Marine Safety.

### Federal Aviation Administration

#### [ 14 CFR Part 39 ]

[Docket 76-GL-10]

### GENERAL ELECTRIC CF6-50

#### Airworthiness Directive

The Federal Aviation Administration is considering amending Part 39 of the Federal Aviation Regulations by adding an airworthiness directive applicable to CF6-50 engines. There have been instances of overpressure in the compressor which resulted in severe damage to the engine. Since this condition is likely to exist or develop in other engines of the same type, the proposed airworthiness directive would require elimination from the fan booster of the material that caused the overpressure.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the Federal Aviation Administration, Office of the Regional Counsel, Attention: Rules Docket, 2300 East Devon Avenue, Des Plaines, Illinois 60018. All communications received on or before July 31, 1976, will be considered by the

Administrator before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

This amendment is proposed under the authority of Sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423) and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend § 39.13 of Part 39 of the Federal Aviation Regulations by adding the following new airworthiness directive:

**GENERAL ELECTRIC:** Applies to Models CF6-50A, CF6-50C, CF6-50D, CF6-50E, CF6-50E1, and CF6-50H Turbofan Engines.

Compliance required by June 1, 1977, unless previously accomplished.

To prevent excessive overpressure in the high pressure compressor, accomplish the following in accordance with General Electric Service Bulletin (CF6-50) 72-412, Revision 1, or subsequent FAA Approved Revision thereto:

(a) Remove the fan stator stages 1, 2 and 3 inner shrouds, stage 2 outer shroud and stages 2 and 3 cases with abrasible epoxy resin.

(b) Replace with new or reworked parts incorporating aluminum honeycomb material.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to General Electric Company, Cincinnati, Ohio 45215. These documents may also be examined at the FAA Great Lakes Region, 2300 E. Devon Avenue, Des Plaines, Illinois 60018 and at FAA headquarters, 800 Independence Avenue, S.W., Washington, D.C. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and at the Great Lakes Region.

The incorporation by reference provisions in this document was approved by the Director of the Federal Register on June 19, 1976.

Issued in Des Plaines, Illinois on May 14, 1976.

RYAN N. WHITTEN,  
Acting Director,  
Great Lakes Region.

[FR Doc.76-14882 Filed 5-21-76; 8:45 am]

#### [ 14 CFR Part 71 ]

[Airspace Docket No. 76-WE-12]

### TRANSITION AREA

#### Proposed Designation

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would establish a new transition area for Woodland-Watts Airport, Woodland, California.

A new instrument approach procedure has been developed for Woodland-Watts Airport, Woodland, California. This new procedure is based on the Sacramento VORTAC 313°T (296°M) radial. Sacramento VORTAC is the initial approach fix and Meret INT (SAC 296° 15 DME) is the final approach fix. The portion of 700 foot transition area is required to provide controlled airspace protection for aircraft executing the instrument procedure.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Airspace and Procedures Branch, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261. All communications received on or before June 23, 1976, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261.

In consideration of the foregoing, the FAA proposes the following airspace action:

In § 71.181 (41 F.R. 440) the following transition area is added:

#### WOODLAND, CALIFORNIA

That airspace extending upward from 700 feet above the surface within a 3-mile radius of Woodland-Watts Airport (latitude 38°40'30" N., longitude 121°52'15" W.) and within 3 miles each side of the Sacramento

VORTAC 313° radial, extending from the 3-mile radius area to the Sacramento VORTAC.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)), and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Los Angeles, California, on May 7, 1976.

LYNN L. HINK,  
Acting Director,  
Western Region.

[FR Doc.76-14881 Filed 6-21-76; 8:45 am]

#### [ 14 CFR Part 71 ]

[Airspace Docket No. 76-RM-5]

### TRANSITION AREA

#### Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations which would alter the transition area at Hayden, Colorado.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Federal Aviation Administration, 10455 East 25th Avenue, Aurora, Colorado 80010. All communications on or before June 23, 1976 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Administration, 10455 East 25th Avenue, Aurora, Colorado 80010.

Instrument approach procedures have been developed for the Craig-Moffatt Airport at Craig, Colorado. Additional controlled airspace is required to protect aircraft using these procedures.

In consideration of the foregoing, the FAA proposes the following airspace action:

§ 71.181 [Amended]

In Federal Aviation Regulation Part 71.181 (41 F.R. 440) the description of the Hayden, Colorado, transition area is amended to read:

#### HAYDEN, COLORADO

That airspace extending upward from 700 feet above the surface within 5 miles each side of the Hayden, Colorado, VOR 248° radial extending from the VOR to 18 miles southwest of the VOR; and that airspace extending upward from 1,200 feet above the surface within an area bounded by a line beginning at 40°06'00"N., longitude 107°00'00"

## PROPOSED RULES

W.; to latitude 40°43'00"N., longitude 107°45'00"W.; to latitude 40°35'00"N., longitude 107°45'00"W.; to latitude 40°35'00"N., longitude 108°08'00"W.; to latitude 40°22'00"N., longitude 108°08'00"W.; to latitude 40°22'00"N., longitude 107°45'00"W.; to latitude 40°07'30"N., longitude 107°45'00"W.; thence along the north edge of V-200 to the point of beginning.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(e)).)

Issued in Aurora, Colorado, May 11, 1976.

M. M. MARTIN,  
Director, Rocky Mountain Region.

[FR Doc.76-14951 Filed 5-21-76; 8:45 am]

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

#### [ 43 CFR Part 3500 ]

### FEDERALLY OWNED MINERAL DEPOSITS

#### Testing Permits

The purpose of this proposed rulemaking is to provide procedures for issuing permits for testing Federally-owned mineral deposits subject to sale or leasing pursuant to Parts 3500 and 3600 of this Chapter.

These procedures are needed to allow testing to secure detailed data on the physical and chemical characteristic of a mineral deposit and the environmental conditions prior to the deposit being offered for sale or lease and to allow testing after a prospecting permit has expired but before the grant of a preference right lease. Permits will contain terms and conditions to protect the environment and the public interest, and provide for continued multiple use. Information obtained by a permittee on a mineral deposit involved in a preference right lease application cannot be used by the permittee to prove his right to a preference right lease.

It is hereby determined that the publication of this proposed rulemaking is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required. An environmental analysis will be prepared on individual or groups of related actions and where significant impacts on the quality of the human environment are identified a statement pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 will be prepared.

In accordance with the Department's policy on public participation in rulemaking (36 FR 8336) interested parties may submit written comments, suggestions, or objections with respect to the proposed rules to the Director (210), Bureau of Land Management, Washington, D.C. 20240 until on or before June 23, 1976.

Copies of comments, suggestions, or objections made pursuant to this notice will be available for public inspection in the Division of Legislation and Regula-

tory Management, Room 5555, Interior Building, Washington, D.C., during regular business hours (7:45 a.m.-4:15 p.m.). Subchapter C of Chapter II of Title 43 Part 3500 is amended by adding a new subpart 3507 as follows:

#### Subpart 3507—Testing Permits—Federally Owned Mineral Deposits

Sec.  
3507.0-1 Purpose.  
3507.0-2 Objectives.  
3507.0-3 Authority.  
3507.0-4 Responsibilities.  
3507.0-5 Definitions.  
3507.1 Lands subject to testing permit.  
3507.2 Pretesting procedures.  
3507.2-1 Environmental review.  
3507.2-2 Cultural resources.  
3507.3 Permits.  
3507.3-1 Applications for permit.  
3507.3-2 Issuance and termination of permit.  
3507.3-3 Rights under permits.  
3507.3-4 Operating regulations.  
3507.3-5 Surface protection and reclamation.  
3507.3-6 Bonds.  
3507.4 Use of data.  
3507.5 Use of surface.

#### Subpart 3507—Testing Permits—Federally Owned Mineral Deposits

##### § 3507.0-1 Purpose.

This subpart provides for issuing permits for testing Federally-owned mineral deposits subject to disposal pursuant to Parts 3500 and 3600 of this chapter, regardless of surface ownership.

##### § 3507.0-2 Objectives.

The objective of this subpart is to obtain data on the environmental, physical, and chemical characteristics of Federally owned mineral deposits and the related area and to provide interested parties with an avenue for exploratory drilling and data gathering on Federally owned mineral deposits.

##### § 3507.0-3 Authority.

The statutory authorities for issuing permits to test Federally-owned minerals under this part are contained in the Acts cited in sections 3500.0-3 and 3600.0-3 of this chapter, the Public Lands Administration Act of July 16, 1960 (43 U.S.C. 1362), and 43 U.S.C. 2 and 1201.

##### § 3507.0-4 Responsibility.

(a) Subject to the supervisory authority of the Secretary, the regulations in this subpart shall be administered by the Director, through the State Director and the authorized officer. The Bureau of Land Management (BLM) exercises at the Bureau level the Secretary's discretionary authority to determine whether or not testing permits are to be issued. The Bureau of Land Management is responsible for issuing and canceling testing permits, terminating the period of liability of bonds, and is the office of record. The appropriate surface managing agency concurs in the testing plan and adequacy of compliance with environmental terms and conditions.

(b) The Geological Survey is responsible for all geologic and engineering determinations for the Secretary.

(c) The authorized officer or other appropriate Federal surface management

agency, after consultation with the Geological Survey and the surface owner, if other than the United States, formulates: (1) the requirements to be incorporated in the permits for the protection of the surface, mineral and nonmineral resources and for reclamation, using as guidelines the surface operating and reclamation performance standards contained in 43 CFR 3041 and in 30 CFR Part 211, and (2) the terms and conditions, including bonding requirements, required of the permittee.

(d) The Geological Survey after consultation with the authorized officer, any other appropriate Federal surface management agency, and the surface owner, if other than the United States, reviews and concurs in testing plans and recommends termination of the period of liability of the bond upon the completion of testing operations.

#### § 3507.0-5 Definitions.

As used in this subpart, the term: (a) "Mineral deposit" refers to all federally-owned mineral deposits which are subject to disposal under applicable law, except oil, gas, geothermal resources, and those held in trust for Indians. It also includes those minerals specifically stated in 43 CFR 3500 and 43 CFR 3600 including but not limited to native asphalt, solid and semi-solid bitumen and bituminous rock (including oil impregnated rock or sand from which oil is recoverable only after special treatment after the deposit is mined, including in situ mining or retorting, or quarried.) It does not include deposits subject to leasing under the Outer Continental Shelf Land Act of August 7, 1953 (43 U.S.C. 1331).

(b) "Testing" means an operation designed to obtain detailed data on the physical and chemical characteristics of mineral deposits and their environment.

(c) "Authorized officer" means any person authorized by law or by lawful delegation of authority in the Bureau of Land Management to perform the duties described.

(d) "Mining Supervisor" means the applicable Area or District Mining Supervisor of the Conservation Division, Geological Survey, or other subordinate acting under the direction of the Supervisor.

(e) "Testing plan" means a detailed plan submitted to the Mining Supervisor for approval after consultation with the authorized officer, or other appropriate Federal surface management agency before testing operations commence showing the location and type of testing work to be conducted, environmental protection procedures, present and proposed roads, as well as reclamation and abandonment procedures to be followed upon completion of such operations.

(f) "Testing permit" means a permit issued by the authorized officer to permit the testing of federally-owned mineral deposits under terms and conditions that will protect the surface and subsurface resources and the environment, and provide for the reclamation of any damage caused by such testing.

(g) "Participant" means a person who participates or shares in a testing permit.

(h) "Participate" means to have or take part or share with others in a testing permit.

(i) "Participation" means the act of sharing or partaking in a testing permit.

(j) "Privileged resource data" means that geological data, mineralogical data, geophysical data, geochemical data, and economic data including maps, that may be used to calculate reserves in place, and the cost of production, trade secrets, and commercial or financial information obtained from any person under this subpart and identified as confidential and privileged by such person shall not be available for public inspection without his consent. Environmental data shall not be considered privileged resource data.

#### § 3507.1 Lands subject to testing permit.

Testing permits may be issued for: (a) Lands subject to mineral lease or sale administered by the Secretary of the Interior;

(b) National forest lands or other lands subject to mineral lease or sale administered by the Department of Agriculture through the Forest Service; and

(c) Mineral deposits in lands which have been conveyed by the United States subject to a reservation to the United States of such mineral deposit, and such deposits are subject to lease or sale pursuant to parts 3500 and 3600 of this chapter.

#### § 3507.2 Pretesting procedures.

##### § 3507.2-1 Environmental review.

Before issuing a testing permit:

(a) The authorized officer or other appropriate surface management agency or other surface owner when appropriate, shall, using the testing plan submitted by the applicant make an environmental analysis and technical examination of the potential effect of such testing upon the resources of the area and its environment, including fish and other aquatic resources, wildlife habitats and populations, visual resources, recreation, cultural, and other resources in the affected area.

(b) If the authorized officer determines that an environmental impact statement as required by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) is required, he will take necessary steps to prepare such a statement.

##### § 3507.2-2 Cultural resources.

If lands listed in the National Register or nominated for inclusion in the National Register with certain cultural resources which might be affected by the issuance of testing permits, none will be authorized until compliance with Section 106 of the Historic Preservation Act (80 Stat. 917; 16 U.S.C. 470f) and Section 2 (b) of E. O. 11593 of May 13, 1971 (36 FR 8921; 16 U.S.C. 470 fn.) has been accomplished.

##### § 3507.2-3 Threatened or endangered species.

The authorized officer shall not issue a testing permit if he determines pursuant to the Act of December 28, 1973 (87 Stat. 884, 16 U.S.C. 153 et seq.), that the existence of any threatened or endangered species of fauna or flora will be jeopardized and that critical habitat will be destroyed or adversely modified to a significant degree by the testing authorized by said permit.

#### § 3507.3 Permits.

##### § 3507.3-1 Applications for permit.

(a) Testing permit applications shall be filed in accordance with the following:

(1) No specified form of application is required.

(2) Each application shall identify the tract or tracts to be tested described by legal description (or if unavailable, by metes and bounds).

(3) Each application shall contain a testing plan which must include a map or maps showing the topography of the lands to be affected, the drainage patterns, present and proposed road and trail locations, proposed test sites, and potential surface disturbance, and a narrative statement setting forth the proposed testing plan and methods for testing, the mineral or energy deposits to be tested, drilling methods, size of hole, size of core, length and size of casing, safety precautions, contingency plan for disposal of brine or other hazardous products, abandonment procedures including restoration, and a schedule of the projected time period during which the testing is to be performed, including starting and completion dates. The applicant shall not begin testing or any surface disturbance activity until an environmental analysis is accomplished and the testing plan has been approved.

(4) Each application with supporting documents shall be filed in the proper BLM Office together with a nonrefundable \$100 service charge.

(b) Any person qualified to hold leases or contracts issued pursuant to Parts 3500 and 3600 of this chapter may apply for a testing permit.

(c) Nothing in this subpart shall preclude the authorized officer from issuing a call for an expression of interest in testing permits for a given area.

(d) Applicants for permits shall be required, after approval of the plan and prior to permit issuance, to afford other parties an opportunity, on a pro rata cost sharing basis, to participate in the approved testing plan. An applicant upon notice that a permit will be issued to him, must publish a "Notice of Invitation," approved by the authorized officer, once every week for four consecutive weeks in at least one newspaper of general circulation in the area where the lands covered by the permit application are situated. This notice must contain an invitation to the public to participate in the proposed testing program. Copies of published Notices of Invitation must be filed with the authorized officer upon each

publication for posting in the proper BLM office. All persons, if any, who elect to participate in the testing program shall notify in writing the authorized officer and the applicant. The authorized officer upon the applicant's compliance with the requirements of this section, all else being regular, shall issue the testing permit.

##### § 3507.3-2 Issuance and termination of permit.

(a) General. The issuance of testing permits under this Subpart is discretionary with the authorized officer. Issuance of a testing permit does not obligate the Government to issue or conduct a lease, permit, or contract on lands covered by the permit.

(b) Duration. Testing permits may be issued for a period of time up to six months duration and shall include clean up and restoration. The authorized officer shall designate the date on which operations may begin.

(c) Extensions. Testing permits may be extended for a period not to exceed six months. Testing operations may not be conducted after a permit has expired and prior to approval of an application for an extension. The application for extension must be accompanied by a nonrefundable service charge of \$25, and must specify the additional time, not to exceed six months, needed to complete the approved testing operations, and reasons why such an extension is required.

(d) Relinquishments. A permittee may, subject to his and his surety's continued obligation to comply with the terms and conditions and special stipulations of the permit, the plan, and the regulations, relinquish a testing permit for all or any portion of the lands it embraced. A relinquishment must be filed in the proper BLM office.

(e) Cancellation. A testing permit may be canceled for noncompliance with the terms of the permit, the plan, or the regulation after the permittee has been given a notice of violation and the permittee fails to correct the violation or violations within the notice period.

(f) Testing Plan. The approved testing plan will be dated, attached and made a part of each permit issued.

(g) Modifications. When unforeseen conditions that could result in significant disturbance or damage are encountered or when geologic or other physical conditions warrant a modification in the approved testing plan, the authorized officer after consultation with the mining supervisor and other appropriate Surface Management Agency may adjust the terms and conditions of the permit or approve changes in the testing plan.

##### § 3507.3-3 Rights under permits.

The issuance of a testing permit shall convey no rights except the right to perform testing operations in accordance with the specific terms and conditions of the permit, the approved plan, special stipulations or the regulations. A permittee shall not acquire any right to a permit or lease nor to preferential treatment nor shall equities be deemed to accrue as a result of any data or information obtained and submitted as required by the permit, the approved plan or the regulations.

mittee shall not acquire any right to a permit or lease nor to preferential treatment nor shall equities be deemed to accrue as a result of any data or information obtained and submitted as required by the permit, the approved plan or the regulations.

##### § 3507.3-4 Operating regulations.

Permittee shall comply with all regulations of the Secretary of the Interior, including the provisions of the operating regulations of the Geological Survey (30 CFR 211 and 231) and all others issued pursuant thereto. Copies of the operating regulations may be obtained from the mining supervisor. Permittee shall allow inspection of the premises and operations by duly authorized representatives of the Department of the Interior, and other appropriate Surface Management Agency, and shall provide for the free ingress or egress of Government officers and for users of the lands under authority of the United States.

##### § 3507.3-5 Surface protection and reclamation.

Each permit shall contain requirements and stipulations pertaining to operations, environmental, and other resource protection, and reclamation of the land disturbed by testing as the authorized officer shall prescribe.

##### § 3507.3-6 Ground water data.

The applicant may be required to collect and report ground water data to the authorized officer.

##### § 3507.3-7 Bonds.

(a) The provisions of the regulations in Subpart 3504 of this chapter are hereby made applicable to these regulations. In addition each compliance bond will be conditioned upon faithful compliance with the regulations in this subpart and any additional terms and conditions of the permit.

(b) Prior to issuing a permit, the authorized officer, after consultation with the Mining Supervisor and other appropriate Surface Management Agency and the surface owner where appropriate, shall ensure that the amount of the compliance bond or bonds to be furnished is sufficient to insure reclamation in accordance with the performance and reclamation standards in § 3041.2-2, and with the terms and conditions of the permit.

(c) Upon completion of a testing and reclamation program which is in compliance with the terms and conditions of a testing permit, approved plan, or the regulations, or upon the discontinuance of testing operations and completion of such reclamation as may be needed to the satisfaction of the authorized officer and other appropriate Surface Management Agency and the mining supervisor the authorized officer will terminate the period of liability of the compliance bond. Where the surface of the land being tested is in private ownership, the authorized officer shall not authorize termination of the period of liability under the compliance bond until he has received written acknowledgement from the surface owner of his satisfaction with the reclamation of the surface. In the event the permittee and surface owners are unable to reach agreement on the adequacy of the permittee's reclamation effort, the authorized officer shall make the final determination. He will terminate the period of liability under the compliance bond after determining that the terms and conditions and special stipulations of the permit, the approved plan and the regulations have been met.

(d) All resource and environmental data obtained by the permittee in compliance with the terms and conditions of the permit, the plan or the regulations shall be submitted to the mining supervisor. The permittee shall submit such data and, where appropriate, the parameters under which the data were gathered, at such time and in such form as required by the mining supervisor or authorized officer, or other appropriate Surface Management Agency or specified in this subpart, the permit, or the plan. Privileged resource data which is submitted to the mining supervisor by the permittee shall be treated as confidential proprietary information for five years or until the permit lands are leased, whichever is sooner, except that due to inaction by the Government to decide to lease or sell, the time may be extended for a period of not to exceed three years unless otherwise authorized by the permittee. During this period the permittee, with concurrence of participants, may dispose of or release such privileged resource data as he may desire.

(e) Access across private lands will be provided by the Federal Government or the applicant at option of the authorized officer.

##### § 3507.5 Use of surface.

(a) A permittee shall be entitled to use for testing purposes only so much of the surface of the permitted lands as is authorized in the approved testing plan.

(b) Operations under these regulations shall not unreasonably interfere with or endanger operations under any other authorized use pursuant to the provisions of any other Act.

(c) The permittee shall not be entitled to use any mineral materials subject to the Materials Act except as provided by Part 3600 of this chapter.

(d) The permittee shall comply with all applicable State, and local regulations and standards as prescribed by the authorized officer of the surface management agency including the regulations in 43 CFR Parts 23, 3041, 3500, 3600, and 30 CFR 211 and 231.

(e) Access across private lands will be provided by the Federal Government or the applicant at option of the authorized officer.

Dated: May 19, 1976.

## Correction

In FR Doc. 76-12095 appearing at page 17742 in the issue for Wednesday, April 28, 1976, the following corrections should be made.

1. On page 17742, in the second column, third line, the entry reading "arrosa miwoka" should read "Helminthoglypta arrosa miwoka".

2. On page 17743, in the first column, third full paragraph, the last three lines should be removed, and, in their place, the first 11 lines from the second column should be inserted.

3. On page 17744, in the second column, fourth line, the word "if" should read "of".

4. On page 17746, in the second column, twelfth line, the word "restruction" should read "destruction".

5. Also on page 17746, in the second column, first full paragraph, the seventh line, which reads "destruction or modification of habitat", should be removed and in its place should be inserted "determination of Critical Habitat for".

6. In the table on page 17747, the fifteenth entry under the second column, Scientific Name, should read "Vesperiola karokorum".

**MILK IN THE UPPER FLORIDA, TAMPA  
BAY AND SOUTHEASTERN FLORIDA  
MARKETING AREAS**

## Hearing on Proposed Amendments to Tentative Marketing Agreements and Orders

Notice is hereby given of a public hearing to be held on June 22, 1976, at the Kahler Plaza Inn, 151 East Washington Street, Orlando, Florida, beginning at 9:30 a.m., with respect to proposed amendments to the tentative marketing agreements and to the orders, regulating the handling of milk in the Upper Florida, Tampa Bay and Southeastern Florida marketing areas.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions in each of the aforesaid specified marketing areas which relate to the proposed amendments, hereinafter set forth, and any appropriate modifications thereof, to the tentative marketing agreements and to the orders.

The proposed amendments, set forth below, have not received the approval of the Secretary of Agriculture.

PROPOSED BY LONGLIFE DAIRY PRODUCTS COMPANY

## PROPOSAL NO. 1

Revise the provisions in the Upper Florida Order (Part 1006), the Tampa Bay Order (Part 1012), and the Southeastern Florida Order (Part 1013) to specify Class II classification, instead of Class I classification, for skim milk and butterfat disposed of as a cream product.

To this end consider—

(a) The revision of the Fluid Milk Product definition, § ----.15, in each order as follows—

§ ----.15 Fluid milk product.

"Fluid milk product" means milk, skim milk, buttermilk, acidophilus milk, flavored milk and flavored milk drinks (including eggnog and milk shake mix) filled milk, concentrated milk, and mixtures of sweet cream and milk or skim milk containing less than 9 percent butterfat.

(b) The revision of the Class II classification provision at § ----.40(b) (1) of each order by inserting before the phrase "sour cream," the phrase "sweet cream, sweet cream products."

The only revision of Orders 1006, 1012 and 1013 intended by this proposal is the specification of Class II classification, instead of Class I classification, for skim milk and butterfat disposed of as a cream product, and to make appropriate conforming changes in the Orders.

PROPOSED BY THE DAIRY DIVISION,  
AGRICULTURAL MARKETING SERVICE

## PROPOSAL NO. 2

Make such changes as may be necessary to make the entire marketing agreements and the orders conform with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and the orders may be procured from the Market Administrator, P.O. Box 11368, Fort Lauderdale, Florida 33306, or from the Hearing Clerk, 112-A, Administration Building, United States Department of Agriculture, Washington, D.C. 20250 or may be there inspected.

Signed at Washington, D.C., on:  
May 19, 1976.

WILLIAM T. MANLEY,  
Deputy Administrator,  
Program Operations.

## SHIPPING COORDINATING COMMITTEE

## Meeting

The working group on carriage of dangerous goods of the Subcommittee on Safety of Life at Sea, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting at 9:30 a.m. on Tuesday, June 15, 1976, in Room 8334 of the Department of Transportation, 400 Seventh Street SW., Washington, D.C.

The purpose of the meeting is to:

Discuss the U.S. position papers to be submitted at the 26th Session of the Intergovernmental Maritime Consultative Organization's (IMCO) Subcommittee on Carriage of Dangerous Goods scheduled to meet in London July 5-9, 1976.

Review amendments to the IMCO International Maritime Dangerous Goods Code (IMDG) proposed by the U.S. and other member states of IMCO which will be considered at the 26th Session of the IMCO Subcommittee on Carriage of Dangerous Goods. Discuss progress of the IMCO activities of a continuing nature such as implementation of the IMDG Code.

Requests for further information on the meeting should be directed to Captain C. E. Mathieu, United States Coast Guard. He may be reached by telephone on (area code 202) 426-2296.

The Chairman will entertain comments from the public as time permits.

RICHARD K. BANK,  
Chairman,

Shipping Coordinating Committee.

## SHIPPING COORDINATING COMMITTEE

## Meeting

The working group on ship design and equipment of the Subcommittee on Safety of Life at Sea, a subcommittee of the Shipping Coordinating Committee, will hold an open meeting at 8:00 a.m. on Wednesday, June 16, 1976, in Rooms 8236 and 8238 of the Department of Transportation, 400 Seventh Street S.W., Washington, D.C.

The purpose of the meeting is to discuss:

The 15th Session of the Subcommittee on Ship Design and Equipment of the Intergovernmental Maritime Consultative Organization (IMCO) which met in London April 28-30, 1976, and the distribution of

work assignments for the 16th Session of the Subcommittee on Ship Design and Equipment tentatively scheduled to meet in London December 8-10, 1976.

Special purpose vessels including training and research vessels, mobile offshore drilling units, and offshore supply vessels.

Draft requirements for segregated ballast tankers below 150 meters in length.

Safety requirements for nuclear ships.

Code for Novel Craft.

Ship-borne barges and barge carriers.

Requests for further information on the meeting should be directed to Captain D. J. Linde, United States Coast Guard. He may be reached by telephone on (area code 202) 426-2167.

The Chairman will entertain comments from the public as time permits.

## DEPARTMENT OF THE TREASURY

## Office of the Secretary

**TUNERS (OF THE TYPE USED IN CONSUMER ELECTRONIC PRODUCTS) FROM JAPAN**

Tentative Determination to Modify or Revoke Dumping Finding

A finding of dumping with respect to tuners (of the type used in consumer electronic products) (hereinafter referred to as tuners) from Japan was made in Treasury Decision 70-257 which was published in the Federal Register on December 12, 1970 (35 F.R. 18914).

On April 2, 1975, this finding was modified to exclude all tuners from Japan, produced and sold by Matsushita Electric Industrial Co., Ltd., Matsushita Electric Trading Co., Ltd., and those sold by Victor Company of Japan, Ltd., by a notice published in the FEDERAL REGISTER of April 2, 1975 (40 F.R. 14591, T.D. 75-80).

After due investigation, I find that tuners produced and sold by Sanyo Electric Co., Ltd., and Sanyo Electric Trading Co., Ltd., are no longer being, nor are likely to be, sold in the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.). The investigation indicated that with the exception of several sales for which dumping duties in a *de minimis* amount were found to accrue, all sales by Sanyo Electric Co., Ltd., and Sanyo Electric Trading Co., Ltd., for a three year period have been made at not less than fair value, and assurances have been given that future sales of such tuners to the United States will not be made at less than fair value.

Accordingly, notice is hereby given that the Department of the Treasury intends to modify the finding of dumping with respect to tuners from Japan to exclude the tuners produced and sold by Sanyo Electric Co., Ltd., and Sanyo Electric Trading Co., from the finding.

In accordance with section 153.37, Customs Regulations (19 CFR 153.37), interested persons may present written views of arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any request that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Avenue, NW., Washington, D.C. 20229, in time to be received by his office on or before June 3, 1976. Such request must be accompanied by a state-

ment outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than 30 days from the date of publication of this notice in the FEDERAL REGISTER.

This notice is published pursuant to section 153.41(c) of the Customs Regulations (19 CFR 153.41(c)).

DAVID R. MACDONALD,  
Assistant Secretary of Treasury.

MAY 18, 1976.

#### LARGE POWER TRANSFORMERS FROM ITALY

##### Notice of Tentative Determination to Modify or Revoke Dumping Finding

A finding of dumping with respect to large power transformers from Italy was published as Treasury Decision 72-161 in the FEDERAL REGISTER of June 14, 1972 (37 FR 11772).

After due investigation, it has been determined, tentatively, that large power transformers manufactured and sold for export by Asgen Ansaldo San Giorgio Compagnia Generale S.p.A. of Genova, Italy, and Societa Nazionale delle Officine di Savigliano of Torino, Italy are not being, nor are likely to be, sold in the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

##### Statement of Reasons on Which This Tentative Determination is Based:

The investigation indicated that no sales at less than fair value of large power transformers by Asgen Ansaldo San Giorgio Compagnia Generale S.p.A., and Societa Nazionale delle Officine di Savigliano have been made for a period of more than two years from the dumping finding. Written assurances have been given by Societa Nazionale delle Officine di Savigliano that future sales of large power transformers for export to the United States will not be made at less than fair value. Asgen Ansaldo San Giorgio Compagnia Generale S.p.A. has indicated that they no longer manufacture large power transformers for sale in any market.

Accordingly, notice is hereby given that the Department of the Treasury intends to modify the finding of dumping with respect to large power transformers from Italy to exclude large power transformers produced and sold for export to the United States by Asgen Ansaldo San Giorgio Compagnia Generale S.p.A. of Genova, Italy, and Societa Nazionale delle Officine di Savigliano of Torino, Italy, from the finding.

In accordance with section 153.37, Customs Regulations (19 CFR 153.37), interested persons may present written views or arguments, or request in writing that

the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Avenue, N.W., Washington, D.C. 20229, in time to be received by his office not later than 10 days from the date of publication of this notice in the FEDERAL REGISTER. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office on or before June 23, 1976.

This notice is published pursuant to section 153.41(c) of the Customs Regulations (19 CFR 153.41(c)).

MAY 18, 1976.

DAVID R. MACDONALD,  
Assistant Secretary of Treasury.

#### DEPARTMENT OF DEFENSE

##### Department of the Army ARMY FINANCIAL MANAGEMENT ADVISORY COMMITTEE

##### Notice of Meeting

In accordance with Section 10(a) (2) of the Federal Advisory Committee Act (P.L. 92-463), announcement is made of the following Committee meeting:

Name of Committee: Army Financial Management Advisory Committee.

Date of meeting: 15-16 June 1976.

Place: Room 2D 680, the Pentagon.  
Time: 0800-1700—15 June 1976; 0800-1500—16 June 1976.

Proposed agenda: The first day's agenda consists of the Committee's discussion and markup on the detailed report chapters and the executive summary. The second day's agenda consists of the preparation and presentation of a status report to the Secretary of the Army and the development of final changes to the report. This meeting is open to the public; however, space accommodations are limited. Persons wishing to attend, appear before, or file statements with the Committee at the time and in the manner permitted by the Committee should advise the Deputy Chairman of the Committee, in writing prior to the meeting at the following address: Office, Assistant Secretary of the Army (Financial Management), Room 2E 665, The Pentagon, Washington, DC 20310.

Dated: May 18, 1976.

By authority of the Secretary of the Army.

R. W. HAMPTON,  
Colonel, U.S. Army, Director of  
Administrative Management,  
TAGCEN.

#### DEPARTMENT OF JUSTICE

##### Drug Enforcement Administration CONTROLLED SUBSTANCES

##### Proposed Revised Aggregate Production Quota for 1976; 2,5-Dimethoxyamphetamine

Section 306 of the Controlled Substances Act (21 U.S.C. 826) requires that the Attorney General establish aggregate production quotas for all controlled substances listed in Schedules I and II. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations.

The quotas are to provide adequate supplies of each such substance for (1) the estimated medical, scientific, research, and industrial needs of the United States, (2) lawful export requirements, and (3) the establishment and maintenance of reserve stocks.

2,5-Dimethoxyamphetamine is a Schedule I controlled substance which has an industrial use in the photographic industry. This substance has no known medicinal use in the United States. On February 11, 1976, an aggregate production quota of 30,000,000 grams (expressed as anhydrous base) for this substance for 1976 was finalized in the Federal Register (Vol. 41, No. 6079). The extensive use of this substance in the photographic industry necessitates that DEA revise the previously established quota for this substance for 1976. Therefore, the Administrator of the Drug Enforcement Administration hereby proposes that the 1976 aggregate production quota, expressed as grams of anhydrous base, for 2,5-Dimethoxyamphetamine be revised as follows:

Basic class: Proposed revised 1976 quota  
2,5-Dimethoxyamphetamine—45,000,000

All interested persons are invited to submit their comments and objections in writing regarding this proposal. These comments or objections should state with particularity the issues concerning which the person desires to be heard. Comments and objections should be submitted in triplicate to The Administrator, Drug Enforcement Administration, Department of Justice, 1405 Eye Street, N.W., Washington, D.C. 20537, Attention: DEA Federal Register Representative, and must be received by June 25, 1976. If a person believes that one or more issues raised by him warrant a full adversary-type hearing, he should state and summarize the reasons for his belief.

In the event that comments or objections to this proposal raise one or more issues which the Administrator finds, in his sole discretion, warrants a full adversary-type hearing, the Administrator shall order a public hearing in the FEDERAL REGISTER summarizing the issues to be heard and setting the time for the hearing which shall not be less

than 30 days after the date of publication.

Dated: May 13, 1976.

PETER B. BENSINGER,  
Administrator,  
Drug Enforcement Administration.

[Marketing Order 905]

##### SHIPPERS ADVISORY COMMITTEE ON ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

##### Notice of Public Meeting

Pursuant to the provisions of § 10(a) (2) of the Federal Advisory Committee Act (86 Stat. 770), notice is hereby given of a meeting of the Shippers Advisory Committee established under Marketing Order No. 905 (7 CFR Part 905). This order regulates the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida and is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The committee will meet in the A.B. Michael Auditorium of the Florida Citrus Mutual Building, 302 South Massachusetts Avenue, Lakeland, Florida, at 10:30 a.m. on June 8, 1976.

The meeting will be open to the public and a brief period will be set aside for public comments and questions. The agenda of the committee includes analysis of current information concerning market supply and demand factors, and consideration of recommendations for regulation of shipments of the named fruits.

The names of committee members, agenda, summary of the meeting and other information pertaining to the meeting may be obtained from Frank D. Trovillion, Manager, Growers Administrative Committee, P.O. Box R, Lakeland, Florida 33802; telephone 813-682-3103.

Dated: May 20, 1976.

DONALD E. WILKINSON,  
Administrator.  
[FR Doc.76-15244 Filed 5-21-76;8:45 am]

#### GRAIN STANDARDS

##### Arizona Grain Inspection Point

Statement of considerations. On April 5, 1976, there was published in the FEDERAL REGISTER (41 FR 14451) a notice announcing (1) the application of Hutson Laboratories, Yuma, Arizona, for designation to operate as an official inspection agency at Yuma, Arizona, under section 7(f) of the U.S. Grain Standards Act (7 U.S.C. 79(f)), and (2) that Agricultural Seed Laboratories, Phoenix,

Arizona, was interested in stationing a licensed sampler in the Yuma area.

Interested persons were given until May 5, 1976, to make application for designation and to submit written views and comments with respect to the application.

Comments were received from seven interested persons recommending that Hutson Laboratories be designated to operate as an official inspection agency at Yuma, Arizona. One other comment received was not relevant to the designation of an official inspection agency at Yuma, Arizona. No applications for designation were received other than the application from Hutson Laboratories, and no adverse comments on the application were received. There was no support for Agricultural Seed Laboratories to station a licensed sampler in the Yuma area.

After due consideration of all submissions made pursuant to the notice of April 5, 1976, and all other relevant matters, the Hutson Laboratories is hereby designated to operate as an official inspection agency at Yuma, Arizona.

(Sec. 7, 39 Stat. 482, as amended 82 Stat. 764; 7 U.S.C. 79(f); 37 FR 28464 and 28476.)

Effective date. This notice shall become effective May 24, 1976.

Done in Washington, D.C. on May 18, 1976.

WILLIAM T. MANLEY,  
Acting Administrator.

[FR Doc.76-15065 Filed 5-21-76;8:45 am]

#### Forest Service

##### SAMUEL R. MCKELVIE NATIONAL FOREST LIVESTOCK ADVISORY BOARD

##### Meeting

The Samuel R. McKelvie National Forest Livestock Advisory Board will meet at 2:00 P.M., MDT, June 5, 1976, at the Niobrara Ranger Station, located 19 miles south of Nenzel, Nebraska.

The purpose of this meeting is to elect advisory board members and to discuss various grazing resource management practices.

The meeting will be open to the public. Persons who wish to attend should notify the District Ranger, Bessey Ranger District, Halsey, Nebraska 69142, phone (308) 533-2257.

The Committee has established the following rules for public participation:

1. Members of the public may present oral statements at any time during discussions.

2. Any member of the public who wishes to do so should file a written statement with the Committee, either before or after the meeting.

Dated: May 17, 1976.

JAMES A. LEES,  
Acting Forest Supervisor.

#### DEPARTMENT OF COMMERCE

##### Office of the Secretary

[Transmittal 293; Department Organization Order 25-4B]

##### OFFICE OF MINORITY BUSINESS ENTERPRISES

##### Organization and Assignment of Function

This order effective May 9, 1976 supercedes the materials appearing at 38 FR 27430 of October 3, 1973, 38 FR 27431 of October 3, 1973, 39 FR 26768 of July 23, 1974 and 40 FR 7696 of February 21, 1975.

Section 1. Purpose.  
01 This order prescribes the organization and assignment of functions within the Office of Minority Business Enterprise ("OMBE").

02 This revision reflects a reorganization of OMBE to more effectively plan, operate, evaluate, and support the minority business enterprise program. The major changes include the abolition of the Eligibility Review Board; the establishment of a separate Congressional Affairs Staff (paragraph 4.01); retitling of Legal Staff to Chief Counsel (paragraph 4.02); the consolidation of information services functions into the Information Center (paragraph 4.03); the elimination of field coordination functions in the Field Operations and Administration Division and the retitling to the Administration Division (Section 5.); the consolidation of planning, evaluation, and research functions into a new Planning and Evaluation Division (Section 6.); and the reorientation of functions of the National Programs Division and retitling to the Program Resources Division (Section 7.).

Section 2. Organization structure.  
The principal organization structure and lines of authority shall be as depicted in the attached organization chart, Exhibit 1. A copy of the chart is on file with the original of this document in the Office of the Federal Register.

Section 3. Office of the Director.

01 The Director shall formulate policies and programs for, and direct and manage all activities of, OMBE.

02 The Deputy Director shall be the principal assistant to the Director, perform the functions of the Director in the latter's absence; and carry out special top level assignments for the Director.

Section 4. Staff offices.

01 The Congressional Affairs Staff shall provide staff support to the Director in his relations with the Congress; serve as the focal point within OMBE for handling Congressional inquiries, requests for assistance and all other matters in which Congress has an interest, except the preparation and analysis of legislation directly affecting OMBE's program; and provide guidance and support to the Regional Offices and the rest of OMBE on matters of interest to the Congress. These activities shall be carried out in coordination with, and in recognition of the responsibilities of, the Department Office of Congressional Affairs.

.02 The Chief Counsel shall provide legal support to the Director; provide legal services for all components of OMBE; and coordinate OMBE's legislative program, including the analysis of proposed legislation affecting the Federal Government's minority business enterprise program. These activities shall be carried out subject to the overall authority of the Office of the General Counsel as provided in Department Organization Order 10-6.

.03 The Information Center shall provide support to the Director in public affairs; serve as the focal point within OMBE for providing the general public with information regarding OMBE programs and activities; handle public inquiries and requests for information; provide assistance and support to the Regional Offices and the rest of OMBE in the preparation and distribution of publications, speeches, displays, and presentations; and maintain a center for the development, collection, summarization, and dissemination of information to aid persons and organizations throughout the Nation in undertaking or promoting the establishment and operation of minority business enterprises. These activities shall be carried out subject to the supervision of the Departmental Office of Communications as provided in Department Organization Order 15-3.

Section 5. Administration Division. The Administration Division, under the supervision of an Assistant Director, shall provide administrative and logistic support, including financial management, administrative services, management information, and secretariat services, to the Director and all OMBE components. More specifically, the Division shall:

- a. Prepare OMBE budgets and support the Director in budget justifications; prepare internal budgets and allocations of funds;
- b. Maintain liaison with the Departmental Office of Budget and Program Analysis on budgetary matters and with EDA and the Departmental Office of Financial Management Services on accounting matters;
- c. Prepare and monitor financial plans, coordinate financial matters with the Small Business Administration and other agencies having mutual financial interests;
- d. Coordinate personnel administration and serve as liaison with the Departmental Office of Personnel;
- e. Assist employees on travel matters and arrange for the provision of housekeeping, printing, payroll, and supply services;
- f. Provide assistance and coordination in the preparation and use of forms and reports;
- g. Maintain liaison with the Departmental Office of Administrative Services and Procurement on all services provided by that office, including procurement/contract policies and procedures;
- h. Maintain a system for the collection of program management data;
- i. Provide secretariat services to the Director and OMBE offices; and

j. Maintain the OMBE Communications System, including coordinating the preparation, clearance and dissemination of directives and manuals.

Section 6. Planning and evaluation division.

The Planning and Evaluation Division, under the supervision of an Assistant Director, shall:

- a. Develop, for the Director's approval, monitor and evaluate research projects conducted by other public or private organizations to test new ways of assisting minority entrepreneurs to overcome special problems facing minority business, or to otherwise advance minority business enterprise;
  - b. Maintain a research library relative to minority business enterprise, and maintain liaison with public and private research organizations;
  - c. Advise the Director on international or national conditions and trends that affect OMBE's mission and goals, and provide economic analyses in support of ongoing programs and activities;
  - d. Coordinate the development of annual objectives, and, upon request, assist program offices in translating goals and objectives into programs and projects;
  - e. Design overall systems for monitoring, evaluating, and reporting progress by OMBE components and funded organizations, develop measures (gross receipts, failure rates, etc.) of progress of minority business enterprises nationally, monitor overall program performance against established goals and objectives, and evaluate the impact of broadscale Federal programs to assist minority business development; and
  - f. Conduct other evaluations and special studies as directed by the Director.
- Section 7. Program Resources Division. The Program Resources Division, under the supervision of an Assistant Director, shall, on a national basis:
- a. Mobilize and generate public and private sector resources (money, markets, and management) on behalf of minority business development, and develop policies and systems to assure that these resources are deliverable and are delivered locally through the Regional Offices and their funded organizations;
  - b. Provide technical support to the Regional Offices in specialized areas, including market development, capital development, and government coordination;
  - c. Develop and maintain liaison with national organizations which contribute to the development of minority business;
  - d. Manage and evaluate those resource development projects which affect the OMBE program in more than one region;
  - e. Develop policies and systems to provide minority entrepreneurs with management education and otherwise support the management development of minority entrepreneurs;
  - f. Study the special problems of Indian entrepreneurs and business enterprises, and, in conjunction with the Bureau of Indian Affairs and other Federal agencies with Indian responsibilities, develop policies and strategies to overcome such problems; and
  - g. Support the Director and the Secretary of Commerce in their Federal coordination responsibilities; develop working relationships and agreements with other Federal departments and agencies covering their minority business activities; appraise the minority business development programs and activities of individual departments and agencies; and support the Under Secretary and the Director in the work of the Interagency Council for Minority Business Enterprise and other appropriate interagency committees and councils.

Section 8. Field structure.

The principal OMBE field structure shall consist of Regional Offices each of which shall implement the policies, programs, and projects designed to accomplish the basic OMBE mission in a specified, multistate area. The OMBE field structure shall be as depicted in the attached map (Exhibit 2). A copy of the map is on file with the original of this document in the Office of the Federal Register.

.01 Each Regional Office shall provide local support of minority business development by identifying and developing local sources of financial, marketing, management, and technical assistance; by mobilizing local private sector resources; by coordinating the local delivery of the resources identified and developed by the Program Resources Division; by coordinating specific Federal support regionally; by mobilizing State and local government support; by carrying out special activities such as seminars and training; and by monitoring and evaluating the contractors and grantees that provide specified assistance to minority businesses (except those research or multi-regional contracts and grants monitored and evaluated by the Planning and Evaluation Division or the Program Resources Division).

.02 Each Regional Office shall be headed by a Regional Director and Deputy Director who shall have staff support in their planning, evaluation, and general administration responsibilities. The Regional Staff shall be divided into program generalists and technical specialists. Each generalist shall be accountable for the accomplishment of overall goals and objectives in a given segment of the Region. The technical specialists shall provide Region-wide support to the Regional Director, Deputy Director and to the generalists in specialized areas, such as market development, capital development and inter-agency coordination.

ALEX ARMINDARN,  
Director, Office of  
Minority Business Enterprise.

Approved: E. KASPUTYS,  
Assistant Secretary  
for Administration.

# COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV, 1974), notice is hereby given that a meeting of the Hardware Subcommittee of the Computer Systems Technical Advisory Committee will be held on Friday, July 16, 1976, at 9:00 a.m. in Room 3814B, Main Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Hardware Subcommittee of the Computer Systems Technical Advisory Committee was established on July 8, 1975, with the approval of the Director, Office of Export Administration, pursuant to the charter of the committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to computer systems, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls. The Hardware Subcommittee was formed to continue the work of the Performance Characteristics and Performance Measurements Subcommittee, pertaining to (a) maintenance of the processor performance tables and further investigation of total system performance; and (b) investigation of array processors in terms of establishing the significance of these devices and determining the differences in characteristics of various types of these devices.

The Subcommittee meeting agenda has four parts:

## GENERAL SESSION

- (1) Opening remarks by the Subcommittee Chairman.
- (2) Presentation of papers or comments by the public.
- (3) Performance measurement of peripheral equipment as part of computer systems.

## EXECUTIVE SESSION

- (4) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The public will be permitted to attend the General Session, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (4), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on November 25, 1975, pursuant to Section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552(b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All materials to be reviewed and discussed by the Subcommittee during the Executive Session of the meeting have been properly classified under the Executive Order. All Subcommittee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Domestic and International Business Administration, Room 3100, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202/377-4196.

The Complete Notice of Determination to close portions of the series of meetings of the Computer Systems Technical Advisory Committee and of any subcommittees thereof, was published in the Federal Register (40 FR 56960, appearing in the issue of December 5, 1975).

Dated: May 18, 1976.

RAUER H. MEYER,  
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

[FR Doc.76-15116 Filed 5-21-76; 8:45 am]

# Domestic and International Business Administration COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV, 1974), notice is hereby given that a meeting of the Technology Transfer Subcommittee of the Computer Systems Technical Advisory Committee will be held on Thursday, July 15, 1976, at 9:30 a.m. in Room 3814B, Main Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to

Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Technology Transfer Subcommittee of the Computer Systems Technical Advisory Committee was initially established on April 10, 1974. On July 8, 1975, the Director, Office of Export Administration approved the reestablishment of this Subcommittee pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, world-wide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to computer systems, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls. The Technology Transfer Subcommittee was formed to examine the impact of transferring Automatic Data Processing technology to Communist destinations.

The Subcommittee meeting agenda has five parts:

## GENERAL SESSION

- (1) Opening remarks by the Subcommittee Chairman.
- (2) Presentation of papers or comments by the public.
- (3) Nomination and election of a new Subcommittee Chairman.
- (4) Completion of outline of the work program on software and discussion on how assignments will be made.

## EXECUTIVE SESSION

- (5) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The public will be permitted to attend the General Session, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on November 25, 1975, pursuant to Section 10(d) of the Federal Advisory Committee Act that the matters to be discussed in the Executive Session should be exempt from the provisions of the Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552(b)(1), i.e., it is specifically required by Executive Order 11652 that they be kept confidential in the interest of the national security. All materials to be reviewed and discussed by the Subcommittee during the Executive Session of the meeting have been properly classified under the Executive Order. All Subcommittee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon

written request addressed to the Freedom of Information Officer, Domestic and International Business Administration, Room 3100, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202/377-4196.

The complete Notice of Determination to close portions of the series of meetings of the Computer Systems Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER (40 F.R. 56960 appearing in the issue of December 5, 1975).

Dated: May 18, 1976.

**RAUER H. MEYER,**  
Director, Office of Export Administration, Bureau of East-West Trade, Department of Commerce.

[FR Doc. 76-15045 Filed 5-21-76; 8:45 am]

#### NORTH CAROLINA STATE UNIVERSITY Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, on or before June 14, 1976.

Amended regulations issued under cited Act, (15 CFR 301) prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket number: 76-00398. Applicant: North Carolina State University, Geosciences Department, Withers Hall, Raleigh, NC 27607. Article: Deep Sea Reversing Thermometers & Case. Manufacturer: Watanabe Keiki Manufacturing Co. Ltd., Japan. Intended use of article: The article is intended to be used to measure and record deep ocean water temperatures and, in addition, provide the means by which the depth of measurement can be determined. Application received by Commissioner of Customs: May 6, 1976.

Docket number: 76-00399. Applicant: North Carolina State University, Geo-

sciences Department, Withers Hall, Raleigh, NC 27607. Article: Deep Sea Reversing Thermometers & Case. Manufacturer: Watanabe Keiki Manufacturing Co. Ltd. Intended use of article: The article is intended to be used to measure and record deep ocean water temperatures and, in addition, provide the means by which the depth of measurement can be determined. Application received by Commissioner of Customs: May 6, 1976.

Docket number: 76-00400. Applicant: North Carolina State University, Geosciences Department, Withers Hall, Raleigh, NC 27607. Article: Deep Sea Reversing Thermometers & Case. Manufacturer: Watanabe Keiki Manufacturing Co. Ltd. Intended use of article: The article is intended to be used to measure and record deep ocean water temperatures and, in addition, provide the means by which the depth of measurement can be determined. Application received by Commissioner of Customs: May 6, 1976.

Docket number: 76-00401. Applicant: Washington University School of Medicine, 660 South Euclid Avenue, St. Louis, Missouri 63110. Article: Electron Microscope, Model EM 201C and Accessories. Manufacturer: Philips Electronic Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for investigations of animal cells and viruses used in the studies of cancer. Varied experiments to be conducted will include: the study of the mechanisms and effects of viral DNA integration into the host cell genome, the role of various types of viral particles in oncogenesis. In addition, the article will be used in the detection of viruses in cells and tissues derived from patients with malignant tumors. These experiments will be carried out to increase the basic knowledge and understanding of the ultrastructural morphology of cancer cells and tissues, and the mechanism(s) and role(s) viruses have in the cancer process. In addition, the article will be used for training faculty and graduate students in electron microscopy. Application received by Commissioner of Customs: May 6, 1976.

Docket number: 76-00402. Applicant: Brigham Young University, Purchasing Department, Provo, Utah 84601. Article: Electron Microscope, Model EM 400 with an eucentric goniometer stage (high tilt). Manufacturer: Philips Electronics Instruments, NVD, The Netherlands. Intended use of article: The article is intended to examine materials at low, intermediate and high magnifications, to investigate freeze-etch replicas at various magnifications, to examine thick specimens, to examine stereo pairs of various kinds of tissue with both freeze-etch and thin section preparations, for various applications of histochemistry at various magnifications, to examine thick specimens, and to apply analytical electron microscopy to various tissue systems and in particulate investigations. Specific projects include the following:

Elemental Analysis of Teliospores of *Smut* Fungus.

Investigations of stereo pairs of biological materials.  
Recombination of particles which constitute the photosynthetic apparatus.  
Intracellular distribution of trace metals in higher plants.  
Analysis of air particulates.

In addition, the article will be used for educational purposes in the following courses:

- 621 Electron Microscopy—to teach students principles of specimen preparation and handling and electron optics.
- 622 Electron Microscopy Laboratory—practical application of principles learned in 621.
- 526 Cell Biology—to teach principles of molecular physiology and ultrastructure of cells, with emphasis upon eucaryotic organisms.

Application received by Commissioner of Customs: May 6, 1976.

Docket number: 76-00403. Applicant: St. Luke's Hospital, 4401 Wornall Road, Kansas City, Missouri 64111. Article: Electron Microscope, Model HS-9 and accessories. Manufacturer: Hitachi, Ltd., Japan. Intended use of article: The article is intended to be used to identify characteristic cellular organelles in studies of the correlation of ultrastructure and function in human neuroendocrine neoplasms and the ultrastructural changes in human glomerular disease which may have value in predicting which diseases will progress to chronicity. The article will also be used to demonstrate the presence and distribution of immune complexes in glomeruli in human glomerulo-nephritis. Early membranous nephropathy and amyloidosis will be studied in an attempt to determine if therapy instituted before the diagnosis can be made by conventional light microscopy favorably alters the course of the disease. In addition, the article will be used for residency training in pathology, graduate program in medical technology. Application received by Commissioner of Customs: May 6, 1976.

#### SOUTH MIAMI HOSPITAL

##### Consolidated Decision on Applications Duty Free Entry of EMI Scanners

The following is a consolidated decision on applications for duty-free entry of EMI Scanners pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301). (See especially Section 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Im-

port Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 76-00308. Applicant: South Miami Hospital, 7400 S.W. 62 Avenue, South Miami, Florida 33143. Article: EMI Scanner System. Manufacturer: EMI Ltd., United Kingdom. Intended use of article: The article is intended to be used in an investigation of diagnosis of brain pathology from conventional invasive techniques compared with those made by non-invasive computerized scanning. This research has the following objectives:

(1) To determine the circumstances under which computerized scanning can replace conventional techniques with equal or better diagnostic results.

(2) To determine the circumstances under which computerized scanning can effectively act as a screening procedure for conventional techniques.

(3) To identify information available from computerized scanning not available from conventional sources, or available in a manner that would make the system more desirable. Application received by Commissioner of Customs: February 24, 1976. Advice submitted by the Department of Health, Education, and Welfare on: May 4, 1976. Article ordered: June 19, 1974.

Docket number: 76-00320. Applicant: C. S. Wilson Memorial Hospital (Chandler Leasing Div. PepsiCo Corp.), 33-57 Harrison Street, Johnson City, New York 13790. Article: EMI Scanner with Magnetic Tape System. Manufacturer: EMI Ltd., United Kingdom. Intended use of article: The article is intended to be used for studies related to the circulation in the brain. Application received by Commissioner of Customs: March 5, 1976. Advice submitted by the Department of Health, Education, and Welfare on: May 5, 1976. Article ordered: September 4, 1974.

Comments: No comments have been received with respect to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for such purposes as these articles are intended to be used, was being manufactured in the United States at the time the articles were ordered. Reasons: Each foreign article is a newly developed system which is designed to provide precise transverse axial X-ray tomography. Although competitive systems are now being manufactured domestically, none of these systems were available at the time the articles were ordered. The Department of Health, Education, and Welfare (HEW) advised in its respectively cited memoranda that the sensitivity and the non-invasive methodology of each article are pertinent to the purposes for which each foreign article is intended to be used. HEW also advised that it knows of no domestic instrument of equivalent scientific value to any of the articles to which the foregoing applications relate for such purposes as these articles are intended to be used which was being

manufactured in the United States at the time the articles were ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which were being manufactured in the United States at the time the articles were ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

**RICHARD M. SEPPA,**  
Director,  
Special Import Programs Division.  
[FR Doc. 76-15048 Filed 5-21-76; 8:45 am]

#### UNIVERSITY OF HOUSTON

##### Consolidated Decision on Applications Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301). (See especially Section 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number 76-00305. Applicant: University of Houston, Facilities Planning & Construction, 4311 Elgin Street, Houston, Texas 77004. Article: Electron Microscope, Model JEM 100C. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for advanced research in the anatomy of the visual system, including the retina, ocular adnexa, optic nerves, optic tracts, and visual centers in the brain, and in other life sciences studies. Other studies will be carried out on the effects of ultraviolet radiant energy on the cornea and the lens. The critical phase of energy versus morphological cellular changes induced by the energy will be determined. Application received by Commissioner of Customs: February 24, 1976. Advice submitted by the Department of Health, Education, and Welfare on: May 4, 1976. Article ordered: November 17, 1975.

Docket number: 76-00314. Applicant: University of Arkansas Medical Center, Department of Pathology, 4301 West Markham Street, Little Rock, Arkansas 72201. Article: Electron Microscope, Elmiskop 102. Manufacturer: Siemens AG, West Germany. Intended use of article: The article is intended to be used to study primarily parathyroid, skin and bone. In addition, to studying the normal ultrastructure, it is planned to study the fate and distribution of ionic materials

in the tissue. Among the elements to be studied are calcium, phosphorous, cobalt, and lead. Experiments will be conducted to provide a better understanding of the mechanisms of control of protein synthesis and secretion in the parathyroid glands. Comparisons will be made with the control of synthesis of the specialized proteins of the epidermis and hair. Graduate students and postdoctoral fellows will use the article as part of their theses or research projects. The article will also be used to train graduate students and postdoctoral trainees in the use of electron microscope as a tool of experimental pathology. Application received by Commissioner of Customs: March 1, 1976. Advice submitted by the Department of Health, Education, and Welfare on: May 5, 1976. Article ordered: August 1, 1975.

Comments: No comments have been received in regard to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for the purposes for which the articles are intended to be used, was being manufactured in the United States at the time the articles were ordered. Reasons: Each foreign article has a specified resolving capability of 3 Angstroms. The most closely comparable domestic instrument available at the time the articles were ordered was the Model EMU-4C electron microscope which was formerly produced by the Forgglo Corporation and which is currently supplied by Adam David Company. The Model EMU-4C had a specified resolving capability of five Angstroms. (Resolving capability bears an inverse relationship to its numerical rating in Angstrom units, i.e., the lower the rating, the better the resolving capability.) We are advised by the Department of Health, Education, and Welfare in the respectively cited memoranda, that the additional resolving capability of the foreign articles is pertinent to the purposes for which each of the foreign articles to which the foregoing applications relate is intended to be used. We, therefore, find that the Model EMU-4C was not of equivalent scientific value to any of the articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, at the time the articles were ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which was being manufactured in the United States at the time the articles were ordered.

## YALE UNIVERSITY

## Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1986 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 76-00303. Applicant: Yale University, Purchasing Department, 20 Ashmun Street, New Haven, Conn. 06520. Article: Ultramicrotome, Model LKB 8800A. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to section materials for high resolution light and electron microscopic examination of kidney tubules from rats and kidney tubules and urinary bladders of several species of amphibians and several species of fish. The structural characteristics of various transporting epithelial will be studied in a variety of normal and pathologic states and it is intended to correlate the structure with function at the cellular level and approach renal physiology and pathology from an integrated standpoint. The article will also be used in the postgraduate training of pathologists, physiologists and cell biologists preparing for a career in the investigation of transporting epithelia.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: Examination of the applicant's thin sections under the electron microscope will provide optimal information when such sections are uniform in thickness and have smoothly cut surfaces. Conditions for obtaining high quality sections depend to a large extent on the properties of the specimen being sectioned (e.g., hardness, consistency, toughness etc.), the properties of the embedding media and the geometry of the block. In connection with prior case (Docket No. 69-00865-33-46500) which relates to the duty-free entry of an identical foreign article, the Department of Health, Education, and Welfare (HEW) advised that "Smooth cuts are obtained when the speed of cutting, (among such [other] factors as knife edge condition and angle), is adjusted to the characteristics of the material being sectioned. The range of cutting speeds and a capability for the higher cutting speeds is, therefore, a pertinent characteristic of the ultramicrotome to be used for sectioning materials that experience has shown difficult to section." In connection with another prior case (Docket No.

70-00077-33-46500) relating to the duty-free entry of an identical foreign article, HEW advised that "ultrathin sectioning of a variety of tissues having a wide range in density, hardness etc." requires a maximum range in cutting speed and, further, that "The production of ultrathin serial sections of specimens that have great variation in physical properties is very difficult." The foreign article has a cutting speed range of 0.1 to 20 millimeters/second (mm/sec). The most closely comparable domestic instrument is the Model MT-2B ultramicrotome manufactured by Ivan Sorvall, Inc. (Sorvall). The Sorvall Model MT-2B ultramicrotome has a cutting speed range of 0.09 to 3.2 mm/sec. We are advised by HEW in its memorandum of May 4, 1976 that cutting speeds in the excess of 4 mm/sec. are pertinent to the the applicant's research studies.

We therefore, find that the Model MT-2B ultramicrotome is not of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes at this article is intended to be used, which is being manufactured in the United States.

## Office of Education

COMMITTEE ON PROGRAM PLANNING  
AND DEVELOPMENT OF THE NATIONAL  
ADVISORY COUNCIL ON ADULT EDUCATION

## Meeting

Notice of Public Meeting of the Committee on Program Planning and Development of the National Advisory Council on Adult Education.

Notice of Public Meeting of the Committee on Program Planning and Development of the National Advisory Council on Adult Education.

Notice is hereby given, pursuant to Section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463), that the Committee on Program Planning and Development of the National Advisory Council on Adult Education will meet on June 11, 1976, from 9:30 a.m. to 4:30 p.m., Office of the National Advisory Council on Adult Education, Room 323, Pennsylvania Bldg., 425 13th Street, N.W., Washington, D.C.

The National Advisory Council on Adult Education is established under Section 311 of the Adult Education Act (80 Stat. 1216.20 U.S.C. 1201). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect

to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Committee shall be open to the public, however, because of limited space in the Council offices, interested persons wanting to attend must contact, in writing, the Executive Director. The proposed agenda includes:

Review of congressional action on the Lifelong Learning Bill.

Revisions to the Council's Lifelong Learning Position Paper.

Continued development of adult education terminology.

Committee recommendations for FY-77.

Records shall be kept of the Committee proceedings (and shall be available for public inspection at the Office of the National Advisory Council on Adult Education located in Room 323, Pennsylvania Bldg., 425 13th Street, N.W., Washington, D.C. 20004).

Signed at Washington, D.C. on May 18, 1976.

GARY A. EYRE,  
Executive Director, National  
Advisory Council on Adult  
Education.

[FR Doc. 76-15110 Filed 5-21-76; 8:45 am]

NATIONAL ADVISORY COUNCIL ON  
VOCATIONAL EDUCATION

## 1975 Annual Report on Closed Meetings

April 30, 1975—The purpose of this meeting was to discuss personnel matters and documents which, if open to the public, would have constituted a clearly unwarranted invasion of personal privacy. Results of meeting: No action taken.

August 25-26, 1975—The purpose of this meeting was to discuss personnel matters and documents which, if open to the public, would have constituted a clearly unwarranted invasion of personal privacy. Results of meeting: Considered Staff reorganization and defined the qualifications sought by the Council for the vacant position of Executive Director.

September 4-5, 1975—The purpose of this meeting was to review and discuss applications for the Executive Director Staff vacancy, and documents were presented which, if open to the public, would have constituted a clearly unwarranted invasion of personal privacy. Results of meeting: Discussed qualifications of applicants and narrowed the field to ten applicants.

October 16, 1975—The purpose of this meeting was to interview applicants for the Executive Director Staff vacancy and documents were presented which, if open to the public, would have constituted a clearly unwarranted invasion of personal privacy. Results of meeting: Selected Reginald E. Petty as Executive Director by unanimous vote of the Council.

Copies of this Report are available from the National Advisory Council on Vocational Education.

REGINALD PETTY,  
Executive Director.

DEPARTMENT OF HOUSING AND  
URBAN DEVELOPMENT

[Docket No. D-76-432]

ACTING REGIONAL ADMINISTRATOR,  
REGION IV (ATLANTA)

## Designation

The employees appointed to the following positions in Region IV (Atlanta) are hereby designated to serve as Acting Regional Administrator, Region IV, during the absence of the Regional Administrator, with all powers, functions, and duties redelegated or assigned to the Regional Administrator, provided that no employee is authorized to serve as Acting Regional Administrator unless all other employees whose titles precede his in this designation are unable to serve by reason of absence:

1. Deputy Regional Administrator.
2. Assistant Regional Administrator for Administration.
3. Assistant Regional Administrator for Community Planning and Development.
4. Assistant Regional Administrator for Housing Production and Mortgage Credit.
5. Assistant Regional Administrator for Housing Management.
6. Assistant Regional Administrator for Equal Opportunity.
7. Regional Counsel.

(Delegation of Authority effective May 4, 1962 (27 FR 4319, May 4, 1962); Dept. Interim Order II (31 FR 815, January 21, 1966).)

This designation supersedes the designation effective August 7, 1975 (40 FR 42234, September 11, 1975).

Effective date: This designation is effective March 15, 1976.

E. LAMAR SEALS,  
Regional Administrator,  
Region IV (Atlanta).

[FR Doc. 76-15075 Filed 5-21-76; 8:45 am]

[Docket No. D-76-430]

ACTING REGIONAL ADMINISTRATOR,  
REGION V (CHICAGO)

## Designation

The officers appointed to the following listed positions are hereby designated to serve as Acting Regional Administrator during the absence of both the Regional Administrator and the Deputy Regional Administrator, with all the powers, functions and duties redelegated or assigned

to both the Regional Administrator and the Deputy Regional Administrator, provided that no officer is authorized to serve as Acting Regional Administrator unless all other officers whose title precede his in this designation are unable to act by reason of absence:

1. Assistant Regional Administrator for Administration.
2. Assistant Regional Administrator for Community Planning and Development.
3. Assistant Regional Administrator for Housing Production and Mortgage Credit.
4. Assistant Regional Administrator for Equal Opportunity.
5. Assistant Regional Administrator for Housing Management.
6. Regional Counsel.

This designation supersedes the designation effective October 1, 1971, (37 FR 1130, January 25, 1972).

Effective date: The effective date of this designation is December 1, 1975.

DON MORROW,  
Regional Administrator,  
Region V (Chicago).

DEPARTMENT OF  
TRANSPORTATION

## Coast Guard

[CGD 76-089]

PROPOSED BRIDGE ACROSS OAK ISLAND  
CANAL BETWEEN OAK ISLAND AND  
LONG ISLAND, FOLLY BEACH, SOUTH  
CAROLINA

## Public Hearing

The Commandant has authorized a public hearing to be held by the Commander, Seventh Coast Guard District, Tuesday, June 22, 1976, 7:30 p.m., James Island High School, 1825 Camp Road, Charleston, South Carolina. This hearing is being held under the provisions of a Temporary Restraining Order of the U.S. District Court for the District of South Carolina, Charleston Division (Civil Action No. 76-358, dated March 9, 1976). This Order is in effect until the Coast Guard holds the public hearing and completes an Environmental Impact Statement (EIS) or makes a showing that an EIS is not necessary.

The plans approved by the Bridge Permit (P158-75) are for a single lane fixed bridge to be constructed mainly upon an existing abandoned deteriorated bridge fill formerly used by the now relocated Folly Road. The plans provide for a minimum vertical clearance of 14.2 feet above mean high water and 19.4 feet above mean low water. The minimum horizontal clearance normal to the axis of the channel is 29 feet.

The general basis for the complaint leading to the Order is that the bridge would lead to extensive residential and commercial developments on Long Island, including many condominiums, a golf course, and a marina. The Court states that the Coast Guard should consider these potential developments in an EIS as having a significant impact upon the human environment, or otherwise

show that the Coast Guard has fully complied with the provisions of the National Environmental Policy Act of 1969.

Interested persons may present comments orally or in writing concerning any matter relevant to the bridge project, especially comments on the environmental impact of the bridge and the potential development of Long Island. Information is desired concerning local land use zoning, community land use planning, both short and long-range. State and local law regulating such a development, extent of potential development such as population density, number of residential units allowable, and adequacy of the proposed bridge for such a development.

The hearing will be informal. A Coast Guard representative will preside at the hearing, will make a brief opening statement describing the proposed bridge, and will announce the procedures for the hearing. Each person who wishes to make an oral statement should notify the Commander (oan), Seventh Coast Guard District, Federal Building, 51 S.W. First Avenue, Miami, Florida 33130, by June 18, 1976. This notification should include the approximate time required to make the presentation. A transcript of the hearing may be purchased by the public. Interested persons who are unable to attend this hearing may also participate in the consideration of this bridge permit application by submitting their comments in writing before July 16, 1976 to the Commander (oan), Seventh Coast Guard District. Each comment should state the reasons for any objections, comments, or proposed changes to the plans and the name and address of the person or organization submitting the comment.

Copies of all written communications will be available for examination by interested persons at the office of the Commander (oan), Seventh Coast Guard District. All comments received will be considered before final action is taken on the proposed bridge permit application. After the time period for the submission of comments, the Commander, Seventh Coast Guard District, will forward the record, including all written comments and his recommendations, to the Commandant, U.S. Coast Guard, Washington, D.C. 20590.

(Section 502, 60 Stat. 847, as amended; 33 U.S.C. 525, 49 U.S.C. 1655(g) (6) (c); 49 CFR 1.46(c) (10).)

Dated: May 19, 1976.

D. J. RILEY,  
Captain, U.S. Coast Guard, Acting  
Chief, Office of Marine  
Environment and Systems.

[CGD 76-090]

PROPOSED MODIFICATION TO A BRIDGE  
ACROSS KIAWAH RIVER BETWEEN SEA-  
BROOK AND KIAWAH ISLANDS IN  
CHARLESTON COUNTY, SOUTH CARO-  
LINA

## Public Hearing

The Commandant has authorized a public hearing to be held by the Com-

mander, Seventh Coast Guard District, Wednesday, June 23, 1976, 7:30 p.m., St. Johns High School, Johns Island, South Carolina. The purpose of the hearing is to consider the application from the Coastal Shores Incorporated for a permit to modify a fixed highway bridge across the Kiawah River between Seabrook and Kiawah Islands in Charleston County, South Carolina.

The hearing will be informal. A Coast Guard representative will preside at the hearing, make a brief opening statement describing the proposed bridge modification, and announce the procedures for the hearing. All interested persons may comment orally or in writing. Each person who wishes to make an oral statement should notify the Command (oan), Seventh Coast Guard District, Federal Building, 51 S. W. First Avenue, Miami, Florida 33130, by June 18, 1976. This notification should include the approximate time required to make the presentation. A transcript of the hearing may be purchased by the public. Interested persons who are unable to attend this hearing may also participate in the consideration of this bridge permit application by submitting their comments in writing before July 16, 1976, to the Commander (oan), Seventh Coast Guard District. Each comment should state the reasons for any objections, comments, or proposed changes to the plans and the name and address of the person or organization submitting the comment.

Copies of all written communications will be available for examination by interested persons at the office of the Commander (oan), Seventh Coast Guard District. All comments received will be considered before final action is taken on the proposed bridge permit application. After the time period for the submission of comments, the Commander, Seventh Coast Guard District, will forward the record, including all written comments and his recommendations, to the Commandant, U.S. Coast Guard, Washington, D.C. 20590. The Commandant will make the final determination of the bridge permit.

(Section 502, 60 Stat. 847, as amended; 33 U.S.C. 525, 49 U.S.C. 1655(g) (6) (c); 49 CFR 1.46(c) (1).)

Dated: May 19, 1976.

D. J. RILEY,  
Captain, U.S. Coast Guard, Acting  
Chief, Office of Marine  
Environment and Systems.

**Federal Railroad Administration  
RAILROAD OPERATING RULES  
ADVISORY COMMITTEE  
Meeting**

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Railroad Operating Rules Advisory Committee will meet on Tuesday, June 8, and Wednesday, June 9, 1976, in Kansas City, Missouri, at 9:00

a.m. each day at the Federal Building, 911 Walnut Street, Kansas City, Missouri.

The Committee was established to provide advice to the Federal Railroad Administration (FRA) concerning solutions to problem areas involving the operating rules of the nation's railroads.

This meeting is being held in Kansas City in keeping with the FRA's policy of scheduling Advisory Committee meetings at locations throughout the country so as to facilitate public participation by railroad labor and management personnel and other interested persons. The agenda for this meeting will include a discussion of the development of a book of rules governing operations within the Kansas City terminal area, and a discussion of problems involved in the operation of track cars and possible rules to address them.

The entire meeting will be open to the public. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so. Under a procedure established by the Committee, persons submitting written statements are requested to provide 15 copies to provide distribution to each of the Committee members. Members of the public who wish to make prepared oral presentations should inform the Office of Chief Counsel, Federal Railroad Administration, (202) 426-8220, at least five days prior to the meeting, if possible, and reasonable provision will be made for their appearance on the agenda.

Minutes of the meeting will be made available for public inspection and duplication during regular business hours in the Office of the Chief Counsel, Federal Railroad Administration, Room 5101, Nassif Building, 400 Seventh Street, S.W., Washington, D.C.

Issued in Washington, D.C. on May 18, 1976.

BRUCE M. FLOHR,  
Deputy Administrator,  
Committee Chairman.

[FR Doc.76-15072 Filed 5-21-76; 8:45 am]

**National Highway Traffic Safety  
Administration  
AMERICAN-COLEMAN CO. ET AL.  
Denials of Petitions**

This notice sets forth the reasons for denial of three petitions for rulemaking to initiate or amend Federal motor vehicle safety standards promulgated under authority of § 103 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1391 et seq.). This notice is published in accordance with § 124 of the Act, which provides that the National Highway Traffic Safety Administration must grant or deny such petitions within 120 days, and "If the Secretary denies such petition he shall publish in the FEDERAL REGISTER his reasons for such denial" (§ 124(d)).

*The American-Coleman Company* (January 31, 1976). Petition to amend Standard No. 121, *Air Brake Systems*, to exclude trucks equipped with a steerable

drive axle of more than 8,000 pounds gross axle weight rating from stopping distance, lane-holding, and "no lock-up" requirements until September 1, 1977. American-Coleman's petition was denied because the agency has found that anti-lock systems used in satisfaction of the standard's requirements are reliable, and that the accident record of the class of vehicles regulated by the standard justifies regulation of their braking systems.

*Mr. Lawrence MacEachern* (January 14, 1976). Petition to amend Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment*, to substitute Society of Automotive Engineers (SAE) Standard J584b (December 1971) for SAE Standard J584 (April 1964) as the referenced standard on motorcycle headlamps. Mr. MacEachern's petition was denied because substitution would not be wholly responsive to the cited problem, and because several major differences between the two SAE standards would prevent adoption of the J584b standard in its entirety.

*Perry A. Sperber, M.D.* (December 29, 1975). Petition to initiate rulemaking to establish a standard to require motor vehicle manufacturers to equip passenger car doors with hold-open features. Dr. Sperber's petition was denied because the agency could not find data indicating a substantial incidence of injuries attributable to the absence of hold-open devices, and because the devices are already commonly available as an option in most passenger cars.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); Sec. 106, Pub. L. 93-492, 88 Stat. 1482 (15 U.S.C. 1410); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8).

Issued on May 17, 1976.

ROBERT L. CARTER,  
Associate Administrator,  
Motor Vehicle Programs.

[FR Doc.76-14878 Filed 5-21-76; 8:45 am]

[Docket No. EX78-3; Notice 1]

**WAYNE CORP.**

**Petition for Temporary Exemption From  
Federal Motor Vehicle Safety Standard**

Wayne Corporation, through its Miller-Meteor Division of Piqua, Ohio, has petitioned for a 2-year exemption from Motor Vehicle Safety Standard No. 301-75, *Fuel System Integrity*, on the basis that to test for compliance would cause it substantial economic hardship.

Miller-Meteor is a final-stage manufacturer of multi-purpose passenger vehicles, specifically funeral coaches and ambulances which are mounted on commercial chassis supplied by Cadillac Division of General Motors Corporation. In the 12-month period March 1, 1975 through February 29, 1976, Miller-Meteor produced 551 such vehicles. In the same period Wayne produced approximately 5700 additional motor vehicles, primarily school buses, and specialized vehicles manufactured under contract. As required by 49 CFR Part

568, *Vehicles Manufactured in Two or More Stages*, General Motors as the manufacturer of an incomplete vehicle furnishes with each chassis information that the final-stage manufacturer, Miller-Meteor, may use to complete the vehicle so that it meets, and may be certified as meeting, all applicable Federal motor vehicle safety standards. On and after September 1, 1976, Standard No. 301-75 will apply to multi-purpose passenger vehicles including petitioner's products, and Cadillac has informed the petitioner that it will make no representation as to conformity with Standard No. 301 as compliance with it is not substantially determined by design of the incomplete vehicle. Petitioner has submitted itemized lists of compliance test programs for its vehicles based upon frontal barrier impact tests, estimating the cost of the 1977 model test program at \$148,000, and the 1978 model test program at \$71,700. It anticipates that modification in the body side and wheelhouse areas, and the "addition of deflection members, isolation plates and protective cages" will be required to effect compliance by September 1, 1978. To require compliance with Standard No. 301 in advance of that time would add over \$1,000 to the cost of an ambulance and in excess of \$600 to the price of a hearse. The company anticipates retail price increases of 15 to 20 percent for its 1977 models, without including any 301 conformance costs. Although Wayne Corporation had a net profit of \$2,992,000 before taxes in 1975, the Miller-Meteor Division had a net loss of \$461,000, and projects a further net loss of \$351,000 in 1976. The company argues that an exemption is in the public interest and consistent with traffic safety objectives since it provides employment in an economically troubled geographic area and only a small number of vehicles are involved.

This notice of receipt of a petition for a temporary exemption is published in accordance with the NHTSA regulations on this subject (49 CFR 555.7), and does not represent any agency decision or other exercise of judgment concerning the merits of the petition. Interested persons are invited to submit comments on the petition for exemption of Wayne Corporation. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, S.W., Washington, D.C. 20590. It is requested but not required that five copies be submitted. All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials and all comments received, are available for examination in the docket both before and after the closing date. Comments received after the closing date will also be filed and will be considered to the extent practicable. Notice of final

action on the petition will be published in the FEDERAL REGISTER.

Comment closing date: June 23, 1976.

(Sec. 3, Pub. L. 92-548, 86 Stat. 1159 (15 U.S.C. 1410); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on May 17, 1976.

ROBERT L. CARTER,  
Associate Administrator,  
Motor Vehicle Programs.

[FR Doc.76-14877 Filed 5-21-76; 8:45 am]

**EFFECT OF CATALYTIC CONVERTERS  
ON MOTOR VEHICLE SAFETY**

**Postponement of Public Meeting**

The purpose of this notice is to postpone indefinitely the public meeting scheduled for May 26, 1976, to gather information on the performance of catalytic converters as it relates to motor vehicle safety.

The National Highway Traffic Safety Administration announced in an April 29, 1976, FEDERAL REGISTER notice (41 F.R. 17958) the scheduling of a public meeting that would provide a forum for all interested persons to present information and views on the susceptibility of catalytic converters to significant overheating and fires, and the need, or lack of need, for rulemaking or other action. The NHTSA and the Environmental Protection Agency had perceived a possible relationship between motor vehicle fires and the performance of the catalytic converter when certain vehicle systems were not operating properly.

Although a number of manufacturers have expressed an interest in attending the public meeting, only General Motors and Ford have requested time for making formal presentations. Both G.M. and Ford informed the agency that the contents of their presentations would not differ from the information they have already placed in the public docket.

Due to the lack of requests for time to formally present views and information at the public meeting, the NHTSA has determined that the May 26, 1976, meeting should not be held as scheduled. The public docket will remain open and continue to receive submissions on the subject described. If and when further interest in a public meeting is expressed, the agency will take steps to reschedule the gathering.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegation of authority at 49 CFR 1.61.)

Issued: May 19, 1976.

JAMES B. GREGORY,  
Administrator.

**DELAWARE RIVER BASIN  
COMMISSION  
PUBLIC HEARING**

Notice is hereby given that the Delaware River Basin Commission will hold

a public hearing on Wednesday, June 2, 1976, commencing at 2 p.m. The hearing will be held in the main conference room of the Commission headquarters building 25 State Police Drive, West Trenton. The subject of the hearing will be as follows:

A. Application for approval of the following projects as amendments to the Comprehensive Plan pursuant to Article 11 of the Compact and/or as project approvals to Section 3.8 of the Compact:

1. *Township of Voorhees (D-76-18 CP)*. Expansion of the Ossage sewage treatment plant in Voorhees Township, Camden County, N.J. Capacity of the treatment plant will be increased to 1.2 million gallons per day. Removal of 92.5 percent BOD<sub>5</sub> will be provided. Treated effluent will discharge to Cooper River.

2. *Camelback Ski Corp. (D-76-38 CP)*. Expansion of the sewage treatment plant at the Camelback ski area in Pocono Township, Monroe County, Pa. Capacity of the treatment facility will be increased to 140,000 gallons per day. Approximately 96 percent of BOD<sub>5</sub> and 92 percent of suspended solids will be removed from the sewerage flow. Treated effluent will discharge to an unnamed tributary of Pocono Creek, a tributary to McMichael Creek.

3. *Warminster Township Municipal Authority (D-75-113 CP)*. Rerating of the Authority's sewage treatment plant in Warminster Township, Bucks County Pa. The facility is designed to treat a sewage flow of 4.6 million gallons per day and provide removal of 96 percent of BOD<sub>5</sub> and 90 percent of suspended solids. Treated effluent will discharge to Little Neshaminy Creek.

4. *Artesian Water Co. (D-76-44 CP)*. A well water supply project to augment public water supplies in the company's service area of New Castle County, Delaware. Designated as Moore's Farm Well No. 7, the new facility is expected to yield 720,000 gallons per day and will serve the Interstate Route 1-95 and U.S. Route 40 corridor area in New Castle County.

5. *Slauffer Chemical Co. (D-76-28)*. Expansion of the industrial wastewater treatment facilities at the company's plant in Delaware City, New Castle County, Del. Capacity of the treatment plant will be increased to 1.05 million gallons per day. Approximately 88 percent of BOD<sub>5</sub> and 90 percent of suspended solids will be removed from the wastewater flow. Treated effluent will discharge to the Delaware River.

6. *South Jersey Terminal Corp. (D-75-108)*. Modification to the company's docking facilities in Pennsauken Township, Camden County, N.J. Additional mooring facilities will be provided.

B. Application for a water quality certification of the following projects pursuant to Section 401 of the Federal Water Pollution Control Act:

1. *Pennsylvania Department of Transportation (D-76-41)*. Construction of box culverts and channel realignment on Poquessing Creek and Byberry Creek in Philadelphia and Montgomery Counties, Pa. The construction work is incident to the extension of the Woodhaven Road Expressway in northeast Philadelphia to Byberry Road and Philmont Avenue.

2. *Pennsylvania Department of Transportation (D-76-42)*. Replacement of Pennsylvania Route 232 bridge over Neshaminy Creek in Northampton and Wrightstown Townships, Bucks County, Pa.

3. *Scott Paper Co. (D-68-152)*. An existing dike and fill project at the company's plant in Eddystone Borough, Delaware County, Pa.

Documents relating to the items listed above on this hearing notice may be examined at the Commission's offices. Persons wishing to testify are requested to notify the Secretary prior to the hearing.

Dated: May 14, 1976.

W. BRINTON WHITALL,  
Secretary.

[FR Doc. 76-15047 Filed 5-21-76; 8:45 am]

# ENVIRONMENTAL PROTECTION AGENCY

[FRL 547-4; PP5G1617/T57]

MOBAY CHEMICAL CORP.

## Notice of Extension of a Temporary Tolerance

On September 9, 1975, the Environmental Protection Agency (EPA) announced (40 FR 41834) that in response to a pesticide petition (PP5G1617) submitted by Mobay Chemical Corp., Chemagro Agricultural Div., PO Box 4913, Kansas City, MO 64120, a temporary tolerance was established for residues of the fungicide O-ethyl S,S-diphenyl phosphorodithioate in or on the raw agricultural commodity rice grain at 0.1 part per million (ppm).

Chemagro Agricultural Div. has subsequently requested a one-year extension of this temporary tolerance both to permit continued testing to obtain additional data and to permit the marketing of rice grain treated in accordance with an experimental use permit that is to be extended concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act.

An evaluation of the scientific data reported and other relevant material has shown that an extension of the temporary tolerance will protect the public health, and it is concluded, therefore, that the temporary tolerance should be extended on condition that the pesticide be used in accordance with the experimental use permit with the following provisions:

1. The total amount of the fungicide to be used must not exceed the quantity authorized by the experimental use permit.

2. Chemagro Agricultural Div. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

3. Rice straw treated under this experimental program must not be used for feed purposes. The rice straw must remain in the field and be plowed under.

This temporary tolerance expires May 13, 1977. Residues not in excess of 0.1 ppm remaining in or on rice grain after this expiration date will not be considered to be actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and the

# NOTICES

temporary tolerance. This temporary tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. (Section 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)).)

Dated: May 13, 1976.

JOHN B. RITCH, JR.,  
Director,  
Registration Division.

[FR Doc. 76-14986 Filed 5-21-76; 8:45 am]

## STATE OF TENNESSEE

### Submission of State Plan for Certification of Pesticide Applicators

In accordance with the provisions of Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136) and 40 CFR Part 171 (39 FR 36446 (October 9, 1974) and 40 FR 11698 (March 12, 1975)), the Honorable Ray Blanton, Governor of the State of Tennessee, has submitted a State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides to the Environmental Protection Agency (EPA) for approval on a contingency basis. Contingency approval is being requested pending promulgation of additional regulations under authority of Tennessee Code Annotated 62-2101, et seq. Copies of the current laws and regulations are attached to the Plan.

Notice is hereby given of the intention of the Regional Administrator, EPA, Region IV, to approve this Plan on a contingency basis.

A summary of this plan follows: The entire plan, together with all attached appendices (except for sample examinations), may be examined during normal business hours at the following locations:

Tennessee Department of Agriculture, Ellington Agricultural Center, Nashville, Tennessee 37204, (Plant Industries Division, (615) 741-1551).  
Room 110, 1421 Peachtree St., N.E., Atlanta, Georgia 30309, (Pesticide Branch, Air & Hazardous Materials Division, EPA, Region IV, (404) 526-3222).  
Room 401, East Tower, Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460 (Federal Register Section, Technical Services Division, (WH-569), Office of Pesticide Programs, EPA (202) 755-4854).

### SUMMARY OF TENNESSEE STATE PLAN

The Plant Industries Division, Tennessee Department of Agriculture has been designated as the state lead agency for the administration of the Pesticide Applicator Certification Program including enforcement activities. The Division will be supported by the Pest Control Licensing and Advisory Board which was created under authority of TCA 62-2105 and 62-2106, the Tennessee Pest Control Operators Act of 1975.

This Board meets quarterly and among other functions advises the department as to the promulgation of rules and reg-

ulations. The make up of the Board is listed in the State Plan.

Cooperating agencies include the State Cooperative Extension Service and the Tennessee Department of Public Health. The Tennessee Cooperative Extension Service will be responsible for conducting a comprehensive training program for commercial and private applicators. The lead agency in cooperation with the Tennessee Department of Public Health and Cooperative Extension Service will conduct an extensive publicity program in order that all affected citizens of Tennessee will be aware of the training and certification requirements.

Legal authority for Tennessee's certification program is contained in the following laws:

1. Tennessee Pest Control Operators Act of 1975.
2. Tennessee Insecticide, Fungicide, and Rodenticide Law (Pesticide Act).
3. Tennessee Commercial Aerial Applicators Act of 1974.

Copies of the above laws are attached to the Plan. Regardless of which law an applicator is certified under, he will be subject to the same standards, testing, record keeping provisions, criminal prohibitions and other requirements which Federal Regulations require.

The Plan indicates that the state lead agency and cooperating agencies have sufficient qualified personnel and funds necessary to carry out the proposed programs. The funding in support of or generated by this program for the fiscal year 1976 is \$226,078.

The state estimates that 3,281 commercial applicators and 50,000 private applicators will need to be certified. Certification credentials for certified applicators will be supplied in the form of a wallet size card identifying the applicator and indicating whether certification is limited or covers all restricted-use pesticides.

An annual report will be submitted to EPA by the state lead agency on or before July 31 of each year and special reports as required.

The commercial applicator categories proposed are those which are listed in 40 CFR 171.3. No new categories are proposed. New subcategories proposed are as follows:

- (1) Agricultural Pest Control.
- (i) Plant.
- (a) Consulting Entomologist.
- (b) Aerial Applicator—general.
- (c) Weed Control—agricultural.
- (d) Agricultural—ground equipment.
- (e) Fumigation—agriculture.
- (f) Fumigation—non-restricted.
- (ii) Animal.
- (a) Consulting Entomologist.
- (2) Forest Pest Control.
- (a) Consulting Entomologist.
- (b) Aerial Application—general.
- (3) Ornamental & Turf Pest Control.
- (a) Consulting Entomologist.
- (b) Horticultural.
- (c) Lawn & Turf Management.
- (4) Aquatic Pest Control.
- (a) Consulting Entomologist.
- (b) Aerial Application—general and her-

bicide.

# NOTICES

- (5) Right-of-Way Pest Control.
- (a) Aerial Application—herbicide.
- (b) Weed Control Right-of-Way and Industrial.
- (6) Industrial, Institutional, Structural and Health Related Pest Control.
- (a) Wood Destroying Organisms.
- (b) General Pest Control and Rodent Control (Household and Commercial).
- (c) General Pest Control and Rodent Control (Non-restricted).
- (d) Bird Control.
- (e) Fumigation (Non-restricted).
- (f) Fumigation (Structural and Commercial).
- (g) Weed Control (Rights-of-Way and Industrial).
- (h) Consulting Entomologist.

The Tennessee laws establish two categories of commercial applicators: a licensed certified commercial applicator category which is now in effect, and a non-licensed certified commercial applicator. The persons (including but not limited to officials or employees of Federal, State or local governments) that are non-licensed certified commercial applicators shall not apply pesticides for a fee.

As provided for in 40 CFR 171.7(e)(3), Tennessee has requested that EPA evaluate the existing licensing program for the subcategories noted earlier in this notice to determine if the requirements of 40 CFR 171.4 have been met. If the current licensing program is approved by EPA, certification for licensed certified commercial applicators will continue as at present. Certification for categories not licensed will be in the same format as at present for licensed applicators and will equal or exceed the requirements of 40 CFR 171.4. Examinations for all certified commercial applicators will be written. All applicants for commercial certification will be given an examination covering the general standards (40 CFR 171.4 and 171.6) applicable to all categories using the EPA developed Core Manual. Those persons who are presently certified and who were not certified on the basis of a written examination will be examined in writing to authenticate their qualifications for the general and specific standards under 40 CFR 171.4.

Private applicators (agricultural commodity producers) will be certified by satisfactorily completing a training course conducted by County Extension Agents, followed by a written or oral examination. At the applicants' options, a written or oral examination may be taken without training.

County Extension Agents will be trained by Extension and lead agency specialists and certified by the lead agency. They in turn, will hold instructional sessions for prospective private applicators using EPA core manual as basis for instruction. Written and oral testing will be supervised by the lead agency.

For non-readers oral testing will necessarily be relied upon. Training, however, can be largely the same. In these cases certification will be limited to the pesticide or pesticides for which the applicant is able to demonstrate competency. Such applicants will, when

necessary, be personally contacted by the County Extension Leader or his representative to insure label comprehension. The applicant will also be counseled as to sources of advice and guidance necessary for the safe and proper use of each pesticide related to his certification.

Sample examinations and review questions are attached to the Plan, as provided for by 40 CFR 171.7(e)(1)(i)(D) and (ii)(C). However, in view of the need to preserve the confidentiality of the examinations, the state of Tennessee has requested that the examinations not be made available for public inspection. The Agency agrees with this position, and has removed the sample examinations from the public inspection copies of the Plan.

The Tennessee State Plan indicates that within 60 days of the final approval of the Government Agency Plan (GAP) by EPA, a statement concerning acceptance of GAP qualified Federal employees will be submitted in accordance with 40 CFR 171.7(e)(4)(i).

Tennessee will reciprocate with all states who are willing to accept the Tennessee certification with reference to private applicators. Tennessee will also reciprocate with other states regarding certified commercial applicators. However, licensed certified commercial applicators represent a special class of applicator and any reciprocal agreements are subject to negotiation with the other States under appropriate circumstances.

Other regulatory activities listed in the State Plan which will supplement the Tennessee certification program are state registration, inspection, and sampling of pesticide products. In addition, all dealers in restricted use pesticides are required to be licensed and registered and are subject to unannounced inspections by the lead agency.

Licensed certified commercial applicators must renew licenses annually and all commercial applicators must renew their certification annually. Private and all commercial applicators will be required to present evidence of participation in training appropriate to their category of certification as a prerequisite to recertification after the five year period from initial certification. Training will be modified after the first major certification effort to provide for changing technology to continually up-date the certified applicators.

Enforcement of the Tennessee certification program will be carried out by inspectors who will spot check commercial and private applicators to insure that they comply with State and Federal laws and regulations.

### PUBLIC COMMENTS

Interested persons are invited to submit written comments on the proposed State Plan for the state of Tennessee to the Chief, Pesticides Branch, Region IV, Environmental Protection Agency, Room 110, 1421 Peachtree Street, N.E., Atlanta, Georgia 30309. The comments must be received on or before June 24, 1976 and should bear the identifying notation

(OFF-42020). All written comments filed pursuant to this notice will be available for public inspection at the above mentioned locations from 8:30 a.m. to 3:30 p.m., Monday through Friday.

Dated: April 8, 1976.

JOHN A. LITTLE,  
Deputy Regional Administrator,  
Region IV.

[FRL 547-2 OPP-240010]

## STATES OF CONNECTICUT, DELAWARE, AND NORTH DAKOTA

### Approval of Requests for Interim Certification To Register Pesticides To Meet "Special Local Needs"

On July 3, 1975, final regulations for the registration, reregistration, and classification of pesticides pursuant to section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 138), were published in the FEDERAL REGISTER (40 FR 28241). These regulations became effective August 4, 1975. Since that date, States have been prohibited from issuing new registrations for pesticide products or uses of pesticide products which are not registered by the Environmental Protection Agency (EPA), except pursuant to certification from the Administrator in accordance with section 24(c) of FIFRA.

On September 3, 1975, proposed regulations for State Registration of Pesticides to Meet Special Local Needs under section 24(c), FIFRA, were published in the FEDERAL REGISTER (40 FR 40538). Since it did not prove possible to promulgate final section 24(c) regulations prior to the effective date of the FIFRA section 3 regulations, some interruption in the authority of States to register pesticides has occurred. In order to prevent further disruption of State registration programs (particularly in relation to minor uses), a procedure has been established by which States may request interim certification to register pesticides to meet special local needs until such time as the final section 24(c) regulations are promulgated. If such a request is granted, a State may register pesticides subject to the terms of the certification and other limitations set out in the Preamble to the proposed regulations. Interim certification will expire if the State has not submitted a plan pursuant to the final section 24(c) regulations within 60 days after the effective date of the Administrator's disapproval.

A State may request interim certification to register pesticides to meet special local needs at any time by having the Governor or Chief Executive Officer or their designee submit a request in writing to the Administrator. The request shall satisfy the requirements set out in the FEDERAL REGISTER announcement of the Interim Certification program (40 FR 40542), and the statutory standard set forth in section 24(c) of FIFRA.

## NOTICES

The FEDERAL REGISTER announcement of the Interim Certification program provides that the Administrator shall notify the State of his approval or denial of a request for Interim Certification and publish notice of approval or denial in the FEDERAL REGISTER. The announcement further states that since the Agency expects Interim Certification to be of limited duration, it will not solicit public comment with respect to requests for Interim Certification. Adequate opportunity for public comment on State plans submitted pursuant to final section 24(c) regulations is provided for in proposed section 162.154(c).

The Agency has received Requests for Interim Certification to register pesticides to meet special local needs (Request(s)) from the States of Connecticut, Delaware, and North Dakota. After reviewing the Requests, the Agency found that they satisfy the requirements set forth in the FEDERAL REGISTER announcement, and that they demonstrate that each of the States is capable of exercising adequate controls to assure that special local needs registrations it issues pursuant to Interim Certification will be in accord with the purposes of FIFRA.

Accordingly, notice is hereby given that the EPA has approved Requests for Interim Certification from the States of Connecticut, Delaware, and North Dakota as described below, subject to the terms set forth in the FEDERAL REGISTER document of Sept. 3, 1975.

## CONNECTICUT

The Connecticut Request for Interim Certification sought authority to amend EPA registrations which involve "changed use patterns," as that term is defined in section 162.152(c) of the proposed regulations, and to amend EPA registrations which do not involve changed use patterns. It is noted that authority was not requested to register antimicrobial agents (see 40 CFR 162.3 (ff)(1)), fungicides, other than agricultural-use fungicides (see 40 CFR 162.3 (ff)(8)), or slimicides (see 40 CFR 162.3 (ff)(16)). The Agency has found that the specific requirements of the Interim Certification program are satisfied in the Request. Procedures for product hazard review and efficacy determination are part of the State's registration program; these procedures are adequate to assure that special local needs registrations issued by this State will be in accord with the purposes of FIFRA.

## DELAWARE

The Delaware Request for Interim Certification sought authority to amend EPA registrations which involve changed use patterns, and to amend EPA registrations which do not involve changed use patterns. The Agency has found that the specific requirements of the Interim Certification program are satisfied in the Request. Procedures for product hazard review and efficacy determination are part of the State's registration program; these procedures are adequate to assure that special local needs registrations issued by this State will be in accord with the purposes of FIFRA.

## NORTH DAKOTA

The North Dakota Request for Interim Certification sought authority to register "new products," as that term is defined in section 162.152(g) of the proposed regulations, to amend EPA registrations which involve changed use patterns, and to amend EPA registrations which do not involve changed use patterns. It is noted that authority was not requested to register antimicrobial agents (see 40 CFR 162.3 (ff)(1)), fungicides, other than agricultural-use fungicides (see 40 CFR 162.3 (ff)(8)), or slimicides (see 40 CFR 162.3 (ff)(16)). The Agency has found that the specific requirements of the Interim Certification program are satisfied in the Request. Procedures for product hazard review and efficacy determination are part of the State's registration program; these procedures are adequate to assure that special local needs registrations issued by this State will be in accord with the purposes of FIFRA.

The State agencies which have been designated responsible for issuance of such registrations are, respectively, the Connecticut Department of Environmental Protection, the Delaware Department of Agriculture, and the North Dakota State Laboratories Department. These Agencies were notified on April 20, 1976, that their Requests had been approved.

Copies of the Connecticut, Delaware, and North Dakota Requests for Interim Certification, along with letters reflecting the Agency's decision to approve the Requests, are available at the following locations:

Federal Register Section, Technical Services Division, (WH-569), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M St., S.W., Washington, D.C. 20460.  
Pesticide Branch, Hazardous Materials Control Division, EPA, John F. Kennedy Federal Bldg., Room 2303, Boston, Massachusetts 02203. (Connecticut Request only).  
Pesticide Branch, Hazardous Materials Control Division, EPA, Curtis Bldg., 6th and Walnut Streets, Philadelphia, Pennsylvania 19106. (Delaware Request only).  
Pesticide Branch, Hazardous Materials Control Division, EPA, 1860 Lincoln St., Suite 900, Denver, Colorado 80203. (North Dakota Request only).

Dated: May 17, 1976.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

## NOTICES

[No. 76-29]

## DALTON STEAMSHIP CORP. V. BOARD OF COMMISSIONERS OF THE PORT OF NEW ORLEANS, ET AL.

## Filing of Complaint

Notice is hereby given that a complaint filed by Dalton Steamship Corporation against Board of Commissioners of The Port of New Orleans and Waterman Steamship Corporation was served May 18, 1976. The complaint alleges that respondents have violated sections 15, 16, and 17 of the Shipping Act 1916, by undertaking to evict complainant from the wharf and terminal facilities it occupies under a preferential berth assignment at the Port of New Orleans.

Hearing in this matter shall commence on or before November 18, 1976.

FRANCIS C. HURNEY,  
Secretary.

[Independent Ocean Freight Forwarder License No. 1353]

## EASTERN FORWARDING INTERNATIONAL, INC.

## Order of Revocation

By letter dated April 13, 1976, Eastern Forwarding International, Inc., 105 Marsh St., Port Newark, N.J. 07114 was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1353 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before May 13, 1976.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

Eastern Forwarding International, Inc. has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised) Section 5.01 (c) dated June 30, 1975;

It is ordered, that Independent Ocean Freight Forwarder License No. 1353 issued to Eastern Forwarding International, Inc., be returned to the Commission for cancellation.

It is further ordered, that Independent Ocean Freight Forwarder License No. 1353 be and is hereby revoked effective May 13, 1976.

It is further ordered, that a copy of this Order be published in the FEDERAL REGISTER and served upon Eastern Forwarding International, Inc.

LEROY F. FULLER,  
Director, Bureau of  
Certification and Licensing.

[Independent Ocean Freight Forwarder License No. 1184]

**H. P. LAMBERT COMPANY INC. OF LA.  
Order of Revocation**

By letter dated March 31, 1976, H. P. Lambert Co., Inc. of LA, 226 Carondelet St., New Orleans, LA 70130 was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1184 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before April 24, 1976.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

H. P. Lambert Co., Inc. of LA has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised) Section 5.01 (c) dated June 30, 1975:

It is ordered, that Independent Ocean Freight Forwarder License No. 1184 issued to H. P. Lambert Co., Inc. of LA be returned to the Commission for cancellation.

It is further ordered, that Independent Ocean Freight Forwarder License No. 1184 be and is hereby revoked effective April 24, 1976.

It is further ordered, that a copy of this Order be published in the FEDERAL REGISTER and served upon H. P. Lambert Co., Inc. of LA.

**LEROY F. FULLER,**  
Director, Bureau of  
Certification and Licensing.

**FEDERAL POWER COMMISSION**

[Docket No. RP75-8; PGA 76-4]

**COMMERCIAL PIPELINE CO., INC.**

**Notice of PGA Filing**

MAY 17, 1976.

Take notice that on May 6, 1976 Commercial Pipeline Company, Inc. (Commercial) tendered for filing Eleventh Revised Sheet No. 3A reflecting Purchased Gas Adjustments and an effective date as set out below:

Sheet No.	Current adjustments	Cumulative adjustments	Effective date
3A 11th revised.	\$0.069	\$0.2674	May 23, 1976

Commercial states that these revisions track precisely similar revisions in the tariff of Cities Service Gas Company, its sole supplier. Commercial requests waiver of notice to the extent required to permit said tariff sheets to become effective as proposed.

Any person desiring to be heard or to protest said filing should file a petition

to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 23, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

**KENNETH F. PLUMB,**  
Secretary.

[Docket No. ER76-151]

**DELMARVA POWER AND LIGHT CO.  
Electric Rates: Order Granting Late Intervention**

MAY 18, 1976.

On September 29, 1975, Delmarva Power and Light Company, a utility operating and holding company, and its two wholly-owned subsidiaries, Delmarva Power and Light Company of Maryland and Delmarva Power and Light Company of Virginia (jointly, Delmarva) tendered for filing proposed changes in the intercompany Power Supply Agreement. The proposed effective date was November 1, 1975.

Notice of Delmarva's proposed rate changes was issued on October 2, 1975, with protests and petitions to intervene due on or before October 15, 1975. On October 31, 1975, we issued an order accepting Delmarva's proposed changes for filing. We suspended the effectiveness of the proposed rate schedules for ninety (90) days and set the matter for hearing.

An untimely notice of intervention was filed by the People's Counsel to the Maryland Public Service Commission (People's Counsel) on April 9, 1976. Having reviewed said notice, we believe that the People's Counsel has an interest in this proceeding which is sufficient to warrant its intervention herein.

The Commission finds: It is desirable and in the public interest to allow the People's Counsel to intervene in these proceedings.

The Commission orders: (A) The People's Counsel is hereby permitted to intervene in these proceedings subject to the rules and regulations of the Federal Power Commission; Provided, however, that participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the notice of intervention; and Provided, further, that the admission of such intervenor shall not be construed as recognition by the Federal Power Commission that it might be aggrieved because of any order or orders of the Federal Power Commission entered in this proceeding.

(B) The intervention granted herein shall not be the basis for delaying or de-

ferring any procedural schedules heretofore established for the orderly and expeditious disposition of this proceeding. (C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

**KENNETH F. PLUMB,**  
Secretary.

[Docket No. RP76-97]

**GULF ENERGY & DEVELOPMENT CORP.  
Extension of Time**

MAY 17, 1976.

On May 13, 1976, Gulf Energy and Development Corporation filed a motion for an extension of time within which to file its exhibits and testimony (Statement P) in the above-designated matter.

Upon consideration, notice is hereby given that the date is extended to and including May 24, 1976, within which Gulf Energy and Development Corporation shall file its Statement P.

**KENNETH F. PLUMB,**  
Secretary.

[Docket No. E-8492; Project No. 1835]

**SIERRA CLUB AND NEBRASKA PUBLIC POWER DISTRICT**

**Shortening Time for Filing**

MAY 17, 1976.

On May 12, 1976, Nebraska Public Power District filed an emergency motion for modification of the cease and desist order and request to shorten time to reply. The motion states that counsel for the Sierra Club has no objection to shortening the time to reply to this motion.

Upon consideration, notice is hereby given that the time is shortened to May 19, 1976 to file answers to the above motion.

**KENNETH F. PLUMB,**  
Secretary.

[Docket No. ER76-320]

**THE CONNECTICUT LIGHT AND POWER CO.**

**Order Granting Late Intervention**

MAY 18, 1976.

By order issued December 31, 1975 the Commission accepted for filing and suspended for two months an amended tariff, R-3 Rate, tendered by the Connecticut Light and Power Company (CL&P) in the above-captioned proceeding. The Commission also set the matter for hearing.

On April 14, 1976, a Petition for Leave To Intervene was filed by General Dynamics, Electric Boat Division and Pfizer, Inc. (Petitioners). The Petitioners state they both purchase electricity at retail from the City of Groton, Connecticut, a wholesale customer of CL&P. They fur-

ther state their interests may be affected by the Commission's decision and that their interests may not be adequately represented unless they are permitted to intervene.

The Commission finds: Good cause exists to grant the late petition to intervene filed by General Dynamics, Electric Boat Division and Pfizer, Inc.

The Commission orders: (A) The above-mentioned petitioners are hereby permitted to intervene in this proceeding, subject to the Rules and Regulations of the Commission. *Provided, however*, That the participation of such intervenors shall be limited to matters affecting the rights and interests specifically set forth in their petition to intervene; and *Provided, further*, That the admission of such intervenors shall not be construed as recognition that they might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(B) The late intervention granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious disposition of this proceeding.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] **KENNETH F. PLUMB,**  
Secretary.

[FR Doc. 76-15084 Filed 5-21-76; 8:45 am]

[Docket No. CP76-96]

**STINGRAY PIPELINE CO.**

**Notice of Amendment to Application**

MAY 19, 1976.

Take notice that on May 3, 1976, Stingray Pipeline Company (Stingray), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP76-96 an amendment to its application filed September 22, 1976, in said docket, pursuant to Section 7(c) of the Natural Gas Act, to reflect certain changes in the engineering design of the original proposal as well as to request authorization to acquire and operate certain of United Gas Pipe Line Company's (United) existing offshore Louisiana transmission facilities, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

It is said that the application in this proceeding involves the proposed construction and operation of certain additional natural gas transmission facilities necessary to transport volumes of gas to be produced from the West Cameron Block 616, offshore Louisiana. It is further said that essentially, as was originally proposed, Stingray requested authorization (1) to construct a supply lateral to connect Block 616 to ray's existing compressor station in West Cameron Block 565 and (2) to increase mainline capacity by installing two, 3,400 horsepower compressor units at Sting-

ray's existing compressor station in West Cameron Block 509 and certain mainline looping from a point at West Cameron Block 148 to the existing Holly Beach Compressor Station in Cameron Parish, Louisiana.

The amendment indicates that with respect to the pipeline supply lateral originally proposed, Stingray now proposes instead to acquire by purchase United's 24-inch pipeline facility extending from a production platform in West Cameron Block 587 approximately 7.2 miles north to a point of interconnection with Stingray's existing line in West Cameron Block 565 and then construct approximately 7.4 miles of 24-inch gathering line from Block 616 to the production platform in Block 587. Stingray states that it has arranged to lease a portion of the production platform in Block 587 and would effectuate the installation of a riser and related equipment necessary to complete the interconnection of the two 24-inch lines at the production platform. The cost of the proposed pipeline construction is estimated to be \$8,150,000 and it is said that Stingray would purchase the United facilities at a net depreciated book value estimated to be \$4,573,623. The amendment further indicates that with respect to mainline construction, Stingray now proposes to construct two additional 3,400 horsepower compressors (beyond those originally proposed in the application) and other related facilities at Stingray's onshore Holly Beach Compressor Station and that these facilities together with the offshore compression originally requested would defer the need to construct immediately the 42-inch loop pipeline as originally proposed.

It is stated that the proposed facilities would provide an increase in Stingray's system capacity from 1,000,000 Mcf per day to 1,120,000 Mcf per day and, once complete, the proposed facilities would have the capability of handling all of the production from Block 616 as well as all of the deliveries from Block 587 attributable to United and would provide the most efficient utilization of existing facilities. Stingray asserts that the total estimated cost of the amended project, including the purchase of the United facilities, is \$27,194,000 rather than the cost of \$67,530,000 previously proposed.

It is estimated that total proven and probable reserves for West Cameron Block 616 are 170,000,000 Mcf and it is additionally estimated that potential gas reserves are in excess for 237,000,000 Mcf bringing the total aggregate estimate for Block 616 to 407,000,000 Mcf. It is stated that Stingray now anticipates the transportation of at least 75 percent of all volumes available from Block 616. Originally, Stingray states, it had requested authority to transport deliveries attributable to the interest of Trunkline Gas Company and Natural Gas Pipeline Company of America only but that Northern Natural Gas Company has acquired the gas purchase rights for 30 percent of the Block 616 reserves and arrangements have been made for the

transportation of these volumes by Stingray.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 3, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Persons who have heretofore filed in this proceeding need not do so again.

**KENNETH F. PLUMB,**  
Secretary.

[FR Doc. 76-15295 Filed 5-21-76; 11:25 am]

**INTERNATIONAL JOINT COMMISSION—UNITED STATES AND CANADA**

**WATER QUALITY IN THE  
ST. JOHN RIVER**

**Public Hearings**

The International Joint Commission, a permanent Canada and United States body, established under the Boundary Waters Treaty of 1909, will hold public hearings at the times and places noted below on the matter of enhancing good quality of the waters in the international section of the St. John River flowing between Maine on one side and Quebec and New Brunswick on the other.

The Governments of Canada and the United States established the *Canada-U.S. Committee on Water Quality in the St. John River* by an exchange of notes in 1972. It was the intent of the notes to seek a semi-formalized arrangement by which the two countries could cooperate in seeking and achieving mutually acceptable solutions to water problems. The St. John River was selected as a pilot project.

The Committee's mandate was to (a) review periodically progress in the conduct of water quality planning on both sides of the international boundary in the St. John River Basin, (b) exchange appropriate information about plans, progress, and actions which could affect water quality; assist in coordination and consultation among appropriate authorities and, (c) make appropriate recommendations to the two Governments and to the International Joint Commission.

At the same time in 1972, the two Governments asked the International Joint Commission to consider the Committee's report and to advise the Governments on what actions should be taken by them in regard to those matters examined by the Committee, and what

joint institutional arrangements would be appropriate to protect and enhance the water quality in the St. John River and to avoid transboundary pollution.

The Committee in September, 1975, submitted its "Report of the Canada-U.S. Committee on Water Quality in the St. John River" to the Governments of Canada and the United States. The purpose of these hearings is to receive testimony and evidence relating to this Report, as well as any other pertinent information which would assist the Commission in developing its advice to the Governments.

Copies of the Committee's Report may be obtained upon request from the International Joint Commission in either Washington or Ottawa at the address noted below, or at the Northern Maine Regional Planning Commission, P.O. Box 779, Caribou, Maine 04736.

Opportunity will be given to anyone, either on his own behalf or in a representative capacity, to offer pertinent information which may assist the Commission in its inquiry. Statements may be made orally or in writing. If written statements are submitted, it is requested that, if possible, thirty (30) copies be provided for the Commission's use. Additional copies may be deposited with the Secretaries at the hearings for the use of the news media and others present.

#### Times and places of hearings

Date	Local time	Place
June 23...	7:30 p.m. (e.s.t.)	Northeastland Hotel, Presque Isle, Maine.
June 23...	3 p.m. (A.D.S.T.)	Small Auditorium, College St., Edmundston, New Brunswick.

#### INTERNATIONAL TRADE COMMISSION

[AA1921-155]

#### HOLLOW OR CORED CERAMIC BRICK AND TILE

##### Place of Seattle Hearing

Notice is hereby given that the United States International Trade Commission's public hearing in connection with investigation No. AA1921-155, Hollow or Cored Ceramic Brick and Tile from Canada, under section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160 (a)), will be held at 10 a.m., p.d.t., June

15, 1976, in the Federal Building, Room 514, 915 2nd Avenue, Seattle, Washington.

Notice of institution of the investigation and of the hearing was published in the FEDERAL REGISTER on May 12, 1976 (41 FR 19383). An amendment of the notice of investigation and hearing was issued by the Commission on May 13, 1976.

Issued: May 19, 1976.

By order of the Commission.

KENNETH R. MASON,  
Secretary.

[FR Doc.76-14993 Filed 5-21-76; 8:45 am]

#### UNITED STATES INTERNATIONAL TRADE COMMISSION

[AA1921-Inq.-5]

#### MONOSODIUM GLUTAMATE FROM KOREA Inquiry and Hearing

The United States International Trade Commission (Commission) received advice from the Department of the Treasury (Treasury) on May 11, 1976, that, during the course of determining whether to institute an investigation with respect to monosodium glutamate from Korea in accordance with section 201(c) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(c)), Treasury had concluded from the information available to it that there is substantial doubt that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of this merchandise into the United States. Therefore, the Commission on May 18, 1976, instituted inquiry AA1921-Inq.5, under section 201(c)(2) of that act, to determine whether there is no reasonable indication that an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

The Treasury advised the Commission as follows:

DEAR MR. CHAIRMAN: In accordance with section 201(c) of the Antidumping Act of 1921, as amended, an antidumping investigation is being initiated with respect to monosodium glutamate from Korea. Pursuant to section 201(c)(2) of the Act, you are hereby advised that information developed during our preliminary investigation has led to the conclusion that there is substantial doubt that an industry in the United States is being, or is likely to be injured, or is prevented from being established, by reason of the importation of this merchandise into the United States.

Information available to Treasury indicates that total domestic sales of the subject merchandise amounted to approximately 45 million pounds in 1975. On the other hand, imports of monosodium glutamate from Korea during 1975 amounted to 1,635,529 pounds. Accordingly, such imports would appear to be equivalent to only 3.6 percent of the U.S. market.

Our information further indicates that imports from Korea, as a percentage of domestic consumption, have declined from 6.7

percent during 1974 to 3.6 percent during 1975. Accordingly, such imports from Korea would appear to have declined by 52 percent from 1974 to 1975. During this same period imports from all sources have declined 26.5 percent and domestic consumption has declined 10 percent, while domestic production has increased 15.3 percent.

I would further note that the information indicates that petitioner represents roughly 15 percent of U.S. consumption. Preliminary margins of sales at less than fair value appear to range from 76 to 113 percent on imports of the subject merchandise from Korea.

Some of the enclosed data is regarded by the United States Customs Service to be of a confidential nature. It is therefore requested that the United States International Trade Commission consider all the enclosed information to be for the official use of the U.S.I.T.C. only, and not to be disclosed to others without prior clearance from the United States Customs Service.

Hearing. A public hearing in connection with the inquiry will be held in the Commission's Hearing Room, United States International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436, beginning at 10 a.m., e.d.t., on Tuesday, June 1, 1976. All parties will be given an opportunity to be present, to produce evidence, and to be heard at such hearing. Requests to appear at the public hearing should be received in writing in the office of the Secretary to the Commission not later than noon Thursday, May 27, 1976.

Written statements. Interested parties may submit statements in writing in lieu of, and in addition to, appearance at the public hearing. A signed original and nineteen true copies of such statements should be submitted. To be assured of their being given due consideration by the Commission, such statements should be received no later than Friday, May 28, 1976.

By order of the Commission.

Issued: May 19, 1976.

KENNETH R. MASON,  
Secretary.

[FR Doc.76-15113 Filed 5-21-76; 8:45 am]

#### NATIONAL ADVISORY COUNCIL ON ECONOMIC OPPORTUNITY

##### NOTICE OF MEETING

MAY 6, 1976.

The National Advisory Council on Economic Opportunity, authorized by Section 605 of the Community Services Act of 1974, will hold a two or possibly three day meeting at its offices at 1725 K Street, N.W., (Room 405), Washington, D.C. 20006. The meeting will begin at 9:30 A.M. on Thursday, June 17 and at 8:30 A.M. on Friday, June 18 and perhaps Saturday, June 19.

The purpose of the meeting will be to proceed with the Advisory Council's analysis of its responsibilities in connection with its advisory and reporting functions.

We are printing the above information in the FEDERAL REGISTER as required

by Section 9 of the Federal Advisory Committee Act of 1972.

FERNANDO PENABAZ,  
Chairman.

#### NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

##### National Endowment for the Arts JAZZ FOLK ETHNIC MUSIC

##### Application Guidelines for Fiscal Year 1977

The following are guidelines for Fellowship Grants made under the Jazz/Folk/Ethnic part of the Music Program of the National Endowment for the Arts, an independent agency on the Federal government which makes grants to organizations and individuals concerned with the arts throughout the United States.

Notice is hereby given that the deadline for these grant applications is 15 June, 1976. Interested persons should contact Walter Anderson, Director, Music Program, National Endowment for the Arts, Mail Stop 553, Washington, D.C. 20506 (202) 634-6390, for further information and application forms.

Signed at Washington, D.C. on 17 May 1976.

ROBERT SIMS,  
Administrative Officer, National  
Endowment for the Arts Na-  
tional Foundation on the Arts  
and the Humanities.

The National Endowment for the Arts is an independent agency of the Federal Government created in 1965 to encourage and assist the nation's cultural resources. The Endowment is advised by the 26 Presidentially-appointed members of the National Council on the Arts.

The Music Program is one of twelve major Program areas. This booklet contains application guidelines and forms for its Jazz/Folk/Ethnic Music grants. The Music Program also offers assistance to: composers and librettists; orchestras and opera companies; national organizations concerned with artist/audience development; contemporary music ensembles and projects; national music service organizations; independent professional colleges of music; and a limited number of professional choral groups. Information about these and other areas of assistance are contained in the Endowment's Guide to Programs which is available from the Program Information Office, National Endowment for the Arts, Washington, D.C. 20506.

##### INTRODUCTION

In fiscal 1977 the National Endowment for the Arts will offer grants to individuals and groups through its Jazz/Folk/Ethnic Music Program. The purpose of this program is the creation of a broad artistic climate in the United States in which its indigenous musical arts will thrive with distinction through artistic, educational and archival programs.

##### APPLICATION DEADLINE: JUNE 15, 1976

Applications must be postmarked no later than June 15, 1976. The proposed period of grant support should not begin prior to February 1, 1977 and may extend through January 31, 1978.

Notices of grant award or rejection will not be sent before January 1, 1977.

Applications postmarked later than June 15, 1976 will not be considered under this program and will be returned.

##### Program Limitations

This program does not provide support for: Direct costs of commercial recording or publication;

Foreign travel (While expenses for foreign travel may not be included in the project budget, this restriction is not intended to prevent jazz/folk/ethnic artists from carrying on their creative work in a foreign country);

Development or completion of Master's degree theses or doctoral dissertations;

High school or college performing groups;

Building or renovation of physical facilities;

Purchase of musical instruments or permanent equipment;

General operating expenses.

These Guidelines are presented in two sections—the first for jazz programs and the second for the other indigenous folk/ethnic arts. Because the needs of the fields differ significantly, the provisions for support are described by separate categories tailored to existing needs. Jazz applicants will find full information on pages 3-5. All other applicants are referred to pages 6-7.

NOTE.—Applications should be developed within the categories and budgetary limitations as designated.

##### NOTIFICATION

In compliance with the Privacy Act of 1974, we wish to furnish you with the following information:

Section (5) of the National Foundation on the Arts and the Humanities Act of 1965, as amended (20 U.S.C. 954) authorizes the Endowment to solicit the requested information. This information is needed to process your grant application and for statistical research and analysis of trends. The routine uses for which this information can be used and the purposes of such use are general administration of grant review process, statistical research, congressional oversight, and analysis of trends.

Failure to provide the requested information could result in rejection of your application due to lack of sufficient facts for determining either your eligibility for a grant or the amount which should be awarded.

##### RESOLUTION ON ACCESSIBILITY TO THE ARTS FOR THE HANDICAPPED

One of the main goals of the National Endowment for the Arts is to assist in making the arts available to all Americans. The arts are a right, not privilege. They are central to what our society is and what it can be. The National Council on the Arts believes very strongly that no citizen should be deprived of the beauty and insights into the human experience that only the arts can impart.

The National Council on the Arts believes that cultural institutions and individual artists could make a significant contribution to the lives of citizens who are physically handicapped. It therefore urges the National Endowment for the Arts to take a leadership role in advocating special provision for the handicapped in cultural facilities and programs.

The Council notes that the Congress of the United States passed in 1968 (P.L. 90-480) legislation that would require all public buildings constructed, leased or financed in whole or in part by the Federal Government to be accessible to handicapped persons. The Council strongly endorses the intent of this legislation and urges private interests and government at the state and local levels to take the intent of this legislation into ac-

count when building or renovating cultural facilities.

The Council further requests that the National Endowment for the Arts and all of the program areas within the Endowment be mindful of the intent and purposes of this legislation as they formulate their own guidelines and as they review proposals from the field. The Council urges the Endowment to give consideration to all the ways in which the agency can further promote and implement the goal of making cultural facilities and activities accessible to Americans who are physically handicapped.

(Adopted by the National Council on the Arts, September 16, 1973.)

##### JAZZ CATEGORY I COMPOSERS/ARRANGERS

Non-matching fellowship grants to composers and arrangers of exceptional talent for creation of new works, completion of works in progress, and professional development.

The program provisions in these guidelines are intended to support only those composers whose works retain a consistent basic idiomatic feeling related to the jazz style with which the composer's or arranger's work is identified.

Composers should be aware that the Endowment does have a separate program of assistance for "Composers/Librettists" whose works do not have a strong idiomatic and stylistic rooting in jazz music.

##### PROJECT EXAMPLE

1. The creation of new works and the completion of works in progress;
2. Copying and reproduction costs of scores and parts of completed works;
3. Expenses necessary to provide time for research and limited expenses for the purchase of other composers' scores and recordings in order that the aspiring composer/arranger may have continuing rapport with the field, be knowledgeable concerning new technological developments, and be in a position to study and explore current trends;
4. Expenses necessary to prepare demonstration tape recordings or excerpts of work for the purpose of providing samples for the review of performers/publishers, or recording firms. While the Endowment does not provide support toward direct costs of publication and commercial recordings, the applicant may request assistance with preparation of demonstration materials which may lead to such an eventuality.
5. Transportation costs and lodging expenses required to discuss work(s) with leaders, artistic directors, and publishing and/or recording representatives.

##### Grant Amounts

Non-matching fellowship grants are up to \$5,000.

##### Application Procedure

Individuals should review the instructions on page 10 and complete the forms titled Individual Grant Application NEA-2 (Rev.) in triplicate. Applicants for this category are also required to provide the following information:

For Composition Projects, please provide: Description of work to be composed or arranged.

Names of any group or individual for whom the work is to be composed.

Plans for the performance of the work—by whom, when, where, in what context (concert, festival, television, et cetera).

Two reference statements sent with application. References must be submitted by individuals who are qualified to discuss the applicant's musical ability and achievements.

One tape and one score or one disc and one score, preferably of the same material, must

accompany the application. The one sample should be representative of the applicant's compositional and/or scoring ability within the specific style for which the applicant is requesting assistance. Please see page 8 for requirements on submission of tapes.

For Professional Development Projects, please provide:

Detailed description of the project for which support is requested.

Brief budget of expenses necessary for the project.

Two reference statements sent with the application. References must be submitted by individuals who are qualified to discuss the applicant's musical ability and achievements.

One tape and one score or one disc and one score, preferably of the same material, must accompany the application. The one sample should be representative of the applicant's compositional and/or scoring ability within the specific style for which the applicant is requesting assistance. Please see page 8 for requirements on submission of tapes.

If the project involves consultation with an authority in the field, the applicant should submit with the application written evidence of interest from a proposed consultant; for example, a recording or publishing representative. If the project is research, the applicant should prepare a statement indicating where the research is to be conducted, its purpose, specific subject matter, and whether the research is independent or with a designated authority.

#### JAZZ CATEGORY II PERFORMANCE

Non-matching fellowship grants to enable jazz instrumentalists and singers of exceptional talent to advance and develop their careers through performance.

#### Grant Amounts

Fellowship grants of up to \$2,500 to assist performers who are in the developing stages of their careers. Fellowship grants of up to \$5,000 to assist established performers.

**Note.**—Before requesting assistance provided in this category, applicants who intend to make use of the grant to compensate other participants should be alerted to certain responsibilities which they may have as employers. It is suggested that applicants obtain and review the provisions of the Internal Revenue Service Publication No. 15 entitled *Employer's Tax Guide*.

#### Application Procedure

Individuals should review the instructions on page 10 and complete the forms titled *Individual Grant Application NEA-2 (Rev.)* in triplicate.

Applicants for this category are also required to provide the following information in the application:

Detailed description of the project for which support is requested, indicating what would be done to advance the applicant's career.

Brief budget of expenses necessary for the project.

Applicants are also required to submit the following materials:

Two reference statements sent with the application. References must be submitted by individuals who are qualified to discuss the applicant's musical ability and achievements.

One tape or one disc must accompany the application. The one sample should show the range of the applicant's ability to perform

in a variety of jazz styles and may include highlights from several recorded performances. Please see page 8 for requirements on submission of tapes.

#### JAZZ CATEGORY III TRAVEL/STUDY

Non-matching travel/study fellowship grants to enable young musicians of exceptional talent to study and/or tour with individual professional artists or ensembles for short-term concentrated instruction and experience.

Normally these grants will not cover periods longer than one month. The intent of this category of support is to facilitate the professional development of musicians who already have proven their potential for advanced study and professional careers.

Under no conditions will these awards cover costs of tuition for formal study at an educational institution, foreign travel, travel with an ensemble of which the applicant is a member, or study with the applicant's own teacher. Recipients of previous Travel/Study Fellowship Grants will not be awarded repeat grants to travel or study with the same artists.

#### Grant Amounts

Non-matching travel/study fellowship grants are up to \$1,000.

#### Application Procedure

Individuals should review the instructions on page 10 and complete the forms titled *Individual Grant Application NEA-2 (Rev.)* in triplicate.

Applicants for this category are also required to provide the following information in the application:

Name of the individual or group with whom the applicant wishes to travel or study. If the applicant requires the address of the musician with whom he wishes to study or travel, the Endowment suggests that an inquiry be addressed to the American Federation of Musicians (President's Office, Tour Department), 641 Lexington Avenue, New York, New York 10022.

When and where the project is to be carried out.

Brief budget of anticipated travel and living expenses. If a fee will be paid to the artist/instructor, the fee and the amount of time involved should be entered in the budget.

Applicants are also required to submit the following materials:

Two reference statements sent with the application. References must be submitted by individuals who are qualified to discuss the applicant's musical ability and achievements.

A confirming letter, sent with the application, from the individual or leader of the group with whom the applicant wishes to travel or study. The letter should designate a definite time commitment; state generally how the activity is to proceed; and confirm the fee which the specialist will receive from the student. The letter should also state that the specialist will provide a report of the applicant's study directly to the Endowment at the close of the period of support.

#### JAZZ CATEGORY IV ORGANIZATIONS

Matching grants will be available for jazz presentations, educational programs, short-term residencies by jazz specialists, and carefully planned regional or national festivals or tours.

#### Eligibility

Organizations must meet the statutory criteria as defined on page 8. Applicants may include professional performing organizations, state arts agencies, and regional arts organizations. Other sponsoring organizations which are in a unique position to make an exceptional contribution in the field for carefully organized programming are eligible provided the applicant organization assumes full organization responsibility and identifies the required matching funds for the project. Grants to educational institutions will be limited to those institutions which have a strong commitment to jazz as evidenced by direct financial support to jazz programming.

Applications for regional or national programming will be recommended only provided that:

1. The overall plan includes a well-developed educational component such as workshops, clinics, and/or other structured programs of educational value. Such programs may be planned in cooperation with local sponsoring educational, community and religious organizations.

2. The applicant presents an itinerary for proposed tours and includes, if applicable, supporting letters from organizations which would act as local sponsors.

#### Grant Amounts

Matching grants up to \$25,000 for organizations with annual expenditures of more than \$100,000 for jazz programming. In most instances grants will be for lesser amounts.

Matching grants of up to \$15,000 for organizations with annual expenditures of less than \$100,000 for jazz programming. In most instances grants will be for lesser amounts.

#### Application Procedure

Organizations should review the instructions on pages 12-15 and complete the forms titled *Project Grant Application NEA-3 (Rev.)* in triplicate. Organizations requesting more than \$15,000 must include with the application the following information:

Two copies of the audited financial statements for the most recent completed fiscal period. Unaudited financial statements are acceptable if audited statements are not available, but the audited statements should be forwarded when available.

If the jazz budget is a portion of a far larger budget, a certified statement of expenditures and income associated with the jazz programming in place of the audit.

The total jazz-related budget showing estimated income and expenses for the 1975-76 and the 1976-77 seasons.

#### JAZZ ORAL HISTORY

The Endowment and the of Performing Arts at the Smithsonian have entered into an agreement to develop a jazz oral history project. The project's primary purpose is the documentation of the creativity and experiences of the distinguished leaders in the development of jazz in the United States.

Applications will not be accepted for jazz oral history project inquiries concerning the project may be addressed to the Jazz Program, Smithsonian Institution, Washington, D.C. 20560.

#### FOLK/ETHNIC CATEGORY I ORGANIZATIONS/ PRESENTATIONS

Matching grants to organizations for folk/ethnic musical presentations.

#### PROJECT EXAMPLES

1. Community celebrations;
2. Regional or national festivals;
3. Regional tours by local musicians within the cultural area of their art;
4. Tours by traditional musicians outside their own area;
5. Presentations of local traditional musicians in schools, libraries, and other community centers;
6. Residency programs, involving traditional musicians at colleges and universities, public school systems, and appropriate community locations;
7. Workshops by knowledgeable consultants to prepare community leaders for effective programming;
8. Activities, including research, to upgrade the quality of community events.

#### Grant Amounts

Matching grants are up to \$25,000. In most instances grants will be for lesser amounts.

#### Application Procedure

Organizations should review the instructions on pages 12-15 and complete the forms titled *Project Grant Application NEA-3 (Rev.)* in triplicate. Applicants for this category are also required to submit the following information and materials:

For all presentation projects: Applicants are required to submit one tape or disc of artist(s) to be presented.

For school-related proposals: The Endowment should be assured that the proposal has the cooperation of the appropriate officials and classroom teachers and that careful, coordinated planning for educational programs has been accomplished.

For programs in special areas: The Endowment should be assured that the proposal for programs located in special areas, such as Indian reservations, have the cooperation of the leaders in those areas and that other involved organizations are prepared to identify with the program plans.

#### FOLK/ETHNIC CATEGORY II ORGANIZATIONS/ DOCUMENTATION

Matching grants to organizations for projects designed to document, preserve and disseminate living musical traditions.

#### Project Examples

Film, videotape, or recorded documentation of techniques, lifestyles, repertoires, or historical recollections of traditional musicians. Documentation projects must include local or regional media dissemination of the work accomplished under the grant. Further, the Endowment requests that a copy of the work be deposited at an appropriate archive.

#### Grant Amounts

Matching grants are up to \$15,000. In most instances grants will be for lesser amounts.

#### Application Procedure

Organizations should review the instructions on pages 12-15 and complete the forms titled *Project Grant Application NEA-3 (Rev.)* in triplicate. Applicants for this category

are also required to submit the following information and materials:

Subject(s) to be documented. In the case of films about a single artist, a statement from the artist indicating willingness to participate.

Tape or disc of artist(s) to be documented. (Please see page 8 for requirements on submission of tapes.)

Technical approach to the documentation. Statement as to why the project would be a significant contribution to the field.

Biographical information on the persons who will have the primary artistic responsibility for both subject matter and documentation.

Statement as to what arrangements, if any, or plans have been made for distribution.

Sample work:  
For Film Project: A loan print (16 mm optical) of at least one completed work by the filmmaker.

For Video Project: A 3/4-inch cassette sample of work by the video artist.

For Recording Project: Sample audio tape or disc of work by the project director.

All materials should be labelled with the name of the applicant, address, title of work, and identification of the artists.

#### FOLK/ETHNIC PILOT CATEGORY INDIVIDUALS

On a pilot basis, a limited number of modest non-matching grants will be available to individuals to accomplish the purposes outlined in Folk/Ethnic Categories I and II.

#### Application Procedure

Individuals should review the instructions on page 10 and complete the forms titled *Individual Grant Application NEA-2 (Rev.)* in triplicate. Individuals applying for a Presentation Project should submit the materials and information required by Folk/Ethnic Category I with a specific description of the project, biographical information on artist(s) to be presented, and budget of project expenses. For Documentation Project, individuals should provide the materials and information required by Folk/Ethnic Category II and a budget of project expenses.

#### FOLK/ETHNIC CATEGORY III INDIVIDUALS

Non-matching fellowship grants to enable individuals of exceptional talent to study with master traditional artists.

#### Grant Amounts

Non-matching fellowship grants are up to \$1,000.

#### Application Procedure

Individuals should review the instructions on page 10 and complete the forms titled *Individual Grant Application NEA-2 (Rev.)* in triplicate. Applicants in this category are required to include the following information and materials.

Name(s) of master traditional artist(s) with whom the applicant wishes to study.

When and where the project is to be carried out.

Brief budget of anticipated travel and living expenses. If a fee will be paid to the artist(s), the fee and the amount of time involved should be entered in the budget.

Two reference statements sent with the application. References must be submitted by individuals who are qualified to discuss the applicant's musical ability and achievements.

Tape or disc indicating applicant's current ability within the style he wishes to study. Please see page 8 for requirements for tape submissions.

A confirming letter, to be sent with the application, from the master traditional artist with whom the applicant wishes to study. The letter should designate a definite time commitment; state generally how the activity is to proceed; and confirm the fee which the artist will receive from the applicant. The letter should also state that the artist will provide a report of the applicant's study directly to the Endowment at the close of the period of support.

#### JAZZ/FOLK/ETHNIC GENERAL PROGRAMS

The Endowment will consider applications from individuals and organizations for specific projects that do not fall into the categories outlined previously. Such projects must be in support of professional activity and be of exceptional merit, outstanding quality, and demonstrated need. Individuals and organizations are urged to accommodate their projects to the provisions of the categories outlined previously.

#### Application Procedure

Grants to organizations will be made on a matching basis. Organizations should review the instructions on pages 12-15 and complete the forms titled *Project Grant Application NEA-3 (Rev.)* in triplicate. Individuals should review the instructions on page 10 and complete the forms titled *Individual Grant Application NEA-2 (Rev.)* in triplicate.

#### ELIGIBILITY

##### For Individuals:

By statute the National Endowment for Arts is limited to the award of grants to individuals of "exceptional talent." Applications will therefore be reviewed according to the following criteria:

1. Exceptional creative or performing talent and accomplishment;
2. Strong commitment to artistic standards;
3. Capacity for research or special study.

##### For Organizations:

By statute, the National Endowment for the Arts is limited to the support of organizations which meet the following criteria:

1. Organizations in which no part of net earnings inures to the benefit of a private stockholder or individual and to which donations are allowable as a charitable contribution under Section 170(c) of the Internal Revenue Code of 1954, as amended. A copy of the Internal Revenue Service Determination letter for tax-exempt status (under Section 501) must be submitted with each application.
2. Organizations receiving National Endowment for the Arts support must conduct their operations in accordance with the requirements of Title VI of the Civil Rights Act of 1964 and the Rehabilitation Act of 1973, as amended, which bar discrimination in federally assisted projects on the basis of race, color, national origin or handicap. Individuals or organizations receiving support from the National Endowment for the Arts who will be making payments for services to any person other than the grantee must comply with these requirements. Such grantees are required to file with the Grants Office, an Assurance of Compliance Form. The form

on page 35 may be removed and completed for this purpose.

3. Organizations which compensate all professional performers, related or supporting professional personnel, laborers and mechanics at the prevailing minimum compensation level or on the basis of negotiated agreements which would satisfy the requirements of Parts 3, 5 and 505 of Title 29 of the Code of Federal Regulations for the duration of any project supported in whole or in part by the National Endowment for the Arts.

Eligibility is further determined on the basis of these additional criteria:

1. Performing ensembles, both instrumental and vocal, must demonstrate high quality in performance and management. (Reminder: Ensembles must meet statutory criteria for organizations as stated above.)

2. Sponsoring organizations demonstrating the capacity for efficient, stable, and imaginative administration as well as a strong commitment to the purposes of this program.

#### REQUIREMENTS FOR SUBMISSION OF TAPES

One tape, in a tape box, 7" reel, 7½ speed, reel-to-reel, quarter track, leader between compositions if there is more than one composition, ready to be played on reel, heads out. No cassettes or cartridges. Applicant's name must be included on all supporting materials.

Tapes, scores, discs, films, and videotapes received at the Endowment will be returned although the Endowment cannot accept responsibility for losses incurred en route. Applicant's name and address must be included on all supporting material.

#### APPLICATION PROCESSING

If an application form is incomplete and/or if all required supplementary materials have not been submitted, the application will be rejected. The Endowment cannot accept responsibility for delays occasioned by the late arrival of applications or requests which have been improperly submitted.

An application will be returned to the applicant if the individual or organization does not meet the eligibility criteria set forth in these guidelines or if the proposed project does not fall within the scope of these guidelines.

In addition, the Endowment will look unfavorably on applications submitted by previous grantees whose grant periods have terminated and whose final reports have not been submitted. Previous grantees whose grant periods are ongoing are asked to submit interim narrative progress reports with their Fiscal 1977 applications.

#### APPLICATION REVIEW

After an application with all necessary information has been received, the file will be reviewed as follows:

1. The Endowment Music staff, the Jazz/Folk/Ethnic Advisory Panel, and the National Council on the Arts successively review the application. The Jazz/Folk/Ethnic Program makes use of two advisory groups: one consisting of jazz specialists; the other consisting of a wide range of practicing folk musicians, sociologists, and ethnomusicologists. These groups meet both separately and jointly; they function concurrently as the Jazz/Folk/Ethnic Panel in reviewing all policy matters and applications.

2. Notices of conditional approval or rejection will be sent only as the Chairman authorizes, but not before January 1, 1977.

Applicants are urged not to seek information on the status of their requests.

#### FINAL REPORTS

At the conclusion of the grant period, the Endowment requires final reports from all grantees. Complete instructions on final reporting will accompany the grant letter.

#### VETERANS ADMINISTRATION STATION COMMITTEE ON EDUCATIONAL ALLOWANCES Meeting

Notice is hereby given pursuant to Section V, Review Procedure and Hearing Rules, Station Committee on Educational Allowances that on June 17, 1976, at 10:00 a.m., the Veterans Administration Regional Office Station Committee on Educational Allowances shall at Federal Building—U.S. Courthouse, Room A-220, 110 9th Avenue, South, Nashville, Tennessee, conduct a hearing to determine whether Veterans Administration benefits to all eligible persons enrolled in Smoky Mountain Aero, Inc., Alcoa, Tennessee, should be discontinued as provided in 38 C.F.R. 21.4134, because a requirement of law is not being met or a provision of the law has been violated. All interested persons shall be permitted to attend, appear before, or file statements with the Committee at that time and place.

Dated: May 17, 1976.

R. S. BIELAK,  
Director, Veterans Administration  
Regional Office, Nashville,  
Tennessee.

[FR Doc.76-15111 Filed 5-21-76; 8:45 am]

#### NATIONAL SCIENCE FOUNDATION ADVISORY PANEL FOR ECONOMICS Meeting

In accordance with the Federal Advisory Committee Act, P.L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Economics.  
Date and time: June 10 and 11, 1976—9:00 a.m. to 6:00 p.m. each day.  
Place: Room 517, National Science Foundation, 1800 G Street NW., Washington, D.C.  
Type of meeting: Closed.

Contact person: Dr. James H. Blackman, Program Director, Economics Program, Rm. 205, National Science Foundation, Washington, D.C. 20550, telephone (202) 632-5968.

Purpose of panel: To provide advice and recommendations concerning support for research in Economics.

Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for closing: The proposals and projects being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals and projects. These matters are within exemptions (4) and (6) of 5 U.S.C. 522(b), Freedom of Information Act. The rendering of advice by the panel is considered to be a part of the Foundation's deliberative process and is thus subject to exemption (5) of the Act. Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of P.L. 92-463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 11, 1976.

#### SUBGROUP ON REGULATION Meeting

In accordance with the Federal Advisory Committee Act, P.L. 92-463, the National Science Foundation announces the following meeting:

Name: Subgroup on Regulation of the Advisory Group on Contributions of Technology to Economic Strength.

Date: June 11, 1976.  
Time: 9:00 a.m. to 5:00 p.m.  
Place: Rm. 543, National Science Foundation, 1800 G St., NW., Washington, D.C. 20550.  
Type of meeting: Open.

Contact person: Mr. William Montgomery, Special Assistant, Scientific, Technological, and International Affairs, Rm. 1225, telephone (202) 632-4061. Anyone planning to attend should notify Mr. Montgomery by June 4, 1976.

Summary minutes: May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, National Science Foundation, Rm. 248, Washington, D.C. 20550.

Purpose of meeting: Briefings by spokesmen for industry on the relationship between government regulation and innovation. Presentations by reviewers of economic data. In addition, the Subgroup will select one or more specific issues for intensive study and review. This will serve to inform a later discussion by the Advisory Group at a subsequent meeting.

Agenda:  
9:00 a.m. Introduction, Dr. Arthur Bueche, chairman.  
9:15 a.m. Presentations by reviewers of economic data.  
10:30 a.m. Discussion of reviews.  
12:00 Recess.  
1:00 p.m. Presentations by industry spokesmen concerning the relationship between government regulation and innovation.

M. REBECCA WINKLER,  
Acting Committee  
Management Officer.

MAY 19, 1976.

#### DEPARTMENT OF THE INTERIOR

##### Office of the Secretary

#### NATIONAL PETROLEUM COUNCIL COMMITTEE ON FUTURE ENERGY PROSPECTS

##### Notice of Meeting

Notice is hereby given for the following meeting:

The National Petroleum Council's Committee on Future Energy Prospects will meet on Friday, June 11, 1976, at 10:00 a.m., in the Mount Vernon Room of the Madison Hotel, 15th and M Streets, N.W., Washington, D.C.

The agenda includes the following:

1. Review and discuss list of topics to be analyzed.
2. Review and discuss staffing of teams to prepare papers on the various topics.
3. Review and discuss coordination between teams.
4. Review and discuss timetable.
5. Discuss any other matters pertinent to the overall assignment of the Committee on Future Energy Prospects.

The purpose of the National Petroleum Council is to provide to the Secretary of the Interior, upon request, advice, information, and recommendations upon any matter relating to petroleum or the petroleum industry.

The meeting will be open to the public to the extent that space and facilities permit. Any member of the public may file a written statement with the Council either before or after the meeting.

Interested persons who wish to speak at the meeting must apply to the Council and obtain approval in accordance with its established procedures.

Further information about the meeting may be obtained from Miss Fran Hanavan, Office of the Assistant Secretary—Energy and Minerals, Department of the Interior, Washington, D.C. (telephone: 343-6226).

Dated: May 18, 1976.

ROBERT L. PRESLEY,  
Staff Assistant-Emergency Preparedness Office of the Assistant Secretary—Energy and Minerals.

#### Bureau of Land Management

[Wyoming 54992]

##### WYOMING

#### Notice of Application

MAY 17, 1976.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Powder River Pipeline Corporation of Casper, Wyoming filed an application for a right-of-way to construct a 6½ inch pipeline for the purpose of transporting crude oil across the following described National Resource Lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 46 N., R. 77 W.,  
Sec. 3, S½;

Sec. 4, SE¼ and N½;  
Sec. 5, NE¼;  
Sec. 10, NE¼;  
Sec. 11, W½;  
T. 47 N., R. 77 W.,  
Sec. 32, S½;  
T. 47 N., R. 78 W.,  
Sec. 4, SW¼ and S½NW¼;  
Sec. 9, W½;  
Sec. 10, SW¼;  
Sec. 14, SW¼;  
Sec. 15, SE¼ and N½;  
Sec. 23, N½NW¼;  
T. 48 N., R. 78 W.,  
Sec. 29, W¼SW¼ and N½;  
Sec. 30, E½.

The pipeline will transport crude oil from a point in the SE¼NE¼ of sec. 32, T. 48 N., R. 78 W., to a point in the NE¼SW¼ sec. 8, T. 45 N., R. 76 W., in Johnson County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should be so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 100 East "B" Street, P.O. Box 2834, Casper, Wyoming 82601.

HAROLD G. STINCHCOMB,  
Chief, Branch of Lands and  
Minerals Operations.

[FR Doc.76-15101 Filed 5-21-76; 8:45 am]

#### RECREATION ACCESS

##### Blanca Wildlife Habitat Area, Colorado

Notice is hereby given in accordance with Title 43 CFR 6250.0-6(b) that the following-described lands under the administration of the Bureau of Land Management are seasonally closed to all public use annually during the period March 15 through June 30. This area is also closed to fishing during the same period annually in accordance with Colorado Fishing Regulations published by the Colorado Division of Wildlife. Limited administrative access for authorized personnel will still be permitted.

The legal description of these lands is as follows:

NEW MEXICO PRINCIPAL MERIDIAN  
ALAMOSA COUNTY

T. 38 N., R. 11 E.,  
Sec. 1, All;  
Sec. 2, N½, SE¼;  
Sec. 12, All;  
Sec. 13, N½, SE¼, N½SW¼;  
Sec. 24, NE¼;  
T. 38 N., R. 12 E.,  
Sec. 5, All;  
Sec. 6, All;  
Sec. 7, N½, SE¼, N½SW¼, SW¼SW¼;  
Sec. 8, All;  
Sec. 9, W½.

Containing 5,390 acres.

These lands are located approximately ten miles northeast of Alamosa, Colo-

rado, within an area known locally as the Dry Lakes. The area has been designated as the "Blanca Wildlife Habitat Area" by the Bureau of Land Management.

These lands are being developed for waterfowl habitat, and numerous ducks, geese and shore birds are attracted for nesting and rearing of young. Public use of this area during the waterfowl nesting season, March 15-June 30, is causing harassment of waterfowl which are attempting to nest. This causes many of them to leave the area or abandon their nests. Continued public use of the area during the nesting season will greatly diminish its waterfowl production potential.

Signs will be posted to identify the exterior boundaries of the closed area. Maps showing the closed area are posted in the Post Office and Alamosa County Court House in Alamosa, Colorado, and in the San Luis Resource Area Office of the Bureau of Land Management, located at 1921 State Street, Alamosa, Colorado 81101.

This closure is supported by the public who participated in the Bureau of Land Management planning process in the San Luis Valley.

CHARLES W. LUSCHER,  
State Director, Colorado,  
Bureau of Land Management.

[FR Doc.76-15114 Filed 5-21-76; 8:45 am]

#### Fish and Wildlife Service ENDANGERED SPECIES PERMIT Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 10 of the Endangered Species Act of 1973 (P.L. 93-205).

Applicant: Mr. Robert A. Jantzen, Director, Arizona Game and Fish Department, 2222 West Greenway Road, Phoenix, Arizona 85023.

Mr. GEORGE W. MILIAS, DEPUTY DIRECTOR, U.S. Fish and Wildlife Service, Washington, D.C. 20240.

APRIL 16, 1976.

DEAR MR. MILIAS: Regarding your inquiry of 30 March 1975, we are transmitting herewith an application for issuance of an Endangered Species Permit, to cover scientific research and propagation activities with the Gila topminnow, *Poeciliopsis occidentalis*.

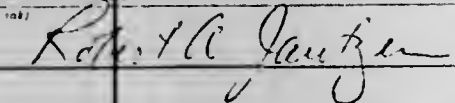

For enhancement and continued survival of the species, we plan to monitor wild native populations, and to improve our propagation program we propose to add new wild stocks for genetic variability in our captive populations. These actions are directed toward the goal of removing the species from endangered status, and ultimately from the listing entirely. Pursuant to Section 9 of the Act, these proposed efforts will require a permit of authorization.

We trust the information and attached application will be sufficient to expedite issuance of the permit.

Sincerely,

ROBERT A. JANTZEN,  
Director.

 <b>DEPARTMENT OF THE INTERIOR</b> <b>U.S. FISH AND WILDLIFE SERVICE</b> <b>FEDERAL FISH AND WILDLIFE</b> <b>LICENSE/PERMIT APPLICATION</b>		1. APPLICATION FOR (Indicate only one) <input type="checkbox"/> IMPORT OR EXPORT LICENSE <input checked="" type="checkbox"/> PERMIT

(iv) Transportation containers to be utilized: hermetically sealed, temperature controlled, 53 liter capacity. Temporary storage, study and display containers: aquaria of 19, 38 and 152 liter capacities.

(v) Excluding approximately 100 specimens sacrificed for scientific identification of various populations, no mortalities have been observed or documented.

(a) (7) Personnel employed by or under direct control of the Director, Arizona Game and Fish Department during the period 1 May 1976 through 31 December 1980.

(a) (8) Applicant as Director of Arizona Game and Fish Department has under his direct control the State agency responsible for fish and wildlife conservation in Arizona. As such, the activities of: collection, transportation, maintenance, display, propagation, release and monitoring will be conducted consistent with the scientific principles of resource management for the enhancement and survival of the species defined herein. Upon termination of activities any specimens held in captivity shall be returned to the wild.

(a) (1) Gila topminnow, *Poeciliopsis occidentalis*. Number to be collected, varied but not to exceed 1000 per sampling locality, dependent upon population level and capacity of rearing facility and/or introductory site. Male and female specimens to be collected from year classes, O, I, and II. Activities to be conducted to include: collection, transportation, maintenance, display, propagation, release and monitoring.

(a) (2) Specimens to be covered under permit are both wild and captive stocks.

(a) (3) Stocks currently held in captivity are subject to gene isolation through reproductive inbreeding; subsequently, to provide genetic variability, additional broodstock must be implanted from wild populations.

(a) (4) Stock currently available in captivity is held at Boyce Thompson Arboretum, Superior, Arizona.

(a) (5) Arizona Game and Fish Department, 2222 West Greenway Road, Phoenix, Arizona (study, maintain and display); Gila River basin in Arizona and New Mexico (collection, transportation, release and monitoring); Yaqui River basin of Arizona (collec-

tion, transportation, release and monitoring). Propagation to be undertaken at Phoenix address of the Department and continued at Boyce Thompson Arboretum.

(a) (6) (i) Live specimens to be retained in captivity at the Phoenix facility will be housed in aquaria of 19, 38, 152, and 4270 liter capacity. Additional brood impoundments are available in 4 to 1.2 hectare surface sizes.

(ii) Department fisheries personnel have successfully conducted these activities prior to enactment of P.L. 93-205, and subsequently with progeny thereof under letter of authority issued 17 May 1975.

(iii) The Department herein extends its willingness to participate in the programs outlined, of: cooperative breeding, maintenance or contributions to a studbook.

LYNN A. GREENWALT, DIRECTOR,  
 U.S. Fish and Wildlife Service,  
 Washington, DC 20240.

DEAR MR. GREENWALT: We, in Arizona, are quite concerned about the existing "endangered" classification under the Endangered Species Act of 1973 of both the native trout, *Salmo apache*, and the Gila topminnow, *Poeciliopsis occidentalis*.

We are also aware that there is current consideration within the regulatory office of your agency to reclassify these two fishes to the "threatened" category. Such action, we understand, would allow for some fisherman harvest and/or possession and transportation of these species. More importantly, it would also allow this Department to continue its previously successful cultural and restorative efforts which have, since 1965, produced and planted a total of 86,000 fingerling and 930 large catchable native trout in thirteen separate waters situated within its former range. These efforts have resulted in the establishment of reproducing populations in at least four streams and indicate strong potential for similar success in other streams not yet completely evaluated.

As you may know, our cultural work with the native trout came to an unfortunate and abrupt halt last December when our entire stock of 300 adult brood fish and 1,400 fingerlings were eliminated through the theft of adults and an unknown mortality of the fingerlings. Obviously, this has placed our future restoration effort in jeopardy unless a permit to procure more native trout from the wild can be granted as soon as possible, at least on an interim basis pending the final outcome of Arizona native trout reclassification or possible future entry into a cooperative agreement.

We would desire that the permit also be written to cover continued propagation and distribution of the Gila topminnow, since our efforts at restoring this species to at least sixty-five waters in its original range have been very successful. A total of at least 50,000 topminnows from initial culture efforts were utilized in planting the waters indicated and now it is reliably estimated that at least 500,000 of these fish exist in waters that were devoid of them just four years ago. We have no doubts that this species is neither endangered nor threatened and, consequently, we desire to continue our successful propagation and reestablishment program with the Gila topminnow in order to repopulate it in as much of its former range as possible.

We now have an aquatic biologist on our Fisheries Division staff who is assigned to devote a major part of his time to the endangered and threatened species program. He is actively coordinating with the several federal and state agencies involved in working toward the recovery and reestablish-

ment of all endangered and threatened fishes in Arizona.

Enclosed are copies of pertinent correspondence, various news media reports and book excerpts dealing with early work and current status of Arizona native trout which should be of interest to you. Two of the letters (December 1974) from your Office of Endangered Species and International Activities to Arizona sportsmen clubs state that data is being gathered and consideration given toward reclassification to "threatened" status for the Arizona native trout.

We earnestly hope that reclassification will occur very soon or that something can be approved in the way of an interim permit prior to reclassification which will allow us to procure native trout from the wild and thereby reestablish our culture program once again. It would be most desirable if a positive decision could be made within the next three or four weeks in order to allow for procurement of trout entering spawning condition. This would produce some young for the current year and, more importantly, initiate the slow adaptive process of the trout to hatchery conditions.

We would appreciate an early response to this request.

Sincerely,

ROBERT A. JANTZEN,  
 Director.

Documents and complete information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Suite 600, 1612 K Street, N.W., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/LE), U.S. Fish and Wildlife Service, Post Office Box 19183, Washington, D.C. 20036. All relevant comments received on or before June 23, 1976 will be considered.

Date: May 8, 1976.

LORON R. PONCISOR,  
 Acting Chief, Division of Law  
 Enforcement, U.S. Fish and  
 Wildlife Service.

[FR Doc. 76-15094 Filed 5-21-76; 8:45 am]

#### Office of Hearings and Appeals

[Docket No. M 76-301]

#### ALLIED CHEMICAL CORP.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Allied Chemical Corporation has filed a petition to modify the application of 30 CFR 75.1710 to its Harewood, One Main Extension, and Copeland Branch Mines, Fayette County, West Virginia. 30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars,

canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or ribs, or from ribs and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches, and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. By Memorandum dated September 20, 1973, the MESA Acting Assistant Administrator interpreted 30 CFR 75.1710-1 to mean that "mining height" as used in such section was "the distance from the floor to the finished roof less 12 inches."

2. Petitioner's Harewood, One Main Extension and Copeland Branch Mines typically have mining heights varying in height between 30½ and 57 inches. Some areas have been encountered where the mining height is less than 30½ inches. Moreover, Petitioner is constantly encountering naturally occurring irregularities in the coal seams, including local undulations and dips and rises.

3. The self-propelled electric face equipment operated in the subject mines is as follows: 26 Lee Norse Continuous Miner; 26 H Lee Norse Continuous Miner; 265 Lee Norse Hard Head Continuous Miner; 28E Lee Norse Continuous Miner (28 inches); 14 BU7 Loader (27 to 37 inches); 14 BU10 Loader (30 inches); 11 RU Cutting Machine, 15 RU Cutting Machine (40½ inches); 300 Galis Roof Bolting Machine (27 inches); 6SC Shuttle Car (31 inches); 21 SC Shuttle Car (30 inches); 10 SC Shuttle Car (43 inches); C. D. 81 Coal Drill; Schroeder Coal Drill; Elkhorn Scoop; and Utility Scoop.

4. The aforesaid equipment has been in service for several years, and when manufactured was not designed for the installation of canopies or cabs which would comply with the provisions of 30 CFR 75.1710-1(a) and, at the same time, assure the safety of individual miners at the subject mines. Petitioner believes that much of said equipment is not constructed in a manner sufficient to support a canopy or cab.

5. Petitioner has made numerous and repeated good faith experiments and efforts to discover, purchase and/or construct suitable canopies or cabs in order to comply with the provisions of 30 CFR 75.1710-1(a), and, at the same time, to assure the safety of individual miners at the subject mines, but such experiments and efforts have been unsuccessful.

6. Technology does not presently exist to enable Petitioner to equip its self-propelled electric face equipment with suitable canopies or cabs in order to comply with the provisions of 30 CFR 75.1710-1(a) and, at the same time, assure the safety of individual miners at the subject mines.

7. Petitioner states that the use of canopies or cabs on the self-propelled electric face equipment would result in the diminution of safety to the individual miners at the subject mines for the following reasons:

(a) While canopies or cabs may have the necessary height clearance some of the time, the necessary clearance frequently diminishes to zero when either the bottom or the full seam undulates or when rolls, dips or rises are encountered. This creates a hazard in that canopies or cabs damage or destroy roof-bolts, headers, and ventilation devices. On occasion the canopies or cabs are torn off when they become wedged against the roof. A high probability of injury exists under such circumstances;

(b) When operating with a canopy or cab, the individual operator of self-propelled electric face equipment has his field of vision so severely obstructed and restricted that operation may become hazardous to the individual operator himself and to all of the persons in his working area;

(c) When operating with a canopy or cab, the individual operator must ride in such a cramped position that fatigue is more readily induced and reaction time is slowed and alertness impaired;

(d) When operating with a canopy or cab, because of the combination of severely limited vision and close confinement, individual operators tend to lean out of the operating compartment in order to promote better vision and less fatigue, thereby increasing the risk of an individual operator being crushed between equipment and coal ribs;

(e) When operating with a canopy or cab, ingress to and egress from self-propelled electric face equipment is so restricted that the individual operator

may be substantially hindered in rapidly escaping or may be held captive and unable to escape, when the action of the roof, smoke or fire, or some other unforeseen danger would clearly warrant such escape; and

(f) When operating with a canopy or cab, the close confinement, obstructed and restricted vision and severely limited ingress and egress encourage individual operators to attempt to manipulate the controls from outside of the equipment while standing between the equipment and the rib, thereby increasing the risk of an individual operator being crushed between equipment and coal ribs.

8. The individual operators of self-propelled electric face equipment in the subject mines are at all times under fully-supported roof in compliance with MESA approved roof-control plans. Such roof support is deemed satisfactory for all other personnel in the mines, including the helpers on self-propelled electric face equipment.

9. Numerous employees at the subject mines who belong to the United Mine Workers of America have complained that installation of cabs or canopies on self-propelled electric face equipment in the present mining heights will reduce safety. In some cases, said employees have refused to operate self-propelled electric face equipment when hampered by a cab or canopy which reduces visibility, bumps or catches the roof or roof supports, more readily induces fatigue, or prevents rapid escape from its confines.

10. Petitioner proposes the following alternative method for compliance with 30 CFR 75.1710-1(g) and maintenance of safe roof and rib conditions in connection with operation of self-propelled electric face equipment at the subject mines:

(a) Petitioner proposes to operate its present self-propelled electric face equipment as its alternate method of compliance with 30 CFR 75.1710-1(a);

(b) Petitioner will replace its present self-propelled electric face equipment as such equipment wears out with new redesigned smaller equipment with cabs or canopies installed to the extent that the cabs or canopies on such new equipment may be developed to satisfy the problems identified in this petition;

(c) Petitioner will continue to perform research and experimentation to attempt to design a cab or canopy for each piece of its present self-propelled electric face equipment which would comply with the provisions of 30 CFR 75.1710-1(a) and, at the same time, assure the safety of individual miners at the subject mines;

(d) If a workable design is discovered by Petitioner, said design will be implemented on an experimental basis for evaluation by Petitioner, MESA and UMWA personnel under actual working conditions. If said experimental operation is successful Petitioner will retrofit those pieces of its self-propelled electric face equipment with the form of cab or

canopy for which successful evaluation has been made;

(e) Petitioner will affirmatively seek ideas from UMWA personnel, MESA, and other members of the coal mining industry as to design for cabs and canopies for use in low coal;

(f) Petitioner will, by letter, advise MESA's local District Manager with jurisdiction over the subject mines, of the progress being made, if so requested by the District Manager; and

(g) In addition to complying with the roof control plans in effect at the subject mines, Petitioner will reinstruct all face workers and section supervisory and inspection personnel in roof and rib fall recognition and prevention techniques as well as safe equipment operation.

11. Petitioner believes that, under present conditions, it is impossible to install or utilize canopies or cabs on the self-propelled electric face equipment in the subject mines which would provide the same degree of safety to miners as its present equipment provides.

12. Petitioner believes that its present self-propelled electric face equipment, and the adoption of its proposed alternate method, does now and will at all times guarantee no less than the same measure of protection afforded the miners of the subject mines by the mandatory standard contained in 30 CFR 75.1710-1(a) and that the application of 30 CFR 75.1710-1(a) without modification to the subject mines will result in a diminution of safety to the miners in such mines as compared with the level of safety now afforded.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-380]

#### APACHE MINING CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Apache Mining Company has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 15, Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the

height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

1. Petitioner states that the subject mine is in the #2 Elkhorn coal seam and ranges from 40 to 48 inches in height. The petitioner states that the coal seam has consistent ascending and descending grades creating dips in the coalbed and that these dips and the varying height make it impossible to keep the canopies from hitting the roof, ripping out roof bolts, and catching the machine.

2. Petitioner also states that this condition restricts visibility.

3. Petitioner states that management and employees of the mine think that the use of canopies diminishes the degree of safety provided to the miners.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

[Docket No. M 76-325]

#### APACHE COAL COMPANY

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Apache Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Apache No. 1 Mine, located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

In the Apache No. 1 Mine, operations are proceeding in seams of coal of heights which, when mined, do not permit clearances between the top of operated equipment and the roof, adequate to allow installation of canopies for protection of operators, without the creation of other and additional hazards. In this mine, seam height varies significantly within all entries and from section to section, and within each section. Therefore, hazards from roof contact exist in all sections covered by this section at areas where low seams, or rolls, dips and other seam variation drop to the vicinity of equipment height. Petitioner has installed canopies on all equipment where repeated contact with the roof does not occur, and has re-equipped sections where possible.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[FR Doc. 76-14996 Filed 5-21-76; 8:45 am]

[Docket No. M 76-257]

#### APACHE MINING CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Apache Mining Company, has filed a petition to modify the application of 30 CFR 75.1710 to its No. 2 Mine in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

V

6  
U  
M  
I

1. The height of the coal seam in the No. 2 Mine ranges from 46 to 48 inches. The coal seam is uneven throughout the mine.

2. The equipment for which the Petitioner seeks modification includes the following: two CX1 S&S scoops, one 11 RV joy cutting machine, one Lee-Norse roof bolter and one long aircon coal drill.

3. The Petitioner installed a canopy on the cutting machine, but it would not clear the roof support. Roof bolts were also pulled out by the canopy. Petitioner altered the canopy so that it was in a lower position. However, as the cutting machine went over a hump in the mine floor, the canopy caught a roof bolt, causing the canopy to be ripped off the machine.

4. Petitioner cannot operate equipment under this regulation inasmuch as employees are working under hazardous conditions. Petitioner alleges that the installation of canopies on the above-mentioned equipment presents a greater hazard than if canopies are not required.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

[Docket No. M 76-326]

#### BEE COALS, LTD.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Bee Coals, Ltd. has filed a petition to modify the application of 30 CFR 75.1710 to its No. 001 Mine, located in Lee County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2),

(3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. \* \* \*

The substance of Petitioner's statement is as follows:

Petitioner maintains that adding a canopy to its Wilcox Mark 20 continuous miner would obstruct the view of the operator of this equipment, preventing him from being able to see his augers as they are cutting to either side. The operator's inability to see would endanger the pack settlers and timbermen working with the continuous miner. Petitioner maintains that it would be impossible to add a cab or canopy since, at present, even without the addition of a cab or canopy, this miner scrapes the roof in the lowest coal area where it is used.

Petitioner maintains that adding a canopy or cab to its Wilcox WRDA-J roof bolters would obstruct the view of the bolter operator and his helper, who must have full view of the top and the bolts. This inability to see the top would, petitioner maintains, make it harder for a two-man crew to work. In addition, the addition of a cab or canopy would create a dangerous "pinch point" between the canopy and the roof, endangering miners in the area, especially a miner tramming this machine, since he must run alongside it while he trams it.

Petitioner maintains that the addition of a cab or canopy to its Elkhorn DLE-1 Scoop is impossible, since the posts on its deck end already drag the top in low places. In addition, petitioner maintains that the addition of a cab or canopy would create "pinch points" with the roof and ribs.

Petitioner maintains that it would be contrary to Virginia State law for it to add these canopies or cabs, in that this law requires a minimum of 6 inches of clearance above any cab or canopy at the lowest point in the mine. Petitioner also maintains that cabs or canopies for this equipment are not available to it.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department

of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-381]

#### BLUE RIBBON COAL CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Blue Ribbon Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its K. W. Blue Ribbon No. 1 Mine, Martin County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. \* \* \*

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of the foregoing standard as applied to his No. 1 Elkhorn Scoop.

2. Petitioner further states that it is dangerous to install canopies on equipment used to mine their coal seam because the bottom of the seam is wavy

and the height is changeable.

3. Petitioner states that the use of a canopy on the subject equipment would diminish the degree of safety provided to the miners.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-384]

#### B&M COAL CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), B&M Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 1, Nicholas County, West Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

#### BUCHANAN AND SONS COAL CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Buchanan and Sons Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 19 Mine located in Wise, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. \* \* \*

The substance of Petitioner's statement is as follows:

1. The following equipment with the following heights is used in this mine:

	Inches
Wilcox continuous miners.....	24
Elkhorn Scoops.....	26
Wise Manufacturing Motors.....	26
Wise Manufacturing Motors.....	26
Kersey Motors.....	26
Wilcox Roof Bolter.....	27

There have been no injuries due to rolls, bumps, or falls to persons operating any machinery in this mine.

2. This mine has been operating since July 20, 1969, without a roof fall accident of any kind. The seam height of the Bolling seam in this area will average from 24 to 36 inches.

3. It will be impossible to install a cab or canopy extending above the height of the machinery because the equipment will hit the roof and loosen the roof bolts

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 11, 1976.

[Fr. Doc 76-15002 Filed 5-21-76; 8:45 am]

creating a potential roof fall hazard. By all records, roof falls are one of the major causes of injury.

4. The operator of the Wilcox miner, and other equipment, must be able to see across the machine while he is operating or mining coal. There are three men working on the side opposite the miner operator, one shoveling loose coal, one setting the jacks, and one man installing roof supports as the miner works back and forth across the face of the coal.

5. The cab or canopies proposed is an after-the-fact solution. If the roof is controlled then neither is needed. Their installation would create a clear danger because the miner could not see the men on the off sides. In the state of West Virginia, in January 1976, a roof bolter and a miner operator were killed while operating equipment which had cabs or canopies.

6. In lieu of cabs or canopies, if MESA can come up with a fail-safe roof control plan, Petitioner is willing to go to any effort that will improve the measure of protection to the miners working in this mine.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-404]

#### BUCCANEER COAL CO.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Buccaneer Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Underground Mine, Buchanan County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face

equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner requests modification of the application of the mandatory safety standard 30 CFR 75.1710-1 with respect to the below-listed equipment used in the No. 1 Underground Mine for the reason that the application of such standard to such equipment in such mine will result in a diminution of safety to miners:

- (a) Epling Spinner;
- (b) Epling Motor;
- (c) Elswick Pinner; and
- (d) Elkhorn Scoop.

2. The No. 1 Underground Mine is in the Blair coal seam and ranges from 30 to 32 inches in height.

3. Petitioner states that the seam is so low that the equipment drags on the roof which could damage the roof bolts and half-headers used for roof support, or cause injury to the operator or other personnel. The use of cabs or canopies could also cause equipment to become wedged between the roof and mine floor trapping the operator.

4. Petitioner states that the addition of cabs or canopies to this equipment would force the operators to work in a cramped position making handling of the equipment more difficult.

5. Petitioner states that visibility would be cut in half if cabs or canopies were installed since they would have to be built close to the body of each piece of equipment.

6. As an alternative to the mandatory safety standard, Petitioner proposes to roof bolt the haulageways to within 10 feet of the face of the coal.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson

Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

MAY 10, 1976.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[FR Doc. 76-15004 Filed 5-21-76; 8:45 am]

[Docket No. M 76-311]

#### CALAHAN-ELKHORN COAL CO., INC.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Calahan-Elkhorn Coal Co., Inc. has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 1 located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. This petition is in reference to canopies on haulage equipment (mine tractors), loading machines, roof bolting machine and cutting machine.

2. This mine is in the Pond Creek seam. The thickness of the seam is not consistent due to rolls in the bottom and

small hills inside the mine. The seam thickness is from 29 to 31 inches.

3. It would be impossible to remove this equipment to the outside without removing the canopies or placing the canopies at the lowest height in the mine. The mine tractor operators would be placed in danger due to the different heights of the coal. The canopies would hang up on roof bolts and headers due to any number of reasons, especially spilled coal lost in haulage.

4. Any piece of equipment with a canopy in low coal will reduce the vision of the operator of that particular piece of equipment to the point where he would be in danger and other workmen in the mine would be subject to injury from the moving equipment.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 6, 1976.

[FR Doc. 76-15005 Filed 5-21-76; 8:45 am]

[Docket No. M 76-423]

#### CAMP COAL CO. NO. 2

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Camp Coal Company No. 2 has filed a petition to modify the application of 30 CFR 75.1710 to its No. 2 Mine.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more but, less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of 30 CFR 75.1710-1 with respect to the following equipment in use in its No. 2 Mine: Epling Spinner, Royal Cutting Machine, Paul Elswick Roof Bolter, Mescher Tractor.

2. The coal seam at this mine ranges in height from 30 to 32 inches. The height of the equipment affected without the canopies of cabs ranges from 24 to 28 inches.

3. Installation of cabs or canopies on the above-mentioned equipment would cut the machine operator's vision in half. In addition, the cab or canopy would cramp the operator and make operation of the equipment more difficult. Also, the machinery would drag the top in some areas and thereby damage the roof bolts and half-headers holding the top. The operator could be injured by the impact of the cab or canopy striking the top. Also, striking the top could "hand the motor" and immobilize the equipment.

4. Petitioner will roof-bolt to within 10 feet of the face of coal. Petitioner will conduct additional and supplemental training on proper roof support inspections and will periodically inspect safety devices on the equipment. Employees will be instructed in the use of existing safety equipment during rock falls. Regular drills on the handling of equipment will be conducted.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 11, 1976.

[FR Doc. 76-15006 Filed 5-21-76; 8:45 am]

[Docket No. M 76-362]

#### CHAFIN COAL CO.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and

Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Chafin Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its 2A, 5 and 6 Mines, Logan County, West Virginia.

20 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

Petitioner requests a waiver of the application of Section 75.1710 as it applies to its face equipment. The substance of Petitioner's statement is as follows:

Petitioner's mining operations involve coal seams which average 47 inches for its 2A mine, 35 inches for both its Number 5 and Number 6 Mines. These seams will sometimes vary dramatically in height from one area to another. The miners feel that in operating machinery with canopies, their visibility would be so limited as to force them to have to lean farther toward the outside of the deck. They feel that in leaning farther out of the machine to acquire better visibility, they would be exposing themselves to greater discomfort, hazards from objects flung from wheels, and greater narrowing of their thin margin of safety in ducking back toward the deck in event that a sudden swerve of the machine should force them against the ribs or timbers.

The canopies will cause the miners to have to be even more alert in performing in a situation already demanding their utmost attention and concentration. They fear the added measure of nervous strain engendered by anxiety over the possibility of hitting someone, will cause

them to be more prone to make dangerous mistakes.

Further, Petitioner has not experienced any unsolvable, abnormal roof control problems and there have been no major accidents attributable to our roof control program.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 10, 1976.

[FR Doc. 76-15007 Filed 5-21-76; 8:45 am]

[Docket No. M 76-453]

#### C. S. & S. COAL CORP.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861 (c) (1970), C. S. & S. Coal Corporation has filed a petition to modify the application of 30 CFR 75.1710 to its No. 3 Mine located in Buchanan County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner's No. 3 Mine is located at Lynn Camp Creek, Buchanan County, Virginia.

2. The mine operates one production shift per day utilizing conventional mining methods. Approximately 150 tons of coal are produced each day. There are 15 underground employees.

3. The anticipated life of the mine is approximately 6 years.

4. The regulatory requirement for installation of canopies or cabs becomes applicable to this mine on July 1, 1976.

5. The electric face equipment subject to the regulation in the No. 3 mine consists of one Model 81-CW Jeffrey Loading Machine, one 12-RB Joy Cutting Machine, one 300 Galis Pinning Machine, and three 12-HD Mescher Tractor Motors.

6. The coal seam being mined is the Gray Morgan seam. The average height of the Gray Morgan coal seam in the No. 3 Mine is 34-38 inches. For purposes of 30 CFR 75-1710-1, the mining height of the No. 3 Mine is 22 inches.

7. The equipment subject to the regulation operates in rooms which are cut 20 feet wide and 34 to 38 inches in height; there are no adverse rib conditions and there is no history of roof falls in any of the face areas.

8. Because of the size of the equipment in relation to the seam height, canopies and cabs would be incompatible with operations in the No. 3 Mine. Installation of canopies, cabs or any similar device would result in a serious diminution of safety, thereby causing the Petitioner to discontinue its operations.

9. The Petitioner has investigated various methods of installing canopies or cabs without encountering a single method which would be safe in its mine.

10. The Petitioner does not have an alternate method for achieving the safety results intended by 30 CFR 75.1710-1, but Petitioner maintains that application of 30 CFR 75.1710-1 to the No. 3 Mine at present mining heights will result in a diminution of safety to the miners in the mine.

11. A combination of timbers and roof bolts with half headers is now being utilized to support the roof of the No. 3 Mine.

12. Petitioner will train and continuously retrain the miners in maintenance of strict roof control in accordance with roof control procedures approved by MESA and the State Department of Mines.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

[Docket No. M 76-401]

#### EASTOVER MINING CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861 (c) (1970), Eastover Mining Company has filed a petition to modify the application of 30 CFR 75.1710 to its Virginia No. 2 Mine, Wise County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. The average mining heights at the Virginia No. 2 Mine range from 30 to 48 inches. Some areas have been encountered where the coal height is less than 30 inches and at this time are considered unminable because of the low seam height. The coal seam is generally level but has some local undulations or dips and rises in the top and bottom.

2. Petitioner requests the modification of the application of 30 CFR 75.1710 with respect to the below listed equipment used in the Virginia No. 2 Mine for the reason that the application of such standard to such equipment in such mine will result in a diminution of safety to miners.

(a) Jeffrey 120L, Jeffrey 120M, Lee Norse 26H, and Joy 14CM continuous mining machines;

(b) Joy 21SC, Jeffrey 404M, and National Mine Service Torkar shuttle cars;

(c) S & S 74 UAT, and S & S 81 UAT scoops; and

(d) FMC-Galls 300, and FMC-Galls 3500 roof drills.

3. Cabs or canopies on this equipment would obstruct the field of vision of the operator of the equipment causing him to possibly run into the rib or machinery or to run over other miners because of limited vision.

4. The post supporting the cabs or canopies would cause shadows to be thrown by the operator's cap lamp. These shadows would increase the chances of over or understeering around corners causing the equipment to run into or sideswipe the ribs or other equipment. This could throw the operator from the equipment and injure or kill him.

5. Installation of cabs or canopies on equipment in this mine would cause the operator to lean out of the operator's compartment in order to see where he is going or in the case of a continuous miner operator whether or not he is cutting in the top or bottom. If he leans out to the side of the equipment to get an unobstructed view of his surroundings or roadway his chances of falling from the equipment is increased or he may sideswipe the rib, a corner, other equipment or some other projecting obstruction and be dragged from or under the equipment and be injured or killed.

6. Installation of cabs or canopies on equipment in this mine would cause the operator to ride on and operate the equipment from a cramped position which may slow down reaction time when steering or applying the brakes which may cause him to injure or kill himself or another miner.

7. The miners who work at this mine have stated that the installation of canopies on equipment would cause death or injury.

8. As a result of the cramped position caused by the canopies, the operator would have to get outside of the operator's compartment to turn in the direction of travel. This required movement could cause the operator to be injured or killed or could cause harm to come to other miners.

9. Ingress to and egress from the cab or canopy would be so limited that the operator would be held captive and this could prevent escape when action of the roof clearly would warrant such retreat. In case of machine malfunction, cable damage, or power failure of any kind, the operator of the equipment may be

held captive by the cab or canopy for an indefinite period.

10. The operators of this type of equipment are under fully supported roof at all times provided by an approved full roof bolting plan or a combination of roof bolts and posts. Such roof support is deemed satisfactory for other personnel in the mine, including helpers on self-propelled face equipment. The helpers and other supporting personnel freely move around the equipment under the protection of proper roof support.

11. Continuous miner operators cannot see the last row of roof bolts because the canopies impair their vision, and such operators may, as a result, inadvertently go in by roof support. Also they cannot see cutter lines and may, because of this situation, weaken the roof by cutting places too wide.<sup>1</sup>

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-337]

#### HALL COAL CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861 (c) (1970), the Hall Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 12 Mine located in Floyd County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is

<sup>1</sup> Petitioner attached photographs and sketches to the petition which illustrate the effect canopies would have on the operation of equipment due to the operator's cramped and unsafe position. These exhibits are available for inspection at the Hearing Division address provided herein.

employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

Petitioner's mine undulates between 35 and 40 inches of coal height. In order to get to the face area, petitioner must pass equipment through an area with 33 inches clearance.

Petitioner's equipment includes 2 scoops and 1 roof bolter. This equipment is about 30 inches in height.

Petitioner maintains that putting tops on this equipment would block the vision of the operators of this equipment and endanger the other miners in the area.

As its alternative to adding these canopies, petitioner wishes to continue mining without them.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

of 30 CFR 75.1710 to its No. 1 Underground Mine.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.110 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of 30 CFR 75.1710-1 with respect to the following equipment in use in its No. 1 Underground Mine: Epling Spinner, Royal Cutting Machine, Paul Elswick Roof Bolter, Mescher Tractor.

2. The coal seam at this mine ranges in height from 30 to 32 inches. The height of the equipment affected without the canopies or cabs ranges from 24 to 48 inches.

3. Installation of cabs or canopies on the above-mentioned equipment would cut the machine operator's vision in half. In addition, the cab or canopy would cramp the operator and make operation of the equipment more difficult. Also, the machinery would drag the top in some areas and thereby damage the roof bolts and half headers holding the top. The operator could be injured by the impact of the cab or canopy striking the top. Also, striking the top could "hang the motor" and immobilize the equipment.

4. Petitioner will roof-bolt to within 10 feet of the face of coal. Petitioner will conduct additional and supplemental training on proper roof support inspections and will periodically inspect safety devices on the equipment. Em-

ployees will be instructed in the use of existing safety equipment during rock falls. Regular drills on the handling of equipment will be conducted.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-386]

#### HARLAN NO. 4 COAL CO.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Harlan No. 4 Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to the following mines: Karen Mine, Lucky Star Mine, Rice Harlan Mine, and Upper Harlan Mines, which are all located in Harlan County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner states that it operates the following underground coal mines in eastern Kentucky with minimum mining heights as indicated:

- a. Karen Mine (ID No. 15-04033): less than 34 inches;
- b. Lucky Star Mine (ID No. 15-06874): less than 36 inches;
- c. Rice Harlan Mine (ID No. 15-06778): less than 32 inches;
- d. Upper Harlan Mine (ID No. 15-08293): less than 30 inches.

Harlan's fifth mine, KOK, has mining heights in excess of 48 inches.

2. Petitioner respectfully petitions the Secretary for exemption from the canopy requirement of 30 CFR 75.1710-1 for the following equipment in the mines named:

- a. Karen Mine: Four Joy 21 SC shuttle cars; Two Joy 14BU10 loaders; Two Joy 16 RB coal cutting machines; Two Galis 300 roof-bolters; and Two Schroeder CDB-200A coal drills.
- b. Lucky Star Mine: One Jeffrey 101 remote continuous miner; Two Joy 18 SC shuttle cars; One Galis 300 roof-bolter; One Elkhorn DLE-1 scoop; and One Schroeder CDB-200A coal drill.

- c. Rice Harlan Mine: One Jeffrey 101 remote continuous miner; One 506 Bridge conveyor-carrier; One Galis 300 roof-bolter; Two Joy 18 SC shuttle cars; and One Schroeder CDE-200A coal drill.

3. In support of its petition Petitioner states that in four of the five mines it is presently operating, the mining heights are insufficient to permit safe operation of its self-propelled electric face equipment with such canopies and/or cabs installed. It states that devices impair equipment operators' range of vision and so restricts their body movements as to reduce effective control of such equipment; they unduly fatigue the operators and have the potential for permanently disabling them by muscle atrophy and possible bodily disfigurement.

4. Petitioner states that it has installed and is using such devices in its KOK Mine because the mining height is sufficient to permit their use without impairment of the operator's vision and body movement. Likewise, it has installed and used such devices in Karen Mine where the coal height was 48 inches or greater. In the three remaining mines, however, and in the portions of Karen now being mined, mining heights are insufficient to permit the cab-canopy installation and leave sufficient visibility and room for the operators' physical movement to insure safe, efficient operation.

5. Petitioner further states that installation of such canopies and cabs has been tried experimentally in these low coal heights and found to be unsatisfactory and unsafe, even with locally constructed modifications.

6. Petitioner also states that both Harlan's management and its underground employees, who are members of the United Mine Workers of America and the operators of the equipment, are in agreement on the need to modify the standard so as to permit use of self-propelled electric face equipment, including shuttle cars, in the four named mines. An informal survey of 23 men engaged at various times in the operation of such equipment in Karen Mine found them unanimous in the opinion that such canopies and/or cabs are hazardous in coal heights of 48 inches or less. Opinions ranged over a broad spectrum covering, *inter alia*, impaired vision, lack of mobility, and physical discomfort. One roof-bolter alleges that he is unable to see his drill point from under the canopy and thus is unable to properly position roof bolts.

7. Petitioner further respectfully urges that in some instances the canopy-cab requirement serves no useful purpose and is futile, as in the case of remotely-controlled continuous miners and bridge conveyors, where the operator is 60 feet or more away from the face and not in close proximity to the equipment and its cab or canopy. 30 CFR 75.1710-1, however, requires their installation even when operators do not ride on the equipment.

8. Petitioner concludes that installation and use of such canopy-cab devices in fact diminishes mine safety by obstructing vision and limiting maneuverability of the equipment. He states that under the existing circumstances it is difficult to suggest any alternative devices which will provide substantially the same protection as canopies and cabs are intended to do; however, Petitioner suggests that in mines such as its own, where roof conditions are generally good, the best safety efforts can be directed toward more frequent inspections and increased education of its personnel.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 10, 1976.

[FR Doc.76-15012 Filed 5-21-76; 8:45 am]

[Docket No. M 76-385]

#### HANNALINE INDUSTRIES, INC.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and

Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Hannaline Industries, Incorporated has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 1, Nicholas County, West Virginia. 30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on or after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. The Petitioner states he is the operator of a small mine near Summersville, West Virginia, with operations in seams of coal in heights of an average of 36 inches. He states that this height does not permit clearances between the top of operated equipment and the roof adequate to allow installation of canopies for protection of the operators without the creation of other and additional hazards. These seams of coal vary significantly in height and the machinery now being used is a 512 Goodman machine, which makes it imperative that the operator leave the machine to make certain adjustments and do other maintenance and mechanical adjustments, which cannot be readily accomplished with canopies in place.

2. The Petitioner also states that in other situations there is not sufficient clearance to permit the machines to work without making contact with the roof, ribs and other equipment and haulways in the mine.

3. Petitioner further states that the canopies would destroy, or partially

block, the view of the operator or cause him to have to protrude his head from underneath the canopies for proper visual inspection.

4. Petitioner states that he has been in contact with other operators in the area, as well as equipment vendors, and finds that no standard canopy now in production can meet the requirements of the law and still permit coal of this height to be satisfactorily removed.

5. Petitioner respectfully asks for a modification of 30 CFR 75.1710 since these standards will result in diminution of safety at its mines, and no technology is available at present to satisfactorily accomplish the desired results of increased safety. The Petitioner states that the production for this mine will be sharply curtailed or stopped, if he is required to install the present standard canopy, and therefore requests that the Safety Act be modified in order that he may continue to produce coal in view of the present energy requirements of the nation.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments, on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-327]

#### HAWKINS AND SWINNEY COAL CO.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), the Hawkins and Swinney Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 E Mine located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2),

(3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

Petitioner's No. 1E Mine uses the following equipment: 1 Epling Spinner, 2 Paul's Repair Shop Roof Bolting Machines, 3 Mescher Tractors, 1 Elkhorn Industrial Products Scoop.

Petitioner's No. 1E Mine is in the No. 2 Elkhorn Seam and ranges from 38 to 48 inches in height. The coal seam has consistent ascending and descending grades creating dips in the coalbed and the bottom. Water collects in the dips in the bottom, forcing Petitioner to use flooring, which adds another 2 to 4 inches of height to the equipment in use there.

Petitioner maintains that it should be allowed to remove the canopies it has installed on this equipment for the following reasons:

1. The limited visibility caused by these canopies is a very serious impairment to the operator and hampers the safe operation of this equipment.

2. On account of these canopies, the operator is forced to work in a very uncomfortable and awkward position and could easily sustain back or muscle injuries resulting from entering or exiting the equipment.

3. The presence of these canopies greatly increases the danger of striking overhead objects.

4. The equipment in use in Petitioner's mine was not manufactured with enough safety engineering for canopies to be installed, considering the height of the coal in the area in which it is used.

Petitioner asserts that its production has dropped from 2,400 tons per month to between 800 and 1,000 tons per month on account of the necessity of operating this equipment slowly in order for the operator to be able to see and maintain safe working conditions. Petitioner asserts that it will not be able to continue working under these conditions.

As its alternative, Petitioner seeks to resume operations without these canopies.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or fur-

nish comments, on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-389]

#### HAWLEY COAL MINING CORP.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Hawley Coal Mining Corporation has filed a petition to modify the application of 30 CFR 75.1710 to its Bottom Creek No. 1 and No. 2 Mines, McDowell County, West Virginia.

30 CFR 75.1710 provides:

"An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

" . . . Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

1. Petitioner states that its mining operations in the Bottom Creek No. 1 Mine are conducted in the Pocahontas No. 12 Seam which ranges in height from 38

inches to 44 inches, and which contains an average seam height of 36 inches. Mining operations in the Bottom Creek No. 2 Mine are conducted in the Pocahontas No. 10 Seam which ranges in height from 44 inches to 52 inches, and which contains an average seam height of 39 inches.

2. Petitioner states that it conducts its coal mining operations in the Bottom Creek No. 1 Mine through the use of continuous mining machines, shuttle cars and roof bolting machines. In the Bottom Creek No. 2 Mine, the Petitioner conducts its coal mining operations through the use of cutting machines, loading machines, roof bolting machines and battery tractors.

3. Petitioner states that in the past he has attempted to utilize cabs and canopies on its electric face equipment, operating in the lower coal seam heights of the Bottom Creek Mines, above mentioned, and by virtue of said use, the Petitioner determined that the installation of these devices on the said equipment greatly decreased the safety of the miners employed by it in said Mines.

4. Petitioner states that this decrease in safety results, in part, from a limitation of the proper visibility necessary for the safe operation of the said mining equipment during periods when the equipment operator is under the cab or canopy.

5. Petitioner further states that the coal seams in which he is presently conducting its mining operations at the Bottom Creek Mines are subject to rolls and undulations which cause the equipment, upon which has been installed cabs or canopies, to become jammed between the roof and the floor of the active workings of the Bottom Creek Mines.

6. Petitioner states that on various occasions, the coal miner employed by the Petitioner at the Bottom Creek Mines, have expressed their dissatisfaction with the use of such devices in the Mines, and have threatened not to operate the electric face equipment should said cabs and canopies be installed thereon.

7. Petitioner states he has contacted its equipment suppliers to determine if any forms of cabs and canopies are available for installation on the electric face equipment operated in the Bottom Creek Mines, which will not produce the safety hazards abovementioned. He has been advised on numerous occasions that such devices do not exist at the present time for use on the said equipment. Furthermore, he has been unable to develop an adequate design for a cab and canopy for said equipment which will alleviate these problems.

8. Based on the foregoing, it is Petitioner's position that the application of the Mandatory Safety Standards set forth in Sections 75.1710 and 75.1710-1 (a) to the electric face equipment presently employed at the Bottom Creek Mines, in the coal seam heights abovementioned, will in fact result in a diminution of safety to the coal miners employed by Petitioner in said Mines.

9. Petitioner submits, as an alternate method to provide for the safety of its miners employed at the Bottom Creek

Mines, the following program for use in connection with its electric face equipment presently in operation at the said Mines:

a. Petitioner will affirmatively undertake steps to ascertain and develop, through its internal staff and its outside equipment suppliers, a suitable form of cab and canopy for use in connection with its electric face equipment in the Bottom Creek Mines, the application of which will not result in the safety hazards enumerated above. During the course of said development program, the Petitioner will consult the proper representatives of the Mining Enforcement and Safety Administration and the United Mine Workers of America, so as to benefit by their expertise in this area. In connection with this, the Petitioner will affirmatively solicit ideas for cab and canopy designs from the mining personnel employed by it in the Bottom Creek Mines. As such technology is developed, the Petitioner will employ it in its mining operations at the Bottom Creek Mines.

b. The Petitioner will regularly conduct classes for all of its supervisory, coal mining and safety personnel employed at the Bottom Creek Mines, concerning the various aspects of the roof and rib control plan employed by the Petitioner at the said Mines, as well as the latest techniques in roof and rib control. Furthermore, the Petitioner will regularly instruct the personnel, abovementioned, in the safe use and operation of the electric face equipment employed by the Petitioner in the Bottom Creek Mines.

c. The Petitioner will, upon request, provide to the applicable local representatives of the Mining Enforcement and Safety Administration reports pertaining to the progress which it is making in this area.

10. Petitioner respectfully requests that this Petition for Modification of the Application of 30 CFR 75.1710 and 75.1710-1 (a) be granted until such time as the Petitioner is able to develop and utilize a cab or canopy configuration which will allow for the safe operation of its electric face equipment in the coal seam height at the Bottom Creek Mines, abovementioned.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-338]

#### HITE PREPARATION CO.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861 (c) (1970), Hite Preparation Company has filed a petition to modify the application of 30 CFR 75.1710 to its G-33 Mine located in Floyd County, Kentucky. 30 CFR 75.1710 provides:

"An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

" . . . Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

The mine that petitioner operates is a drift mine in a coal seam which has an average height of 45 inches.

The electric face equipment which petitioner uses and the height of each piece of equipment are as follows:

2 Elkhorn Industrial Products Co., AR-4 Scoops, 27 inches; 1 Elkhorn Industrial Products Co., DLE-1 Scoop, 28½ inches; 1 Acme Roofbolter, 27 inches; 1 Schroeder Coal Drill, 27 inches.

In addition to the fact that the coal seam in this mine is low, there are uneven bottom conditions there. These conditions make it hazardous for a man to operate this equipment with a canopy over the deck of the machine. With such

a canopy, it would be necessary for operators to extend their heads out the side of these machines to get adequate visibility. Petitioner believes that the addition of canopies to this machinery would result in a diminution of safety to the miners operating them. As its alternative, petitioner seeks to continue using these machines without adding canopies to them.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-379]

#### IMPERIAL COLLIERY CO.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Imperial Colliery Company has filed a petition to modify the application of 30 CFR 75.1712 to its Mine No. 14, Kanawha County, West Virginia. 30 CFR 75.1712 provides:

"The Secretary may require any operator to provide adequate facilities for the miners to change from the clothes worn underground, to provide for the storing of such clothes from shift to shift, and to provide sanitary and bathing facilities. Sanitary toilet facilities shall be provided in the active workings of the mine when such surface facilities are not readily accessible to the active workings.

The substance of Petitioner's statement is as follows:

1. Petitioner states that the hydrologic conditions in the vicinity of the portal to No. 14 Mine virtually precludes the installation of bathhouse facilities utilizing a septic tank and tile drainage field. He states that at the site the ground water table lies approximately 6 to 12 inches below the normal ground surface. According to the West Virginia State Department of Health, Design Standard for Small Septic Tank Systems, page 5, " . . . the depth of a proposed absorption system, (is) normally 24 to 30 inches." Petitioner concludes their drainage field would be located below the local ground water table. He states that the West Virginia State Board of Health, Small Sewage and Excreta Disposal Systems Regulations, section 6.2.9 provides as follows: "No soil

V

4  
  
7  
6  
U  
M  
I

absorption system shall be permitted where the depth to normal ground water . . . is within four feet of the bottom of the proposed absorption system." Petitioner claims that the aforesaid provisions prohibit them from installing the bathhouse in the immediate vicinity of the portal.

2. Petitioner further alleges that in the area immediately above (upstream) of the portal, the terrain and hydrologic conditions are such that it is impossible to put in a bathhouse and related waste disposal system. Below (downstream) of the No. 14 portal, the only area available for the installation of a bathhouse and related waste disposal system is the active refuse disposal area for the Eskdale Tipple and Preparation Plant. The West Virginia State Board of Health, Small Sewage and Excreta Disposal Systems Regulations, section 6.1.2 provides as follows: "No part of a small sewage or excreta disposal system shall be located in swampy or filled areas . . ." Because of this regulation Petitioner states they are prohibited from installing any system in this area.

3. Petitioner alleges that they are additionally restricted in the area of the No. 14 portal by West Virginia State Board of Health, Small Sewage and Excreta Disposal Systems Regulations, section 6.1.4. This regulation provides: "No septic tank or a soil-absorption system shall be located within ten feet of a building foundation . . ."

4. Petitioner states that the proposed bathhouse facilities would serve approximately 65 miners at a location where it would be difficult to find sufficient room to install such facilities and have parking for the miners using such facilities.

5. Petitioner also states that sanitary water is not available and will probably have to be pumped approximately 1,800 feet to the proposed site and then be treated and Petitioner states that a suitable building for such facilities is not available and will have to be either constructed or purchased.

6. Petitioner estimates that the proposed facilities would cost approximately \$35,000. Such an expenditure cannot be justified when the life expectancy for the mine portal is less than 2 years. It will take at least 6 months to prepare the area (assuming the proposed area will be adequate), obtain necessary permits and equipment and install facilities. Therefore, the proposed facilities would only be in service a maximum of 18 months.

7. Petitioner requests that in lieu of the requirements contained in 30 CFR 75.1712, that it be permitted to continue to pay its miners compensation in lieu of bathing facilities for the remaining life expectancy of this mine which is less than 2 years. Petitioner avers that such alternative method provides no less than the same measure of protection to the miners at its Mine No. 14 as that sought to be afforded the miners by 30 CFR 75.1712.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Office of  
Hearings and Appeals.

MAY 10, 1976.

[FR Doc. 76-15017 Filed 5-21-76; 8:45 am]

[Docket No. M. 76-321]

#### LIGON PREPARATION CO.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), the Ligon Preparation Company has filed a petition to modify the application of 30 CFR 75.1710 to its I-206 Mine, located in Floyd County, Kentucky. 30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches.

The substance of Petitioner's statement is as follows:

The mine that petitioner operates is a drift mine in a coal seam which has an average height of 32 inches.

The electric equipment which the petitioner uses and the height of each piece of equipment are as follows:

2 Acme D-1 Roofbolters, 30 inches; 2 Elkhorn Industrial Products Co., Mine Tractors, 28 inches; 1 Elkhorn Industrial Products Co., AR-4 Scoop, 25 inches; 2 Jeffrey 100-L Continuous Miners, 24 inches; 6 S & S Machinery Co. Mine Tractors, 24 inches.

In addition to the fact that the coal seam in this mine is low, there are uneven bottom conditions there. These conditions make it hazardous for a man to operate this equipment with a canopy over the deck of the machine. With such a canopy, it would be necessary for operators to extend their heads out the side of these machines to get adequate visibility. Petitioner believes that the addition of canopies to this machinery would result in a diminution of safety to the miners operating them. As its alternative, petitioner seeks to continue using these machines without adding canopies to them.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[FR Doc. 76-15021 Filed 5-21-76; 8:45 am]

[Docket No. M. 76-417]

#### MILBURN COLLIERY CO.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Milburn Colliery Company, has filed a petition to modify the application of 30 CFR 75.300 to its Mine No. 4. 30 CFR 75.300 provides:

All coal mines shall be ventilated by mechanical ventilation equipment installed and operated in a manner approved by an authorized representative of the Secretary and such equipment shall be examined daily and a record shall be kept of such examination.

The substance of Petitioner's statement is as follows:

1. Petitioner's No. 4 Mine was developed in the No. 2 Gas coal seam in 1952. The coal from the No. 4 Mine is removed from the mine down a steep incline to a silo approximately 160 feet below the mine and then transferred from the silo into mine cars. The No. 2 Gas coal seam is a non-gassy coal seam and methane has never been detected in this coal in the areas relevant to this Petition.

2. Once the coal from the No. 4 Mine is transferred from the silo into mine cars, the coal is hauled on track haulage through four tunnels to a dumping point where the coal is removed from the mine cars and transferred to a belt. The belt then transports the coal to the tipple.

3. The four tunnels involved in this Petition are used principally for coal haulage. Coal is hauled in six 16-ton mine cars by two 15-ton locomotives in tandem operated by one operator. A motorman, operating the locomotive and trip of cars, makes approximately 12 round trips through each of the tunnels during an 8-hour shift. Each round trip from the silo takes approximately 25 to 30 minutes which includes time required for dumping.

4. Each of the four tunnels is ventilated by natural ventilation. The No. 4 tunnel (closest to the silo) is approximately 740 feet long. Each one-way trip through this tunnel takes approximately 1 minute and 48 seconds. The No. 3 tunnel is approximately 645 feet long. Each one-way trip through this tunnel takes approximately 1 minute. The No. 2 tunnel is approximately 1360 feet long. Each one-way trip through this tunnel takes approximately 2 minutes and 15 seconds. The No. 1 tunnel (closest to the dumping point) is approximately 750 feet long. Each one-way trip through this tunnel

takes approximately 1 minute and 20 seconds.

5. Each of the aforementioned tunnels (No. 1, No. 2, No. 3 and No. 4) have been used since the year 1913, first in connection with mining in the Eagle Coal Seam and thereafter for coal haulage from Petitioner's No. 4 Mine to the dumping point near Petitioner's tipple. Mechanical ventilation has never been provided for these tunnels.

6. Installation of mechanical ventilation in each of the aforementioned tunnels would require substantial construction work in old workings, thereby unnecessarily exposing miners to hazards.

7. Petitioner proposes in lieu of the mandatory standard contained in Section 303(a) of the Act (30 CFR 75.300) that it be permitted to continue its present system of ventilation for its No. 1, No. 2, No. 3 and No. 4 haulage tunnels at its Mine No. 4.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 11, 1976.

[FR Doc. 76-15022 Filed 5-21-76; 8:45 am]

[Docket No. M. 76-425]

#### M. AND J. COAL CO.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), M. and J. Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 2 Mine. 30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraph (1) (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such

V  
4  
1  
1  
0

2  
4  
7  
6  
U  
M  
I

equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of 30 CFR 75.1710-1 with respect to the following equipment in use in its No. 2 Underground Mine: Epling Spinner, Paul Elswick Roof Bolter, Epling Tractor.
2. The coal seam at this mine ranges in height from 30 to 32 inches. The height of the equipment affected without the canopies or cabs ranges from 24 to 28 inches.
3. Installation of cabs or canopies on the above-mentioned equipment would cut the machine operator's vision in half. In addition, the cab or canopy would cramp the operator and make operation of the equipment more difficult. Also, the machinery would drag the top in some areas and thereby damage the roof bolts and half headers holding the top. The operator could be injured by the impact of the cab or canopy striking the top. Also, striking the top could "hang the motor" and immobilize the equipment.
4. Petitioner will roof-bolt to within 10 feet of the face of coal. Petitioner will conduct additional and supplemental training on proper roof support inspections and will periodically inspect safety devices on the equipment. Employees will be instructed in the use of existing safety equipment during rock falls. Regular drills on the handling of equipment will be conducted.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 11, 1976.

[FR Doc.76-15029 Filed 5-21-76;8:45 am]

[Docket No. M 76-322]

#### M. S. & M. COAL CO.

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), the M. S. & M. Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Mine located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

Petitioner feels that the installation of canopies on the following equipment would create a hazard to the operators of this equipment:

- 1 Long Airdox Scoop (Model LDH 31).
- 1 Long Airdox Roof Bolting Machine (Model LRB 15).

The No. 1 Mine is in the Elkhorn No. 2 seam, which has consistent ascending and descending grades creating dips in the coal bed. As a result of these dips, the canopies would have to be installed in such a manner as to prevent them from striking the roof and possibly de-

stroying roof support. The addition of canopies allows only a 23-inch vertical operating compartment, thus limiting the visibility of the equipment operators and creating a hazard to them as well as to the other employees in the mine.

Petitioner feels that the equipment operators' limited visibility and the cramped nature of the operating compartment could cause accidents in the mine. As its alternative to installing these canopies, petitioner seeks to continue operation without them.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 10, 1976.

[FR Doc.76-15020 Filed 5-21-76;8:45 am]

[Docket No. M 76-426]

#### MOLE COAL CO. NO. 1

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Mole Coal Company No. 1 has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Mine, Buchanan County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches

or more;

- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

1. Petitioner seeks a waiver of the application of section 75.1710 as it applies to its No. 1 Mine which has an average mining height of 30 inches.
2. The equipment to which the petition pertains is as follows:

	Height	Length	Width
	Feet	Feet	Feet
Epling spinner.....	23	16	5
Epling cutting machine.....	23	16	5
Paul Eastwick roof bolter.....	28	8	4 1/2
Epling tractor.....	24	9	5

3. Petitioner believes that the installation of canopies will result in a diminution of safety because the machine operator's vision would be impaired. Also, the operator would be cramped by the canopy thus making handling the machine more difficult.
4. As an alternative to the installation of canopies Petitioner proposes to conduct supplemental training on the proper inspection of roof supports in addition to regular instruction on operating the mobile equipment in the mine.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 11, 1976.

[FR Doc.76-15024 Filed 5-21-76;8:45 am]

[Docket No. M 76-418]

#### MOLE COAL CO. NO. 2

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Mole Coal Company No. 2 has filed a petition to modify the application of 30 CFR 75.1710 to its No. 8 Underground Mine.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of 30 CFR 75.1710-1 with respect to the following equipment in use in its No. 8 Underground Mine: Epling Spinner, Epling Cutting Machine, Paul Elswick Roof Bolter, Epling Tractor.
2. The coal seam at this mine ranges in height from 30 to 32 inches. The height of the equipment affected without the canopies or cabs ranges from 24 to 28 inches.
3. Installation of cabs or canopies on the above-mentioned equipment would cut the machine operator's vision in half. In addition, the cab or canopy would cramp the operator and make operation of the equipment more difficult. Also, the machinery would drag the top in some areas and thereby damage the roof bolts and half headers holding the top. The operator could be injured by the impact of the cab or canopy striking the top. Also, striking the top could "hang the motor" and immobilize the equipment.
4. Petitioner will roof-bolt to within 10 feet of the face of coal. Petitioner will conduct additional and supplemental training on proper roof support inspections and will periodically inspect safety devices on the equipment. Employees will be instructed in the use of existing safety equipment during rock falls. Regular drills on the handling of equipment will be conducted.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-427]

#### MULLINS COAL CO. NO. 6

##### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Mullins Coal Company No. 6 has filed a petition to modify the application of 30 CFR 75.1710 to its No. 5 Mine, Buchanan County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

The average height of the coal seam in locations where equipment, subject to section 75.1710, is being used is between 30 and 32 inches. The equipment for which a modification of the mandatory standard is sought is:

	Height	Length	Width
	Inches	Feet	Feet
Epling spinner.....	25	16	5
Royal cutting machine.....	25	16	5
Paul Elswick roof bolter.....	24	8	4 1/2
Moscher tractor.....	24	9	5
Epling tractor.....	24	9	15

Mining is accomplished by the conventional method. The subject mine has a roof control plan approved by MESA.

The installation of canopies on the aforementioned equipment would substantially reduce the operator's vision. In addition, the cabs or canopies would not only pose threat to dislodge roof bolts and other roof support but would cramp the operators so as to make handling of the machine more difficult.

As an alternative to the application of section 75.1710 Petitioner proposes to conduct additional training on proper inspections of roof support, periodic inspections of safety devices on equipment, and regular drills in the operation of equipment.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 10, 1976.

[FR Doc.76-15025 Filed 5-21-76; 8:45 am]

[Docket No. M 76-376]

#### NEW ELK COAL CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), New Elk Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Number 1 Mine, Logan County, West Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on or after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches.

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of the foregoing standard with respect to the following equipment: one Model MJ-51 Eplin Spinner Loader, one Model LRB-5A Long Roof Bolter, one Model Mark 4 Pauls Repair Roof Bolter, one Model AR 4 Elkhorn Scoop, one Model 100 S & S Battery Tractor and two Model MA-4 Eplin Battery Tractors. This equipment operates in rooms which are 20 feet wide and under sandstone top; there are no adverse rib conditions and there is no history of roof falls in any of the face areas.

2. Petitioner states that the average height of the coal seam in this mine is 35 inches. For purposes of 30 CFR 75.1710-1, the present mining height in this mine (as measured in accordance with official instructions set forth in Exhibit A<sup>1</sup>) is 23 inches.

3. Petitioner states that he has investigated various methods of installing canopies or cabs, without encountering a single method which would be safe in its mine.

4. Petitioner submits, however, that both canopies and cabs are incompatible with the present operations in its mine (primarily because of the size of the equipment in relation to the seam height), and that installation of canopies, cabs or any similar device would result in such a serious diminution of safety that the mine would not be able to continue to operate.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must

<sup>1</sup> Exhibit A is available for public inspection at the Office of Hearings and Appeals (see closing paragraph).

be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 11, 1976.

[Docket No. M 76-396]

#### OLD BEN COAL CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Old Ben Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Dixiana Mine, Wise County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on or after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches.

The substance of Petitioner's statement is as follows:

1. Petitioner states that its Dixiana Mine consists of three active sections. Two of the sections (Nos. 002 and 013) have average heights of 56 inches, while the height of 44 inches.

2. Petitioner requests the modification of 30 CFR 75.1710 with respect to all of its electric face equipment used in section No. 004 (the 44-inch high section) of the Dixiana Mine for the reason that the application of such standard to such equipment in such section of the mine will result in a diminution of safety to the miners.

3. Petitioner states that it has brought and received factory custom-built canopies for the equipment. The canopies are 43 inches high and when installed on the equipment they will not clear the roof bolts, which could cause the bolts to break interfering with roof support.

4. Petitioner states that the equipment operator has to lie down while under the canopy resulting in about a 90 percent loss of visibility towards the front and rear, and a 100 percent loss of visibility of the roof.

5. The No. 004 section has a life expectancy of 12 months.

6. Canopies have been redesigned and installed on most of the equipment on the two 56-inch high sections (Nos. 002 and 013), and work is in progress to fully comply with the mandatory standard on those two sections.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

[Docket No. M 76-392]

#### P. AND P. COAL CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), P. and P. Coal Company has filed a petition to modify the application of 30 CFR 75.1101 to its No. 2 Mine, Lee County, Virginia.

30 CFR 75.1101 provides:

Deluge-type water sprays or foam generators automatically actuated by rise in temperature, or other no less effective means approved by the Secretary of controlling fire, shall be installed at main and secondary belt-conveyor drives.

The substance of Petitioner's statement is as follows:

1. Petitioner requests modification of the application of 30 CFR 75.1101, which requires deluge-type water sprays or foam generators, to its No. 2 mine. It states that its proposed alternative

method will at all times guarantee no less than the same measure of protection afforded the miners at its No. 2 Mine as the mandatory safety standard.

2. Rather than installing the deluge-type water sprays or foam generators that automatically actuate by a rise in temperature located at the main and secondary belt-conveyor drives, Petitioner proposes to:

- (a) place a man at all belt drives while the drives are in operation;
- (b) install a high-pressure fire outlet water valve placed 50 feet on the intake air side of the drive (out by the drive); and
- (c) install a 100 foot section of 1 1/2 inch water hose on that outlet.

3. Petitioner also proposes to provide rock dust and a fire extinguisher at or near the drives.

4. Petitioner states that its existing belts are flame resistant.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 10, 1976.

[FR Doc.76-15028 Filed 5-21-76; 8:45 am]

[Docket No. M 76-420]

#### REPUBLIC STEEL CORP.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Republic Steel Corporation has filed a petition to modify the application of 30 CFR 75.1704 to its Banning No. 4 Mine.

30 CFR 75.1704 provides in pertinent part:

... [A]t least two separate and distinct travelable passageways which are maintained to insure passage at all times of any person ... and which are to be designated as escapeways, at least one of which is ventilated with intake air, shall be provided from each working section continuous to the surface escape drift opening, or continuous to the escape shaft or slope facilities to the surface, as appropriate, and shall be maintained in safe condition and properly marked.

The substance of Petitioner's statement is as follows:

1. Construction of two separate and distinct escapeways would necessitate excessive capital expenditures, consume unnecessary time, and subject construction personnel to hazards during rehabilitation of approximately 1,200 feet

of older passageway. The construction of a distinct secondary escape route would increase the distance required to reach an escape shaft.

2. The alternate method requires rehabilitation of approximately 100 feet of older passageway. When complete, the first escapeway would proceed through this rehabilitated area, pass through a man door, and follow an intake air passageway leading to the escape hoist in Sherbondy shaft. The portion of the escape route on intake air to Sherbondy shaft would be devoid of electrical lines or equipment for the entire length of its use as an escape route.

3. The second escapeway would utilize the existing track haulage road to 24 Butt Section. The second escapeway utilizes the same intake air as the primary escape route to Sherbondy shaft for approximately 1,500 feet, at which point the secondary route intersects with intake air from another man shaft. The route thereafter leads to this second man shaft.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-331]

#### REX MINING CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), the Rex Mining Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Mine located in Campbell County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on or after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs

## NOTICES

(1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

Petitioner maintains that due to the low ceilings and obstructions in its mine that the canopies are not practical. To the contrary, having canopies over its equipment would create more of a hazard than operation without them. Petitioner maintains that canopies would have to be constructed in such a manner that operators would have to lean out of their equipment in order to have proper vision, and that this in itself would jeopardize the health and safety of the operators along with any other persons.

## REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-419]

R. AND H. COAL CO.

## Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), R. and H. Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 3 Underground Mine.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed

canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of 30 CFR 75.1710-1 with respect to the following equipment in use in its No. 3 Underground Mine: Epling Spinner, Royal Cutting Machine, Paul Elswick Roof Bolter, Epling Tractor.

2. The average height of the coal seam at this mine is 35 inches. The height of the equipment affected without the canopies or cabs ranges from 24 to 28 inches.

3. Installation of cabs or canopies on the above-mentioned equipment would cut the machine operator's vision in half. In addition, the cab or canopy would cramp the operator and make operation of the equipment more difficult. Also, the machinery would drag the top in some areas and thereby damage the roof bolts and half headers holding the top. The operator could be injured by the impact of the cab or canopy striking the top. Also, striking the top could "hang the motor" and immobilize the equipment.

4. Petitioner will roof-bolt to within 10 feet of the face of coal. Petitioner will conduct additional and supplemental training on proper roof support inspections and will periodically inspect safety devices on the equipment. Employees will be instructed in the use of existing safety equipment during rock falls. Regular drills on the handling of equipment will be conducted.

## REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must

be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

[Docket No. M 76-421]

SLAB FORK COAL CO.

## Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Slab Fork Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 8, Mine No. 10, Mine No. 14 and Mine Gaston No. 2.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with Section 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of 30 CFR 75.1710-1 with respect to self-propelled electric face equipment in its Mine No. 8, Mine No. 10, Mine No. 14, and Mine Gaston No. 2. The equipment for which modification is sought includes

the following: Lee Norse 265 HH Continuous Mining Machines; Joy 18 SC Shuttle Cars, Galis 300 Roof Bolting Machines, Kersey Battery Tractors, Fletcher DDO 13 Dual Head Roof Bolting Machines, Joy 12 RB Cutting Machines, Joy 14 BU-10 Loading Machines, Long Coal Drills, Lee Norse CM 28 Continuous Mining Machines, Lee Norse 245 Continuous Mining Machine, Wilcox Mark 20 Continuous Mining Machine, Wilcox Roof Bolting Machine, Joy 11 RU Cutting Machines, Joy 6 SC Shuttle Cars, Joy 16 RB Cutting Machines, Joy 14 BU 9 Loading Machines.

2. Mine No. 8 is operating in the Pocahontas No. 4 coal seam, which is approximately 34 inches high.

3. Mine No. 10 is operating in the Pocahontas No. 3 coal seam, which is approximately 42 inches high.

4. Mine No. 14 is operating in the Beckley coal seam, which is approximately 34 inches high.

5. Mine Gaston No. 2 is operating in the Pocahontas No. 3 coal seam, which is approximately 45 inches high.

6. The vision of the equipment operator is substantially restricted by the installation of cabs and canopies, thereby increasing the safety hazards to personnel in each mine. Persons operating self-propelled electric face equipment with cabs or canopies in a mining height of less than 60 inches have difficulty reaching the controls of the equipment so that positive control of such equipment is not insured at all times. Cabs or canopies make it difficult for some operators to get into and out of the equipment. Also, portions of the operator's body protrude from the canopy or cab in such a manner that the equipment operator is in danger of being crushed between the cab or canopy and the roof, floor, set post or coal ribs. Finally, in some areas of each mine, the tops of the canopies and cabs rub against the roof, loosening roof bolts and increasing the possibility of roof falls in areas regularly traveled by miners.

7. Employees at each mine believe that the operation of self-propelled electric face equipment with cabs or canopies where the mining height is less than 60 inches is more hazardous to mine personnel than operation of such equipment without cabs or canopies.

8. Petitioner requests that it be permitted to continue to operate self-propelled electric face equipment in these four mines without cabs or canopies.

## REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

## NOTICES

[Docket No. M 76-377]

SUNRISE COAL COMPANY, INC.

## Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Sunrise Coal Company, Inc., has filed a petition to modify the application of 30 CFR 75.1710 to its Pardee Mine, Wise County, Virginia, and Letcher County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. . . .

The substance of Petitioner's statement is as follows:

1. Petitioner states that mining operations in the Pardee Mine are conducted in the Morris Seam which ranges in height from 30 to 55 inches, and which contains an average seam height of 44 inches.

2. Petitioner states that he conducts his coal mining operations in the Pardee Mine through the use of conventional mining equipment, including cutting machines, loading machines, shuttle cars, roof and coal drills. In the past, the Petitioner states that he attempted to utilize cabs and canopies on its electric face equipment, operating in the lower coal seam heights above-mentioned, and by virtue of said use, the Petitioner determined that the installation of these devices on the said equipment greatly

decreased the safety of the miners employed by it in the mine.

3. Petitioner further alleges that he has contacted its equipment suppliers to determine if any forms of cabs and canopies are available for installation on the electric face equipment operated in the Pardee Mine which will not produce the safety hazards mentioned below. Petitioner has been advised on numerous occasions that such devices do not exist at the present time for use on said equipment. Furthermore, Petitioner states he has been unable to develop an adequate design for a cab and canopy for said equipment which will alleviate these problems.

4. Petitioner states that this decrease in safety results, in part, from a limitation of the proper visibility necessary for the safe operation of the said mining equipment during periods when the equipment operator is under the car or canopy. Moreover, Petitioner states that the coal seam in which the Petitioner is presently conducting its mining operations at the Pardee Mine is subject to rolls and undulations which cause the equipment, upon which has been installed cabs or canopies, to become jammed between the roof and the floor of the active workings of the coal mine.

5. Petitioner also alleges that the use of such devices on Petitioner's mining equipment further reduces the safety of the operators of said equipment by unduly confining them and restraining their ability to escape rapidly from said equipment in the event of an emergency.

6. Petitioner submits, as an alternate method to provide for the safety of its miners employed at the Pardee Mine, the following program for use in connection with its electric face equipment presently in operation at the said mine:

a. Petitioner will affirmatively undertake steps to ascertain and develop, through its internal staff and its outside equipment suppliers, a suitable form of cab and canopy for use in connection with its electric face equipment in the Pardee Mine, the application of which will not result in the safety hazards enumerated above. During the course of said development program, the Petitioner will consult the proper representatives of the Mining Enforcement and Safety Administration and the United Mine Workers of America, so as to benefit by their expertise in this area. In connection with this, the Petitioner will affirmatively solicit ideas for cab and canopy designs from the mining personnel employed by it in the Pardee Mine. As such technology is developed, the Petitioner will employ it in its mining operations at the Pardee Mine.

b. The Petitioner will regularly conduct classes for all of its supervisory, coal mining and safety personnel employed at the Pardee Mine, concerning the various aspects of the roof and rib control plan employed by the Petitioner at the said mine, as well as the latest techniques in roof and rib control. Furthermore, the Petitioner will regularly instruct the personnel, abovementioned, in the safe use and operation of the electric face equip-

ment employed by the Petitioner in the Pardee Mine.

c. The Petitioner will, upon request, provide to the applicable local representatives of the Mining Enforcement and Safety Administration reports pertaining to the progress which it is making in this area.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 10, 1976.

[FR Doc. 76-15038 Filed 5-21-76; 8:45 am]

[Docket No. M 76-334]

#### THELMA COAL CO., INC.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), the Thelma Coal Company, Inc. has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Mine located in Martin County, Kentucky. 30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

Petitioner maintains that the height of the coal at its No. 1 Mine and the contours of the bottom there are such that the addition of canopies to its equipment would make for poor visibility and cramped operating position for the operator of this equipment.

As its alternative to adding these canopies, petitioner seeks to continue mining operations without them.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 21, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 10, 1976.

[FR Doc. 76-15034 Filed 5-21-76; 8:45 am]

[Docket No. M 76-422]

#### WESTMORELAND COAL CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Westmoreland Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its Wentz No. 1 Mine.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with Section 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirement of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. While canopies have the necessary height clearance most of the time during mining under normal conditions, necessary clearance diminishes to zero when either the bottom or the full seam undulates or when rolls in the coal seam are encountered. Canopies have been torn off when they became wedged against the roof.

2. When operating with the available canopies, the operator's vision is severely impaired to the point that operation of the equipment becomes hazardous to the operator and to all other persons in the working area.

3. Due to the combination of the severely limited vision and close confinement in the cab, appendages of the operator's body, such as his hands, feet, buttocks or head, protrude in such manner that they are in jeopardy of being crushed between the equipment, posts or the coal rib.

4. Ingress to and egress from the cab is limited.

5. Because of close confinement in the cabs, severely limited ingress to and egress from the cab under the canopies, and lack of vision, operators attempt to manipulate the controls from outside the equipment while standing between the equipment and the rib, thus incurring the risk of being crushed.

6. In case of machine malfunction, cable damage, or power failure of any kind, the operators of the equipment may be held captive by the canopies for an indefinite period, depending on the circumstances.

7. The operators of this type of equipment are at all times under fully supported roof provided by an approved full-roof bolting plan or a combination of roof bolts and posts. Such roof support is deemed satisfactory for all other personnel in the mine, including helpers on self-propelled electric face equipment, such as the continuous miner and the bolter. The helpers and other supporting personnel freely move around adjacent to the equipment under the protection of the proper roof support.

8. Cutting machine operators and continuous miner operators cannot see the last row of roof bolts because the canopies impair their vision; such operators may, as a result, inadvertently go inby supported roof.

[Docket No. M 76-390]

#### WHITE ASH MINING CORP.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), White Ash Mining Corporation has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Mine, located in Johnson County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner states that its mine contains the following equipment:

Acme D 3 Roof Bolters, Long Airdox Coal Drills, Joy Equipment—12 RB Cutter 17083; 12 RB Cutter 17029; 12 RB Cutter 16979; 21 SC Shuttle Car ET 10385; 21 SC Shuttle Car ET 10386; 21 SC Shuttle Car; 14 BU 10-11AE Loader 8821; 14 10-11AE Loader 8830; 14 BU 10-11AE Loader 9322; 8 SC Shuttle Car 7036; 8 SC Shuttle Car 4337; 8 SC Shuttle Car #22; 8 SC Shuttle Car, 8 SC Shuttle Car.

2. Petitioner states that its equipment is old and was not designed by the manufacturer for cabs or canopies.

3. Petitioner further states that the thickness of their coal seam is 28 to 32 inches and this thickness makes it impossible to operate with cabs or canopies without causing a hazard to the operators that is greater than operating without a canopy.

9. Cutting machine operators and continuous miner operators cannot see the cutter lines nor the cutter bar or cutter head due to impaired vision, and places may be cut too wide and off center, thus weakening the roof and creating roof fall hazards.

10. Technical support personnel from MESA, representatives of the miners, equipment operators, mine health and safety committees, and representatives of Westmoreland have worked together to attempt to modify the canopies in order to comply with the regulation. Such modifications created additional hazards to the miners and resulted in a diminution in safety.

11. Petitioner requests permission to operate self-propelled electric face equipment in the Wentz No. 1 Mine without cabs or canopies.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 11, 1976.

[FR Doc. 76-15035 Filed 5-21-76; 8:45 am]

[Docket No. M 76-467]

#### WESTMORELAND COAL CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Westmoreland Coal Company has filed a petition to modify the application of 30 CFR 75.1405 to its Eccles No. 6 Mine, Eccles, Raleigh County, West Virginia.

30 CFR 75.1405 provides:

All haulage equipment acquired by an operator of a coal mine on or after March 31, 1971, shall be equipped with automatic couplers which couple by impact and uncouple without the necessity of persons going between the ends of such equipment. All haulage equipment without automatic couplers in use in a mine on March 30, 1970, shall also be so equipped within 4 years after March 30, 1970.

The substance of Petitioner's statement is as follows:

1. On March 31, 1975, a decision and order approving a petition for modification of the application of Section 75.1405 of the Departmental regulations was entered. A copy of the decision and order approving the petition is attached hereto, marked Exhibit "A" and made a part hereof.

Exhibit A is available for inspection at the address contained in the last paragraph of the notice.

2. The approved modifications were made at the Eccles No. 6 Mine but application of the approved modifications has not entirely eliminated the necessity for a person to place himself between the mine cars occasionally. The following additional alterations to the mine cars in the Eccles No. 6 Mine will eliminate any necessity for workers to position themselves between the mine cars:

A. The bumper on the rear of the car (opposite the dumping end of the car) will be changed to a socket design bumper that will guide the link to the proper position for coupling in accordance with the drawings and specifications shown upon Exhibit "B" attached hereto and made a part hereof.

B. The 16-inch straight hollow coupling link will be replaced with an 18-inch coupling link with a solid block in the center as shown in Detail "A" on Exhibit "B." This type of link facilitates the alignment of the link to the socket in the car bumper to which it is to be coupled. This design also permits the link to be so positioned to avoid contact with the shaft wall during hoisting of the mine car. The barrel and coupling-pin chain on the rear end of the car has been so designed to prevent damage to the barrel and chain.

C. A hand link aligner will be used by workers to align the link, if necessary, to couple the mine cars and will also be used to disengage the link from the pin. The workers will also use the aligner to position the link in order to prevent contact with the shaft wall during hoisting of the mine car. The hand link aligner will be sufficient length as to obviate the worker placing himself between the mine cars.

(3) Twenty-five (25) mine cars altered as above described have been placed in service and are in the process of technical evaluation by the Mining Enforcement and Safety Administration.

The above-described alterations of the approved alternate system for coupling and uncoupling mine cars will at all times guarantee no less than the same measure of protection afforded to miners of the Eccles No. 6 Mine by Section 75.1405 of the Departmental regulations and the modification of said section granted by the order attached hereto as Exhibit "A."

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 11, 1976.

[FR Doc. 76-15036 Filed 5-21-76; 8:45 am]

Exhibit B is also available at the address noted in the last paragraph of the notice.

[Docket No. M 76-399]

#### WISE MINING, INC.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Wise Mining, Inc., has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Mine, Logan County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. \* \* \*

The substance of Petitioner's statement is as follows:

1. Petitioner has not applied to the Assistant Administrator-Technical Support of the Mining Enforcement and Safety Administration (MESA) for approval of devices to be used in lieu of cabs or canopies as permitted by 30 CFR 75.1710-1(f) since the Petitioner is without knowledge of any alternate devices which would be safe and otherwise suitable for use in its mine.

2. The Petitioner submits, however, that both canopies and cabs are incompatible with the operations in its mine (primarily because of the size of the equipment in relation to the seam height) and that installation of canopies, cabs or any similar device would result in such a serious diminution of safety that the mine would not be able to continue to operate.

3. On the basis of present projections it is estimated that there is enough coal for this mine to continue operating for 2 years. The average height of the coal seam in this mine (the Cedar Grove seam) where the equipment is being used is 36 to 42 inches.

4. For purposes of the regulation at 30 CFR 75.1710-1 the mining height in this mine (as measured in accordance with official instructions of MESA) is 24 inches. Thus, the regulatory requirement for installation of canopies or cabs becomes applicable to this mine on July 1, 1976.

5. The electric face equipment subject to the regulation in this mine consists of one 12 RB Joy cutting machine, three SS74 scoops, one long Airdox coal drill and one D3 Acme roof drill.

6. This equipment operates in rooms which are cut 20 feet wide; there are no adverse rib conditions and there is no history of roof falls in any of the face areas.

7. Roof bolts are being utilized to support the roof at this mine.

8. The Petitioner has investigated various methods of installing canopies or cabs, without encountering a single method which would be safe in its mine.

9. The Petitioner does not have an alternate method for achieving the safety results intended by 30 CFR 75.1710-1, but Petitioner maintains that application of 30 CFR 75.1710-1 to its mine will result in a diminution of safety to the miners in the mine because of uneven bottom.

10. Petitioner will, however, train and continuously retrain the miners in maintenance of strict roof control in accordance with roof control procedures approved by MESA and the State Department of Mines.

\* Petitioner attached a copy of a memorandum from an Acting Assistant Administrator for MESA to MESA District Managers concerning enforcement of 30 CFR 75.1710-1. This exhibit is available for inspection at the Hearings Division address provided below.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 10, 1976.

[Docket No. M 76-315]

#### WOLF CREEK COLLIERIES CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), Wolf Creek Collieries Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 5 Mine located in Martin County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or ribs, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. \* \* \*

The substance of Petitioner's statement is as follows:

1. At the present time the self-propelled electric face equipment does have canopies. However, the company requests permission to remove the canopies from said equipment because to maintain said canopies on this equipment diminishes the overall safety to the machine operator and other workers in the area of said equipment in the following manner:

(a) To provide room for the canopies on said equipment the workers must mine a portion of the roof thereby disturbing the roof rock and creating a less than ideal roof control plan, all of which creates a greater hazard of roof falls.

(b) The canopy impairs the vision of the worker operating the equipment thereby decreasing his ability to maneuver the equipment and increasing the likelihood of accidents causing injury to the worker-operator and others in the area of the equipment.

2. The removal of part of the roof in order to provide room for the said canopies creates prohibitive costs to the company for mining coal less than sixty (60) inches in height.

3. Petitioner respectfully requests that the Secretary modify the interpretation and application of the provisions of 30 CFR 75.1710-1(a) at the Petitioner's mine by waiving the requirements of 75.1710-1(a) to the extent that Petitioner will be allowed to operate its electric self-propelled equipment in coal that is less than sixty (60) inches in its No. 5 Mine.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

MAY 10, 1976.

[FR Doc. 76-15039 Filed 5-21-76; 8:45 am]

[Docket No. M 76-335]

#### WOODMAN THREE MINING CO.

#### Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. § 861(c) (1970), the Woodman Three Mining Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 1 Mine located in Pike County, Kentucky.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710-1 which in pertinent part provides:

... Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

- (1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;
- (2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;
- (3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;
- (4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;
- (5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and
- (6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. \* \* \*

The substance of Petitioner's statement is as follows:

The equipment for which Petitioner seeks modification of the canopy provisions is as follows:

- 2 Joy 18SC6 Shuttle cars
- 1 14 EU 10 Lading machine
- 1 15 RU Cutting machine
- 1 11 RU Cutting machine
- 1 Model 198 Schroder Drill

Petitioner asserts that its No. 1 Mine is in the Splash Dam coal seam and ranges from 39 to 52 inches in height. The coal seam has consistent ascending and descending grades creating dips in the coalbed. As a result of these dips, the canopies would have to be installed in such a manner as to prevent them from striking the roof and possibly destroying roof support.

Petitioner also asserts that adding canopies to this equipment would allow only a 24-inch vertical operating compartment, thus limiting the visibility of the equipment operators and creating a hazard to them and to other miners in the area of operation.

Petitioner asserts that the cramped operating position and the reduction of visibility of the operators of this equipment caused by installation of canopies could contribute to accidents in the mine.

As its alternative, Petitioner seeks to continue operation without installing canopies.

#### REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before June 23, 1976. Such requests or comments must

be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,  
Director, Office of  
Hearings and Appeals.

#### Bureau of Mines

[Bulletin 76-1, Supplement No. 1]

#### PROCUREMENT REGULATIONS

Legal Review of Procurement Actions; Correction

In FR Doc. 76-10830 appearing at page 15881 in the FEDERAL REGISTER of April 15, 1976, a correction is made to eliminate the identity of the specific Solicitor's offices which will be used for review of procurement actions. In paragraph 3, delete the following: "(Washington, D.C., Denver, CO, or Philadelphia, PA)".

Background. The identity of other field offices of the Solicitor which may be used by Bureau procurement offices for legal review of procurement actions was inadvertently omitted from Bulletin 76-1. Local Solicitor's offices should be used by Bureau field installations whenever practical.

Dated: May 14, 1976.

NUCLEAR REGULATORY  
COMMISSION

[Docket No. STN 50-485]

ROCHESTER GAS AND ELECTRIC CORP.  
Prehearing Conference

Before the Atomic Safety and Licensing Board.

In the Matter of Rochester Gas and Electric Corporation.

Sterling Power Project Nuclear Unit No. 1.

By Notice of Hearing dated March 17, 1976, the Atomic Safety and Licensing Board invited intervention in this proceeding by any person whose interest might be affected by the addition of Orange and Rockland Utilities, Inc., Central Hudson Gas & Electric Corporation, and Niagara Mohawk Power Corporation as joint owners of the proposed Sterling facility. The Notice requires that petitions to intervene be submitted no later than June 21, 1976. Admitted parties and persons submitting petitions in response to the Notice of Hearing are informed that a Prehearing Conference in this matter will be held on June 22, 1976 at the Oswego County Legislative Chambers, Oswego County Building, 3rd Floor, 46 East Bridge Street, Oswego, New York.

Parties and petitioners are hereby requested to attend the aforementioned Prehearing Conference prepared to discuss all aspects of any petitions received in response to the Notice.

Dated at Bethesda, Maryland, this 19th day of May 1976.

It is so ordered.

The Atomic Safety and Licensing Board.

EDWARD LUTON,  
Chairman.

[Docket No. 50-184]

NATIONAL BUREAU OF STANDARDS  
Notice of Issuance of Amendment to  
Facility License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 2 to Facility License No. TR-5 issued to the National Bureau of Standards (NBS) for operation of its reactor, located near Gaithersburg, in Montgomery County, Maryland. The amendment is effective as of its date of issuance.

The amendment reduces the maximum amount of contained uranium 235 NBS is authorized to receive, possess and use in connection with the operation of its reactor.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the non-proprietary portion of the application for amendment dated September 24, 1975, (2) Amendment No. 2 to License No. TR-5, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street N.W., Washington, D.C.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 14th day of May, 1976.

For the Nuclear Regulatory Commission.

VERNON L. ROONEY,  
Acting Chief, Operating Reactors  
Branch No. 4, Division of  
Operating Reactors.

[Docket No. STN 50-437]

OFFSHORE POWER SYSTEMS  
Notice of Resumption of Hearing

In the Matter of Offshore Power Systems (Manufacturing License for Floating Nuclear Power Plants).

Please take notice that the public evidentiary hearing that has been underway in this proceeding before the Atomic Safety and Licensing Board (the Board), and which has been in recess since the March 30, 1976 session in Atlantic City, New Jersey, will resume again at 9:30 A.M. local time, Tuesday, June 15, 1976, at the following location:

NRC Public Hearing Room, 5th Floor, East-West Towers Bldg., 4350 East-West Highway, Bethesda, Maryland 20814.

The purpose of this proceeding, to consider the application of Offshore Power Systems (the applicant) for a manufacturing license to build eight pressurized water floating nuclear power plants, has been more fully set forth in the Atomic Energy Commission's original Notice of Hearing dated December 5, 1973 (published in the FEDERAL REGISTER December 10, 1973, 38 FR 34008).

The scope of this next session of the hearing will be as set forth in this Board's Fifth Prehearing Conference Order (p. 5) issued May 17, 1976, and pursuant to the matters listed under "Phase II" of the parties' March 8, 1976 "Stipulation Concerning Hearing Schedule," as amended at the May 11 Fifth Prehearing Conference.

Interested members of the public are invited to attend the hearing.

Issued at Bethesda, Maryland this 18th day of May, 1976.

It is so ordered.

For the Atomic Safety and Licensing Board.

THOMAS W. REILLY, Esq.,  
Chairman.

[FR Doc.76-14942 Filed 5-21-76; 8:45 am]

[Docket No. P-558-A]

## SAN DIEGO GAS &amp; ELECTRIC CO.

## Notice of Receipt of Attorney General's Advice and Time for Filing of Petitions to Intervene on Antitrust Matters

The Commission has received, pursuant to section 105c of the Atomic Energy Act of 1954, as amended, the following advice from the Attorney General of the United States, dated May 12, 1976: "You have requested our advice pursuant to Section 105c of the Atomic Energy Act of 1954, as amended, in connection with the above-captioned facility.

This facility will consist of two units each capable of producing 950 MW of electric power. The first unit is scheduled to begin commercial operation in May, 1984, with the second unit coming on line in May, 1987. San Diego Gas & Electric Company is currently the only participant in the facility. However, a number of public and private electric systems in Southern California have been invited to purchase a portion of the units.

"On July 12, 1971, the Department advised the Atomic Energy Commission concerning San Diego Gas & Electric's application, together with the Southern California Edison Company, to construct the San Onofre Nuclear Generation Station, Units 2 and 3. Letter from Walker B. Comegys, Acting Assistant Attorney General, to Bertam H. Schur, Associate General Counsel, 26 F.R. 17886 (1971). At that time, we recommended an antitrust hearing to consider alleged anticompetitive conduct of Southern California Edison toward smaller electric systems in its area. In our advice, we noted that San Diego Gas & Electric had no wholesale customers and that the only smaller electric system with which it was interconnected had satisfactory alternative bulk power sources available. We found no basis in San Diego Gas & Electric's competitive practices to warrant an antitrust hearing. Since that time no information has come to our attention to suggest that a different conclusion would now be appropriate. Consequently we do not recommend that your Commission hold an antitrust hearing in connection with the licensing of these nuclear units."

Any person whose interest may be affected by this proceeding may, pursuant to section 2.714 of the Commission's "Rules of Practice", 10 CFR Part 2, file a petition for leave to intervene and request a hearing on the antitrust aspects of the application. Petitions for leave to intervene and requests for hearing shall be filed by June 24, 1976, either (1) by delivery to the NRC Docketing and Service Section at 1717 H Street, NW, Washington, DC, or (2) by mail or telegram addressed to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attn: Docketing and Service Section.

For the Nuclear Regulatory Commission.

JEROME SALTZMAN,  
Chief, Antitrust & Indemnity  
Group Nuclear Reactor Regulation.

<sup>1</sup>Subsequently on the basis of Southern California Edison's acceptance of certain procompetitive conditions to the San Onofre licenses, the Department was able to advise the AEC that a hearing on these matters was no longer required. Letter of June 27, 1974, from Thomas E. Kauper, Assistant Attorney General, to Howard K. Shapar, Assistant General Counsel, 39 F.R. 27822 (1974).

SECURITIES AND EXCHANGE  
COMMISSION

[File No. 500-1]

AMERICAN KITCHEN FOODS, INC.,  
ET AL.

## Suspension of Trading

May 12, 1976.

In the matter of trading in securities of American Kitchen Foods, Inc., American Marine, Ltd., Associated Food Stores, Inc., Capital Facilities Corp., Computer Interactions, Inc., Diversitron, Inc., Encoder Research and Development Corp., Interconnect Resources Corp., Julyn Sportswear, Inc., Larson Industries Inc., Marks Polarized Corp., Micon Corp., Panefab International Corp., Petrominerals Corp., Record Retrieval and Retention Corp., Southern Scottish Inns, Sovereign Industries, Inc., Walter Reade Organization, and Willcox and Gibbs, Inc.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the securities of the above companies being traded on a national securities exchange or otherwise is required in the public interest and for the protection of investors; Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 2:00 p.m. (EDT) on May 12, 1976 through May 21, 1976.

By the Commission.

[SEAL] GEORGE A. FITZSIMMONS,  
Secretary.

[FR Doc.76-15055 Filed 5-21-76; 8:45 am]

[Release No. 34-12452; File No. SR-NYSE-76-17]

NEW YORK STOCK EXCHANGE, INC.  
Self-Regulatory Organizations; Proposed  
Policy Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on March 11, 1976, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission a proposed policy change as follows:

The Board of Directors of the New York Stock Exchange, Inc. (the "Exchange") proposes to amend the Exchange's policy on the form of stock certificates in order to permit issuance of the single denomination stock certificate:

A single denomination stock certificate with or without punch panel may be utilized in accordance with the following provisions:

## WITH PUNCH PANEL

All engraving requirements of the conventional certificate must be followed with the exception of the corner piece. The corner piece, which denotes the limitation a certificate may represent is not

required when an engraved punch panel appears on the certificate.

## WITHOUT PUNCH PANEL

The single denomination stock certificate without punch panel calls for additional and special engraving requirements and certificate imprints which must be adhered to without exception. They are as follows:

1. The share and number counters and the open throat area, used for stockholder addressing and indicating the issuance of shares in numerical and alpha numerical form, must bear fine line intaglio engraving. (The fine line intaglio engraving is spaced so as to create clearly discernible parallel lines. If these parallel lines are erased or broken, they are extremely obvious to the unaided eye and reconstruction is virtually impossible.)

2. A penetrating ink ribbon must be used in addressing certificates and imprinting the number of shares in alpha numeric and numeric form. (The penetrating ink ribbon must have the capacity of actually penetrating the fabric of the certificate.)

3. As an additional preventative to raising the number of shares represented by a certificate, a matrix (see example) must be added in the open throat area indicating the number of shares in five different positions.

## MATRIX EXAMPLE

\*100,000\*\*\*\*\*  
\*100,000\*\*\*\*\*  
\*100,000\*\*\*\*\*  
\*100,000\*\*\*\*\*  
\*100,000\*\*\*\*\*

4. The number of shares must be shown in alpha numeric form in the open throat area.

Along with the above additional and special requirements, all of the engraving requirements of the conventional certificate must be followed with the exception of the corner piece. The corner piece, which denotes the limitation a certificate may represent, is not required.

3. Purpose of Proposed Policy Change. It being concluded that the required safeguards, which the single denomination certificate (hereinafter called the "Single Certificate") must bear, are sufficient preventatives to discourage certificate duplication and alteration, the purpose of the proposed policy change is:

To permit issuance of the Single Certificate so that listed companies or their agents may utilize available technology to enjoy a speedier and more efficient transfer process and the concomitant cost savings inherent in such utilization and to afford the securities industry the residual benefits of a speedier transfer process.

4. Basis under the Act for Proposed Policy Change. (a) (i), (ii), (iii), (iv), (v), (B) and (D), (vi), (vii) and (viii) Not applicable.

(a)(v)(A) The Exchange's Committee on Securities adopted engraving requirements for stock and bond certificates on December 23, 1874 and, since

that time, the Exchange has steadfastly endeavored to assure that certificates of listed issues provide all reasonable safeguards against fraudulent acts. In fact, the Exchange requires engraving features for certificates of listed issues that are far more stringent than those of any other exchange or regulatory body.

The Exchange has required that listed companies issue certificates in "100 share" and odd-lot denominational form. In 1966, with the advent of Central Certificate Service, Inc. (predecessor of the Depository Trust Company), use of a "more than 100 share" certificate form was sanctioned.

The purpose of the Exchange's engraving and protective requirements are two-fold. In the first instance they are designed to prevent the fraudulent duplication or counterfeiting of security certificates. Secondly, they act as preventatives to the fraudulent alteration of validly issued certificates, i.e., they prevent the raising of the number of shares or principal amount of a certificate to a higher value.

The primary protective features against counterfeiting lie in the engraved borders, the engraved vignette and the engraved text appearing on the face of the certificate. Under the proposal, these features will not be changed. The primary protective features against fraudulent alteration lie in the use of "punch-panels" and maceration. The engraved corner pieces are also significant in the cases of the "less than 100 share" and "100 share" certificates. The "less than 100 share", or odd-lot, certificate might be raised, but there is an inherent limitation, i.e., 99 share maximum. The "100 share" certificate, by definition, is used for only that issuance. The "more than 100 share", or jumbo, certificate does not have an upper limit valuation. To the extent that the corner pieces are engraved they also function as a deterrent to counterfeiting.

The question at hand deals with fraudulent alteration rather than counterfeiting.

Under the proposal for the Single Certificate, without punch panel, the following protective features must be incorporated in lieu of the requirement for the "punch panel" or maceration:

• • • The share and number counters and the open throat area (used for stockholder addressing and indicating issuance of shares in numerical and alpha numerical form) must bear fine line intaglio engraving. (The fine line intaglio engraving is spaced so as to create clearly discernible parallel lines. If these parallel lines are erased or broken they are extremely obvious to the unaided eye and reconstruction is virtually impossible.)

• • • A penetrating ink ribbon must be used in addressing certificates and imprinting the number of shares in alpha and alpha numerical form. (The penetrating ink ribbon must have the capacity of actually penetrating the fabric of the certificate.)

• • • A matrix, as exemplified in "Text of Proposed Policy Change" above, must be printed in the open throat area of the

certificate, i.e., over the fine line intaglio printing. The matrix shows the share issuance, in numerical form, in five different positions.

• • • The number of shares, in alpha numerical form, must also be printed in the open throat area and over the fine line intaglio printing.

The engraved corner piece, setting a limiting value, is not required for the Single Certificate as any limiting value would have to be stated in significant numbers, and is therefore questionable that it could be considered a significant factor in terms of alteration. Additionally, a limiting value would, by definition, defeat the purpose for which the certificate was devised. Furthermore, since Rule 185 of the NYSE Constitution and Rules requires that stock certificates physically delivered in settlement of contracts must be "prepared in accordance with the engraving requirements of the Exchange", it would have been cumbersome to attempt to provide for all the variations that listed companies might opt for.

To the extent that additional engraving of fine line intaglio printing is incorporated, it acts as an offset to the elimination of the requirement for engraved corner pieces as those requirements relate to preventatives against counterfeiting.

It is acknowledged that the Single Certificate presents a greater potential for the forger than is now present in the conventional forms of NYSE approved stock certificates. That is, a Single Certificate issued for as little as one share is unlimited as to the value it might be raised to. Under present conditions the odd-lot certificate cannot be raised above 99 shares. While the present "more than 100 share" certificate may also be raised to an unlimited value, it does require a greater capital expenditure to acquire one—thus providing a built in economic deterrent. However, it is noted that the potential for raising presently approved certificates has always been present. Significantly, no situations have been reported to the Exchange of presently approved certificates having been successfully raised.

Being aware that a greater potential for raising the Single Certificate to an unlimited value would now be present, it was obvious that additional safeguards had to be devised and employed—despite the fact that there were no known cases of presently utilized certificates that have been altered. Therefore, the features of the Single Certificate were principally designed to thwart alteration. They are measurably more difficult to overcome than the features of the odd-lot and "more than 100 share" certificate. Specifically, the Single Certificate requires a minimum of seven alterations to printing in order to raise the value thereof, i.e., the number in the share counter, the five numerals of the matrix and the alpha numerical of shares in the open throat area—and each of those is printed over the fine line intaglio printing. The present odd-lot and "more than 100 share" certificates require only three

alterations, i.e., share counter, alpha numerical form and "punch-panel" (or maceration in the alternative for the "more than 100 share" certificate).

A further consequence of the overall complexity of design and substance of the Single Certificate is that it presents inconspicuous alteration. The matrix concept of imprinting multiple renditions of the value of the certificate adds greatly to the manual task of alteration. Further, the penetrating ink ribbon makes the removal of images quite difficult. Consequently, if an erasure is attempted, the paper and the fine line intaglio printing will be badly damaged in the appropriate areas before the images are completely removed. (It is of significant note that, upon completion of the intaglio engraving process such engraving becomes an effective part of the physical substance of the certificate. Moreover, there is no valid chemical means of replacing the intaglio lines which are produced.)

(a) (v) (C) As represented in the statement of "Purpose of Proposed Policy Change" above, permissive utilization of the Single Certificate, by listed companies or their agents, is directed towards fostering corporation between transfer agents and the Exchange as well as facilitating transactions in securities.

(a) (v) (E) The "security" features of the Single Certificate have been subjected to rigorous and extensive technical evaluation leading to the conclusion by the Exchange that the substance and design of the certificate is sufficiently complex and intricate. Moreover, it is deemed significant that this document has withstood the exposure of a 4-year pilot test without any of the participants experiencing incident of alteration.

Therefore, the Exchange concludes, that, in view of the positive pilot experience, the complexity of certificate design and an entirely favorable experience with the use of blank denomination bonds, a proper balance has been struck between the Exchange's regulatory objectives and the facilitation of commerce.

5. *Comments Received from Members, Participants or Others on Proposed Policy Changes.* The Exchange commissioned Arthur D. Little, Inc. (ADL) to make a study of a proposal of the American Bank Note Company regarding the security of the Single Certificate without "punch panel". ADL submitted its finding to the Exchange on December 15, 1972, recommending therein that a limiting value be placed on the Single Certificate to increase overall security.

The Bureau of Engraving and Printing of the Department of the Treasury reviewed the Single Certificate without "punch panel" endorsing the ADL recommendation.

1 Single Certificate with punch panel started in December 1971, and the Single Certificate without punch panel in April 1973. There are presently 88 corporations who have requested entry into the program, 85 opting for the Single Certificate without "punch panel" and 23 for the Single Certificate with "punch panel".

ommendation that some method be developed so that limiting values could be placed on the Single Certificate.

The Exchange, thereafter, commissioned ADL to make a further study of methods by which limiting values could be applied. This study concluded that no equipment is commercially available which can be directly attached to the line printers or other devices used in the transfer operation without interrupting the completely on-line procedure, and thereby affecting the speed and efficiency of the procedure.

The Exchange thereupon received comment from the following companies on the second ADL Report:

American Telephone and Telegraph Company  
British American Bank Note Company Limited  
Brunswick Corporation  
General Electric Company  
General Motors Corporation  
Northern Bank Note Company  
Santa Fe Industries, Inc.  
Singer Company (The)  
Texaco Inc.  
United States Banknote Corporation  
United States Steel Corporation

The overwhelming consensus of the participating companies represented in the above submissions was that the Single Certificate provided an adequate level of security protection without embracing the second ADL recommendation.

In May, 1975, the Exchange requested letters from the following organizations:

American Telephone and Telegraph Company  
Brunswick Corporation  
General Electric Company  
General Motors Corporation  
International Harvester Company  
Singer Company (The)

These letters attest affirmatively to the design and overall workability of the Single Certificate.

An inquiry has been received as to whether banks or brokers extending loans on the Single Certificate have incurred any problems. The Exchange has not been advised of any problems or reluctance by institutions in accepting the Single Certificate as collateral or for any other commercial use. It is noted that banks have been extending loans on blank denomination bonds and other forms of equity securities, both corporate and municipal, the certificates of which do not manifest "security" features with as high a degree of complexity in certificate design as the Single Certificate.

The Board of Directors of the Exchange has concluded, upon the weight of the record, that, while there would be merit in pursuing the additional protection recommended by ADL as a longer range objective, the Single Certificate be approved for listed companies desiring to utilize it without further delay.

6. *Burden on Competition.* None.

On or before June 28, 1976, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for

[License No. 09/12-0019]

# SIERRA CAPITAL CO. Surrender of License

Notice is hereby given that Sierra Capital Company, 4929 Wilshire Boulevard, Los Angeles, California 90010, has surrendered its License No. 09/12-0019, issued July 28, 1960.

Sierra Capital Company has complied with all conditions set forth by SBA for surrender of its license. Therefore, under the authority vested by the Small Business Investment Act of 1958, as amended, and pursuant to the regulations promulgated thereunder, the surrender of the license of Sierra Capital Company is accepted and it is no longer licensed to operate as a small business investment company, effective May 4, 1976.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: May 13, 1976.

## INTERSTATE COMMERCE COMMISSION

[Docket No. AB-37; Sub-No. 3]

OREGON-WASHINGTON RAILROAD AND  
NAVIGATION COMPANY AND UNION  
PACIFIC RAILROAD COMPANY ABANDONMENT PORTION PENDLETON  
BRANCH BETWEEN MCKAY AND ALTO,  
IN COLUMBIA COUNTY, WASHINGTON

### Notice of Findings

Notice is hereby given pursuant to Section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on April 9, 1976, a finding, which is administratively final, was made by the Commission, Commissioner Brown, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in Chicago, B. & Q. R. Co. Abandonment, 257 I.C.C. 700, the present and future public convenience and necessity permit abandonment by the Oregon-Washington Railroad and Navigation Company and abandonment of operation by the Union Pacific Railroad Company, over a portion of the Pendleton Branch of Oregon-Washington Railroad and Navigation Company, extending from railroad Milepost 78.832 near McKay, Washington, in a northerly direction to railroad Milepost 83.352 at Alto, Washington, a distance of 4.469 miles in Columbia County, Washington. A certificate of abandonment will be issued to the Oregon-Washington Railroad and Navigation Company and Union Pacific Railroad Company, based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment)

so finding or (ii) as to which the Exchange consents, the Commission will:

(A) by order approve such proposed policy change, or

(B) institute proceedings to determine whether the proposed policy change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before June 14, 1976.

For the Commission by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

May 14, 1976.

## SMALL BUSINESS ADMINISTRATION

[License No. 02/02-0311]

### RAND SBIC, INC.

Issuance of Small Business Investment  
Company License

On June 3, 1975, a Notice of Application for a license as a Small Business Investment Company was published in the FEDERAL REGISTER (40 FR 23945) stating that an Application had been filed with the Small Business Administration (SBA) pursuant to Section 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1975)) for a license as a small business investment company by Rand SBIC, Inc., 2110 Main Place, Buffalo, New York 14202.

Interested parties were given until the close of business June 18, 1975, to submit their comments to SBA. No comments were received.

Notice is hereby given that, pursuant to Section 301(c) of the Small Business Investment Act of 1958, as amended, after having considered the application and all other pertinent information and the facts with regard thereto, SBA on May 5, 1976, issued License No. 02/02-0311 to Rand SBIC, Inc., to operate as a Small Business Investment Company.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: May 10, 1976.

JAMES THOMAS PHELAN,  
Deputy Associate Administrator  
for Investment.

[FR Doc.76-15105 Filed 5-21-76; 8:45 am]

to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 F.R. 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

[Docket No. AB-37 Sub-No. 4]

# **OREGON-WASHINGTON RAILROAD AND NAVIGATION COMPANY AND UNION PACIFIC RAILROAD COMPANY ABANDONMENT PORTION OF DAYTON BRANCH BETWEEN DAYTON AND TURNER IN COLUMBIA COUNTY, WASHINGTON**

## **Notice of Findings**

Notice is hereby given pursuant to Section 1a(6) (a) of the Interstate Commerce Act (49 U.S.C. 1a(6) (a)) that by an order entered on April 13, 1976, a finding, which is administratively final, was made by the Commission, Commissioner Brown, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Chicago, B. & O. R. Co., Abandonment*, 257 I.C.C. 700, the present and future public convenience and necessity permit abandonment by the Oregon-Washington Railroad and Navigation Company and abandonment of operation by the Union Pacific Railroad Company, over a portion of the Dayton Branch of Oregon-Washington Railroad and Navigation Company, extending from railroad Milepost 14.16 near Dayton, Washington,

in a northeasterly direction to railroad Milepost 25.18 at Turner, Washington, a distance of 11.02 miles in Columbia County, Washington. A certificate of abandonment will be issued to the Oregon-Washington Railroad and Navigation Company and Union Pacific Railroad Company, based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued opera-

tion of rail service over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 F.R. 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

By the Commission.

[Notice No. 253]

## **MOTOR CARRIER BOARD TRANSFER PROCEEDINGS**

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 208(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission within 30-days after the date

of this publication. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopsis form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC-FC-76563, filed May 14, 1976. Transferee: GEORGE & SONS MOVERS, INC., 37-41 Hawthorne Street, Chelsea, Massachusetts 02150. Transferor: CHARLOTTE M. RODERICK, doing business as A. G. RODERICK TAXI & TRUCKING, 7 West Circle, Salem, Massachusetts 01970. Applicants' attorney: STEVEN D. GOPIN, Esq., 186-A Broadway, Chelsea, Massachusetts 02150. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-94224, issued May 3, 1972, as follows: *Household goods* as defined by the Commission, between Salem, Mass., on the one hand, and, on the other, points in Maine, New Hampshire, Vermont, Connecticut, Rhode Island, and New York. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC-FC-76583, filed May 10, 1976. Transferee: ROCKLIN TRUCKING COMPANY, INC., 209 North 8th St., Brooklyn, N.Y. 11211. Transferor: DANIEL ROCKLIN, doing business as ROCKLIN TRUCKING COMPANY, 209 North 8th St., Brooklyn, N.Y. 11211. Applicant's representative: IRVING KLEIN, Attorney-at-Law, 371 Seventh Ave., New York, N.Y. 10001. Authority sought for purchase by transferee of the operating

rights of transferor as set forth in Permit No. MC-127133 (Sub-No. 2), issued May 2, 1966, as follows: *Paper-backed books, periodicals, and magazines*, from Pine Brook, N.J., to points in the New York, N.Y., Commercial Zone, as defined by the Commission, restricted to shipments to retail outlets; and returned, unsold issues, from points in the New York, N.Y., Commercial Zone, as defined by the Commission, to Pine Brook, N.J., limited to a transportation service to be performed under a continuing contract, or contracts, with Dell Distributing Co., Inc., of Pine Brook, N.J. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

[SEAL] ROBERT L. OSWALD,  
Secretary.

## **FOURTH SECTION APPLICATIONS FOR RELIEF**

May 19, 1976.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43165—*Acetic Acid, Acetic Anhydride and Formic Acid from Points in Texas*. Filed by Southwestern Freight Bureau, Agent, (No. B-606), for interested rail carriers. Rates on acetic acid, acetic anhydride, and formic acid, in tank-car loads, as described in the application, from specified points in Texas, to East St. Louis, Illinois and St. Louis, Missouri.

Grounds for relief—Market competition.

Tariff—Supplement 185 to Southwestern Freight Bureau, Agent, tariff 354-C, I.C.C. No. 5084. Rates are published to become effective on June 16, 1976.

FSA No. 43166—*Joint Rail-Water Container Rates—United States Lines, Inc.*

Filed by United States Lines, Inc., (No. 12), for itself and interested rail carriers. Rates on general commodities, from rail carrier's terminals at United States Atlantic and Seaport cities, to ports in the Far East, Saudi Arabia and Iran.

Grounds for relief—Water competition.

Tariffs—United States Lines, Inc., tariffs Nos. 23 and 24, I.C.C. Nos. 23 and 24, F.M.C. Nos. 88 and 89, respectively. Rates are published to become effective on June 17, 1976, and later.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

[FR Doc. 76-15132 Filed 5-21-76; 8:45 am]

[Notice No. 54]

## **ASSIGNMENT OF HEARINGS**

May 19, 1976.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC-F 12675, O.N.C. Freight Systems—Control—Rocor Truck Lines; and Rocor International—Control—Altruk Freight Systems, Tractor Inc.; and American Cartage now assigned June 8, 1976 at the Offices of the Interstate Commerce Commission in Washington, D.C. is being postponed to August 8, 1976 at the Offices of the Interstate Commerce Commission in Washington, D.C.

MC 83539 (Sub 421), C & H Transportation Co. Inc. now assigned June 7, 1976 (1 day) at Los Angeles, California is now being cancelled, application dismissed.

MC 113495 Sub 77, Gregory Heavy Haulers, Inc., now being assigned July 7, 1976, at the Offices of the Interstate Commerce Commission, Washington, D.C.

[SEAL] ROBERT L. OSWALD,  
Secretary.

UMI

V

## ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 86]

[FRL 528-8]

## CONTROL OF AIR POLLUTION FROM NEW MOTOR VEHICLES AND NEW MOTOR VEHICLE ENGINES: CERTIFICATION AND TEST PROCEDURES

## Revised Heavy Duty Engine Regulations for 1979 and Later Model Years

The Environmental Protection Agency (EPA) is considering amendments to Subparts A and I of Part 86 of Title 40 of the Code of Federal Regulations. In addition, a new Subpart D combining previous Subparts H and J has been developed. These amendments set new standards for heavy duty gasoline-fueled and Diesel engines, revise the section numbering to reflect applicability to the 1979 and later model years, and also revise parts of the current test procedures.

In spite of the gains made in control of air pollution there are many air quality control regions which will not be able to meet ambient air quality standards. Motor vehicles contribute a large percentage of the total hydrocarbons, carbon monoxide and oxides of nitrogen contaminants. As standards on light duty vehicles and light duty trucks are made more stringent, a larger portion of these pollutants will come from heavy duty vehicles.

Standards are proposed beginning with the 1979 model year for both gasoline-fueled and Diesel heavy duty engines of 1.5 gms/BHP-hr. hydrocarbon (HC), 25 gms/BHP-hr. carbon monoxide (CO), and 10 gms/BHP-hr. hydrocarbon plus oxides of nitrogen (HC+NOx). Current standards are 16 gms/BHP-hr. HC+NOx and 40 gms/BHP-hr. CO without a separate HC requirement. Additionally, a Diesel engine peak smoke opacity standard of 35 percent instead of the present 50 percent standard is proposed to prevent degradation in on the road smoke levels as a result of changes in gaseous emissions standards. Nearly all currently certified engine families have demonstrated smoke levels at or below 35 percent peak opacity. Acceleration and lugging mode Diesel smoke standards of 20 and 15 percent are unchanged by the proposal.

Test procedure revisions include the substitution of more accurate instrumentation for measurement of gasoline-fueled engine HC and both gasoline-fueled and Diesel NOx measurements; the addition of specific calibrations and maintenance procedures; and minor revisions to the test cycles.

This action is forecast to result in a reduction in 1990 nationwide emissions of 0.6 to 0.7 million tons HC, up to 1.8 million tons CO, and 0.4 to 1.0 million tons of NOx. These reductions correspond to urban air quality improvements of 1 to 4 percent for oxidants, 1 percent for carbon monoxide and 1 to 4 percent for nitrogen dioxide.

The retail price for heavy duty trucks is expected to increase approximately

\$110 for gasoline-fuel vehicles and 120 for Diesel vehicles. The aggregate five year cost of the proposal is forecast to be \$378 million.

An evaporative HC standard is not a part of the proposed regulations. This is because an adequate test procedure, such as the enclosure (SHED) method, has not been fully developed for application to heavy duty vehicles. Further, a comprehensive compliance assurance mechanism to deal with vehicles rather than engines alone has not been established.

EPA believes that the proposed emission levels are achievable with current, production proven technology. A lead time of one year should be sufficient to incorporate this technology into production engines. Further, it is expected that engines meeting the proposed standards need not suffer any loss in fuel economy if already demonstrated fuel efficient technology is employed. The standards proposed were selected because they represent a significant and cost effective reduction in emission levels, especially HC, obtainable in the short term without use of catalyst or costly and unproven technology.

A separate HC standard is included in the proposed regulations. Test measurements of HC correspond well with actual on the road emissions, and an individual standard plus a combined HC and NOx standard will give incentive for HC control. This necessary control will be effective in reducing atmospheric oxidant levels.

Certain modifications to certification practices are proposed. The requirement that the Administrator specify the engine displacement with the highest projected sales within a control system for durability testing has been eliminated. This provision unnecessarily limited the Administrator's ability to require a showing that a particular displacement could meet the requirements of the regulations.

Maintenance provisions for gasoline-fueled and Diesel engines have been modified to include EGR systems and catalytic converters. Essentially, light duty vehicle regulations on these topics have been modified to apply to heavy duty engines. Neither the use of EGR systems or catalytic converters are considered necessary to meet the proposed standards. However, if used, warning devices to alert the engine operator to the need for EGR or catalyst maintenance are required, and the conditions under which maintenance may be performed are specified.

The "zero hour" emission test is no longer required nor allowed. Manufacturers will continue to be required to supply information on components used on certification engines prior to service accumulation in order to assure that these engines are representative of engines intended for production.

Specifications for service accumulation gasoline have been modified to more accurately reflect commercially available fuel. The minimum lead and phosphorus content requirements for unleaded fuel have been deleted. Sensitivity (research minus motor octane) must be at least 8

octane numbers. Some of these changes were previously made in the light duty vehicle regulations. EPA believes that the same fuel specifications should apply to heavy duty engines, with the one exception that Reid vapor pressure corresponding to seasonal fuel changes will not be required since heavy duty engine testing is normally performed under controlled ambient conditions.

Several changes have been made to the test cycle for gasoline-fueled engines. A change to engine torque to define the various operating modes (instead of engine manifold vacuum) for the 9-mode test is most significant. This was necessary to accommodate supercharged engines which do not operate under vacuum conditions in all modes. Also, engines utilizing EGR have widely varying vacuums for a given power setting. Data from 19 representative engines were statistically analyzed in arriving at equivalent percent torque set points corresponding to the current manifold vacuum set points. Values of 10, 25, 55, and 90% of maximum observed torque were derived to replace the manifold vacuum levels of 19, 16, 10, and 3 inches of mercury. The test cycle as modified closely corresponds to the existing 9-mode cycles. Only the definition of the operating points has been changed.

Although the emission test has been defined in terms of torque, service accumulation can be carried out under manifold vacuum, manifold pressure or torque control. The manufacturer will be required to select a method and then notify EPA. This option was included to allow flexibility in instrumentation and control systems.

Two other related changes in the 9-mode test procedures have been made. First, time in mode has been increased to a uniform 60 seconds for each mode. Second, the number of cycles per test has been reduced from four to two. As a consequence, the overall test is approximately the same length. Any loss in test repeatability from fewer cycles is compensated by increased measurement time available during each cycle. These changes were made to give the test operator time to determine proper instrument ranges and to take all required readings. Even though mode times are changed, the prior weighting factors are retained. EPA testing indicates that these revisions do not significantly affect average test results.

Several significant changes for both gasoline-fueled and Diesel engine sampling and analytical systems have been proposed. Hydrocarbons (HC) will be measured by a heated flame ionization detector (HFID) replacing the present non-dispersive infrared (NDIR) analyzer used in testing gasoline-fueled engines. The Diesel test procedure already uses an HFID. The FID is more accurate and stable, and has a linear response. The requirement for a heated instrument will eliminate water condensation and exhaust sample condensation (hang-up) difficulties. Because HFIDs are more sensitive than

current analyzers, the proposed standards have been adjusted to reflect the change in instrumentation. In addition, a carbon dioxide measurement by NDIR is now required for Diesel engines to provide a basis for calculating and comparing air fuel ratio to measured values. Carbon dioxide data are also used in calculating the total mass of exhaust.

Oxides of nitrogen will be measured by a CL analyzer instead of the current NDIR instruments. The CL analyzer, when coupled with a reducing converter, will measure total oxides of nitrogen (NO + NO<sub>2</sub>) and not just nitric oxide (NO) as is the case with the current NDIR analyzers. Since more than one compound is to be measured, it would appear that any total nitrogen oxides instrument would give higher concentrations than an instrument that only measures NO. However, since the CL analyzer is not subject to interference from water vapor and carbon dioxide it may give a slightly lower, but more accurate, total reading than the current NDIR instrument.

Coincidental with the change in analyzers the exhaust sample conditioning and transport system has been modified. These revisions in line length, transit time, arrangements, heating requirements, etc. are necessary to insure sample integrity and accurate results. Calibration procedures and instrument checks have been revised accordingly. Variations in either the instruments or analytical system are permissible. However, prior EPA approval based on proven equivalency is necessary before a modified system can be used.

Test data requirements have been expanded. Fuel temperature, humidity, air temperature, and fuel hydrogen to carbon ratio must now be supplied. These data are needed to calculate a correction factor to account for water vapor in the HFID sample. Currently, engine air flow is measured for diesel engines and not for gasoline-fueled engines. The air flow measurement of gasoline-fueled engines is now being proposed. This will provide a basis for calculating the wet to dry sample correction factor (Kw) and will also be used in computing a measured air fuel ratio to be compared to the air fuel ratio calculated from the exhaust gas constituents. This will serve as the only overall system quality control check. Measured and calculated values must agree within 10% for a valid test.

EPA recognizes that this requirement is an additional burden for the gasoline-fueled engine manufacturers and testing laboratories. However, the confidence in test accuracy which a system quality control mechanism provides is an overriding consideration.

There may, of course, be other methods of accomplishing the quality control objectives such as use of a tracer gas. However, EPA has no experimental experience with such a method as applied to heavy duty engines. EPA invites the submission of data on alternative quality control mechanisms as well as on the use

of measured and calculated air flow for this purpose. If a less complicated, but equally comprehensive total system check is available, EPA will consider it as an alternative to, or replacement for, the air flow measurement requirement in final rulemaking.

Preconditioning for gasoline-fueled engine tests now begins with an engine that is warmed up at progressively higher loads until maximum torque is determined. As in current practice, the engine must be allowed to stand for one to two hours at 25±5°C prior to the actual test. Each test consists of a 5 minute idle followed by two 9-mode cycles. Each mode is one minute long and exhaust gases are evaluated over the last 10 seconds (50 seconds for the closed throttle). Only one significant change has been made in the Diesel 13-mode test cycle. The time in mode has been reduced from 10 minutes per mode to 5 minutes per mode to significantly reduce the time required to complete an entire test. Manufacturers are invited to supply data on the effect of reduced mode time on emission levels, if any, and to comment on any resource savings which may result.

Emission level calculations for CO, CO<sub>2</sub>, and NOx are made on a dry basis (i.e., with water vapor removed); a correction is applied to the wet HC measurements. Chart reading requirements have been clarified and computers or other devices may be substituted for manual monitoring if they meet the requirements of the pertinent subpart.

All Diesel engine test procedures are now contained in the proposed regulations. References to Society of Automotive Engineers practices have been eliminated and the required procedure is now fully stated in the regulations.

Diesel fuel specifications for service accumulation have been revised. The revised fuel specification should make service accumulation fuel easier to obtain and should also better reflect the composition of commercially available fuel.

It is unlikely that carry-over emission data will be allowed for certification because of the standards changes coupled with extensive revisions to the analytical measurement system which now measures total NOx. Only nitrous oxide (NO) was measured previously.

In summary, the proposed regulations make more stringent the emission standards applicable to 1979 and later model year heavy duty engines. EPA believes that these standards are feasible, will result in no fuel penalty, and can be met without the use of catalysts. Without more stringent controls on all motor vehicles many Air Quality Control Regions will be unable to meet ambient air quality standards. Along with new standards, improvements in test procedures and equipment are also proposed.

Recently EPA has received information that suggests that some manufacturers may be contemplating the development of Diesel engines for use in vehicles that fall into the lower part of the weight range of vehicles classified as heavy duty,

which vehicles are currently almost exclusively powered by gasoline engines. EPA is concerned about the appropriate testing of such engines because the current heavy duty Diesel durability test schedule, which is much more severe than the heavy duty gasoline test schedule, may hinder the introduction of lighter duty Diesel engines for applications in lighter trucks currently powered by gasoline engines. EPA hereby requests comments and suggestions on a means of defining this emerging new class of engines, as well as on a test protocol appropriate for the testing of these engines.

Relevant comments, views, suggestions and data from any individual or group on pertinent topics will be considered in drafting final regulations.

40 CFR, Part 86, as amended would become effective 30 days after publication and would be applicable to 1979 and subsequent model year heavy duty engines. The current regulations which appear in 40 CFR, Part 85 and Part 86 would remain in effect for 1974 through 1978 model year engines.

Interested persons may submit written data, views, or arguments (in quadruplicate) to the Administrator, Environmental Protection Agency, Attention: Office of Mobile Source Air Pollution Control (AW-455), 401 M Street, S.W., Washington, D.C. 20460. All relevant material received not later than August 23, 1976 will be considered. Comments submitted shall be available for public inspection during normal business hours at the Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 4th and M Streets, S.W., Washington, D.C. 20460.

A Document entitled "An Examination of Interim Emission Control Strategies for Heavy Duty Vehicles" which describes the need for additional control and the technical development of proposed standards is available from the Director, Emission Control Technology Division, 2565 Plymouth Road, Ann Arbor, Michigan 48105.

Single copies of the Draft Environmental Impact Statement for this regulation are available upon request from the Public Information Center (PM-215), U.S. Environmental Protection Agency, Washington, D.C. 20460. The Draft Environmental Impact Statement discusses the environmental and economic impacts of the proposed regulation.

This notice of proposed rulemaking is issued under the authority of sections 202, 206, 207, 208 and 301(a) of the Clean Air Act, as amended (42 U.S.C. 1857f-1, 1857f-5, 1857f-5a, 1857f-6 and 1857g(a)).

It is hereby certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with Executive Order 11821.

Dated: May 7, 1976.

JOHN QUARLES,  
Acting Administrator.

It is proposed to amend 40 CFR Part 86 as follows:

1. A new section 86.079-2 is added and reads as follows:

§ 86.079-2 Definitions.

The following definitions apply beginning with the 1979 model year. Other portions of § 86.077-2 remain effective.

"Gross vehicle weight rating" (GVWR) means the value specified by the manufacturer as the maximum design loaded weight of a single vehicle.

"Hang-up" means any hydrocarbon molecules that are absorbed, adsorbed, condensed, or by any other method removed from the sample flow prior to reaching the instrument detector.

"Intermediate speed" means peak torque speed if peak torque speed occurs between 60 and 75 percent of rated speed.

If the peak torque speed is outside of these specifications, intermediate speed is defined as 60 percent of rated speed.

"Turn down ratio" means the ratio of the minimum detectable quantity to the maximum detectable quantity.

2. A new section 86.079-10 is added and reads as follows:

§ 86.079-10 Emission standards for 1979 gasoline-fueled heavy duty engines.

(a) (1) Exhaust emissions from new 1979 and later model year gasoline-fueled heavy duty engines shall not exceed:

(i) *Hydrocarbons*, 1.5 grams per brake horsepower hour.

(ii) *Carbon monoxide*, 25 grams per brake horsepower hour.

(iii) *Hydrocarbons plus oxides of nitrogen*, 10 grams per brake horsepower hour.

(2) The standards set forth in paragraph (a) (1) of this section refer to a composite sample representing the operating cycle set forth in subpart D and measured in accordance with those procedures.

(b) (Reserved)

(c) (See paragraph (c) of § 86.077-10).

(d) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a) (1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in subpart D to ascertain that such test engines meet the requirements of paragraphs (a) and (c) of this section.

3. A new section 86.079-11 is added and reads as follows:

§ 86.079-11 Emission standards for 1979 Diesel heavy duty engines.

(a) (1) The opacity of smoke emissions from new 1979 and later model year Diesel heavy duty engines shall not exceed:

(i) 20 percent during the engine acceleration mode.

(ii) 15 percent during the engine lugging mode.

(iii) 35 percent during the peaks in either mode.

(2) The standards set forth in paragraph (a) (1) of this section refer to ex-

haust smoke emissions generated under the conditions set forth in Subpart I and measured and calculated in accordance with those procedures.

(b) (1) Exhaust gaseous emissions from new 1979 and later model year Diesel heavy duty engines shall not exceed:

(i) *Hydrocarbons*, 1.5 grams per brake horsepower hour.

(ii) *Carbon monoxide*, 25 grams per brake horsepower hour.

(iii) *Hydrocarbons plus oxides of nitrogen*, 10 grams per brake horsepower hour.

(2) The standards set forth in paragraph (b) (1) of this section refer to exhaust gaseous emissions generated under the conditions set forth in subpart D and measured and calculated in accordance with those procedures.

(c) through (d) (See paragraphs (c) through (d) of § 86.077-11).

(e) Every manufacturer of new motor vehicle engines subject to the standards prescribed in this subpart shall, prior to taking any of the actions specified in section 203(a) (1) of the Act, test or cause to be tested motor vehicle engines in accordance with test procedures prescribed in subparts D and I to ascertain that such test engines meet the requirements of paragraphs (a) and (b) of this section.

4. A new section 86.079-23 is added and reads as follows:

§ 86.079-23 Required data.

The manufacturer shall perform the tests required by the applicable test procedures, and submit to the Administrator the following information:

(a) Durability data on such vehicles (or engines) tested in accordance with the applicable test procedures and in such numbers as specified, which will show the performance of the systems installed on or incorporated in the vehicle (or engine) for extended mileage (or extended operation), as well as a record of all pertinent maintenance (all maintenance and servicing for heavy duty engines) performed on the test vehicles (or test engines). Maintenance and servicing of heavy duty engines performed prior to the zero hour point need not be submitted.

(b) through (b) (1) (ii) (See paragraphs (b) through (b) (1) (ii) of § 86.077-23).

(2) Certification engines. Emission data on such engines tested in accordance with applicable emission test procedures and in such numbers as specified, which will show their emissions after 125 hours of operation.

(c) (1) (See paragraph (c) (1) of § 86.077-23).

(2) For heavy duty engines, a statement that engines for which certification is requested conform to the requirements in § 86.077-5(b) and that the descriptions of tests performed to ascertain compliance with the general standards in § 86.077-5(b) and the data derived from such tests are available to the Administrator upon request.

(d) (1) For light duty vehicles and light duty trucks, a statement that the

test vehicles with respect to which data are submitted have been tested in accordance with the applicable test procedures, that they meet the requirements of such tests, and that, on the basis of such tests, they conform to the requirements of the regulations in this part. If such statements cannot be made with respect to any vehicle tested, the vehicle shall be identified, and all pertinent test data relating thereto shall be supplied.

(2) For heavy duty engines, a statement that the test engines with respect to which data are submitted to demonstrate compliance with § 86.077-11 are in all material respects as described in the manufacturer's application for certification, have been tested in accordance with the applicable test procedures utilizing the fuels and equipment described in the application for certification, and that on the basis of such tests the engines conform to the requirements of the regulations in this part. If such statements cannot be made with respect to any engine tested, the engine shall be identified, and all pertinent data relating thereto shall be supplied to the Administrator. If, on the basis of the data supplied and any additional data as required by the Administrator, the Administrator determines that the test engine was not as described in the application for certification or was not tested in accordance with applicable test procedures utilizing the fuels and equipment as described in the application for certification, the Administrator may make the determination that the engine does not meet the applicable standards. The provisions of § 86.077-30(b) shall then be followed.

5. A new section 86.079-24 is added and reads as follows:

§ 86.079-24 Test vehicles and engines.

(a) (1) through (a) (2) (iv) (See paragraphs (a) (1) through (a) (2) (iv) of § 86.077-24).

(v) The location of intake and exhaust valves (or ports) and the valve (or port) sizes (within a 1/8-inch range on the valve head diameter).

(a) (2) (vi) and (vii) (See paragraphs (a) (2) (vi) and (vii) of § 86.077-24).

(viii) Catalytic converter characteristics.

(ix) Thermal reactor characteristics.

(x) Air inlet cooling characteristics, (e.g., inter-coolers and after-coolers) for Diesel heavy duty engines.

(a) (3) through (g) (4) (See paragraphs (a) (3) through (g) (4) of § 86.077-24).

6. A new section 86.079-25 is added and reads as follows:

§ 86.079-25 Maintenance.

(a) and (b) (See paragraphs (a) and (b) of § 86.077-25).

(c) (1) *Heavy duty engines*. Paragraph (c) of this section applies to heavy duty engines.

(2) (i) The scheduled maintenance described in this section may be performed on a durability engine provided the maintenance is requested in the application for certification and is specified

at the same intervals in the maintenance instructions which will be furnished to the ultimate purchaser of the vehicle in which the engine, which is represented by the test engine, is installed. (For equivalent dynamometer hours, engine hours, and mileage intervals, see § 86.077-2.) A scheduled major engine servicing shall be restricted to items listed in this subparagraph and shall be conducted in a manner consistent with service instructions and specifications provided by the manufacturer for use by the customer service personnel.

(A) For gasoline-fueled engines, major engine tuneups to manufacturer's specifications may be performed no more frequently than every 375 hours of scheduled dynamometer operation, provided no tuneups are performed after 1375 hours of scheduled dynamometer operation. The following items may be inspected, replaced, cleaned, adjusted and/or serviced as required:

(1) Ignition system.

(2) Cold starting enrichment system (includes fast idle speed setting).

(3) Curb idle speed and air/fuel mixture.

(4) Drive belt tension on engine accessories.

(5) Valve lash.

(6) Inlet air and exhaust gas control valves.

(7) Engine bolt torque.

(8) Spark plugs.

(9) Fuel filter and air filter.

(10) Crankcase emission control system.

(11) Fuel evaporative emission control system.

(B) For Diesel engines one major engine servicing to the manufacturer's specifications may be performed prior to 875 hours ( $\pm 8$  hours) of scheduled dynamometer operation. The following items may be inspected, replaced, cleaned, adjusted, and/or serviced as required:

(1) Low idle speed.

(2) Drive belt tension.

(3) Engine bolt torque.

(4) Valve lash.

(5) Injection timing.

(6) Injector assemblies.

(7) Governor settings.

(C) Normal engine servicing such as engine oil change, and oil filter, fuel filter, and air filter cleaning or replacement will be allowed at manufacturer's recommended intervals. If approved in advance by the Administrator, the maintenance for these items may differ from that specified in the manufacturer's maintenance instructions.

(D) Readjustment of the engine low idle speed may be performed once during the first 125-hours of engine operation.

(ii) Unscheduled maintenance may be performed on durability engines, except as provided in paragraph (c) (2) (v) (A) of this section, only under the following provisions:

(A) An injector or spark plug may be changed if a persistent misfire is detected.

(B) Readjustment of a gasoline-fueled engine cold starting enrichment system

may be performed if there is a problem of stalling or if there is visible black smoke.

(C) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to that performed as scheduled maintenance under subparagraph (c) (2) (i) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(D) The idle mixture may be reset, other than during scheduled major engine tuneups, only with the advance approval of the Administrator.

(iii) Any exhaust gas recirculation (EGR) system may be serviced during durability testing only under one of the following provisions:

(A) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneup if an audible and/or visual signal approved by the Administrator alerts the engine operator to the need for EGR system maintenance at the service point. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction does not render the test engine unrepresentative of engines in use.

(B) Manufacturers may service the EGR system as unscheduled maintenance a maximum of one time during durability testing (1500 hours for gasoline-fueled engines or 1000 hours for Diesel engines) if failure of the EGR system activates an audible and/or visual signal approved by the Administrator which alerts the engine operator to the need for EGR system maintenance. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction does not render the test engine unrepresentative of engines in use.

(C) Manufacturers may service the EGR system as unscheduled maintenance a maximum of three times during durability testing (1500 hours for gasoline-fueled engines or 1000 hours for Diesel engines) either at a scheduled major engine tuneup point or as unscheduled maintenance, if an audible and/or visual signal approved by the Administrator alerts the engine operator to the need for EGR system maintenance. The signal may be activated either by EGR system/failure (unscheduled maintenance) or need for scheduled periodic maintenance. If maintenance is performed, the signal for scheduled periodic maintenance shall be reset. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction does not render the test engine unrepresentative of engines in use.

(D) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneup(s) if failure to perform EGR system maintenance is not likely, as determined by the Administrator, to result in an improvement in engine performance. One additional servicing, may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test engine unrepresentative of engines in use.

(iv) The catalytic converter may be serviced once during durability testing (1500 hours for gasoline-fueled engines or 1000 hours for Diesel engines) if an audible and/or visual signal approved by the Administrator alerts the engine operator to the need for maintenance. The signal may be activated either by component failure or need for maintenance at a scheduled point.

(v) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

may be performed if there is a problem of stalling or if there is visible black smoke.

(C) Readjustment of the engine idle speed (curb idle and fast idle) may be performed, in addition to that performed as scheduled maintenance under subparagraph (c) (2) (i) of this section, if the idle speed exceeds the manufacturer's recommended idle speed by 300 r.p.m. or more, or if there is a problem of stalling.

(D) The idle mixture may be reset, other than during scheduled major engine tuneups, only with the advance approval of the Administrator.

(iii) Any exhaust gas recirculation (EGR) system may be serviced during durability testing only under one of the following provisions:

(A) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneup if an audible and/or visual signal approved by the Administrator alerts the engine operator to the need for EGR system maintenance at the service point. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test engine unrepresentative of engines in use.

(B) Manufacturers may service the EGR system as unscheduled maintenance a maximum of one time during durability testing (1500 hours for gasoline-fueled engines or 1000 hours for Diesel engines) if failure of the EGR system activates an audible and/or visual signal approved by the Administrator which alerts the engine operator to the need for EGR system maintenance. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction does not render the test engine unrepresentative of engines in use.

(C) Manufacturers may service the EGR system as unscheduled maintenance a maximum of three times during durability testing (1500 hours for gasoline-fueled engines or 1000 hours for Diesel engines) either at a scheduled major engine tuneup point or as unscheduled maintenance, if an audible and/or visual signal approved by the Administrator alerts the engine operator to the need for EGR system maintenance. The signal may be activated either by EGR system/failure (unscheduled maintenance) or need for scheduled periodic maintenance. If maintenance is performed, the signal for scheduled periodic maintenance shall be reset. One additional servicing may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction does not render the test engine unrepresentative of engines in use.

(D) Manufacturers may schedule service to the EGR system at the scheduled major engine tuneup(s) if failure to perform EGR system maintenance is not likely, as determined by the Administrator, to result in an improvement in engine performance. One additional servicing, may also be performed as unscheduled maintenance if there is an overt indication of malfunction and if the malfunction or repair of the malfunction does not render the test engine unrepresentative of engines in use.

(iv) The catalytic converter may be serviced once during durability testing (1500 hours for gasoline-fueled engines or 1000 hours for Diesel engines) if an audible and/or visual signal approved by the Administrator alerts the engine operator to the need for maintenance. The signal may be activated either by component failure or need for maintenance at a scheduled point.

(v) Any other engine, emission control system, or fuel system adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(A) In the case of unscheduled maintenance such approval will be given if the Administrator:

(1) Has made a preliminary determination that part failure or system malfunction, or the repair of such failure or malfunction, does not render the engine unrepresentative of engines in use, and does not require direct access to the combustion chamber, except for fuel injection component, or removable prechamber removal or replacement; and

(2) Has made a determination that the need for maintenance or repairs is indicated by an overt indication of malfunction such as persistent misfire, engine stall, overheating, fluid leakage, loss of oil pressure, excessive fuel consumption or excessive power loss.

(B) Emission measurements may not be used as a means of determining the need for unscheduled maintenance under subparagraph (c) (2) (v) (A) (1).

(C) Requests for authorization of scheduled maintenance of emission control related components not specifically authorized to be maintained by these regulations must be made prior to the beginning of durability testing. The Administrator will approve the performance of such maintenance if the manufacturer makes a satisfactory showing that the maintenance will be performed on engines in use.

(vi) If the Administrator determines that part failure or system malfunction occurrence and/or repair rendered the engine unrepresentative of engines in use, the engine shall not be used as a durability engine.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

(3) (i) Scheduled maintenance on emission data engines is limited to the adjustment of idle speed once before the 125-hour test point, provided the idle speed is outside the manufacturer's specifications.

(ii) Any other engine, emission control system, or fuel system, adjustment, repair, removal, disassembly, cleaning, servicing, or replacement shall be performed only with the advance approval of the Administrator.

## PROPOSED RULES

- (4) (Reserved)
- (5) (i) Complete emission tests (see subpart D for gasoline-fueled engines and subparts D and I for Diesel engines) are required, unless waived by the Administrator, before and after:
- (A) Scheduled maintenance approved for durability engines.
- (B) Unscheduled maintenance which may reasonably be expected to affect emissions.
- (ii) The tests before and after scheduled maintenance, which are performed on durability engines prior to 117 hours, are waived. The test before scheduled maintenance, which is performed on durability engines after 117 hours and prior to 133 hours, is waived. The after maintenance test must be run and the results used in the deterioration factor calculation in accordance with § 86.079-28.
- (iii) The idle speed reset and any scheduled maintenance on the emission-data engine shall be performed prior to the 125 hour test. The before-maintenance and after-maintenance tests associated with idle speed reset and scheduled maintenance on the emission-data engine are waived.
- (iv) Test data required by this paragraph shall be air posted to the Administrator within 72 hours of test completion (or delivered within 5 working days), along with a complete record of all pertinent maintenance.
- (v) When unscheduled maintenance is approved, a preliminary engineering report, unless waived by the Administrator, shall be supplied within three working days. A final engineering report shall be delivered within ten working days after the completion of the emission tests. The Administrator may approve an extension of the time requirements for the final engineering report.
- (vi) All test data, maintenance reports, and required engineering reports shall be compiled and provided to the Administrator in accordance with § 86.079-23.
- (6) The Administrator shall be given the opportunity to verify the existence of an overt indication of part failure and/or engine malfunction (e.g., misfire, stall).
- (7) Equipment, instruments, or tools may not be used to identify malfunctioning, maladjusted, or defective engine components unless the same or equivalent equipment, instruments, or tools will be available to dealerships and other service outlets and
- (i) Are used in conjunction with scheduled maintenance on such components,
- (ii) Are used subsequent to the identification of an engine failure or malfunction, as provided in subparagraph (c) (2) (v) (A) of this section for durability engines or paragraph (c) (3) of this section for emission data engines, or
- (iii) Unless specifically authorized by the Administrator.
7. A new section 86.079-26 is added and reads as follows:

## § 86.079-26 Mileage and service accumulation: emissions measurements.

- (a) [See paragraph (a) of § 86.077-26]
- (b) (1) Paragraph (b) of this section applies to heavy duty engines.
- (2) (i) For gasoline-fueled engines, the dynamometer service accumulation schedule will consist of several operating conditions which give the percent loads and the modes as specified in the following chart. The percentage of times in each mode must be held within the limits specified. The maximum observed torque for each mode in the service accumulation cycle, must be determined at the rpm at which the mode is being conducted. The percent load for that mode will be determined from the maximum torque at the rpm the mode is being conducted.

Mode	Observed torque (percent of maximum observed)	Percentage of time
Idle	Idle	33 (22-41)
Closed throttle (CT)	CT	31 (30-32)
Part throttle deceleration (PTD)	10	15 (14-16)
Cruise	25	6 (5-7)
Part throttle acceleration (PTA)	35	11 (10-12)
Full load (FL)	90	14 (13-15)

- (ii) The equivalent control parameter for engine loading will be manifold vacuum, manifold pressure, or torque. Usage of one of the three parameters will require approval in advance by the Administrator. The control parameter values that correspond to the appropriate percent loads as specified in the emission test cycle will be initially determined at the zero-hour point or after an appropriate break-in procedure. The control parameter values determined initially will be used for the entire service accumulation schedule. If at any time during the service accumulation, the 90% torque value cannot be attained, the engine shall be operated at wide open throttle.
- (iii) The average speed shall be between 1,650 and 1,700 rpm. Subject to the requirements as to average speed, there must be operation at speeds in excess of 3,200 rpm (but not in excess of governed speed for governed engines or rated speed for non-governed engines) for a cumulative maximum of 0.5 percent of the actual cycle time, excluding time in transient conditions. Maximum cycle time shall be 15 minutes. A cycle approved in advance by the Administrator shall be used.
- (3) (i) For Diesel engines, the following criteria must be met before service accumulation can begin. Failure to comply with these requirements shall invalidate all test data submitted for an engine.
- (A) Each engine shall produce at least 95 percent of the maximum horsepower, corrected to rating conditions, at 95 to 100 percent of the rated speed.
- (B) The fuel rate at maximum horsepower shall be within manufacturer's specifications.

- (ii) During service accumulation, hours can be credited toward the required service accumulation hours when the following criteria are met. If these criteria cannot be met, engine operation shall be discontinued and the Administrator shall be notified immediately. (Adjustments to the fuel rate can be approved under the provisions of § 86.079-25.)

(A) Each engine shall produce at least 95 percent of the maximum horsepower, at 95 to 100 percent of the rated speed, observed at the zero-hour point. Horsepower values shall be corrected to the rating conditions.

(B) The engine shall be operated at 75 percent of the inlet and exhaust restrictions specified in § 86.879-8 except that the tolerance will be  $\pm 3$  inches of water and  $\pm 0.5$  inches of Hg respectively.

(C) During each emission test the inlet and exhaust restrictions shall be specified in § 86.879-8.

(4) If a break-in procedure is used the procedure must be the same as recommended to the ultimate purchaser. Prior approval by the Administrator is required for use of any break-in procedure. The hours accumulated during the break-in procedure will not be counted as part of the service accumulation.

(5) Emission data engines: Each emission data engine shall be operated for 125 hours with all emission control systems installed and operating. An emission test shall be conducted at 125 hours. No zero hour emission test will be required or allowed. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the engine induction system.

(6) Durability data engines: Each gasoline-fuel durability data engine shall be operated, with all emission control systems installed and operating, for 1,500 hours. Each Diesel durability data engine shall be operated, with all emission control systems installed and operating, for 1000 hours. Emission measurement, as prescribed, shall be made at 125 intervals beginning at 125 hours of operation. No zero hour emission test will be required or allowed. Evaporative emission controls need not be connected provided normal operating conditions are maintained in the induction systems.

(7) All tests required by this subpart to be conducted after 125 hours of operation or at any multiple of 125 hours may be conducted at any accumulated number of hours within 8 hours of 125 hours or the appropriate multiple of 125 hours, respectively.

(8) (i) Data from all emission tests (including voided tests) shall be air posted to the Administrator within 72 hours (or delivered within five working days). The manufacturer shall furnish to the Administrator an explanation for voiding any test. The Administrator will determine if voiding the test was appropriate based upon the explanation given by the manufacturer for the voided test. If a manufacturer conducts multiple tests at any test point at which the data are intended to be used in the calculation of

the deterioration factor, the number of tests must be the same at each point and may not exceed three valid tests. Tests between test points may be conducted as required by the Administrator. In addition, all test data shall be compiled and provided to the Administrator in accordance with § 86.079-23. Where the Administrator conducts a test on a durability engine at a prescribed test point, the results of that test will be used in the calculation of the deterioration factor.

(ii) The results of all emission tests shall be recorded and reported to the Administrator using two places to the right of the decimal point. These numbers shall be rounded in accordance with the "Rounding Off Method" specified in ASTM E 29-67.

(9) Whenever the manufacturer proposes to operate and test an engine which may be used for emission or durability data, he shall provide such information concerning components used on the engine as the Administrator may require and make the engine available for such testing under § 86.077-29 as the Administrator may require, before beginning to accumulate hours on the engine. Failure to comply with this requirement will invalidate all test data later submitted for this engine.

(10) Once a manufacturer begins to operate an emission data or durability data engine, as indicated by compliance with paragraph (b) (9) of this section, he shall continue to run any emission data engine to 125 hours, any gasoline-fueled durability data engine to 1,500 hours, and any Diesel durability data engine to 1000 hours. The data from the engine will be used in the calculations under § 86.345. Discontinuation of an engine shall be allowed only with the prior written consent of the Administrator.

(11) (i) The Administrator may elect to operate and test any test engine during all or any part of the service accumulation and testing procedure. In such cases the manufacturer shall provide the engine(s) to the Administrator with all information necessary to conduct the testing.

(ii) The test procedures (subpart D for gasoline-fueled engines, and subparts D and I for Diesel engines) will be followed by the Administrator. The Administrator will test the engines at each test point. Maintenance may be performed by the manufacturer under such conditions as the Administrator may prescribe.

(iii) The data developed by the Administrator for the engine-system combination shall be combined with any applicable data supplied by the manufacturer on other engines of that combination to determine the applicable deterioration factors for the combination. In the case of a significant discrepancy between data developed by the Administrator and that submitted by the manufacturer, the Administrator's data shall be used in the determination of deterioration factors.

(12) Emission testing of any type with respect to any certification engine other than that specified in this subpart is not allowed except as such testing may be

specifically authorized by the Administrator.

8. A new section § 86.079-27 is added and reads as follows:

## § 86.079-27 Special test procedures.

(a) For light duty vehicles and light duty trucks the Administrator may, on the basis of a written application therefore by a manufacturer, prescribe test procedures, other than those set forth in this part, for any motor vehicle which he determines is not susceptible to satisfactory testing by the procedures set forth herein or in subpart B.

(b) For heavy duty engines:

(i) The Administrator, may on the basis of a written application therefore by a manufacturer, prescribe test procedures, other than those set forth in this subpart, for any motor vehicle engine which he determines is not susceptible to satisfactory testing by the procedures set forth herein or in subparts D and I.

(ii) If the manufacturer does not submit a written application for use of special test procedures but the Administrator determines that a motor vehicle engine is not susceptible to satisfactory testing by the procedures set forth herein, the Administrator will reject the applicable portions of the application. The Administrator shall notify the manufacturer in writing and set forth the reasons for such rejection in accordance with the provisions of § 86.077-22(c).

9. A new section 86.079-28 is added and reads as follows:

## § 86.079-28 Compliance with emission standards.

(a) [See paragraph (a) of § 86.077-28]

(b) (1) Paragraph (b) of this section applies to heavy duty engines.

(2) The exhaust emission standards for gasoline-fueled engines in § 86.079-10 or for Diesel engines in § 86.079-11 apply to the emissions of engines for their useful life.

(3) Since emission control efficiency decreases with the accumulation of hours on the engine, the emission level of a gasoline-fueled engine which has accumulated 1,500 hours of dynamometer operation or a Diesel engine which has accumulated 1000 hours of dynamometer operation will be used as the basis for determining compliance with the standards.

(4) The procedure for determining compliance of a new engine with exhaust emission standards is as follows:

(i) Separate emission deterioration factors shall be determined from the emission results of the durability data engines for each engine-system combination. Separate factors shall be established for HC, CO, and for the combined emissions of HC and NOx. For Diesel engines, separate factors shall also be established for the acceleration mode (designated as "A"), the lugging mode (designated as "B") and the peak opacity (designated as "C").

(A) The applicable results to be used in determining the deterioration factors for each combination shall be:

(1) All emission data from the tests required under § 86.079-26(b) (6). This shall include the official test results, as determined in § 86.077-29, for all tests conducted on all gasoline-fueled durability engines of the combination selected under § 86.079-24(c) (2) or on all Diesel durability engines of the combination selected under § 86.079-24(c) (3) (including all engines elected to be operated by the manufacturer under § 86.079-24(c) (2) (iii) for gasoline-fueled engines or under § 86.079-24(c) (3) (ii) for Diesel engines).

(2) All emission data from the test conducted before and after maintenance provided in § 86.079-25(c) (2) (i) (A) for gasoline fueled engines or in § 86.079-25(c) (2) (i) (B) for Diesel engines.

(3) All emission data from the tests conducted before and after maintenance provided in § 86.079-25(c) (5) (i) if emission tests were conducted.

(B) All applicable emission results for (1), HC, (2) CO, (3) HC+NOx, (4) acceleration smoke ("a"), (5) lugging smoke ("b"), and (6) peak smoke ("c") shall be plotted as a function of durability hours which shall be consistently rounded to the nearest hour. Emission data shall have two figures to the right of the decimal. The best fit straight lines, fitted by the method of least squares, shall be drawn through these data points. The interpolated 125-hour and 1500-hour points for gasoline-fueled engines or the 1000-hour points for Diesel engines on each line, rounded to whole numbers in accordance with ASTM E 29-67, must be within the standards specified in § 86.077-10 for gasoline-fueled engines or in § 86.077-11 for Diesel engines or the data shall not be used in the calculation of the deterioration factor, unless no applicable data points exceed the standards.

(C) The interpolated values shall be used to calculate a deterioration factor as follows:

Factor = Exhaust emissions interpolated to 1500 hours for gasoline-fueled engines or to 1000 hours for Diesel engines minus the exhaust emissions interpolated to 125 hours (Negative deterioration factors shall be considered zero.)

(ii) The appropriate deterioration factor, carried out to two places to the right of the decimal point, shall be added to the exhaust emission test results, carried out to two places to the right of the decimal point, for each emission data engine.

(iii) The emission values to compare with the standards shall be the adjusted emission values of paragraph (b) (4) (ii) of this section rounded to whole numbers in accordance with ASTM E 29-67 for each emission data engine.

(iv) Every test engine of an engine family must comply with all applicable standards, as determined in paragraph (b) (4) (iii) of this section, before any engine in that family will be certified.

10. A new section 86.079-35 is added and reads as follows:

## § 86.079-35 Labeling.

(a) (1) [See paragraph (a) (1) of § 86.077-35]

(2) Heavy duty engines:

(i) The plastic or metal label shall be welded, bonded, or otherwise permanently attached to the engine in a position in which it will be readily visible after installation in the vehicle.

(ii) The label shall be attached to an engine part necessary for normal engine operation and not normally requiring replacement during engine life.

(iii) The label shall contain the following information lettered in the English language in block letters and numerals which shall be of a color that contrasts with the background of the label:

(A) The label heading: Engine Exhaust Emission Control Information;

(B) Full corporate name and trademark of manufacturer;

(C) Engine displacement (in cubic inches) and engine family and model designations;

(D) Date of engine manufacture (month and year);

(E) Engine specifications and adjustments as recommended by the manufacturer. These specifications should indicate the proper transmission position during tuneup and what accessories (e.g., air conditioner), if any, should be in operation;

(F) For gasoline-fueled engines the label should include the idle speed, ignition timing, and the idle air-fuel mixture setting procedure and value (e.g., idle CO, idle air-fuel ratio, idle speed drop) and valve lash.

(2) For Diesel engines the label should include the advertised hp, at rpm, fuel rate at advertised hp, in m.m.<sup>3</sup>/stroke, valve lash, initial injection timing, and idle speed.

(F) An unconditional statement of compliance with the appropriate model year (e.g., 1979) U.S. Environmental Protection Agency regulations applicable to heavy duty engines.

(iv) The label may be made up of one or more pieces provided that all pieces are permanently attached to the same engine or vehicle part as applicable.

(b) [See paragraph (b) of § 86.077-35]

11. A new subpart D is added to Part 86 and reads as follows:

## Subpart D—Emission Regulations for New Gasoline-Fueled and Diesel Heavy Duty Engines; Gaseous Exhaust Test Procedure

Sec.

86.301-79 Scope, applicability.

86.302-79 Definitions.

86.303-79 Abbreviations.

86.304-79 Section numbering, construction.

86.305-79 Introduction, structure of subpart.

86.306-79 Equipment required and specifications overview.

86.307-79 Fuel specifications.

86.308-79 Gas specifications.

86.309-79 Sampling and analytical system; schematic drawing.

86.310-79 Sampling and analytical system; component specifications.

86.311-79 Miscellaneous equipment, specifications.

86.312-79 Dynamometer and engine equipment specifications.

Sec.

86.313-79 Air flow measurement, specifications.

86.314-79 Fuel flow measurement specifications.

86.315-79 General analyzer specifications.

86.316-79 Carbon monoxide and carbon dioxide analyzer specifications.

86.317-79 Hydrocarbon analyzer specifications.

86.318-79 Oxides of nitrogen analyzer specifications.

86.319-79 Analyzer checks and calibrations, frequency and overview.

86.320-79 Analyzer bench checks.

86.321-86.325 [Reserved]

86.326-79 Non-linearity check, CO and CO<sub>2</sub> analyzers.

86.327-79 Quench check, NOx analyzer.

86.328-79 Leak checks.

86.329-79 Sample line residence time, check procedure.

86.330-79 Carbon monoxide and carbon dioxide analyzer calibration.

86.331-79 Hydrocarbon analyzer calibration.

86.332-79 Oxides of nitrogen analyzer calibration.

86.333-79 Dynamometer calibration.

86.334-79 Test procedure overview.

86.335-79 Gasoline-fueled engine test cycle.

86.336-79 Diesel engine test cycle.

86.337-79 Information.

86.338-79 Exhaust measurement accuracy.

86.339-79 Pre-test procedures.

86.340-79 Gasoline-fueled engine dynamometer test run.

86.341-79 Diesel engine dynamometer test run.

86.342-79 Post-test procedure.

86.343-79 Chart reading.

86.344-79 Humidity calculations.

86.345-79 Emission calculations.

AUTHORITY: Secs. 202, 206, 207, 208, 301(a) of the Clean Air Act, as amended (42 U.S.C. 1857f-1, 1857f-5, 1857f-5a, 1857f-6, 1857g(a)).

Subpart D—Emission Regulations for New Gasoline-fueled and Diesel Heavy Duty Engines; Gaseous Exhaust Test Procedure

§ 86.301-79 Scope, applicability.

This subpart contains gaseous emission test procedures for gasoline-fueled and Diesel heavy duty engines. It applies to 1979 and later model years.

§ 86.302-79 Definitions.

The definition in § 86.077-2 and § 86.079-2 apply to this subpart.

§ 86.303-79 Abbreviations.

The abbreviations in § 86.079-3 apply to this subpart.

§ 86.304-79 Section numbering, construction.

(a) The model year of initial applicability is indicated by the section number. The two digits following the hyphen designate the first model year for which a section is effective. A section remains effective until superseded.

EXAMPLE: Section § 86.311-79 applies to the 1979 and subsequent model years until superseded. If a section § 86.311-81 is promulgated it would take effect beginning with the 1981 model year; § 86.311-79 would apply to model years 1979 and 1980.

(b) A section reference without a model year suffix refers to the section applicable for the appropriate model year.

(c) Unless indicated, all provisions in this subpart apply to both gasoline-fueled and Diesel heavy duty engines.

## § 86.305-79 Introduction, structure of subpart.

(a) This subpart describes the equipment required and the procedures to follow in order to perform exhaust emission tests on gasoline-fueled and Diesel heavy duty engines. Subpart A sets forth the testing requirements and test intervals necessary to comply with EPA certification procedures.

(b) Four topics are addressed in this subpart. Sections §§ 86.306 through 86.318 set forth specifications and equipment requirements; §§ 86.319 through 86.333 discuss calibration methods and frequency; test procedures and data requirements are listed (in approximately chronological order) in §§ 86.334 through 86.343, and calculation formulas are found in §§ 86.344 and 86.345.

## § 86.306-79 Equipment required and specifications, overview.

(a) This subpart contains procedures for both gasoline-fueled and Diesel engine gaseous emission tests. Generally, the equipment required is identical for both types of engines. Equipment required and specifications are found in §§ 86.307 through 86.318.

(b) Some analyzer specifications refer to calibration checks found in §§ 86.320 through 86.332.

## § 86.307-79 Fuel specifications.

(a) Gasoline. (1) Gasoline having the following specifications will be used by the Administrator in exhaust emission testing. Gasoline having the following specifications or substantially equivalent specifications approved by the Administrator, shall be used by the manufacturer in exhaust testing, except that the lead and octane specifications do not apply.

Item designation	ASTM	Leaded	Unleaded
Octane, research, minimum.	D1656	100	96
Pb (organic), grams per U.S. gallon.		1.4	0.00-0.05
Distillation range:			
IBP, °F	D86	75-95	75-95
10-pet point, °F	D86	120-135	120-135
50-pet point, °F	D86	200-230	200-230
90-pet point, °F	D86	300-325	300-325
EP, °F (maximum).	D86	415	415
Sulfur, weight percent, maximum.	D1296	0.10	0.10
Phosphorus, grams per U.S. gallon, maximum.		.01	.005
RVP, pounds per square inch, maximum.	D323	8.0-9.2	8.0-9.2
Hydrocarbon composition:			
Olefins, percent, maximum.	D1319	10	10
Aromatics, percent, maximum.	D1319	35	35
Saturates, percent, maximum.	D1319	Remainder	Remainder

<sup>1</sup> Minimum.

(2) Gasoline representative of commercial gasoline which will be generally available through retail outlets shall be used in service accumulation. For leaded gasoline, the minimum lead content shall be 1.4 grams per U.S. gallon, except that where the Administrator determines that engines represented by the test engine

will be operated using gasoline of different lead content than that prescribed in this paragraph, he may consent in writing to use of a gasoline with a different lead content. The octane rating of the gasoline used shall be no higher than 4.0 research octane numbers above the minimum recommended by the manufacturer and have a minimum sensitivity of 8.0 octane numbers, where sensitivity is defined as research octane number minus motor octane number.

(b) Diesel fuel. (1) The Diesel fuels employed for testing shall be clean and bright, with pour and cloud points adequate for operability. The Diesel fuel may contain nonmetallic additives as follows: Cetane improver, metal deactivator, antioxidant, dehazer, antirust, pour depressant, dye, and dispersant.

(2) Diesel fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in exhaust emissions testing. The grade of Diesel fuel recommended by the engine manufacturer commercially designated as "Type 1-D" or "Type 2-D", shall be used.

Item	ASTM test method No.	Type 1-D	Type 2-D
Cetane.....	D613.....	48-54	42-50
Distillation range.....	D86.....		
IBP, °F.....		330-390	340-400

Flashpoint, °F (minimum).....	D56.....	120	130
Viscosity, centistokes.....	D445.....	1.6-2.0	2.0-3.2

<sup>1</sup> Minimum.

(3) Diesel fuel meeting the following specifications, or substantially equivalent specifications approved by the Administrator, shall be used in service accumulation. The grade of Diesel fuel recommended by the engine manufacturer, commercially designated as "Type 1-D" or "Type 2-D", shall be used.

Item	ASTM test method No.	Type 1-D	Type 2-D
Cetane (min.).....	D613.....	42-56	38-58
Distillation range 90-pet point, °F.....	D86.....	440-530	540-630
Gravity °API.....	D287.....	39-45	30-42
Total sulfur, percent.....	D129 or D2622.....	1.0-0.5	1.0-2
Flash point, °F (min.).....	D56.....	120	130
Viscosity, centistokes.....	D445.....	1.2-2.2	1.5-4.5

<sup>1</sup> Minimum.

(4) Other petroleum distillate fuels may be used for testing and service accumulation provided:

(i) They are commercially available, and

(ii) Information, acceptable to the Administrator, is provided to show that only the designated fuel would be used in customer service, and

(iii) Use of a fuel listed under paragraphs (b) (2) and (b) (3) of this section would have a detrimental effect on emissions or durability, and

(iv) Written approval from the Administrator of the fuel specifications was provided prior to the start of testing.

(5) The specification range of the fuels to be used under subparagraphs (b) (2), (b) (3), and (b) (4) of this section shall be reported in accordance with § 86.077-21(b) (3).

## § 86.308-79 Gas specifications.

(a) Analyzer gases: (1) Calibration or span gases for the CO and CO<sub>2</sub> analyzers shall have zero-grade nitrogen as a diluent.

(2) Calibration or span gases for the hydrocarbon analyzer shall be propane with zero-grade nitrogen as a diluent when testing gasoline-fueled engines. For Diesel engine tests the diluent shall be zero-grade air.

(3) Calibration or span gases for the NOx analyzer shall be single blends of NO named as NOx with a maximum NO<sub>x</sub> concentration of 5 percent of the nominal value. Zero-grade nitrogen shall be the diluent.

(4) Zero gases for hydrocarbon analyzers shall be nitrogen when testing gasoline-fueled engines and air when testing Diesel engines.

(5) Zero gases for the carbon monoxide, carbon dioxide and oxides of nitrogen analyzers shall be either zero grade air or zero grade nitrogen.

(6) The allowable zero grade gas (air or nitrogen) impurity concentrations shall not exceed 2 ppm C hydrocarbon, 10 ppm carbon monoxide, 400 ppm carbon dioxide and 1 ppm nitric oxide.

(7) "Zero grade air" includes artificial air consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18 and 21 mole percent.

(b) Calibration gas: Calibration gas concentrations shall be traceable within 1 percent of applicable National Bureau of Standards gas blends concentrations. Alternatively, calibration gas concentrations shall be named with a 99% confidence level within 2% of true concentration.

(c) Span gas: Span gas concentrations shall be traceable to within 1 percent of a calibration gas.

(d) Hydrocarbon analyzer fuel: (1) The fuel shall contain 40±1% hydrogen. The balance shall be helium. The mixture shall contain less than 2 ppm C hydrocarbon.

(2) Alternate pure hydrogen fuel: Some FIDs are designed to operate on pure hydrogen. Generally this FID fuel is incompatible with good relative hydrocarbon response.

(3) For Diesel engines this fuel is not recommended. However, this fuel may be used if the engine manufacturer demonstrates, across his product line, that a FID using this fuel produces comparable results to a FID using 40% H<sub>2</sub>/60% He fuel. These data must be submitted to and approved by the Administrator prior to testing. Pure H<sub>2</sub> fuel, that may be allowed for testing, must contain at least 99.0 percent hydrogen and contain less than 2 ppm C hydrocarbon.

(4) For gasoline-fueled engines, pure hydrogen fuel for the FID is not allowed.

(e) Hydrocarbon analyzer burner air: The burner air should contain nominally 21±1 percent oxygen. The concentration of oxygen must be within 1 mole percent of the oxygen concentration of the burner air used in the latest oxygen interference check (%O<sub>2</sub>). If the difference in oxygen concentration is greater than 1 mole percent, then the oxygen interference must be checked and the analyzer adjusted, if necessary, to meet the %O<sub>2</sub> requirements. The burner air must contain less than 2 ppm C hydrocarbon.

(f) Oxygen interference check gases shall contain propane with a 350 ppm C±50 ppm C concentration named by chromatographic analysis to calibration gas tolerances. Nitrogen shall be the predominant diluent with the balance oxygen. Blends required for gasoline-fueled and Diesel engine testing are as follows:

Applicability	O <sub>2</sub> concentration (percent)	Balance
Diesel.....	21 (20-22) N <sub>2</sub>	
Do.....	15 (14-16) N <sub>2</sub>	
Diesel and gasoline.....	10 (9-11) N <sub>2</sub>	
Do.....	5 (4-6) N <sub>2</sub>	
Gasoline.....	0 (0-1) N <sub>2</sub>	

## § 86.309-79 Sampling and analytical system; schematic.

(a) Schematic drawing. (1) Fig. D79-1 is a schematic drawing of the exhaust gas sampling and analytical system which shall be used for testing under this subpart. All components or parts of components that are wetted by the sample or corrosive calibration gases are to be either chemically cleaned stainless steel or inert material, e.g. polytetrafluoroethylene resin. The use of "gauge savers" or "protectors" with nonreactive diaphragms is permissible.

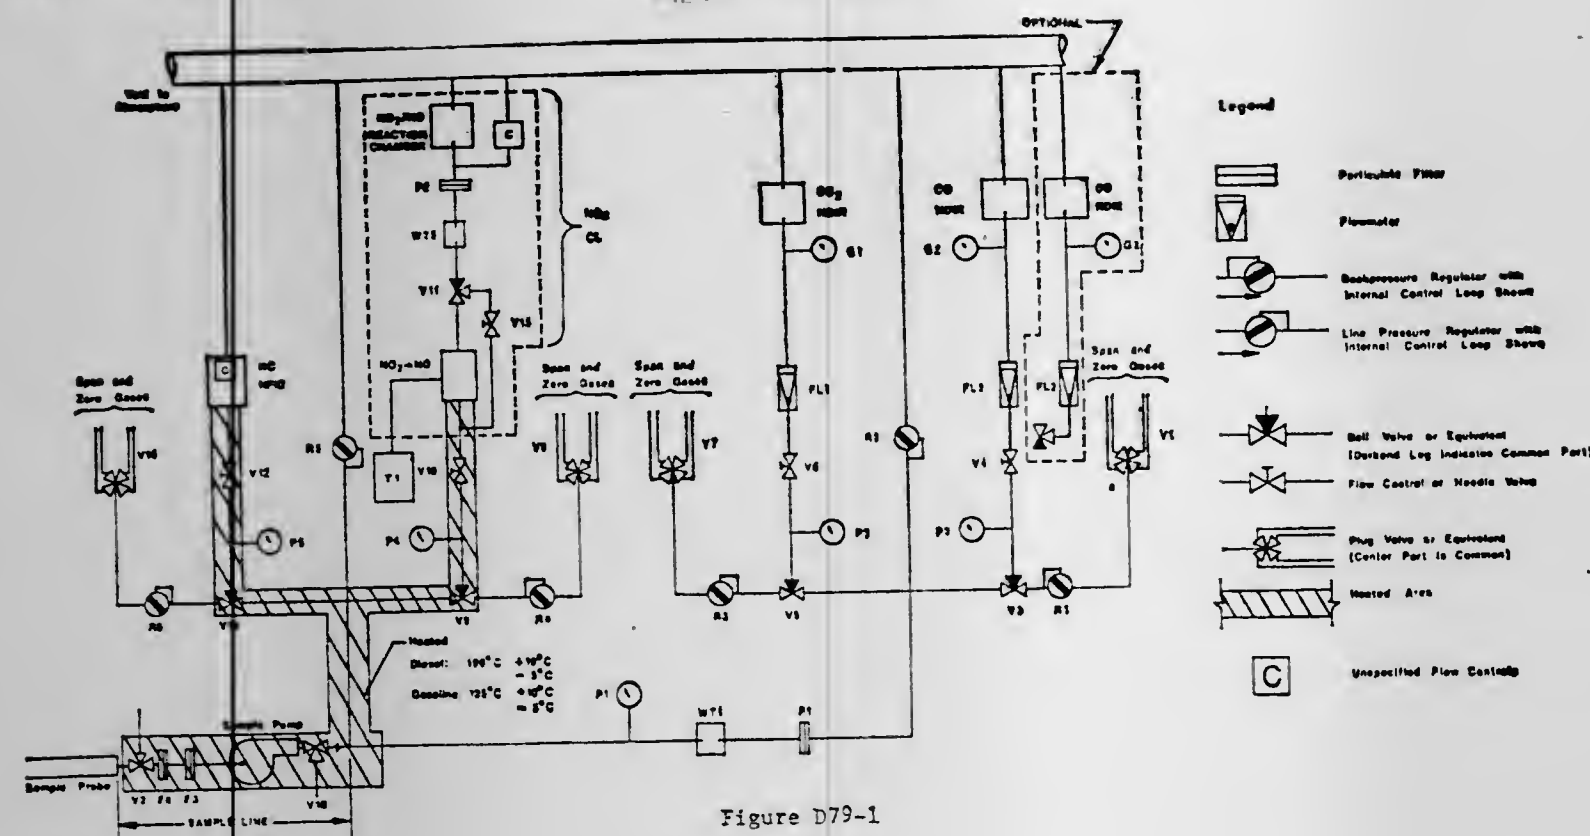

Figure D79-1

Heavy Duty Exhaust Gas  
Sampling and Analytical Train

(2) Any variations from the depicted system, including instrument detection method or internal instrument flow controls, may be used only with prior approval from the Administrator based on proven equivalency.

(b) **System Components List.** The following is a list of components shown in Fig. D79-1 by numeric identifier. Pressure ranges and accuracies when given are suggested values. Deviations from suggested values do not require prior approval.

(1) **Filters:** It is suggested that for F1, F2, and F3, a 7 cm diameter glass fiber filter paper be used. Optional filter F4 is a coarse filter for large particulates.

(2) **Flowmeters:** Flowmeters FL 1 and FL 2 indicate sample flow rates through the CO and CO<sub>2</sub> analyzers, (0-10 CFH).

(3) **Gauges:** Gauges G1 and G2 measure input pressure to CO and CO<sub>2</sub> detector cells (0-15" H<sub>2</sub>O gauge). These gauges measure pressure drop across the detector cell.

(4) **Pressure gauges:** (i) P1—bypass pressure (0-20 psig).

(ii) P2, P3, P4 and P5—sample or span pressure at inlet to flow control valves (0-10 psig).

(5) **Water traps:** Water traps WT1, and WT2 are to remove water from the sample. Chemical dryers are not an acceptable method of removing the water. Water removal by condensation may be used only with prior approval from the Administrator based on proven equivalency.

(6) **Regulators:** (i) R1, R3, R4, and R6—line pressure regulators to control span pressure at inlet to flow control valves (0-10 psig, sensitivity  $\pm 2''$  H<sub>2</sub>O).

(ii) R2 and R5—back pressure regulators to control sample pressure at inlet to flow control valves (0-10 psig, sensitivity  $\pm 2''$  H<sub>2</sub>O).

(7) **Valves:** (i) V1, V7, V8, and V14—selector valves to select zero- or calibration-gases.

(ii) V2—optional heated selector valve to purge the sample probe, perform leak checks, or to perform hang-up checks.

(iii) V3 and V5—selector valves to select sample or span gases.

(iv) V4, V6, and V15—flow control valves.

(v) V9 and V13—heated selector valve to select sample or span gases.

(vi) V10 and V12—heated flow control valves.

(vii) V11—selector valve to select NO<sub>x</sub> or bypass mode in the chemiluminescence analyzer.

(viii) V16—optional heated selector valve to perform leak checks.

(9) **Pump:** Sample transfer pump to transport sample to analyzers (1.0 CFM at 10 psig).

(10) **Temperature sensor:** T1 measures the NO<sub>2</sub> to NO reduction converter temperature (0-1000°C, 32-1832°F).

§ 86.310-79 Sampling and analytical system; component specifications.

(a) **Temperature.** Any heated component must be maintained at: (1) 125°C;  $\pm 10^\circ\text{C}$ ,  $-5^\circ\text{C}$  (257°F;  $\pm 18^\circ\text{F}$ ,  $-9^\circ\text{F}$ ) for gasoline-fueled engines.

(2) 190°C;  $\pm 10^\circ\text{C}$ ,  $-5^\circ\text{C}$  (374°F;  $\pm 18^\circ\text{F}$ ,  $-9^\circ\text{F}$ ) for Diesel engines.

(b) **Sample probe.** (1) The sample probe shall be a straight, closed end, stainless steel, multi-hole probe. The I.D. shall be between 0.18 and 0.32 inches.

(2) There shall be a minimum of three holes in the probe. The spacing of the radial planes for each hole in the probe must be such that they cover approximately equal cross-sectional areas of the exhaust duct. The angular spacing of the holes must be approximately equal.

The angular spacing of any two holes in one plane may not be  $180^\circ \pm 20^\circ$ . The holes should be sized such that each has approximately the same flow. See Figure D79-2.

Figure D79-2 SAMPLE PROBE AND TYPICAL HOLE SPACINGS

(3) The probe shall extend radially across the exhaust duct. The probe must pass through the approximate center and must extend across at least 80 percent of the diameter of the duct.

(c) (1) **Sample transfer:** The exhaust gas sample shall be transferred to the analytical instruments through a heated filter and heated line by a heated sample pump.

(2) All heated lines shall be of chemically cleaned stainless steel construction.

(3) The I.D. of the sample line shall be between 0.18 and 0.32 inches.

(4) Generally, the sample-line length should be limited to 50 feet. Longer sample-line may be used if the total system response time and the hydrocarbon hang-up check meet the requirements for testing under this subpart.

(5) The sample line outside wall temperature must be maintained at the temperature specified in paragraph (a) of the section. An exception is made for the first two feet of sample-line from the exhaust duct. The upper temperature tolerance for this two foot section will be increased to  $+60^\circ\text{C}$  ( $+108^\circ\text{F}$ ).

(6) The sample pump should be located as close as practical to the sample probe, and the wetted surfaces of the pump must be heated.

(7) If valve V2 is used, the sample probe must connect directly to valve V2. The location of optional valve V2 may not be greater than two feet from the exhaust duct.

(8) The location of optional valve V16 may not be greater than 12 inches from

the sample pump. The leakage rate for this section on the pressure side of the sample pump may not exceed the leakage rate on the vacuum side of the pump.

(d) **Venting.** (1) The method of disposing of the sample is not specified. However, caution must be used in routing of the vent lines.

(2) Venting of the instruments, especially the NDIR analyzers, must be such that the analyzer vent does not see a back pressure caused by the proximity of other vents.

(3) Pressure relief vents of regulators should be vented to the atmospheric vent manifold for safety.

§ 86.311-79 Miscellaneous equipment, specifications.

(a) **Chart recorders.** (1) the minimum chart speed allowed is 3 inches per minute for gasoline-fueled engines and 0.5 inches per minute for Diesel engines.

(2) When testing gasoline-fueled engines all chart recorders (analyzers, torque, rpm, etc.) shall be provided with automatic markers which indicate one second intervals. Preprinted chart paper (one second intervals) may be used in lieu of the automatic markers provided the correct chart speed is used.

(b) All temperature measurements, (wet, bulb, dry bulb, dew point, etc.) shall be accurate to within  $\pm 0.5^\circ\text{C}$ .

(c) **Intake air humidity and temperature measurements.** (1) Humidity conditioned air. Air that has had its absolute humidity altered is considered humidity conditioned air. For this type of intake air, the humidity measurement must be made within the intake air system, and after the air conditioning has taken place. Also, this measurement must be made within 48 inches of the engine.

(2) Non-conditioned air. Humidity measurements in non-conditioned intake air systems must be made in the intake air stream and within 18 inches of the inlet for engine intake air system.

(3) Intake air temperature measurement must be made in the intake air stream and within 48 inches of the engine.

(4) Temperature and humidity devices must have a time constant,  $\tau$ , between 13 and 52 seconds. For a given instantaneous step change the measurement system must respond to 63.2% of that step change.

If the temperature and humidity measurement systems have a time constant  $\tau$ , less than 13 seconds, then the measurements will be sampled at a rate four or more times faster than the time constant  $\tau$  and averaged. For continuously integrated intake air temperature systems, excursions exceeding the temperature limits for 30 seconds or less will be allowed.

(d) **Dynamometer room temperature** must be measured in two locations in the room within 10 feet of the engine. The two measurements are averaged. The measurement system must have a time constant,  $\tau$ , between 13 and 52 seconds. For a given instantaneous step change the measurement system must respond to 63.2% of that step change. If the tem-

perature measurement system has a time constant  $\tau$ , less than 13 seconds, then the measurements will be sampled at a rate four or more times faster than the time constant  $\tau$  and averaged. For continuously integrated dynamometer room air temperature systems, excursions exceeding the temperature limits for 30 seconds or less will be allowed.

(e) **Sample component surface temperatures.** (1) Measure the sample pump surface temperature.

(2) Measure the surface temperature of all heated filters.

(3) For each section of sample-line 10 feet long or less, that has a separate source of power or heating element, measure the sample wall line temperature at least at one location.

(4) For each section of sample-line longer than 10 feet that has a separate source of power or heating element, measure the sample line wall temperature at least at two locations. These sensor locations must be approximately equal distance from each other and the ends of the sample-line.

(f) If water is removed by condensation the exit gas temperature must be measured and may not exceed  $7^\circ\text{C}$  ( $45^\circ\text{F}$ ).

§ 86.312-79 Dynamometer and engine equipment specifications.

(a) **Dynamometer.** (1) The dynamometer test stand and other instruments for measurement of power output shall be accurate to within 2 percent of point at all power settings. The dynamometer must be capable of performing the test cycle, § 86.335 or § 86.336. Dynamometers used for testing gasoline-fueled engines must have motoring capability.

(2) **Dynamometer calibration weights.** A minimum of 6 calibration weights for each range used are required. The weights must be equally spaced and traceable to within 1% of NBS weights.

(b) **Engine cooling.** Means of engine cooling which will maintain the engine operating temperatures at approximately the same temperature as specified by the manufacturer shall be used. An auxiliary fixed speed fan may be used to maintain engine cooling during sustained operation on the dynamometer.

(c) **Exhaust system.** (1) A chassis-type single pipe exhaust system shall be used. Standard or specially fabricated "Y" pipes may be used for Vee type engines. The probe shall be located three to ten feet downstream from the exhaust manifold outlet flange, turbocharger exit flange or emission control device(s) (catalyst, etc.).

Further, the probe location must be at least three feet downstream of any "Y" intersection. If a catalyst(s) is used, the catalyst(s) must be located the same distance from the exhaust manifold flange as in the vehicle configuration. For Vee Type engines the "Y" intersection must be downstream of the catalyst(s).

(2) When testing Diesel engines a noninsulated exhaust system extending  $15 \pm 5$  feet from the exhaust manifold,

or the crossover junction in the case of Vee engines, and presenting an exhaust back pressure within  $\pm 0.2$  inch Hg. of the upper limit at maximum rated horsepower, as established by the engine manufacturer in his sales and service literature for vehicle application, shall be used. A conventional automotive muffler of a size and type commonly used with the engine being tested shall be employed in the exhaust system during smoke emission testing. The terminal 2 feet of the exhaust pipe shall be circular cross section and be free of elbows and bends. The end of the pipe shall be cut off squarely. The terminal 2 feet of the exhaust pipe shall have a diameter in accordance with the engine being tested, as specified below:

Maximum rated horsepower:	Exhaust pipe diameter (inches)
Less than 101	2
101-200	3
201-300	4
301 or more	5

#### § 86.313-79 Air flow measurement specifications.

(a) The air flow measurement method used must have a turn-down ratio large enough to accurately measure the airflow over the engine operating range during the test. Overall measurement accuracy must be  $\pm 1$  percent of full-scale value of the measurement device. The Administrator must be advised of the method used.

(b) Corrections to the measured air mass-flow-rate: When an engine system incorporates devices that add or subtract air mass (air injection, bleed air, etc.), determine the air mass from these devices by one of the following methods:

(1) Measure the air mass-flow from the device during each operating mode by a method approved by the Administrator.

(2) Demonstrate to the Administrator that the air mass-flow for each mode from the device is typical for many system applications. Then the device flow-rate for each mode may be generally applied.

(3) Under certain circumstances, the Administrator will accept theoretical calculations that predict the device mass flow-rate during each mode.

(c) Gasoline-fueled engine systems:

(1) Flow distribution: The air cleaner is considered part of the engine system. A plenum chamber of sufficient volume is recommended to insure uniform distribution to the engine.

(2) Velocity profile: The velocity profile is considered the velocity profile to the air cleaner. The desired condition is a uniform velocity profile with a velocity between 3.3 to 13.2 meters per second (10 to 40 feet per second) delivering air to the air cleaner.

(3) Pressure drop: The pressure drop (from atmospheric pressure) at the inlet to the air cleaner must not be more than 1.74 kPa (7.0 in H<sub>2</sub>O).

(4) Vents: Devices like PCV valves that vent to the air cleaner, must continue to be vented to the air cleaner.

Devices that vent to the atmosphere as some carburetor float vents, governors, etc. must vent to the plenum chamber.

(5) Hot air: (i) Ducted Ambient Air: On engines that use ducted ambient air to the carburetor, the hot air device will be non-functional during the test sequence. The engine will induct ambient air at 20°C (68°F) to 30°C (86°F).

(ii) Under-Hood Air: On engines that induct air under the hood, the hot air device (if used) will be non-functional during the test sequence. The engine will induct air at a typical under hood temperature that would occur on a 20°C (68°F) to 30°C (86°F) day. The manufacturer will specify and substantiate the under-hood intake air temperature.

(d) Diesel engine systems. An engine air inlet system presenting an air inlet restriction within  $\pm 1$  inch of water of the upper limit for the engine operating condition which results in maximum air flow, as established by the engine manufacturer in his sales and service literature, for the Diesel engine being tested shall be used.

#### § 86.314-79 Fuel flow measurement specifications.

(a) The fuel flow-rate measurement instrument must have a minimum accuracy of 1 percent of full-scale flow-rate for each measurement range used. The controlling parameters are the elapsed time measurement of the event and the weight or volume measurement. Restrictions on these parameters are:

(1) The error in the elapsed time measurement of the event must not be greater than 1 percent of the absolute event time. This includes errors in starting and stopping the clock as well as the period of the clock.

(2) If the mass of fuel consumed is measured by discrete weights, then the error in the actual weight of the fuel consumed must not be greater than 1 percent of the measuring weight.

(3) If the mass of fuel consumed is measured electronically (load cell, load beam, etc.), the error in the actual weight of fuel consumed must not be greater than 1 percent of the full-scale value of the electronic device.

(4) If the mass of fuel consumed is measured by volume flow and density, the error in the actual volume consumed must not be greater than 1 percent of the full-scale of the volume measuring device.

(b) For devices that have varying mass scales (electronic weight, volume, density, etc.), measurements may not be used for calculations if the measurement is less than twenty percent of full scale.

(c) Option: Complete flow-rate measurement systems may be used below 20 percent of full-scale measurement as long as the combination of mass and time measurements indicate a flow-rate that has an error of less than 5 percent of the actual absolute flow-rate.

#### § 86.315-79 General analyzer specifications.

(a) Analyzer response-time: The analyzer must respond to an instantaneous

step change at the entrance to the analyzer with a response equal to 95 percent of that step change in 3.0 seconds or less on all ranges used.

(b) Precision: The precision of the analyzer must be no greater than  $\pm 1$  percent of full-scale for each range used. The precision is defined as 2.086 times the standard deviation (s) of 20 repetitive responses to a given calibration gas.

(c) Noise: The analyzer peak to peak output noise at frequencies greater than 0.1 hertz must not exceed  $\pm 1$  percent of full-scale on all ranges used.

(d) Zero drift: The analyzer zero-response drift during a 1 hour period shall be less than  $\pm 1$  percent of full-scale on the lowest range used. The zero-response is defined as the mean response to a zero gas during a 30 second time interval including peak to peak noise at frequencies less than 0.1 hertz.

(e) Span drift: The analyzer span drift during a 1 hour period shall be less than  $\pm 1$  percent of full-scale on the lowest range used. The analyzer span is defined as the difference between the span-response and the zero-response. The span-response is defined as the mean response to a span gas during a 30 second time interval including peak to peak noise at frequencies less than 0.1 hertz.

(f) Linearity: HC and NOx analyzers must be linear within 2 percent of full scale for each range used.

#### § 86.316-79 Carbon monoxide and carbon dioxide analyzer specifications.

(a) Carbon monoxide and carbon dioxide measurements are to be made with NDIR analyzers.

(b) The degree of nonlinearity shall not exceed 15 percent of full scale for all ranges used. See § 86.326 for measurement procedure.

(c) The use of linearizing circuits is permitted.

(d) Zero suppression: Various techniques of zero suppression may be used to increase readability, but only with prior approval by the Administrator.

(e) If the turn down ratio of the carbon monoxide analyzer is not great enough for the desired application, a combination of two or more separate instruments, two or more separate cells with one amplifier, or a multi-cell analyzer may be used. Accomplish this by adding a selector valve between flowmeter F2 and gauge G2 (see Fig. D79-1). All cell flow paths must be parallel and must have a gauge G2 immediately upstream of all detector cells. Vent all detector cells to atmospheric pressure as shown in Fig D79-1.

(g) If the cells are in series optically as in some dual cell arrangements, the cell not in use must be continuously purged with zero-grade gas when analyzing a sample. Furthermore the purge pressure at G2 must be approximately the same as the sample pressure at G2 although the flow rate may be lower. Other combinations must be approved in advance by the Administrator.

#### § 86.317-79 Hydrocarbon analyzer specifications.

(a) Hydrocarbon measurements are to be made with an HFID analyzer.

(b) The analyzer shall be fitted with a constant temperature oven housing the detector and sample handling components. It shall maintain temperature within  $\pm 2^\circ\text{C}$ . of the set point. The detector, oven, and sample-handling components within the oven shall be suitable for continuous operation at temperatures to 200°C.

(c) Fuel and burner air shall conform to the specifications in § 86.508.

(d) The percent of oxygen interference must be less than 2%, as specified in § 86.331.

(e) Premixed burner air: (1) For Diesel engines, premixing burner air with the FID fuel is not recommended as a means of improving oxygen interference (%O<sub>2</sub>). However, this procedure may be used if the engine manufacturer demonstrates across his product line that an FID using this procedure produces comparable results to an FID not using this procedure. This data must be submitted to the Administrator for his consideration prior to testing.

(2) For gasoline-fueled engines, premixing burner air with the FID fuel is not allowed.

#### § 86.318-79 Oxides of nitrogen analyzer specifications.

(a) Oxides of nitrogen are to be measured with a chemiluminescence analyzer.

(b) The NO<sub>2</sub> to NO converter efficiency shall be at least 90%.

(c) The quench interference must be less than 2% as measured in § 86.327.

#### § 86.319-79 Analyzer checks and calibrations; frequency and overview.

(a) Prior to initial use and after major repairs bench check each analyzer, see § 86.320.

(b) At least once every seven days during testing check the NO<sub>x</sub> converter efficiency, see § 86.332.

(c) At least once every thirty days during testing perform the following:

(1) Leak check the system, see § 86.328.

(2) Calibrate all analyzers; see § 86.330 through § 86.332.

(3) Check sample line residence time, see § 86.329.

(4) Verify that the automatic data collection system (if used) meets the chart reading requirements found in § 86.343.

(5) Check the fuel flow measurement instrument to insure that the specifications in § 86.314 are met.

(d) At least once every 180 days during testing check the dynamometer test stand and power output instrumentation, see § 86.333.

#### § 86.320-79 Analyzer bench check.

(a) Prior to initial use and after major repairs verify that each analyzer complies with the following specifications:

- (1) Response time, see § 86.315(a)
- (2) Precision, see § 86.315(b)
- (3) Noise, see § 86.315(c)
- (4) Zero drift, see § 86.315(d)
- (5) Span drift, see § 86.315(e)

In addition, perform a quench check on NOx analyzers, see § 86.327 and a non-linearity check on CO and CO<sub>2</sub> analyzers, see § 86.326.

(b) Condition all new or replacement NO<sub>x</sub> NO converters. The conditioning consists of either purging the converter with air for a minimum of 4 hours or until the converter efficiency is greater than 90 percent. The converter must be at operational temperature while purging. Do not use this procedure prior to checking converter efficiency on in-use converters.

#### § 86.321 through 86.325 [Reserved]

#### § 86.326-79 Non-linearity check, CO and CO<sub>2</sub> analyzers.

(a) For CO and CO<sub>2</sub> analyzers the degree of non-linearity of the detector cell shall be determined from the calibration curves of chart deflection vs. calibration concentration and a straight line from zero through the 100% full-scale value. The linearizing circuit (if equipped) shall not be employed during this check. Use calibration procedure specified in § 86.330. Calculate the degree of non-linearity (NL) for each range and calibration concentration by:

$$\%NL = \frac{(\text{Actual Chart Deflection} - \text{Linear Chart Deflection})}{\text{Actual Full-Scale Chart Deflection}} \times 100$$

#### § 86.327-79 Quench check, NO<sub>x</sub> analyzer.

(a) Perform the reaction chamber quench check for each model of high vacuum reaction chamber analyzer prior to testing.

(b) Perform the reaction chamber quench check for each new analyzer that has an ambient pressure of "soft vacuum" reaction chamber prior to testing. Additionally, perform this check prior to testing each time an analyzer of this type has had the sample capillary repaired or replaced.

(c) Quench check as follows: (1) Calibrate the NOx analyzer on the lowest anticipated range that may be used for testing.

(2) Introduce a mixture of CO<sub>2</sub> and NOx (diluent N<sub>2</sub>) to the CL analyzer. Dynamic blending may be used to provide this mixture. The CO<sub>2</sub> concentration should be approximately equal to the highest concentration experienced during testing. Record the response.

(3) Recheck the calibration. If it has changed more than 0.25 percent of full-scale, recalibrate and repeat the quench check.

(4) Prior to testing, the difference between the calculated NOx response and the response if NOx in the presence of CO<sub>2</sub> (step 2) must not be greater than 2 percent. The calculated NOx response is based on the calibration performed in step (1).

#### § 86.328-79 Leak checks.

(a) Vacuum side leak check: (1) With the sample pump operating, cap the probe or sample line at the probe fitting. Valve V2 may be used to meet this requirement.

(2) Measure the flow at the discharge of the pump. Valve V16 may be used to facilitate this check.

(3) If the measured flow exceeds 50 cc/min, repair the system.

(b) Pressure Side leak check: (1) Vent the inlet of the sample pump to atmosphere. Valve V2 may be used to meet this requirement.

(2) Cap the sample-line at the point that the line connects to the analysis train.

(3) Measure the flow at the inlet to the pump. Valve V2 may be used to facilitate this check.

(4) If the measured flow exceeds 500 cc/min, repair the system.

(5) All other pressure fittings may be checked by using the bubble-check method. Fitting leakage shall be corrected.

#### § 86.329-79 Sample line residence time, check procedure.

(a) Check the sample-line residence time by the following procedure:

(1) Heat the sample-line, sample pump and heated filters to the operating temperature.

(2) Introduce HC span gases into the sampling system at the sample probe or valve V2 at atmosphere pressure. Simultaneously, start the time measurement.

(3) When the HC instrument response is 95 percent of the span gas concentration used, stop the time measurement.

(4) If the elapsed time is more than 15.0 seconds, make necessary adjustments.

(5) Repeat with the CO, CO<sub>2</sub>, and NOx instruments and span gases.

#### § 86.330-79 Carbon monoxide and carbon dioxide analyzer calibration.

(a) Detector optimization: If necessary, follow the manufacturer's instructions for initial start-up and basic operating adjustments.

(b) Calibration Curve. Develop a calibration curve for each range used: (1) Zero the analyzer.

(2) Span the analyzer to give a response of approximately 90 percent of full-scale chart deflection.

(3) Recheck the zero response. If it has changed more than 0.25 percent of full-scale, repeat steps (1) and (2).

(4) Record the response of calibration gases having nominal concentrations of 15, 30, 45, 60, 75, and 90 percent of full scale concentration.

(5) Generate a rational polynomial calibration curve. The polynomial shall be of fourth order or less and have five or fewer coefficients. Include zero as a data point. The calibration curve must fit the data points within 2 percent of point or 1 percent of full-scale whichever is less.

(c) If any range is within 2% of being linear, a linear calibration may be used. To determine if this criteria is met:

(1) Perform a linear least square regression on the data generated. Use an equation of the form  $y=mx$ , where  $x$  is the actual chart deflection and  $y$  is the concentration.

(2) Use the equation  $z=y/m$  to find the linear chart deflection (2) for each calibration gas concentration (y).

(3) Determine the linearity (%L) for each calibration gas by:

$$\%L = \frac{(Z-X)}{\text{Full-Scale Linear Chart Deflection}} (100)$$

(4) The linearity criteria is met if the %L is less than  $\pm 2$  percent for any data point generated. For each emission test, a calibration curve of the form  $y=mx$  is to be used. The slope (m) is defined for each range by the spanning process.

#### § 86.331-79 Hydrocarbon analyzer calibration.

The following steps are followed in sequence to calibrate the hydrocarbon analyzer. It is suggested, but not required that efforts be made to minimize relative response variations.

(a) If necessary, follow manufacturer's instructions for instrument start-up and basic operating adjustments.

(b) Set the oven temperature 5° C hotter than the required sample-line temperature. Allow at least one-half hour after the oven has reached temperature for the system to equilibrate.

(c) Adjust fuel flow. With the fuel and air flow rates set at the manufacturer's recommendations, introduce a 350 ppm C  $\pm 50$  ppm C span gas to the detector. Determine the response at a given fuel flow from the difference between the span-gas response and the zero-gas response. Incrementally adjust the fuel flow above and below the manufacturer's specification. Record the span and zero response at these fuel flows. A plot of the difference between the span and zero response versus fuel flow will be similar to the one shown in Fig. D79-3. Adjust the fuel flow rate to the rich side of the curve, as shown. This is initial flow rate setting and may not be the final optimized flow rate.

Figure D79-3 RESPONSE vs. FUEL FLOW

(d) Oxygen interference optimization. Choose a range where the 350 ppm C  $\pm 50$  ppm C oxygen interference check gases will fall in the upper 30%. Conduct this

test with the oven temperature set as required. Oxygen interference check gas specifications are found in § 86.308.

(1) Zero the analyzer.

(2) Span the analyzer with an oxygen interference check gas. For instruments used with gasoline-fueled engines use the 0 percent oxygen blend; Diesel engine instruments are spanned with the 21% oxygen blend.

(3) Recheck zero response. If it has changed more than 0.25 percent of full-scale repeat subparagraphs (1) and (2).

$$\%O_2I = \frac{B - \text{Analyzer response (ppm C)}}{B} (100)$$

$$\text{Analyzer response} = \left[ \frac{A}{\% \text{ of full-scale analyzer response due to A}} \right] \left[ \frac{B}{\% \text{ of full-scale analyzer response due to B}} \right] (100)$$

where

A = Hydrocarbon concentration (ppm C) of the span gas used in step (2)

B = Hydrocarbon concentration (ppm C) of the oxygen-interference check gases used in step (4)

(7) The percent of oxygen interference (%O<sub>2</sub>I) must be less than  $\pm 2\%$  for all required oxygen interference check gases prior to testing.

(8) If the oxygen interference is greater than the specifications, incrementally adjust the air flow above and below the manufacturer's specifications, repeating subparagraphs (1) through (7) for each flow.

(9) If the oxygen interference is greater than the specification after adjusting the air flow, vary the fuel flow and thereafter the sample flow, repeating subparagraphs (1) through (7) for each new setting.

(10) If the oxygen interference is still greater than the specifications, repair or replace the analyzer, FID fuel, or burner air prior to testing. Repeat this section with the repaired or replaced equipment or gases.

(e) Linearity check. For each range used check linearity as follows: (1) With the fuel flow, air flow and sample flow adjusted to meet the oxygen interference specification, zero the analyzer.

(2) Span the analyzer using a calibration gas that will provide a response of approximately 90 percent of full-scale concentration.

(3) Recheck the zero response. If it has changed more than 0.25 percent of full-scale, repeat steps (1) and (2).

(4) Record the response of calibration gases having nominal concentrations of 30, 60, and 90 percent of full-scale concentration.

(5) Perform a linear least square regression on the data generated. Use an equation of the form  $y=mx$ , where  $x$  is the actual chart deflection and  $y$  is the concentration.

(6) Use the equation  $z=y/m$  to find the linear chart deflection (2) for each calibration gas concentration (y).

(7) Determine the linearity (%L) for each calibration gas by:

$$\%L = \frac{(Z-X)}{\text{Full-Scale Linear Chart Deflection}} (100)$$

(8) The linearity criteria is met if the %L is less than  $\pm 2$  percent for any data

(4) Introduce the following oxygen interference check gases: (i) Gasoline-fueled engine analyzers; 5 and 10 percent oxygen blends.

(ii) Diesel engine analyzers; 5, 10 and 15 percent oxygen blends.

(5) Recheck the zero response. If it has changed more than 0.25 percent of full-scale, repeat the test.

(6) Calculate the percent of oxygen interference (%O<sub>2</sub>I) for each mixture in step (4).

point generated. For each emission test, a calibration curve of the form  $y=mx$  is to be used. The slope (m) is defined for each range by the spanning process.

(9) If the %L for any point is greater than  $\pm 2\%$ , the air, fuel, and sample flow-rates may be varied within the boundaries of the oxygen interference specifications.

(10) If the %L still exceeds  $\pm 2$  percent for any data point repair or replace the analyzer, FID fuel, burner air, or calibration bottles prior to testing. Repeat the procedures of this section with the repaired or replaced equipment or gases.

(f) Optimized flow rates. The fuel-flow rate, air flow-rate and sample-flow rate are defined as "optimized" at this point.

#### § 86.332-79 Oxides of nitrogen analyzer calibration.

(a) Perform a converter efficiency check, paragraph (b) of this section, every 7 days. Every 30 days perform a linearity check, paragraph (c) of this section, which must be followed by a converter efficiency check.

(b) Converter efficiency check. The apparatus described and illustrated in Figure D79-4 is to be used to determine the conversion efficiency of devices that convert NO<sub>2</sub> to NO. The following procedure is to be used for determining the values to be used in the equation below:

(1) Follow the manufacturer's instructions for instrument startup and operation. Adjust the analyzer to optimize performance.

(2) Zero the oxides of nitrogen analyzer.

(3) Connect the outlet of the NOx generator (see Figure D79-4) to the sample inlet of the oxides of nitrogen analyzer which has been set to the most common operating range.

(4) Introduce into the NOx generator analyzer-system a span gas with a NO concentration equal to approximately 80% of the most common operating range.

FIGURE D79-4. NOx CONVERTER EFFICIENCY TEST

(5) With the oxides of nitrogen analyzer in the NO mode, record the concentration of NO indicated by the analyzer.

(6) Turn on the NOx generator O<sub>2</sub> (or air) supply and adjust the O<sub>2</sub> (or air) flow rate so that the NO indicated by the analyzer is about 10% less than indicated in step 5. Record the concentration of NO in this NO+O<sub>2</sub> mixture.

(7) Switch the NOx generator to the generation mode and adjust the generation rate so that the NO measured on the analyzer is 20% of that measured in step 5. There must be at least 10% unreacted NO at this point. Record the concentration of residual NO.

(8) Switch the oxides of nitrogen analyzer to the NOx mode and measure total NOx. Record this value.

(9) Switch off the NOx generation, but maintain gas flow through the system. The oxides of nitrogen analyzer will indicate the total NOx in the NO+O<sub>2</sub> mixture. Record this value.

(10) Turn off the NOx generator O<sub>2</sub> (or air) supply. The analyzer will now indicate the total NOx in the original NO in N<sub>2</sub> mixture. This value should be no more than 5% above the value indicated in step 4.

(11) Calculate the efficiency of the NO<sub>2</sub> converter by substituting the concentrations obtained into the following equation:

$$\% \text{ Eff.} = 1 + \frac{a-b}{c-d} \times 100$$

where a = concentration obtained in step 8

b = concentration obtained in step 9

c = concentration obtained in step 6

d = concentration obtained in step 7

The efficiency of the converter should be greater than 90 percent. Adjustment of the converter temperature may be necessary to maximize the efficiency. If the converter does not meet conversion-efficiency specifications, repair or replace the unit prior to testing. Repeat

the procedures of this section with the repaired or new converter.

(c) Linearity check. For each range used check linearity as follows:

(1) With the operating parameters adjusted to meet the converter efficiency check and the quench checks, zero the analyzer.

(2) Span the analyzer using a calibration gas that will give a response to approximately 90 percent of full-scale concentration.

(3) Recheck the zero response. If it has changed more than 0.25 percent of full-scale, repeat steps (1) and (2).

(4) Record the response of calibration gases having nominal concentrations of 30, 60, and 90 percent of full-scale concentration.

(5) Perform a linear least squares regression on the data generated. Use an equation of the form  $y=mx$ , where  $x$  is the actual chart deflection and  $y$  is the concentration.

(6) Use the equation  $z=y/m$  to find the linear chart deflection (2) for each calibration gas concentration (y).

(7) Determine the linearity (%L) for each calibration gas by:

$$\%L = \frac{(z-x)}{\text{Full scale linear chart deflection}} \times 100$$

(8) The linearity criteria is met if the %L is less than  $\pm 2$  percent for any data point generated. For each emission test, a calibration curve of the form  $y=mx$  is to be used. The slope (m) is defined for each range by the spanning process.

(9) If the %L exceeds  $\pm 2$  percent for any data point generated, repair or replace the analyzer or calibration bottles prior to testing. Repeat the procedures of this section with the repaired or replaced equipment or gases.

(10) Perform a converter efficiency check, paragraph (b) of this section.

(11) The operating parameters are defined as "optimized" at this point.

#### § 86.333-79 Dynamometer calibration.

(a) If necessary, follow the manufacturer's instructions for initial start-up and basic operating adjustments.

(b) Check the dynamometer torque measurement for each range used by the following: (1) Determine the dynamometer calibration moment arm. Equipment manufacturer's data, actual measurement, or the value recorded from the previous calibration used for this subpart may be used.

(2) Warm up the dynamometer following the equipment manufacturer's specifications.

(3) Calculate the indicated torque (IT) for each calibration weight to be used by:

$$IT = \text{calibration weight (lb)} \times \text{calibration moment arm (ft.)}$$

(4) Attach each calibration weight specified in § 86.312 to the moment arm

at the calibration distance determined in step (1). Record the power measurement equipment response (ft-lb) to each weight.

(5) For each calibration weight, compare the torque value measured in step (4) to the calculated torque determined in step (3).

(6) The measured torque must be within 2 percent of the calculated torque.

(7) If the measured torque is not within 2 percent of the calculated torque, adjust or repair the system. Repeat steps 1) through (6) with the adjusted or repaired system.

#### § 86.334-79 Test procedure overview.

(a) The test consists of prescribed sequences of engine operating conditions to be conducted on an engine dynamometer. The exhaust gases generated during engine operation are sampled for specific component analysis through the analytical train. The test is applicable to engines equipped with catalytic or direct-flame afterburners, induction system modifications, or other systems, or to uncontrolled engines.

(b) The tests are designed to determine the brake-specific emissions of hydrocarbons, carbon monoxide, and oxides of nitrogen. The gasoline-fueled engine test consists of one warmup cycle and one hot cycle. The diesel engine test consists of three idle modes and five power modes at each of two speeds which span the typical operating range of diesel engines. These procedures require the determination of the concentration of each pollutant, the exhaust flow and the power output during each mode. The measured values are weighted and used to calculate the grams of each pollutant emitted per brake-horsepower hour.

(c) When an engine is tested for exhaust emissions or is operated for service accumulation on an engine dynamometer, the complete engine shall be tested, with all standard accessories which might reasonably be expected to influence emissions to the atmosphere, installed and functioning, except the fan for water cooled engines. Evaporative emission controls need not be connected if data are provided to show that normal operating conditions are maintained in the engine induction system.

(d) Except in cases of component malfunction or failure, all emission control systems installed on or incorporated in a new motor vehicle engine shall be functioning during all procedures in this subpart. Maintenance to correct component failure or malfunction shall be authorized in accordance with § 86.079-25.

#### § 86.335-79 Gasoline-fueled engine test cycle.

(a) The following test sequence shall be followed in dynamometer operation tests of gasoline-fueled heavy duty engines. Diesel engines are covered in § 86.336.

## PROPOSED RULES

Cycle No.	Mode No.	Mode	Observed torque (percent of maximum observed)	Time in mode (seconds)	Cumulative time (seconds)	Weighting factors
1	1	Idle	25	60	60	0.232
1	2	Cruise	25	60	120	0.077
1	3	PTA	25	60	180	0.147
1	4	Cruise	25	60	240	0.077
1	5	PTD	10	60	300	0.057
1	6	Cruise	25	60	360	0.077
1	7	FL	25	60	420	0.113
1	8	Cruise	25	60	480	0.077
1	9	CT	25	60	540	0.143
1	10	Cruise	25	60	600	0.077
1	11	PTA	25	60	660	0.077
1	12	Cruise	25	60	720	0.057
1	13	PTD	25	60	780	0.077
1	14	Cruise	25	60	840	0.113
1	15	FL	25	60	900	0.077
1	16	Cruise	25	60	960	0.143
1	17	CT	25	60	1,020	0.143
1	18	Idle	25	60	1,080	0.232

(b) The engine dynamometer shall be operated at a constant speed of 2000 r.p.m.  $\pm 100$  r.p.m. Speed deviations, not to exceed 200 r.p.m., will be allowed during the first ten seconds of each mode.

(c) The times in mode are the times specified in paragraph (a)  $\pm 2$  seconds.

(d) Torque for each mode must be held at the specified value  $\pm 2\%$  of the maximum torque observed. For example, mode 3 torque shall be held between 53 and 57% of maximum torque ( $55 \pm 2\%$ ).

(e) The idle operating mode shall be carried out at the manufacturer's recommended curb-idle engine speed.

Arrive at the last idle mode by closing the throttle, breaking the dynamometer to the engine idle speed, and unloading the dynamometer.

(f) The CT operating mode shall be carried out at the same engine speed as specified in paragraph (b).

#### § 86.336-79 Diesel engine test cycle.

(a) The following 13 mode test cycle shall be followed in dynamometer operation tests of heavy-duty Diesel engines. Gasoline-fueled engines are covered in § 86.335.

Mode No.	Engine speed	Observed torque (percent of maximum observed)	Time in mode (minutes)	Cumulative time (minutes)
1	Low idle	25	5	5
2	Intermediate	25	5	10
3	do.	25	5	15
4	do.	50	5	20
5	do.	75	5	25
6	do.	100	5	30
7	Low idle	100	10	(1)
8	Rated	75	5	5
9	do.	50	5	10
10	do.	25	5	15
11	do.	2	5	20
12	do.	2	5	25
13	Low idle	2	5	30

<sup>1</sup> Refer to sec. 86.341.

(b) During each mode the specified speed shall be held to within 50 rpm. Torque for each mode must be held at the specified value  $\pm 2\%$  of the maximum torque observed. For example, mode 4 torque shall be held between 48 and 52 percent of maximum torque ( $50 \pm 2\%$ ).

(c) The times in mode are the times specified in paragraph (a)  $\pm 10$  seconds.

(d) If the operating conditions specified in paragraph (b) of this section for modes 3, 4, 5, 9, 10, and 11 cannot be maintained, the Administrator may authorize deviations from the specified load conditions. Such deviations shall not exceed 10 percent of the maximum torque at the test speed. The minimum deviations, above and below the specified load, necessary for stable operation shall be determined by the manufacturer and approved by the Administrator prior to the test run. Emission tests shall be performed at each of the approved load settings, one above and one below the operating conditions specified in paragraph (a). The emission values obtained shall be calculated in accordance with § 86.331

except that the weighting factor shall be 0.04.

#### § 86.337-79 Information.

The following information, as applicable, shall be recorded for each test:

(a) Engine Description and specifications. (1) Engine identification numbers. (2) Number of hours of operation accumulated on engine.

(3) Engine-system combination.

(4) Engine displacement.

(5) Governed speed.

(6) Rated maximum horsepower and torque.

(7) Maximum horsepower and torque speeds.

(8) Air aspiration system.

(9) Curb idle rpm, gasoline-fueled engines only.

(10) Manufacturer's start-up and warm-up reference, gasoline-fueled engines only.

(11) Number of carburetors, gasoline-fueled engines only.

(12) Number of carburetor venturies, gasoline-fueled engines only.

(13) Maximum horsepower at 2000 rpm, corrected per § 86.345, gasoline-fueled engines only.

(14) Fuel consumption and maximum torque at 2000 rpm, gasoline-fueled engines only.

(15) Maximum air flow at 2000 rpm, gasoline-fueled engines only.

(16) Low idle rpm, Diesel engines only.

(17) Exhaust pipe diameter(s), Diesel engines only.

(18) Fuel injector type, Diesel engines only.

(19) Fuel consumption at maximum power and torque, Diesel engines only.

(20) Maximum exhaust system back pressure, Diesel engines only.

(21) Air inlet restriction, Diesel engines only.

(22) Maximum air flow, Diesel engines only.

(b) Test data: (1) Test number.

(2) Instrument operator.

(3) Engine operator.

(4) Date and time of day.

(5) Fuel identification, including H/C ratio.

(6) Ambient temperature in dynamometer testing room.

(7) Engine intake air temperature and humidity for each mode.

(8) Barometric pressure, before and after test.

(9) Observed engine torque for each mode.

(10) Maximum observed torque for intermediate and rated speeds, Diesel engines only.

(11) Maximum observed torque at 2000 rpm, gasoline-fueled engines only.

(12) Intake air flow and depression for each mode.

(13) Fuel flow and temperature for each mode.

(14) Sample-transport component surface temperatures, sample pump, heated filters and sample line temperature(s).

(15) Sample-line residence time (Refer to § 86.329).

(16) Date of most recent analytical assembly calibration.

(17) Record all pertinent instrument information such as tuning, gain, serial numbers, detector number, calibration curve numbers, etc. As long as this information is traceable it may be summarized by system number or analyzer identification numbers.

(18) Recorder chart. Identify for each test mode; zero traces for each range used—calibration or span traces for each range used—emission concentration traces and associated analyzer range(s)—start and finish of each test.

(19) Record chart speed of recorder and date of last speed calibration.

(20) Record engine torque and engine r.p.m. continuously on the same chart.

§ 86.338-79 Exhaust measurement accuracy.

(a) The analyzers must be operated between 20 percent and 95 percent of full-scale chart deflection (millivolt output) for nonlinear instruments (20 to 100 percent for linear instruments) during the measurement of the emissions for each mode. The exceptions to the lower limit of this operating rule are:

(1) The analyzers response may be less than 20 percent of full-scale if the full-scale value is 120 ppm (or ppm C) or less.

(2) The analyzers response may be less than 20 percent of full-scale if the emissions from the engine are erratic and the integrated chart-deflection value is greater than 20 percent of full-scale.

(3) For gasoline-fueled engines, the analyzer response may be less than 20 percent of full-scale during the initial part of the CT mode provided that the integrated chart-deflection value is greater than 20 percent of full-scale.

(4) The analyzer response may be less than 20 percent of full-scale if the contribution of all modes read below the 20 percent level is less than 5 percent by mass of the final test results.

§ 86.339-79 Pre-test procedures.

(a) HC, CO, CO<sub>2</sub>, and NOx: Allow a minimum of 2 hours warmup for the HC, CO, CO<sub>2</sub>, and NOx analyzers. This period is not necessary if the analyzer is left in a standby or operating condition.

(b) Replace or clean the filter elements and then vacuum leak check the system, § 86.328(a). Allow the heated sample-line, filters, and pumps to reach operating temperature.

(c) Perform the following system checks: (1) Prior to gasoline-fueled engine tests, purge the NO<sub>x</sub>-NO converter with air (zero grade air, room air, or O<sub>2</sub>) for a minimum of 30 minutes. The converter must be at operational temperature while purging. Minimum purge-rate is 40 cc/minute.

(2) Check sample-line temperature.

(3) Check sample-line residence time. Sample-line residence time may be applied from the most recent check of residence time if all of the following are met: (i) The same size and type of pump is used.

(ii) The sample line I.D. is the same and the length is equal to or shorter than the tested line.

(iii) Pressure gauges P1, P2, P3, P4, and P5 read the same pressure ( $\pm 15\%$  of previous value).

(4) A hang-up check may be performed.

(d) Introduce the zero-grade gases at the same flow rates and pressures used to calibrate the analyzers and zero the analyzers on the lowest anticipated range that may be used during the test. Immediately prior to each test (segment, for Diesel engines), obtain a stable zero for each anticipated range that may be used during the test.

(e) Introduce span gases to the instruments under the same flow conditions as were used for the zero gases. Adjust the instrument gains on the lowest range to be used to give the desired value. Span-gases should have a concentration greater than 70% of full-scale for each range used. A significant shift in gain setting indicates an instrument or system problem. If necessary, recheck spanning procedure and span-gas concentration-labels. Immediately prior to each test and also prior to each segment of the diesel test, record the response to the span-gas and the span-gas concentration for each range that may be used during the test.

(f) Check zero responses. If they have changed more than 0.25 percent of full scale repeat paragraphs (d) and (e).

(g) Check instrument flow rates and pressures. Record the values of gauges G1 and G2.

## PROPOSED RULES

cedure and span-gas concentration-labels. Immediately prior to each test and also prior to each segment of the diesel test, record the response to the span-gas and the span-gas concentration for each range that may be used during the test.

(f) Check zero responses. If they have changed more than 0.25 percent of full scale repeat paragraphs (d) and (e).

(g) Check instrument flow rates and pressures. Record the values of gauges G1 and G2.

#### § 86.340-79 Gasoline-fueled engine dynamometer test run.

(a) This section applies to gasoline-fueled engines only. Diesel engines are covered in § 86.341.

(b) (1) Mount test engine on the engine dynamometer.

(2) Install instrumentation and sample probe as probed.

(c) Precondition the engine by the following continuous steps. (1) The engine shall be started and operated at: (i) zero load in accordance with the manufacturer's start up and warm up procedures for 1 minute  $\pm 30$  sec.

(ii) a torque equivalent to  $10 \pm 3$  percent of the most recent determination of maximum torque for 4 minutes  $\pm 30$  sec at 2000 rpm.

(iii) a torque equivalent to  $55 \pm 5$  percent of the most recent determination of maximum torque for 35 minutes  $\pm 1$  min at 2000 rpm.

(2) If tested under the provisions of § 86.077-29 check specifications as required. This check must be performed within 10 minutes after the completion of engine preconditioning.

(3) Determine the maximum torque of the engine at 2000 rpm  $\pm 100$  rpm.

(4) Operate the engine with the throttle fully-opened for a maximum of three minutes. During the second minute of operation, record the high and low torque readings. The average of these two readings will be the maximum torque value at 2000 rpm.

(5) Calculate the torque corresponding to 10, 25, 55, and 90 percent of the observed maximum torque value.

(6) Determine the analyzer ranges required for each mode specified in § 86.335 to meet the range specifications of § 86.338. The engine must not be operated for more than 5 minutes.

(7) The engine shall be turned off and allowed to stand for at least 1 hour, but not more than 2 hours, at an ambient temperature of  $25^\circ\text{C} \pm 5^\circ\text{C}$  ( $77^\circ\text{F} \pm 9^\circ\text{F}$ ).

(8) The following steps shall be taken for each test:

(1) Maintain dynamometer test cell ambient temperature at  $25^\circ\text{C} \pm 5^\circ\text{C}$  ( $77^\circ\text{F} \pm 9^\circ\text{F}$ ).

(2) Observe pre-test procedures, § 86.339.

(3) Start cooling system.

(4) Start engine and operate in accordance with manufacturer start-up and warm-up procedures. The duration of the warm-up procedure will be 5 minutes  $\pm 30$  seconds.

(5) Read and record all non-modal data as required in § 86.337.

(6) Release the choke idle-stop (if necessary) and return the engine throttle control to the curb idle position, start sample flow and recorders, and begin test sequence of § 86.335.

(7) Should it be determined that the test must be rerun, then only the soak specified in subparagraph (c) (5) need be performed prior to paragraph (d).

(8) Perform the test cycle, § 86.335 and continuously record exhaust gas concentrations.

(9) The engine speed and load must be maintained within the requirements of § 86.343.

(e) Exhaust gas measurements. (1) Measure HC, CO, CO<sub>2</sub>, and NOx volume concentration in the exhaust sample. Record data specified in § 86.337. Should the analyzer response exceed 95% of full-scale value for non-linear instruments (100% of full-scale value for linear instruments) or respond less than 20% of full-scale value (for all instruments), the next higher or lower analyzer range shall be used per § 86.338. For exceptions to the lower limit see § 86.338. Should the fuel flow instrument read below 20% of the full-scale value, a flow measurement unit with a lower scale must be used unless the option in § 86.314 is desired.

(2) For each analyzer, each range that may be used during a test must have the zero and span responses recorded prior to the execution of that test. Only the range(s) used to measure the emissions during a test are required to have their zero and span recorded after the completion of the test.

(3) If during an emission test the value of gauges G1 or G2 differs by more than 4 inches of water from the pre-test value the test is void.

#### § 86.341-79 Diesel engine dynamometer test run.

(a) This section applies to Diesel engines only. Gasoline-fueled engines are covered in § 86.340.

(b) The temperature of the air supplied to the engine shall be between  $68^\circ\text{F}$  and  $86^\circ\text{F}$ . The fuel temperature at the pump inlet shall be  $100^\circ\text{F} \pm 10^\circ\text{F}$ . The observed barometric pressure shall be between 28.5 inches and 31 inches Hg. Higher air temperature or lower barometric pressure may be used, if desired, but no allowance shall be made for increased emissions because of such conditions.

(c) The governor and fuel system shall have been adjusted to provide engine performance at the levels in the application for certification required under § 86.077-21.

(d) The following steps shall be taken for each test: (1) Install instrumentation and sample probes as required.

(2) Start cooling system.

(3) Precondition the engine in the following manner: (i) Operate the engine at idle for 2 minutes.

(ii) Operate the engine at rated speed and maximum horsepower for 10 minutes.

(iii) Longer preconditioning times may be used only if prior approval is obtained from the Administrator.

(4) Within a total elapsed time of 10 minutes, determine by experimentation the maximum torque at the rated and intermediate speeds.

(5) Calculate the torque corresponding to 2, 25, 50, 75, and 100 percent of the maximum observed torque for the rated and intermediate speeds.

(6) Observe pre-test procedures, § 86.339.

(7) Read and record all data required by § 86.337.

(8) Start the test cycle, § 86.336, within 10 minutes, after determining test load using the torque values determined in subparagraph (c) (5).

(9) Test modes 1 through 6, mode 7, and modes 8 through 13 are considered individual test segments and must be performed within the cumulative time indicated in § 86.336. Test segments may be repeated if the requirements for testing under this subpart are met.

(10) If a delay of more than 10 minutes occurs at the following points, the test is void. The test sequence may be restarted at subparagraph (c) (6).

(i) At the end of mode 6 and the beginning of modes 7 or 8.

(ii) At the end of mode 7 and the beginning of modes 8 or 9.

(iii) At the end of mode 13 and the beginning of mode 8.

(11) Continuously record the analyzer's response to the exhaust gas during each test segment except during mode 7.

(12) Record the analyzer's response to exhaust gas during the last 4 minutes of mode 7.

(13) Read and record the modal data as specified in § 86.337 during the last 2 minutes of each mode.

(14) The engine speed and load must be maintained within the requirements of § 86.336 during the last 2 minutes of each mode. If the requirement is not met for all modes during a test segment, that portion of the test is void. The test sequence may be restarted under the provisions of subparagraph (c) (9) of this section.

(15) Fuel flow during the idle or 2 percent load conditions may be determined just prior to or immediately following the dynamometer sequence, if longer times are required for accurate measurements.

(e) Exhaust gas measurements. (1) Measure HC, CO, CO<sub>2</sub>, and NO<sub>x</sub> volume concentration in the exhaust sample. Record data specified in § 86.337. Should the analyzer response exceed 95% of full scale value for nonlinear instruments (100% of full-scale value for linear instruments) the next higher or lower analyzer range shall be used § 86.338. For exceptions to the lower limit see § 86.338. Should the fuel flow instrument read below 20% of full-scale value, a smaller flow measurement unit must be used unless the option in § 86.314 is desired.

(2) Each analyzer range that may be used during a test segment must have the

zero and span responses recorded prior to the execution of that test segment. Only the range(s) used to measure the emissions during a test segment are required to have their zero and span recorded after the completion of the test segment.

(3) The span check for mode 7 may be included in either the first segment or the last segment of the test.

(4) If there is no delay between the end and beginning of modes 6 and 7, and 7 and 8, the span check at the end of mode 6 may be used for the before-segment span check for the last segment of the test.

(5) Filter elements may be changed during the first part of mode 7.

(6) If, during the emission measurement portion of a test segment, the value of gauges of G1 or G2 differs by more than 4 inches of water from the pre-test value the test segment is void.

§ 86.312-79 Post-test procedures.

(a) Immediately after the completion of the test, record for each analyzer the zero and span response for each range used during the preceding test segment.

(b) Begin a hang-up check within 10 minutes of the completion of the post-test span check. Use the following procedure:

(1) Zero the HC analyzer on the lowest range used during the test.

(2) Span the HC analyzer.

(3) Check zero response. If it has shifted more than 0.25 percent of full scale, repeat steps (1) and (2).

(4) Introduce an HC zero-grade gas into the sample probe or V2.

(5) Within 50 seconds for gasoline-fueled engine tests or 4 minutes for Diesel engine tests, after the zero gas was introduced, the difference between the span-zero response and hang-up zero response must not be greater than 5.0 percent of full-scale or the test is void.

(6) Check the zero response. If it has shifted more than 0.25 percent of full scale repeat the hang-up check.

(c) If during the test, the filter element(s) were replaced or cleaned, a vacuum check must be performed, see § 86.328, immediately after the hang up check. If the vacuum side leak-check does not meet the requirements of § 86.328 the test is void.

(d) For a valid test, the analyzer drift between the before-test and after-test (before segment and after-segment for Diesels) span-checks for each analyzer must meet the following requirements:

(1) The span drift (defined as the difference between the zero-response and the span-response) must not exceed 2.0 percent of full-scale for each range used.

(2) The zero-response drift must not exceed 2.0 percent of full-scale.

(i) If the zero-response drift is less than 2.0 percent of full scale the before-segment zero response is to be used.

(ii) If the zero-response drift is between 2.0 and 6.0 percent of full-scale, a zero-response correction based on an

interpolation which is linear with time is acceptable.

§ 86.313-79 Chart reading.

(a) A computer or any other automatic data processing device(s) may be used as long as the system meets the requirements of this subpart.

(b) Determine the location on the chart of the analyzer responses corresponding to the end of each mode.

(c) For gasoline-fueled engines determine whether the test cycle was run in accordance with § 86.335 by observing either chart event marks, speed trace, torque trace, or concentration traces. The test will be invalidated if there is a deviation by more than:

(1) two seconds from the specified time for each mode, or

(2) 2 percent of maximum torque during each mode excluding the first 10 seconds of each mode, or

(3) 200 rpm during the first 10 seconds of each mode, or 100 rpm during the remainder of each mode.

(d) Determine chart deflections. (1) Locate the last 10 seconds of each gasoline-fueled engine mode except CT. Locate the last 50 seconds of each gasoline-fueled engine CT mode. For all Diesel engine modes locate the last 60 seconds.

(2) (i) Determine for each second (or less) the percent of full scale deflection of the CO<sub>2</sub>, CO, HC, and NO<sub>x</sub> analyzers for each mode time period.

(ii) Option for Diesel engine modes: If the deviation from a constant value straight line (other than instrument noise) during this 60 seconds is less than ±5 percent of full scale, a simple average of the interpreted straight line may be used as the chart deflection for the entire 60 seconds. For linear instruments the straight line need not be constant value.

(3) Other methods of determining the percent of full-scale deflection of the analyzers may be used only with prior approval by the Administrator.

(e) Determine CO, CO HC and NO<sub>x</sub> concentrations. (1) For linear instruments, average the chart deflections for each mode time period. Determine the concentration for this average chart deflection using calibration data.

(2) For non-linear instruments, calculate concentrations for each chart deflection during each mode time period. Take the average of these concentrations.

(3) If the option in subparagraph (d) (2) (ii) is employed, then those chart deflections are applied to this paragraph.

(4) For purposes of this paragraph, calibration data includes calibration curves, linearity curves, span gas response and zero shift corrections.

## § 86.344-79 Humidity calculations.

(a) The following abbreviations (and units) are used in this section:

BARO = Barometric pressure (Pa)  
H = Specific humidity (gm H<sub>2</sub>O/gm of dry air)  
K = 0.6219 gm H<sub>2</sub>O/gm dry air  
M<sub>air</sub> = Molecular weight of air = 28.967  
M<sub>H<sub>2</sub>O</sub> = Molecular weight of water = 18.01534  
P<sub>DB</sub> = Saturation vapor pressure of water at the dry bulb temperature (Pa)  
P<sub>DP</sub> = Saturation vapor pressure of water at the dewpoint temperature (Pa)  
P<sub>v</sub> = Partial pressure of water vapor (Pa)  
P<sub>WB</sub> = Saturation vapor pressure of water at the wet bulb temperature (Pa)  
T<sub>DB</sub> = Dry bulb temperature (°K)  
T<sub>WB</sub> = Wet bulb temperature (°K)  
Y = Water-vapor volume concentration

(b) The specific humidity (H) is defined by equation (1).

$$H = \frac{K P_v}{\text{BARO} - P_v} \quad (1)$$

(c) The partial pressure of water vapor may be determined in two manners:

(1) A dew point device may be used. In that case:

$$P_v = P_{DP}$$

(2) A wet-bulb, dry-bulb method may be used. In that case "Fornells equation" (eq. (2)) is used.

$$P_v = P_{WB} - 0.000660 (T_{DB} - T_{WB}) \text{BARO}$$

(1 + 0.00115 (T<sub>WB</sub> - 273.15)) (2)

(d) (1) The saturation vapor pressure (P<sub>WB</sub>) of water at the wet-bulb temperature is defined by equation (3) (Ref. Wexler and Greenspan, equation (23), National Bureau of Standards).

$$P_{WB} = \exp \left[ B \ln T_{WB} + \sum_{i=0}^n \frac{F_i T_{WB}^i}{i!} \right] \quad (3)$$

where (P<sub>WB</sub> is in Pascals (Pa))

T<sub>WB</sub> = Wet-bulb temperature (°K)  
B = -12.13079  
F<sub>0</sub> = -2.4922(10)<sup>-1</sup>  
F<sub>1</sub> = -7.4231865(10)<sup>-1</sup>  
F<sub>2</sub> = 96.163147  
F<sub>3</sub> = 2.4117616(10)<sup>-2</sup>  
F<sub>4</sub> = -1.3109119(10)<sup>-3</sup>  
F<sub>5</sub> = -1.4469154(10)<sup>-4</sup>  
F<sub>6</sub> = 2.1701283(10)<sup>-5</sup>  
F<sub>7</sub> = -3.610258(10)<sup>-6</sup>  
F<sub>8</sub> = 3.550519(10)<sup>-7</sup>  
F<sub>9</sub> = -1.4317(10)<sup>-8</sup>

(2) The table in Figure D79-5 may be used in lieu of equation (3).

(c) The saturated vapor pressure of water at the dry-bulb temperature (P<sub>DB</sub>) is found (if required) by using dry-bulb absolute temperature (°K) in equation (3).

(f) The percent of relative humidity (RH) (if required) is defined by equation (1).

$$RH = \frac{P_v}{P_{DB}} (100) \quad (4)$$

(g) The water-vapor volume concentration of the engine intake air (Y) is defined by equation (5).

$$Y = \frac{(H) (M_{air})}{(M_{H_2O})} = \frac{P_v}{\text{BARO} - P_v} \quad (5)$$

FIGURE D79-5.—Saturation vapor pressure over water (pascals)

## § 86.345-79 Emission calculations.

(a) The following abbreviations (and units) are used in this section.

α = Atomic hydrogen/carbon ratio of the fuel  
φ = Dry fuel-air ratio (measured)/fuel-air ratio (stoichiometric)

BARO = Barometric pressure (in. Hg A)

BHP = Brake horsepower

BSCO = Brake specific carbon monoxide emissions, (gm/BHP-HR)

BSFC = Brake specific fuel consumption (lb/BHP-HR)

BSHC = Brake specific hydrocarbon emissions (gm/BHP-HR)

BSNO<sub>x</sub> = Brake specific oxides of nitrogen emissions (gm/BHP-HR)

DCO = CO volume concentration in exhaust, ppm (dry)

DCO<sub>2</sub> = CO<sub>2</sub> volume concentration in exhaust, % (dry)

DIIC = HC volume concentration in exhaust, ppm C (dry)

DKNO = NO volume concentration in exhaust, in ppm (dry and humidity corrected)

EIP = Engine intake pressure (in. Hg A)

BARO = inlet depression.

f<sub>a</sub> = Measured dry fuel-air ratio

H = Humidity of the inlet air in grain of water per pound of dry air = (0.0748/453.59) (gm. H<sub>2</sub>O/gm. air)

K = Water - gas equilibrium constant = 3.5

KNO<sub>x</sub> = Humidity correction factor for oxides of nitrogen

K<sub>w</sub> = Wet to dry correction factor

M<sub>c</sub> = Atomic weight of carbon

(M<sub>c</sub> + M<sub>H</sub>) = Mean molecular weight of the fuel per carbon atom

M<sub>c</sub> = Atomic weight of CO

M<sub>H</sub> = Molecular weight of hydrogen

M<sub>NO<sub>x</sub></sub> = Molecular weight of nitrogen dioxide (NO<sub>2</sub>)

T = Temperature of inlet air °F

W<sub>CO</sub> = Mass rate of CO in exhaust, grams/hr.

W<sub>I</sub> = Mass flow rate of fuel used in the engine, grams/hr = (453.59) X (W<sub>I</sub> lbs/hr)

W<sub>IIIC</sub> = HC volume concentration in exhaust, ppm C (wet)

W<sub>NO<sub>x</sub></sub> = Mass rate of NO<sub>x</sub> in exhaust, grams/hr

Y = H<sub>2</sub>O volume concentration of intake air, % (see § 86.344)

(b) Determine the exhaust species volume concentrations to a dry basis per the following:

(c) Convert the measured hydrocarbon (HC) volume concentrations to a dry basis per the following:

Wet-concentrations = K<sub>w</sub> X dry-concentrations

K<sub>w</sub> is defined by the equation in Figure D79-6.

(d) Multiply the dry nitric oxide volume concentrations by the following humidity correction factor: (1) Gasoline-fueled engines:

$$K_{NO_x} = 0.6272 + 0.0062911 - 0.000017611$$

(2) Diesel engines:

$$K_w = \frac{1}{1 + \left[ \frac{\left( \frac{DCO_2}{10^2} + \frac{DCO}{10^6} \right) + \frac{2Y}{\theta} \left( \frac{DCO_2}{10^2} + \frac{DCO}{10^6} + \frac{WHC}{10^6} \right) \left( 1 + \frac{\alpha}{4} \right)}{2 \left( 1 + \frac{\frac{DCO}{10^6}}{\left( \frac{DCO_2}{10^2} \right)^K} \right)} \right]}$$

Figure D79-6  $K_w$  - WET TO DRY CORRECTION FACTOR

$$(f/a) = \frac{1}{\bar{X}} \left( \frac{DCO}{2\bar{X}} \left( \frac{1}{10^6} \right)^b \right) + \frac{\alpha}{4} \left( 1 - \frac{DHC}{\bar{X}(10^6)} \right) - \frac{75}{\bar{X}} \left( \frac{K}{\left( \frac{DCO}{10^2} \right)^b} \right) + \left( \frac{1}{1 - \frac{DHC}{\bar{X}(10^6)}} \right)$$

$$(f/a)_{stoich} = \frac{M_C + \alpha M_H}{138.18 \left( 1 + \frac{\alpha}{4} \right)}$$

where

$$\bar{X} = DCO_2/10^2 + DCO/10^6 + DHC/10^6$$

(2) When calculating the (f/a) ratio to be used in determining  $K_w$ , use only the airflow entering the combustion chamber. This may require subtraction of bleed-air, etc. from the measured airflow.

(f) (1) Data validation: Compare the calculated dry (f/a) with the measured fuel and air flow. For a valid test the emission calculated (f/a) must agree within 10% of the measured (f/a) for each mode. Gasoline-fueled engine idle and CT modes and Diesel engine idle and

2 percent modes do not have to meet this requirement.

(2) Fuel/Air ratio comparison: When comparing measured (f/a) ratio to an emissions calculated (f/a) ratio, the measured airflow (in terms of mass) is the total mass of air entering the exhaust pipe. This may include additions of air mass to the exhaust pipe by an air injection system.

(g) Calculate the mass emissions of each species in grams per hour for each mode as follows:

$$(1) \text{ HC grams/hr} = W_{HC} = \frac{DHC}{10^4} W_f$$

$$(2) \text{ CO grams/hr} = W_{CO} = \frac{M_{CO} \frac{DCO}{10^4} W_f}{(M_C + \alpha M_H) \left( \frac{DCO}{10^4} + DCO_2 + \frac{DHC}{10^4} \right)}$$

$$(3) \text{ NO}_x \text{ grams/hr} = W_{NO_x} = \frac{M_{NO_2} \frac{DKNO}{10^4} W_f}{(M_C + \alpha M_H) \left( \frac{DCO}{10^4} + DCO_2 + \frac{DHC}{10^4} \right)}$$

(h) (1) For gasoline-fueled engines. Weight the mass values of BHP,  $W_{HC}$ ,  $W_{CO}$ ,  $W_f$ , and  $W_{NO_x}$  for each mode by multiplying the modal mass values by the appropriate modal weighting factor prescribed by § 86.335.

(2) For Diesel fueled engines. Weight the values of BHP,  $W_{HC}$ ,  $W_{CO}$ ,  $W_f$ , and  $W_{NO_x}$  as follows:

(i) Average the values obtained from the three idle modes and multiply this value by (0.2/3). Substitute this value for each of the three idle modes.

(ii) Weight the remaining modes by multiplying the values by 0.08.

(i) Calculate the brake specific emissions for

(1) each gasoline-fueled engine test cycle, and

(2) each Diesel engine test by summing the weighted values (BHP,  $W_{HC}$ ,  $W_{CO}$ , and  $W_{NO_x}$ ) from each mode as follows:

$$BSHC(i) = \frac{\sum \text{weighted } W_{HC}}{\sum \text{weighted BHP}}$$

$$BSCO(i) = \frac{\sum \text{weighted } W_{CO}}{\sum \text{weighted BHP}}$$

$$BSNO_x(i) = \frac{\sum \text{weighted } W_{NO_x}}{\sum \text{weighted BHP}}$$

(i) = Test cycle number (i=1, 2), gasoline-fueled engines only.

(j) Calculate the brake specific fuel consumption (BSFC) from the non-weighted BHP and  $W_f$  for each mode. Gasoline-fueled engine idle and CT modes and Diesel idle modes are excluded.

$$BSFC = \frac{W_f}{\text{Corrected BHP}}$$

where

Corrected BHP

$$= BHP \left[ \frac{29.00}{T+459.69} \right] \left[ \frac{T+459.69}{85+459.69} \right]^n$$

where

$n=0.5$  for gasoline-fueled engines

$=0.7$  for diesel engines

(2) Other methods of correcting power to determine BSFC may be used only with prior approval of the Administrator.

(k) Calculate the weighted brake specific fuel consumption (WBSFC) for

(1) each gasoline engine test cycle, and

(2) each diesel engine test by summing the weighted values ( $W_f$  and corrected BHP) from each mode as follows:

$$WBSFC(i) = \frac{\sum \text{weighted } W_f}{\sum \text{weighted corrected BHP}}$$

$$W_f = \text{Fuel flow in lb/hr}$$

(i) = Test cycle number (i=1, 2), gasoline-fueled engines only.

(1) For gasoline-fueled engines. Calculate the brake specific emissions and fuel consumption for the complete test as follows:

$$\begin{aligned} BSHC(T) &= 0.35 BSHC(1) + 0.65 BSHC(2) \\ BSHC(T) &= 0.35 BSHC(1) + 0.65 BSHC(2) \\ BSCO(T) &= 0.35 BSCO(1) + 0.65 BSCO(2) \\ BSNO_x(T) &= 0.35 BSNO_x(1) + 0.65 BSNO_x(2) \\ WBSFC(T) &= 0.35 WBSFC(1) + 0.65 WBSFC(2) \end{aligned}$$

12. The title to Subpart H is revised to read as follows:

Subpart H—Emission Regulations for New 1977 and 1978 Model Year Gasoline-Fueled Heavy Duty Engines; Test Procedures

13. Section § 86.777-1 is revised to read as follows:

§ 86.777-1 General applicability.

The provisions of this subpart apply to new 1977 and 1978 model year

gasoline-fueled heavy duty engines.

14. New sections § 86.879-5 through § 86.879-14 are added to subpart I and read as follows:

§ 86.879-5 Test procedures.

The procedures described in this and subsequent sections will be the test program to determine the conformity of engines with the standard set forth in § 86.077-11(a).

(a) The test consists of a prescribed sequence of engine operating conditions on an engine dynamometer with continuous examination of the exhaust gases. The test is applicable equally to controlled engines equipped with means for preventing, controlling, or eliminating smoke emissions and to uncontrolled engines.

(b) The test is designed to determine the opacity of smoke in exhaust emissions during those engine operating conditions which tend to promote smoke from Diesel-powered vehicles.

(c) The test procedure begins with a warm engine which is then run through preloading and preconditioning operations. After an idling period, the engine is operated through acceleration and lugging modes during which smoke emission measurements are made to compare with the standards. The engine is then returned to the idle condition and the acceleration and lugging modes are repeated. Three sequences of acceleration and lugging constitutes the full set of operating conditions for smoke emission measurement.

(d) Except in cases of component malfunction or failure, all emission control systems installed on or incorporated in a new motor vehicle engine shall be functioning during all procedures in this subpart. Maintenance to correct component malfunction or failure shall be authorized in accordance with § 86.077-24.

§ 86.879-6 Diesel fuel specifications.

The requirements of this section are set forth in § 86.307.

§ 86.879-7 Dynamometer operation cycle for smoke emission tests.

(a) The following sequence of operations shall be performed during engine dynamometer testing of smoke emissions, starting with the dynamometer preloading determined and the engine preconditioned (§ 86.879-12(c)).

(1) *Idle mode.* The engine is caused to idle for 5 to 5.5 minutes at the manufacturer's recommended low idle speed. The dynamometer controls shall be set to provide minimum load by turning the load switch to the "off" position or by adjusting the controls to the minimum load position.

(2) *Acceleration mode.* (i) The engine speed shall be increased to 200±50 r.p.m. above the manufacturer's recommended low idle speed within 3 seconds.

(ii) Immediately upon completion of the mode specified in paragraph (a) (2) (i) of this section, the throttle shall be moved rapidly to, and held in, the fully-open position. The inertia of the engine and the dynamometer, or alternately a preselected dynamometer load, shall be used to control the acceleration of the

engine so that the speed increases to 85 percent of the rated speed in 5±1.5 seconds. This acceleration shall be linear within 100 r.p.m. as specified in § 86.879-13(c).

(iii) After the engine reaches the speed required in paragraph (a) (2) (ii) of this section, but before the speed exceeds 90 percent of the rated speed, the throttle shall be moved rapidly to, and held in, the fully-closed position. Immediately after the throttle is closed, the preselected load required to perform the acceleration in paragraph (a) (2) (iv) of this section shall be applied.

(iv) When the engine decelerates to the intermediate speed (within 50 r.p.m.), the throttle shall be moved rapidly to, and held in, the fully-open position. The preselected dynamometer load which was applied during the preceding transition period shall be used to control the acceleration of the engine so that the speed increases to at least 95 percent of the rated speed in 10±2 seconds.

(3) *Lugging mode.* (i) Immediately upon completion of the preceding acceleration mode, the dynamometer controls shall be adjusted to permit the engine to develop maximum horsepower at rated speed. This transition period shall be 50 to 60 seconds in duration. During the last ten seconds of this period, the engine speed shall be maintained within 50 r.p.m. of the rated speed, and the power (corrected, if necessary, to rating conditions) shall be no less than 95 percent of the maximum horsepower developed at the zero-hour point.

(ii) With the throttle remaining in the fully-open position, the dynamometer controls shall be adjusted gradually so that the engine speed is reduced to the intermediate speed (within 50 r.p.m.). This lugging operation shall be performed smoothly over a period of 35±5 seconds. The rate of slowing of the engine shall be linear, within 100 r.p.m., as specified in § 86.879-13(c).

(4) *Engine unloading.* Immediately upon completion of the preceding lugging mode, the dynamometer and engine shall be returned to the idle condition described in paragraph (a) (i) of this section.

(b) The procedures described in paragraphs (a) (1) through (a) (4) of this section shall be repeated until three consecutive valid cycles have been completed. If three valid cycles have not been completed after a total of six consecutive cycles have been run, the engine shall be preconditioned by operation at

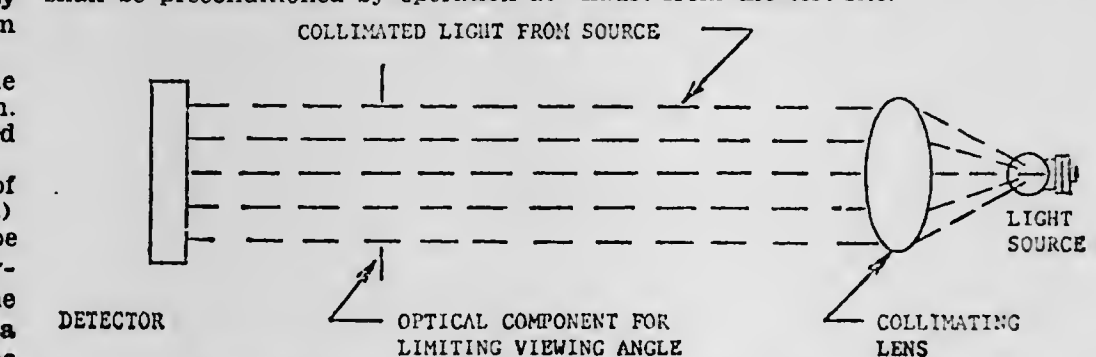

Figure I79-1 EPA SMOKE METER OPTICAL SYSTEM (SCHEMATIC).

maximum horsepower at rated speed for 10 minutes before the test sequence is repeated.

§ 86.879-8 Dynamometer and engine equipment.

The following equipment shall be used for smoke emission testing of engines on engine dynamometers.

(a) An engine dynamometer with adequate characteristics to perform the test cycle described in § 86.879-7.

(b) An engine cooling system having sufficient capacity to maintain the engine at normal operating temperatures during conduct of the prescribed engine tests.

(c) A noninsulated exhaust system extending 15±5 feet from the exhaust manifold, or the crossover junction in the case of Vee engines, and presenting an exhaust back pressure within ±0.2 inch Hg of the upper limit at maximum rated horsepower, as established by the engine manufacturer in his sales and service literature for vehicle application. A conventional automotive muffler of a size and type commonly used with the engine being tested shall be employed in the exhaust system during smoke emission testing. The terminal 2 feet of the exhaust pipe shall be circular cross section and be free of elbows and bends. The end of the pipe shall be cut off squarely. The terminal 2 feet of the exhaust pipe shall have a diameter in accordance with the engine being tested, as specified below:

Maximum rated horsepower:	Exhaust pipe diameter (inches)
Less than 101.....	2
101-200.....	3
201-300.....	4
301 or more.....	5

(d) An engine air inlet system presenting an air inlet restriction within ±1 inch of water of the upper limit for the engine operating condition which results in maximum air flow, as established by the engine manufacturer in his sales and service literature, for the engine being tested.

§ 86.879-9 Smoke measurement system.

(a) *Schematic drawing.* The Figure I79-1 is a schematic drawing of the optical system of the light extinction meter.

(b) *Equipment.* The following equipment shall be used in the system:

(1) Adapter—the smoke meter optical unit may be mounted on a fixed or movable frame. The normal unrestricted shape of the exhaust plume shall not be modified by the adapter, the meter, or any ventilator system used to remove the exhaust from the test site.

(2) **Smokemeter** (light extinction meter)—continuous recording, full-flow light obscuration meter. It shall be positioned near the end of the exhaust pipe so that a built-in light beam traverses the exhaust smoke plume which issues from the pipe at right angles to the axis of the plume. The light source is an incandescent lamp operated at a constant voltage of not less than 15 percent of the manufacturer's specified voltage. The lamp output is collimated to a beam with a nominal diameter of 1.125 inches. The angle of divergence of the collimated beam shall be within 4° included angle. A light detector, directly opposed to the light source, measures the amount of light blocked by the smoke in the exhaust. The detector sensitivity is restricted to the visual range and comparable to that of the human eye. A collimating tube with apertures equal to the beam diameter is attached to the detector. (It restricts the viewing angle of the detector to within 16° included angle.) An amplified signal corresponding to the amount of light blocked is recorded continuously on a remote recorder. An air curtain across the light source and detector window assemblies may be used to minimize deposition of smoke particles on those surfaces provided that it does not measurably affect the opacity of the plume. The meter consists of two units, an optical unit and remote control unit. Light extinction meters employing substantially identical measurement principles and producing substantially equivalent results but which employ other electronic and optical techniques may be used only after being approved in advance by the Administrator.

(3) **Recorder**—a continuous recorder, with variable chart speed over a minimal range of 0.5 to 8.0 inches per minute (or equivalent) and an automatic marker indicating 1-second intervals shall be used for continuously recording the exhaust gas opacity, engine rpm and throttle position. The recorder shall be equipped to indicate only when the throttle is in the full-open or fully-closed position. The recorder scale for opacity shall be linear and calibrated to read from 0 to 100 percent opacity full scale. The opacity trace shall have a resolution within 1 percent opacity. The recorder scale for engine r.p.m. shall be linear and have a resolution of 30 r.p.m. The throttle position trace must clearly indicate when the throttle is in the fully-open and fully-closed positions. Any means other than a strip-chart recorder may be used provided it produces a permanent visual data record of quality equal to or better than that described above.

(4) The recorder used with the smoke-meter shall be capable of full-scale deflection in 0.5 second or less. The smoke-meter-recorder combination may be damped so that signals with a frequency higher than 10 cycles per second are attenuated. A separate low-pass electronic filter with the following performance characteristics may be installed between the smokemeter and the recorder to achieve the high-frequency attenuation.

(i) 3 decibel point—10 cycles per second.

(ii) Insertion loss—zero  $\pm 0.5$  decibels.

(iii) Selectivity—12 decibels per octave above 10 cycles per second.

(iv) Attenuation—27 decibels down at 40 cycles per second minimum.

(c) **Assembling equipment.** (1) The optical unit of the smokemeter shall be mounted radially to the exhaust pipe so that the measurement will be made at right angles to the axis of the exhaust plume. The distance from the optical centerline to the exhaust pipe outlet shall be  $5 \pm 1$  inch. The full flow of the exhaust stream shall be centered between the source and detector apertures (or windows and lenses) and on the axis of the light beam.

(2) Power shall be supplied to the control unit of the smokemeter in time to allow at least 15 minutes for stabilization prior to testing.

§ 86.879-10 Information to be recorded.

The following information, as applicable, shall be recorded for each test.

(a) Engine Description and specifications. (1) Engine identification numbers.

(2) Number of hours of operation accumulated on engine.

(3) Engine-system combination.

(4) Engine displacement.

(5) Low idle r.p.m.

(6) Exhaust pipe diameter(s).

(7) Governed speed.

(8) Rated maximum horsepower and torque.

(9) Maximum horsepower and torque speeds.

(10) Fuel consumption at maximum power and torque.

(11) Fuel injector type.

(12) Air aspiration system.

(13) Maximum exhaust system back pressure.

(14) Air inlet restriction.

(15) Maximum air flow.

(b) Test data. (1) Test number.

(2) Date and time of day.

(3) Instrument operator.

(4) Engine operator.

(5) Smokemeter: Number-zero control setting—calibration control setting—gain.

(6) Recorder chart: Identify zero traces—calibration traces—idle traces—closed throttle trace—open throttle trace—acceleration and lug down test traces—start and finish of each test.

(7) **Intake air humidity and temperature.** (i) Humidity conditioned air. Air that has had its absolute humidity altered is considered humidity conditioned air. For this type of intake air, the humidity measurement must be made within the intake air system, and after the air conditioning has taken place. Also, this measurement must be made within 48 inches of the engine.

(ii) Non-conditioned air. Humidity measurements in non-conditioned intake air systems must be made in the intake air stream and within 18 inches of the inlet for engine intake air system.

(iii) Intake air temperature measurement must be made in the intake air stream and within 48 inches of the engine.

(iv) Temperature and humidity devices must have a time constant  $\tau$ , between 13 and 52 seconds. For a given instantaneous step change the measurement system must respond to 63.2% of that step change. If the temperature and humidity measurement systems have a time constant  $\tau$ , less than 13 seconds, then the measurements will be sampled at a rate four or more times faster than the time constant  $\tau$  and averaged. For continuously integrated intake air temperature systems, excursions exceeding the temperature limits for 30 seconds or less will be allowed.

(8) **Dynamometer room temperature** must be measured in two locations in the room within 10 feet of the engine. The two measurements are averaged. The measurement system must have a time constant  $\tau$ , between 13 and 52 seconds. For a given instantaneous step change the measurement system must respond to 63.2% of that step change. If the temperature measurement system has a time constant  $\tau$ , less than 13 seconds, then the measurements will be sampled at a rate four or more times faster than the time constant  $\tau$  and averaged. For continuously integrated dynamometer room air temperature systems, excursions exceeding the temperature limits for 30 seconds or less will be allowed.

(9) Barometric pressure, before and after test.

(10) Observed engine torque and speed during the steady-state test conditions specified in § 86.879-11(a)(3)(i).

(11) Calibration date(s) of neutral density filters used to calibrate the smokemeter.

§ 86.879-11 Instrument checks.

(a) The smokemeter shall be checked according to the following procedure prior to each test: (1) The optical surfaces of the optical section shall be checked to verify that they are clean and free of foreign material and fingerprints.

(2) The zero control shall be adjusted under conditions of "no smoke" to give a recorder trace of zero.

(3) Calibrated neutral density filters having approximately 10, 20, and 40 percent opacity shall be employed to check the linearity of the instrument. The filter(s) shall be inserted in the light path perpendicular to the axis of the beam and adjacent to the opening from which the beam of light from the light source emanates, and the recorder response shall be noted. The nominal opacity value of the filter will be confirmed by the Administrator. Deviations in excess of 1 percent of the nominal opacity shall be corrected.

(b) The instruments for measuring and recording engine r.p.m., engine torque, air inlet restrictions, exhaust system back pressure, throttle position, etc., which are used in the tests prescribed herein, shall be calibrated in accordance with good engineering practice. Neutral density filters shall be calibrated semi-annually.

§ 86.879-12 Test run.

(a) The temperature of the air supplied to the engine shall be between

68°F and 86°F. The fuel temperature at the pump inlet shall be 100°F,  $\pm 10^\circ$ F. The observed barometric pressure shall be between 28.5 inches and 31 inches Hg. Higher air temperature or lower barometric pressure may be used, if desired, but no allowance will be made for possible increased smoke emissions because of such conditions.

(b) The governor and fuel system shall have been adjusted to provide engine performance at the levels in the application for certification required under § 86.079-21.

(c) The following steps shall be taken for each test: (1) Start cooling system.

(2) Starting with a warmed engine, determine by experimentation the dynamometer inertia and dynamometer load required to perform the acceleration in the dynamometer cycle for smoke emission tests (§ 86.879-7(a)(2)). In a manner appropriate for the dynamometer and controls being used, arrange to conduct the acceleration mode.

(3) Install smokemeter optical unit and connect it to the recorder. Connect the engine r.p.m. and torque sensing devices to the recorder.

(4) Turn on purge air to the optical unit of the smokemeter, if purge air is used.

(5) Check and record zero and span settings of the smokemeter recorder at a chart speed of approximately 1 inch per minute. (The optical unit shall be retracted from its position about the exhaust stream if the engine is left running.)

(6) Precondition the engine by operating it for 10 minutes at maximum rated horsepower.

(7) Proceed with the sequence of smoke emission measurements on the engine dynamometer as prescribed in § 86.879-7.

(8) During the test sequence of § 86.879-7, continuously record smoke measurements, engine r.p.m., and throttle position at a minimum chart speed of 1 inch per minute during the idle mode and transitional periods and 8 inches per minute during the acceleration and lugging modes. The smokemeter zero and full scale recorder deflections may be rechecked during the idle mode of each test sequence. If either zero or full scale drift is in excess of 2 percent opacity, the smokemeter controls must be readjusted and the test must be repeated.

(9) Turn off engine.

(10) Check zero and reset if necessary and check span of the smokemeter recorder by inserting neutral density filters. If either zero or span drift is in excess of 2 percent opacity, the test results shall be invalidated.

§ 86.879-13 Chart reading.

The following procedure shall be used to analyze the recorder chart.

(a) Locate the modes specified in § 86.879-7(a)(1) through (a)(4) by applying the following starting and ending criteria.

(1) The idle mode specified in § 86.879-7(a)(1) starts when engine preconditioning or the lugging mode of a preceding cycle has been completed and ends when the engine speed is raised above the idle speed.

(2) The acceleration mode specified in § 86.879-7(a)(2)(i) starts when the preceding idle mode has been completed and ends when the throttle is in the fully-open position as indicated by the throttle position trace.

(3) The acceleration mode specified in § 86.879-7(a)(2)(ii) starts when the preceding acceleration mode has been completed and ends when the engine speed reaches 85 percent of the rated speed.

(4) The transition period specified in § 86.879-7(a)(2)(iii) starts when the throttle is in the fully-closed position and ends when the throttle is in the fully-open position as indicated by the throttle position trace.

(5) The acceleration mode specified in § 86.879-7(a)(2)(iv) starts when the preceding transition period has been completed and ends when the engine speed reaches 95 percent of the rated speed.

(6) The transition period specified in § 86.879-7(a)(3)(i) starts when the preceding acceleration mode has been completed and ends when the engine speed is 50 r.p.m. below the rated speed and the provisions of § 86.879-7(a)(3)(i) are met.

(7) The lugging mode specified in § 86.879-7(a)(3)(ii) starts when the preceding transition period has been completed and ends when the engine speed is at the intermediate speed.

(b) Determine if the test requirements of § 86.879-7 are met by applying the following modal criteria.

(1) Idle mode as specified in § 86.879-7(a)(1): (i) Duration: 5 to 5.5 minutes.

(ii) Speed: within specifications.

(2) Acceleration mode as specified in § 86.879-7(a)(2)(i): (i) Duration: 3 seconds or less.

(ii) Speed increase:  $200 \pm 50$  r.p.m.

(3) Acceleration mode as specified in § 86.879-7(a)(2)(ii): (i) Linearity:  $\pm 100$  r.p.m. as specified in paragraph (c) of this section.

(ii) Duration: 3.5 to 6.5 seconds.

(iii) Throttle position: fully-open until speed is at least 95 percent of the rated speed.

(4) Transition period as specified in § 86.879-7(a)(2)(iii): (i) Throttle position: fully-closed before speed exceeds 90 percent of the rated speed.

(5) Acceleration mode as specified in § 86.879-7(a)(2)(iv): (i) Duration: 8 to 12 seconds.

(ii) Throttle position: fully-open when speed is at intermediate speed.

(6) Transition period as specified in § 86.879-7(a)(3)(i): (i) Duration: 50 to 60 seconds.

(ii) Speed during last 10 seconds within  $\pm 50$  r.p.m. of rated speed.

(iii) Corrected power during last 10 seconds: at least 95 percent of horsepower developed during zero-hour testing.

(7) Lugging mode as specified in § 86.879-7(a)(3)(ii): (i) Linearity:  $\pm 100$  r.p.m. as specified in paragraph (c) of this section.

(ii) Duration: 30 to 40 seconds.

(iii) Speed at end: intermediate speed.

(c) Determine if the linearity requirements of § 86.879-7 were met by means of the following procedure: (1) For the acceleration mode specified in § 86.879-7(a)(2)(ii), note the maximum deflection of the r.p.m. trace from a straight line drawn from the starting and ending points specified in paragraph (a)(3) of this section.

(2) For the lugging mode specified in § 86.879-7(a)(3)(ii), note the maximum deflection of the r.p.m. trace from a straight line drawn from the starting and ending points specified in paragraph (a)(7) of this section.

(3) The test results will be invalid if any deflection is greater than 100 r.p.m.

(d) Analyze the smoke trace by means of the following procedure: (1) Starting at the beginning of the first acceleration, as defined in paragraph (a)(2) of this section, and stopping at the end of the second acceleration, as defined in paragraph (a)(3) of this section, divide the smoke trace into  $\frac{1}{2}$ -second intervals. Similarly, subdivide into  $\frac{1}{2}$ -second intervals the third acceleration mode and the lugging mode as defined by paragraphs (a)(5) and (7) respectively, of this section.

(2) Determine the average smoke reading during each  $\frac{1}{2}$ -second interval.

(3) Locate and record the 15 highest  $\frac{1}{2}$ -second readings during the acceleration mode of each dynamometer cycle.

(4) Locate and record the five highest  $\frac{1}{2}$ -second readings during the lugging mode of each dynamometer cycle.

(5) Examine the average  $\frac{1}{2}$ -second values which were determined in paragraphs (3) and (4) above and record the three highest values for each dynamometer cycle.

§ 86.879-14 Calculations.

(a) Average the 45 readings in § 86.879-13(d)(3) and designate the value as "A".

(b) Average the 15 readings in § 86.879-13(d)(4) and designate the value as "B".

(c) Average the nine readings in § 86.879-13(d)(5) and designate the value as "C".

15. The title to Subpart J is revised to read as follows:

**Subpart J—Emission Regulations for New 1977 and 1978 Model Year Diesel Heavy Duty Engines; Gaseous Exhaust Test Procedure**

16. Section § 86.977-1 is revised to read as follows:

§ 86.977-1 General applicability.

The provisions of this subpart apply to new 1977 and 1978 model year Diesel heavy duty engines.

**PART III:**

## **FEDERAL ENERGY ADMINISTRATION**

■

### **DOMESTIC CRUDE OIL ALLOCATION PROGRAM**

**Entitlement Notice for March 1976**

**V41101**

**MAY 24**

**76**  
**UMI**

**FEDERAL ENERGY  
ADMINISTRATION**  
**DOMESTIC CRUDE OIL ALLOCATION  
PROGRAM**

**Entitlement Notice for March 1976**

In accordance with the provisions of 10 CFR § 211.67 relating to FEA's domestic crude oil allocation program, the monthly notice specified in § 211.67(i) is hereby published.

Based on reports submitted to FEA by refiners and eligible firms as to crude oil receipts, crude oil runs to stills and eligible product imports for March 1976, application of the entitlement adjustment for residual fuel oil production for sale in the East Coast market provided in § 211.67(d)(4), and application of the entitlement adjustment for small refiners provided in § 211.67(e) and of Special Rule No. 6, the national domestic crude oil supply ratio for March 1976 is calculated to be .357897.

In accordance with § 211.67(b)(2), to calculate the number of barrels of deemed old oil included in a refiner's adjusted crude oil receipts for the month of March 1976, each barrel of old oil is equal to one barrel of deemed old oil and each barrel of upper tier crude oil is equal to .1890201 of a barrel of deemed old oil.

The issuance of entitlements for the month of March 1976 to refiners and eligible firms is set forth in the Appendix to this notice. The Appendix lists the name of each refiner and other eligible firm to which entitlements have been issued, the number of barrels of deemed old oil included in each such refiner's adjusted crude oil receipts; the number of entitlements issued to each such refiner or other firm, and the number of entitlements required to be purchased or sold by each such refiner or other firm.

Pursuant to 10 CFR § 211.67(i)(4), FEA hereby fixes the price at which entitlements shall be sold and purchased for the month of March 1976 at \$7.89, which is the exact differential as reported for the month of March between the weighted average per barrel costs to refiners of old oil and of imported crude oil less the sum of 21 cents.

In accordance with 10 CFR § 211.67(b), each refiner that has been issued fewer entitlements for the month of March 1976 than the number of barrels of deemed old oil included in its adjusted crude oil receipts is required to purchase a number of entitlements for the month of March 1976 equal to the difference between the number of barrels of deemed old oil included in those receipts and the number of entitlements issued to and retained by that refiner. Refiners which have been issued a number of entitlements for the month of March 1976 in excess of the number of barrels of deemed old oil included in their adjusted crude oil receipts for March 1976 and eligible firms issued entitlements shall sell such

entitlements to refiners required to purchase entitlements. In addition, certain refiners are required to purchase or sell entitlements to effect corrections for reporting errors for the months September 1975 through February 1976 pursuant to 10 CFR § 211.67(j)(1). No corrections for reporting errors for months prior to September 1975 are reflected in the listing as FEA will effect these corrections in future entitlement notices as provided in § 211.67(j)(2).

The listing of refiners' old oil receipts contained in the Appendix reflects any adjustments made by FEA pursuant to § 211.67(h).

The listing contained in the Appendix gives effect to Special Rule No. 6, and the exempted volumes for all refiners benefiting from the Special Rule are shown in a separate column in the listing.

For purposes of the adjustments to refiners' crude run volumes under § 211.67(d)(4), total production of residual fuel oil for sale in the East Coast market (in excess of the first 5,000 barrels per day thereof for each refiner reporting such production) was 13,756,372 barrels for March 1976. For that month, imports of residual fuel oil eligible for entitlement issuances totaled 32,441,096 barrels.

The total number of entitlements required to be purchased and sold under this notice is 20,252,999.

Payment for entitlements required to be purchased under 10 CFR § 211.67(b) for March 1976 must be made by May 31, 1976.

On or prior to June 10, 1976, each firm which is required to purchase or sell entitlements for the month of March shall file with FEA the monthly transaction report specified in 10 CFR § 211.66(i) certifying its purchases and sales of entitlements for the month of March. FEA has mailed the monthly transaction report forms for the month of March to reporting firms. FEA requests that firms which have been unable to locate other firms for required entitlement transactions by May 31, 1976 contact FEA at 202-254-6296 to expedite consummation of these transactions. For firms that have failed to consummate required entitlement transactions on or prior to May 31, 1976, FEA may direct sales and purchases of entitlements pursuant to the provisions of 10 CFR § 211.67(k).

This notice is issued pursuant to Subpart G of FEA's regulations governing its administrative procedures and sanctions, 10 CFR Part 205. Any person aggrieved hereby may file an appeal with FEA's Office of Exceptions and Appeals in accordance with Subpart H of 10 CFR Part 205. Any such appeal shall be filed on or before June 23, 1976.

Issued in Washington, D.C. on May 18, 1976.

DAVID G. WILSON,  
Acting General Counsel.

**PROPOSED RULES**

21317

## PRIVACY ACT OF 1974

### Systems of Records and Notice of Proposed Routine Uses Therefor

Pursuant to the Privacy Act of 1974 (P.L. 93-579) as prescribed in 5 U.S.C. 552a(e)(4), the following notices of systems of records that are maintained by the Department of Health, Education, and Welfare are published as set forth below. These systems are currently ongoing and were either inadvertently omitted from past publications because of oversight or they are notices of contractor systems of records where the contracts were entered into before September 27, 1975.

Prior to the final adoption of the proposed routine uses for these notices, consideration in accordance with the requirements of 5 U.S.C. 552a(e)(11) will be given to comments which are submitted in writing on or before 30 days from the publication date of this notice. Comments should be addressed to the Director, Fair Information Practice Staff, Department of Health, Education, and Welfare, 330 Independence Ave., S.W., Washington, D.C. 20201. Comments received will be available for inspection in Room 526E, South Portal Building, at the above address.

Dated: May 13, 1976.

John Ottina  
Assistant Secretary for  
Administration and Management

#### NIH NIGMS 0317.00

**System name:** Pharmacology Research Associates  
HEW/NIH/NIGMS

**Security classification:** None.

**System location:**

National Institutes of Health  
5333 Westbard Avenue, Westwood Bldg., Room 9A-03  
Bethesda, Maryland 20015

**Categories of individuals covered by the system:** Applicants for positions as Pharmacology Research Associates with the National Institute of General Medical Sciences.

**Categories of records in the system:** Individual application forms, academic transcripts and references.

**Authority for maintenance of the system:** 42 USC 209.

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** File folders.

**Retrievability:** By name of applicant. HEW uses: (1) for consideration of the applicant as a candidate for the Pharmacology Research Associate Training Program (PRAT). (2) for consideration of the applicant by other NIH Associate Programs at the applicant's request.

**Safeguards:** The records are maintained in locked cabinets with access limited to authorized personnel (system manager and his/her staff assigned to the program).

**Retention and disposal:** 1. Records of applicants who are admitted to the program are kept not more than 5 years. 2. Records of applicants who are not admitted to the program are kept for one year. Records are shredded. 3. All records are shredded after proper time has elapsed.

**System manager(s) and address:**

Executive Secretary, PRAT Program  
Pharmacology-Toxicology Program  
NIGMS - NIH  
Westwood Bldg., Room 9A-03  
Bethesda, Maryland 20015

**Notification procedure:** To determine if a file exists, write to the System Manager and provide the following information: Date of Application; Applicant's Name.

**Record access procedures:** Same as notification procedures. Requestors should also reasonably specify the record contents being sought.

**Contesting record procedures:** Write to system manager and reasonably identify the record and specify the information to be contested, in accordance with Department Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR, Part 5b.7).

**Record source categories:** Information provided by applicants, university registrars, and references.

**Systems exempted from certain provisions of the act:** None.

HSA BMS 0031.00

**System name:** PHS Beneficiary-Contract Medical/Health Care Records. HEW/HSA/BMS.

**Security classification:** None.

**System location:**

1. Director, Division of Hospitals and Clinics  
Federal Center Bldg 03  
6525 Belcrest Road  
Hyattsville, MD 20782
2. Director, PHS Hospital responsible for supervision of the area (See Appendix)

**Categories of individuals covered by the system:** Individuals (primarily American seamen) who are legally entitled to medical or health care by the Public Health Service and who have received medical or health care from health professionals or facilities under contract to the Public Health Service, Bureau of Medical Services.

**Categories of records in the system:** May include any or all of the following medical history, diagnostic (laboratory/X-ray, etc.) and treatment data, sociologic information, eligibility data including employment history, master's certificate, uniformed services information (employing services, service numbers, duty station, etc.).

**Authority for maintenance of the system:** PHS Act, Sections 321, 322, 326, (42 USC 248, 249, 253) PL 88-71, Section 1 (42 USC 253a)

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:**

1. To a non-agency physician, medical facility or laboratory for continued care of the patient.
2. To a federal, state or local governmental agency for purposes of reporting disease or injuries as required by laws or regulations of that agency.
3. To the Department of Justice for investigation or litigation in protection of the Government.
4. To Department of Transportation (U.S. Coast Guard), National Oceanic & Atmospheric Administration for reports of examination and/or treatment of that agency's personnel or dependents.
5. To the Veterans Administration to assist uniformed services personnel, retirees and veterans obtain medical care or benefits.
6. To the Coast Guard for reports of American seamen found suffering from medical conditions that are hazardous to themselves.
7. In accordance with Item (4), Appendix B, 45 CFR 5b.
8. In accordance with Item (5), Appendix B, 45 CFR 5b.
9. In accordance with Item (100), Appendix B, 45 CFR 5b.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** Folders in file cabinets or open shelves in locked rooms accessible only to personnel with a need-to-know.

**Retrievability:** Retrieved by name, uniformed service number, and/or Z number. Used by contract professionals to provide medical care to the beneficiary and to report results of examination and/or treatment used by PHS personnel to verify eligibility and to audit care provided by the contracting professionals.

**Safeguards:** Filed in locked files or locked rooms in the contracting professional's office/facility. Records are accessible only to contractors or PHS professionals with a need-to-know for the performance of their official duties.

**Retention and disposal:** Retained in the contracting professional's facility files until the contract is terminated. Then turned over to the supervisory PHS facility for transmittal to a new contracting professional or storage at a Federal Records Center. When stored

in a Federal Records Center, active duty uniformed services personnel records are stored for 50 years, other beneficiaries' records for 25 years. Destruction at that time is in accordance with standard practices of the Federal Records Center.

**System manager(s) and address:**

Director  
Division of Hospitals and Clinics  
Federal Center Building 03  
6525 Belcrest Road  
Hyattsville, Maryland 20782

**Notification procedure:** Inquiries should be addressed to the PHS facility supervising the area where care has been obtained from a contract source. (See listing in Appendix). Individual must provide name, beneficiary category, date of birth, service number/Z number (if applicable) and name and location of source of contract care.

**Record access procedures:** Same as above. See HEW Regulations published in the Federal Register, October 8, 1975, page 47411 (45 CFR 5b.6).

**Contesting record procedures:** Same as above.

**Record source categories:** Individual, employers, other medical care providers, families and social agencies.

**Systems exempted from certain provisions of the act:** None.

#### SSA HI 1375.00

**System name:** Physician/Supplier 1099 File (Statement for Recipients of Medical and Health Care Payments) HEW SSA.

**Security classification:** None.

**System location:** Carriers and intermediaries under contract to Social Security Administration (See Appendix C, Section 3 and Section 4 of the Federal Register, Vol. No. 167-Wednesday, August 27, 1975).

**Categories of individuals covered by the system:** Physician/suppliers to whom Medicare payments have been made by carriers or intermediaries.

**Categories of records in the system:** A record of total Medicare payments made to physicians and suppliers during each calendar year. It contains the name, address and social security number of the physician/provider number or supplier EIN (employer identification number).

**Authority for maintenance of the system:** 26 U.S. Code 6041 (Internal Revenue Code).

**Routine uses of records maintained in the system, including categories of users and the purposes of such uses:** This record is disclosable only to the Internal Revenue Service in connection with the determination of the individual's self-employment income.

**Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:**

**Storage:** The records are maintained on magnetic tape and paper.

**Retrievability:** The system is indexed by physician/provider numbers and supplier EIN (employer's identification numbers).

**Safeguards:** Records are maintained in secure storage areas accessible only to authorized personnel.

**Retention and disposal:** The records are retained for 5 years.

**System manager(s) and address:**

Director, Bureau of Health Insurance  
6401 Security Boulevard  
Baltimore, Maryland 21235

**Notification procedure:** Inquiries and requests for systems records should be directed to the intermediary or carrier who made Medicare payments to the physician/supplier.

**Record access procedures:** Same as above.

**Contesting record procedures:** Same as above.

**Record source categories:** The record of total annual payments made to each physician/supplier is derived from the individual Medicare bill payments.

**Systems exempted from certain provisions of the act:** None. /\*

## Guide to Record Retention Requirements

[Revised as of January 1, 1975]

This useful reference tool is designed to keep businessmen and the general public informed concerning the many published requirements in Federal laws and regulations relating to record retention.

The 87-page "Guide" contains over 1,000 digests which tell the user (1) what type records must be kept, (2) who must keep them, and (3) how long

they must be kept. Each digest carries a reference to the full text of the basic law or regulation providing for such retention.

The booklet's index, numbering over 2,000 items, lists for ready reference the categories of persons, companies, and products affected by Federal record retention requirements.

**Price: \$1.45**

Compiled by Office of the Federal Register, National Archives and Records Service, General Services Administration

**Order from Superintendent of Documents, U.S. Government Printing Office  
Washington, D.C. 20402**

## reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

### Rules Going Into Effect Today

NOTE: There were no items eligible for inclusion in the list of RULES GOING INTO EFFECT TODAY.

### List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of PUBLIC LAWS.

## AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

Ten agencies have agreed to a six-month trial period based on the assignment of two days a week beginning February 9 and ending August 6 (See 41 FR 5453). The participating agencies and the days assigned are as follows:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
	CSC			CSC
	LABOR			LABOR

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this trial program are invited. Comments should be submitted to the Director of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

**ATTENTION:** Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202-523-5286. For information on obtaining extra copies, please call 202-523-5240.

To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202-523-5022.

federal register

Phone 523-5240  
Area Code 202

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Diamond tips for phonograph needles from United Kingdom	21384

## VETERANS ADMINISTRATION

### Rules

Death pension, apportionment	21324
------------------------------	-------

## WAGE AND HOUR DIVISION

### Notices

Hearing, etc.:	
Industry Committee for various industries, Puerto Rico	21381

## list of cfr parts affected in this issue

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, follows beginning with the second issue of the month. A Cumulative List of CFR Sections Affected is published separately at the end of each month. The guide lists the parts and sections affected by documents published since the revision date of each title.

## rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 40—Protection of Environment  
CHAPTER I—ENVIRONMENTAL  
PROTECTION AGENCYPART 51—PREPARATION, ADOPTION,  
AND SUBMITTAL OF IMPLEMENTATION  
PLANSMaintenance of National Ambient Air  
Quality Standards—Summary

## Correction

In FR Doc. 76-12690 appearing in the issue for Monday, May 3, 1976, on page 18388, in § 51.12(h)(1) the following date should appear within the parentheses: "May 3, 1977."

[FRL 546-5]

PART 52—APPROVAL AND PROMULGA-  
TION OF IMPLEMENTATION PLANSWashington; Approval of Implementation  
Plan Revision

● The purpose of this notice is to approve a revision to the State of Washington Implementation Plan (SIP) under section 110 of the Clean Air Act. ●

On November 6, 1975, the Governor of the State of Washington submitted a revision to § 9.05(c) of Regulation I of the Olympic Air Pollution Control Authority (APCA) as a revision to the Washington SIP.

The revision was proposed in the FEDERAL REGISTER on January 29, 1976 (41 FR 4298). No comments were received during the 30-day public comment period provided.

The revised regulation requires hog fuel boilers installed after December 3, 1969 to meet an emission limitation of 0.20 grains per standard cubic foot of gas (calculated to 12 percent carbon dioxide). It also requires that when uncombined water causes opacity in excess of 20 percent (number one on the Ringelmann Smoke Chart) the owner or operator of the source must supply valid data to show that the concentration of particulate matter is less than 0.10 grains per standard cubic foot. The presently approved regulation requires these boilers to meet an emission limitation of 0.10 grains per standard cubic foot.

The Board of Directors of the Olympic APCA stipulated, at the time they passed the revision, that it would not take effect until approved by EPA as a Plan revision.

The Administrator of EPA has carefully reviewed and evaluated the revision and has determined that it meets the requirements of 40 CFR 51.13. Implementation of the revision will not cause or contribute to a violation of the national ambient air quality standards in

the Olympic—Northwest Washington Intrastate Air Quality Control Region.

An evaluation report (Rationale for Approval) prepared by EPA on the revision is available for public inspection at the Region X Office, 1200 Sixth Avenue, Seattle, Washington 98101 and the EPA Public Information Reference Unit, Room 2922, 401 M Street SW, Washington, D.C. 20460.

The approval promulgated herein is effective June 24, 1976.

(Sec. 110 of the Clean Air Act, as amended. (42 U.S.C. 1857c-5).)

Dated: May 18, 1976.

JOHN QUARLES,  
Acting Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

## Subpart WW—Washington

In § 52.2470, paragraph (c)(15) is amended by adding the following:

§ 52.2470 Identification of plan.

(c) The plan revisions listed below were submitted on the dates specified.

(15) Revision to § 9.05(c) of Regulation I of the Olympic Air Pollution Control Authority submitted November 6, 1975 by the Governor.

[FR Doc. 76-15135 Filed 5-24-76; 8:45 am]

[FRL 543-8]

PART 79—REGISTRATION OF FUELS  
AND FUEL ADDITIVES

## Revision of Regulations

Revised regulations for the Registration of Fuels and Fuel Additives were promulgated on November 7, 1975. These provided that Additive Manufacturer Notifications for the registration of additives for motor vehicle fuels should be submitted by February 7, 1976, and that registration of such additives should be accomplished by May 7, 1976. Experience indicates (1) that many additive manufacturers did not become aware of the registration requirements in time to file notifications on schedule, and (2) that the quantity and required investigation by EPA of the components of the additives, particularly of the large number of consumer-packaged additives, were underestimated. To provide additional time for EPA to process notifications received after February 7, 1976, and to complete investigations required for registration, the date for the registration of additives is postponed two months to July 7, 1976. This change also makes it desirable to

set back by two months the schedule for registration of motor vehicle gasoline, so that Fuel Manufacturer Notifications for Motor Vehicle Gasolines will not be required until July 7, 1976, and registration is to be accomplished by September 7, 1976.

In addition to changing the schedule for registration and submission of additive and motor vehicle gasoline notifications, minor changes to the wording of several other sections of the Fuel and Fuel Additive Registration regulations have been made to clarify the intent of these regulations and to make a minor modification to § 79.21(a)(2):

1. Section 79.4(b)(4) is changed to exempt a mixture sold only to fuel manufacturers consisting of one registered additive with one or more hydrocarbons, thereby making it consistent with the last sentence of § 79.5(b).

2. Section 79.21(a)(2) is changed to provide that a single percentage figure combining the percentages for carbon, hydrogen, and oxygen may be provided for engine oil additives instead of requiring individual percentages for these three elements. Additive manufacturers have indicated that the elemental analysis was not normally made, that it would be imprecise at best, and that it would be an unproductive expenditure of effort. EPA technical personnel concluded that it should not be required.

3. The definition of "motor vehicle" in the Act and the exclusion of motorcycle fuels and additives were included in § 79.32(a), relating to the registration of gasoline, but were inadvertently omitted from § 79.31(a), relating to the registration of additives. It is proposed to add these to § 79.31(a).

The Environmental Protection Agency finds that general notice of proposed rulemaking and the public procedure thereon are impracticable and unnecessary because the changes are (1) necessary to allow the Agency sixty (60) additional days to process the fuel and fuel additive registrations which are currently being processed; (2) necessary to clarify the original regulations; and (3) necessary to relieve engine oil additive manufacturers who are in the process of registering their engine oil additives from the burden of providing individual percentages for carbon, hydrogen, and oxygen in their additives. Therefore, these regulations are hereby promulgated and shall be effective immediately.

(Secs. 211 and 301(a) of the Clean Air Act, 42 U.S.C. 1857f-6c and 1857g.)

Dated: May 18, 1976.

JOHN QUARLES,  
Acting Administrator.

Part 79, Chapter I of Title 40 of the Code of Federal Regulations, is amended as follows:

1. In section 79.4 paragraph (b) (4) is revised as follows:

(4) If an additive manufacturer prepares for sale only to fuel manufacturers (i) a blend or mixture of two or more registered additives or (ii) a blend or mixture of one or more registered additives with one or more substances containing only carbon and/or hydrogen, he will not be required to register such blend or mixture provided he will, upon request, furnish the Administrator with the names and percentages by weight of all components of such blend or mixture.

2. Section 79.12 is revised as follows:

Whenever the Administrator determines that a notification fails to comply with the regulations of this part, he shall within 30 days of receipt of the notification (in the case of registration prior to the date prescribed for the fuel in Subpart D, by such prescribed date) inform the noncomplying fuel manufacturer of the reasons for such determination.

3. Section 79.13(a) is revised as follows:

(a) If the provisions of this part requiring the submission of information and the giving of assurances have been complied with for a particular fuel, the Administrator shall, within 30 days of receipt of the notification (in the case of registration prior to the date prescribed for the fuel in Subpart D, by such prescribed date), register that fuel and notify the fuel manufacturer of such registration.

4. The first sentence of § 79.20 is revised as follows:

Except as provided in § 79.23(b), any manufacturer of a designated additive who wishes to have such additive registered shall notify the Administrator in accordance with § 79.21 at least 150 days prior to the date prescribed for such additive in Subpart D or, after such prescribed date, at least 30 days prior to the date on which such additive manufacturer proposes to begin to sell, offer for sale, or introduce into commerce such additive.

5. Section 79.21(a) (2) is revised as follows:

(2) In the case of an additive for engine oil, only the name, percentage by weight, and method of analysis of each element in the additive are required provided, however, that a percentage figure combining the percentages of carbon, hydrogen, and/or oxygen may be provided unless the breakdown into percentages for these individual elements is already known to the registrant.

6. Section 79.22 is revised as follows: Whenever the Administrator determines that a notification fails to comply

with the regulations of this part, he shall within 30 days of the receipt of the notification (in the case of registration prior to the date prescribed for the additive in Subpart D, by such prescribed date) inform the noncomplying additive manufacturer of the reasons for such determination.

7. Section 79.23(a) is revised as follows:

(a) If the provisions of this part requiring the submission of information and the giving of assurances have been complied with for a particular additive, the Administrator shall, within 30 days of receipt of the notification (in the case of registration prior to the date prescribed for the additive in Subpart D, by such prescribed date), register that additive and notify the additive manufacturer of such registration.

8. The following sentences are added to § 79.31(a):

(a) \* \* \*. The Act defines the term "motor vehicle" to mean any self-propelled vehicle designed for transporting persons or property on a street or highway. For purposes of this registration, however, additives specifically manufactured and marketed for use in motorcycle fuels are excluded.

9. § 79.31(b) is revised as follows: (b) All designated additives must be registered by July 7, 1976, except as provided in § 79.23(b).

10. § 79.32(b) is revised as follows: (b) All designated motor vehicle gasoline must be registered by September 7, 1976.

#### Title 38—Pensions, Bonuses, and Veterans' Relief

#### CHAPTER I—VETERANS ADMINISTRATION

#### PART 3—ADJUDICATION

##### Death Pension—Apportionment

On page 14907 of the FEDERAL REGISTER of April 8, 1976, there was published a notice of proposed regulatory development to amend § 3.460 which relates to apportionment of death pension benefits.

Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulation.

No written comments have been received and the proposed regulation is hereby adopted without change and is set forth below.

Effective date: This VA Regulation is effective May 19, 1976.

Approved: May 19, 1976.

By direction of the Administrator:

ODELL W. VAUGHN,  
Deputy Administrator.

Section 3.460 is revised to read as follows:

#### § 3.460 Death pension.

Death pension will be apportioned if the child or children of the deceased veteran are not in the custody of the widow or widower. Where the widow's or widower's rate is in excess of \$70 monthly because of having been the wife or husband of the veteran during service or because of need for regular aid and attendance, the additional amount will be added to the widow's or widower's share.

(a) *Civil, Indian and Spanish-American wars.* Where pension is payable under 38 U.S.C. 532, 534, or 536 apportionment will be based on the facts in the individual case in accordance with § 3.451.

(b) *Mexican border period and later war periods.* Where pension is payable under 38 U.S.C. 541 (including laws in effect prior to July 1, 1960) apportionment will be at rates approved by the Chief Benefits Director except when the facts and circumstances in a case warrant special apportionment under § 3.451.

[FR Doc. 76-15219 Filed 5-24-76; 8:45 am]

#### Title 9—Animals and Animal Products

#### CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

#### PART 78—BRUCELLOSIS

##### Subpart D—Designation of Brucellosis Areas, Specifically Approved Stockyards, and Slaughtering Establishments

##### BRUCELLOSIS AREAS

##### Correction

In FR Doc. 76-12504 appearing at page 18084 in the FEDERAL REGISTER of Friday, April 30, 1976, the following correction should be made:

On page 18086, first column, second paragraph under the heading "Kansas" in § 78.21(b), fifth line from the bottom, insert the county name "Rush" after "Rooks".

#### PART 78—BRUCELLOSIS

##### Subpart D—Designation of Brucellosis Areas, Specifically Approved Stockyards, and Slaughtering Establishments

##### Brucellosis Areas

##### Correction

In FR Doc. 76-12827 appearing at page 18086 in the FEDERAL REGISTER of Friday, April 30, 1976, the following corrections should be made: On page 18087, first column, in § 78.21(b) under the heading "Texas", the eleventh line from the bottom, second word should read "Rockwall". In the sixth line from the bottom the third word should read "Throckmorton".

#### Title 24—Housing and Urban Development CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

#### SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-1139]

#### PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

##### Status of Participating Communities

The purpose of this notice is to list those communities wherein the sale of flood insurance is authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128).

Insurance policies can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurers Association servicing company for the state (addresses are published at 40 FR 57210-212 and 41 FR 1062). A list of servicing companies is also available from the Federal Insurance Administration (FIA), HUD, 451 Seventh Street, SW., Washington, D.C. 20410.

The Flood Disaster Protection Act of 1973 requires the purchase of flood insurance as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in a flood plain area having special hazards within any community.

[Docket No. FI-1138]

**PART 1915—IDENTIFICATION AND  
MAPPING OF SPECIAL HAZARD AREAS**  
List of Communities With Special Hazard  
Areas

The purpose of this notice is the identification of communities with areas of special flood or mudslide or erosion hazards in accordance with Part 1915 of Title 24 of the Code of Federal Regulations as authorized by the National Flood Insurance Program (42 U.S.C. 4001-4128). The identification of such areas is to provide guidance so that communities may adopt appropriate flood plain management measures to minimize damage caused by flood losses and to guide future construction, where practicable, away from locations which are threatened by flood hazards.

The Flood Disaster Protection Act of 1973 requires the purchase of flood insur-

ance on and after March 2, 1974, as a condition of receiving any form of Federal or Federally related financial assistance for acquisition or construction purposes in an identified flood plain area having special flood hazards that is located within any community participating in the National Flood Insurance Program.

One year after the identification of the community as flood prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction in these areas unless the community has entered the program. The prohibition, however, does not apply to loans by a Federally regulated, insured, supervised or approved bank prior to March 1, 1976, to finance the acquisition of a previously occupied residential dwelling.

**§ 1915.3 List of communities with special hazard areas (FHBMs in effect).**

FEDERAL REGISTER, VOL. 41, NO. 102—TUESDAY, MAY 25, 1976

The effective date of identification shall be 30 days after the date of publication in the FEDERAL REGISTER, or the date which appears in this notice, whichever is later.

This 30 day period does not supersede the statutory requirement that a community, whether or not participating in the program, be given the opportunity for a period of six months to establish that it is not seriously flood prone or that such flood hazards as may have existed have been corrected by floodworks or other flood control methods. The six months period shall be considered to begin June 24, 1976 or the effective date of the Flood Hazard Boundary Map, whichever is later. Similarly, the one year period a community has to enter the program under section 201(d) of the Flood Disaster Protection Act of 1973 shall be considered to begin June 24, 1976 or the effective date of the Flood Hazard Boundary Map, whichever is later.

Where several dates appear in the column set forth below marked Effective Date of Identification, the first date is the date of initial identification, and all other dates represent modification by additions or deletions to identified areas with special hazards.

Accordingly, § 1915.3 is amended by adding in alphabetical sequence a new entry to the table, which entry reads as follows:

State	County	Location	Map No.	Local map repository	Effective date of identification of areas which have special flood hazard
Do.	Palm Beach	Royal Palm Beach, village of	H 120225A 01 through H 120225A 03	Mayor, Village of Royal Palm Beach, 684 Camellia Dr., West Palm Beach Fla. 33411.	June 28, 1974.
Do.	Jackson	Sneads, town of	H 120130A 01 through H 120130A 02	Mayor, P.O. Box 156, Sneads, Fla. 32460.	Aug. 2, 1974.
Georgia	Gwinnett	Duluth, city of	H 130058A 01 through H 130058A 04	Mayor, P.O. 624, Duluth, Ga. 30136.	May 21, 1976.
Do.	Clayton	Forest Park, city of	H 130042A 01 through H 130042A 06	Mayor, P.O. Box 60, Forest Park, Ga. 30050.	May 31, 1974.

#### Title 7—Agriculture

#### CHAPTER I—AGRICULTURAL MARKETING SERVICE (STANDARDS, INSPECTION, MARKETING PRACTICES), DEPARTMENT OF AGRICULTURE

#### PART 51—FRESH FRUITS, VEGETABLES AND OTHER PRODUCTS, INSPECTION, CERTIFICATION AND STANDARDS

#### United States Standards for Grades of Fresh Fruits, Vegetables, Nuts and Other Special Products<sup>1</sup>

On October 6, 1975, a notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 46115) concerning issuance of policy on establishing

<sup>1</sup> Packing of the product in conformity with the requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug and Cosmetic Act or with applicable State laws and regulations.

uniform grade nomenclature for United States standards for grades of fresh fruits, vegetables, nuts and other special products (7 CFR § 51.100) pursuant to the Agricultural Marketing Act of 1946 (60 Stat. 1087, as amended; 7 U.S.C. 1621-1627), which provides for the issuance of official U.S. grades to designate different levels of quality for the voluntary use of producers, buyers and consumers. Official grading services are also provided under this act upon request of any financially interested party and upon payment of a fee to cover the cost of such services.

#### STATEMENT OF CONSIDERATIONS LEADING TO THE ISSUANCE OF POLICY ON UNIFORM GRADE NOMENCLATURE

For a number of years there has been interest and concern on the part of industry groups, legislators, consumers and

the Department in the variations in grade names used in the grade standards for fresh fruit and vegetables. In January 1975 the General Accounting Office recommended to Congress that the Secretary of Agriculture "revise existing regulations to make grade designations more uniform and easier for consumers and industry to understand." The National Association of State Departments of Agriculture has urged the Department to develop uniform grade names. Members of the 94th Congress has introduced legislation calling for uniform grade nomenclature for all foods and for mandatory grading and grade labeling.

The first fresh fruit and vegetable grade standards established were for potatoes in 1917. Since then standards have been established for many commodities. At present there are 152 grade standards covering 82 different fresh fruits and vegetables. These grade standards are

voluntary and were developed in consultation with representatives of producers, receivers and consumers, following three basic principles: (1) There must be a need for the standards; (2) There must be interest and support for the use of the standards; and (3) The standards must be practical to use.

In developing grade standards for a commodity the full range of quality produced is considered. The number of grades provided depends to a large extent on the number of distinct gradations of quality that the industry makes which is usually governed by the relative value of the product. The new policy would not preclude the existing practice of providing only the number of grades in standards necessary to describe the full range of quality for that commodity.

As the grade standards were developed or revised over the years, it was usually members of the particular commodity industry concerned, like the potato growers, shippers and the apple packers, who had the most influence on what grade terminology was selected. There are good reasons why the grade terminology evolved that way. But as marketing becomes more complex it is much more important to have a system of simplified nomenclature that everyone can easily understand and use.

It is the industry's responsibility as well as the Department's to help consumers get the quality they desire. A simplified uniform grade nomenclature that consumers and everyone in the marketing system could understand will help consumers select the quality they want.

Following publication of the proposal in the FEDERAL REGISTER copies were widely distributed to individuals and to industry and consumer groups and organizations. Information concerning the proposal was carried on television and radio and in newspapers and trade publications.

The period for comments ended on February 15, 1976, and 224 letters of comment were received in response to the proposal. Most comments were from consumers or organizations representing them. Of the remainder of comments, most were from growers, shippers and industry organizations representing them.

Some consumer organizations and consumers in general expressed unqualified approval of the proposal. Most consumer organizations and some consumers supported the concept of uniform nomenclature but suggested that U.S. No. 1 as the top grade would be less confusing than U.S. Fancy. However, the U.S. Fancy grade represents premium quality and covers only the top quality range produced, while U.S. No. 1, the chief trading grade, represents good average quality that is practical to pack under commercial conditions and covers the bulk of the quality range produced.

Many industry members and organizations expressed complete disapproval of the proposal, as in their opinion, the proposal would be of little or no benefit

to the consumer and would create substantial and costly confusion within the selling and buying framework of industry. Some industry organizations specified that the proposal was acceptable if certain existing grade subclassifications could be retained under the policy.

The Department recognizes that in certain situations strict compliance might be inappropriate and, accordingly, has provided for exceptions that would be consistent with declared policy and the promotion of consumer interests. Exceptions might include retaining grade subclassifications such as the "U.S. Export No. 1" grade in some standards and making minor changes in the standards necessary to keep them compatible with current marketing practices such as the bulk handling of commodities which may require minor changes in the application of tolerances requirement.

After consideration of all relevant matters presented by interested persons, including the proposal set forth in the aforesaid notice, the following policy on establishing uniform grade nomenclature for United States standards for grades of fresh fruits, vegetables, nuts and other special products is hereby promulgated pursuant to the Agricultural Marketing Act 1946 (60 Stat. 1087, as amended; 7 U.S.C. 1621-1627).

The new subpart shall read as follows:

**Support—United States Standards for Grades of Fresh Fruits, Vegetables, Nuts and Other Special Products**

#### UNIFORM GRADE NOMENCLATURE

§ 51.100 Uniform grade nomenclature.

When new U.S. standards for grades for fresh fruits, vegetables, nuts and other special products, except for raw products for processing, are issued, or when existing grade standards are revised or amended, the following grade nomenclature shall be used:

Grade name	Definition
U.S. Fancy-----	Premium quality; covers only the top quality range produced.
U.S. No. 1-----	The chief trading grade; represents good average quality that is practical to pack under commercial conditions; covers the bulk of the quality range produced.
U.S. No. 2-----	Intermediate quality between U.S. No. 1 and U.S. No. 3; noticeably superior to U.S. No. 3.
U.S. No. 3-----	The lowest merchantable quality practical to pack under normal conditions.

The foregoing shall apply except in situations that compliance would be considered inappropriate or unreasonable.

The policy contained in this subpart shall become effective July 1, 1976.

(Secs. 203, 205 Stat. 1087, as amended, 1090 as amended (7 U.S.C. 1622-1624).)

Dated: May 20, 1976.

DONALD E. WILKINSON,  
Administrator.

##### Correction

In FR Doc. 76-14100 appearing at page 19960 in the FEDERAL REGISTER of Friday, May 14, 1976 the following corrections should be made in § 301.48-2a:

1. On page 19961, second column under "Rock Island County", ninth line, the word "Road" should read "Route".
2. On page 19962, first column, immediately above the paragraph headed "Starke County" insert "St. Joseph County, The entire county."
3. On page 19962, third column, in paragraph headed "Macomb County", the fourth line, last letter should read "E".
4. On page 19962, third column, in paragraph headed "Monroe County", the third line, first word should read "S<sup>1</sup>/<sub>4</sub>".
5. On page 19963, second column, under heading "Ohio", the eleventh line, first word should read "Carroll".

### CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

#### [Avocado Regulation 18]

#### PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

##### Quality and Maturity Requirements

Avocado Regulation 18 prescribes during the period May 31, 1976, through April 30, 1977, the following grade and maturity requirements for fresh avocados grown in South Florida: Avocados

shipped to destinations outside the production area shall grade at least U.S. No. 3 and individual fruit for specified types of avocados must be at least the prescribed minimum weights or diameters by specified dates (maturity requirements). Avocados shipped to destinations within the production area are exempted from all grade requirements, if packed in containers other than those authorized for shipments outside such area, but such avocados must also meet maturity requirements. The requirements are issued in the interest of producers and consumers and are designed to help keep immature and defective fruit off the market. Immature avocados will not ripen satisfactorily and would be unacceptable in taste.

On April 28, 1976, notice of proposed rulemaking was published in the FEDERAL REGISTER (41 FR 17748), regarding a proposed regulation to be made effective on May 31, 1976, pursuant to the marketing agreement, as amended, and Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida. Such proposed regulation was recommended by the Avocado Administrative Committee established pursuant to the said marketing agreement and order. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The notice allowed interested persons until May 10, 1976, to submit written data, views, or arguments in connection with the proposed regulation. None were received.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, the recommendation and information submitted by the Avocado Administrative Committee (established pursuant to the marketing agreement and order), and other available information, it is hereby found and determined that the regulation, as hereinafter set forth, is in accordance with the provisions of the said amended marketing agreement and order and will tend to effectuate the declared policy of the act.

The regulation hereinafter set forth is based upon an appraisal of current and prospective crop and market conditions. Total 1976-77 season fresh shipments of Florida avocados is estimated at 950,000 bushels, as compared with fresh shipments of about 1,097,000 bushels in the 1975-76 season. If realized, 1976-77 shipments would be the second largest quantity of record. The regulation is designed to assure shipment of fruit of a quality and maturity acceptable to consumers in the respective distribution areas in the interest of consumers and producers consistent with the objectives of the act.

It is hereby further found that it is impracticable and contrary to the public

interest to give further notice and postpone the effective date of this regulation until June 24, 1976 (5 U.S.C. 553), and good cause exists for making the provisions hereof effective as herein-after set forth in that (1) shipments of the current crop of avocados are expected to begin on or about the effective date hereof, and this regulation should be applicable, insofar as practicable, to all such shipments in order to effectuate the declared policy of the act; (2) the recommendations upon which this regulation is based were developed by the committee at an open meeting on April 7, 1976, after due notice thereof, and all interested persons present were given an opportunity to express their views; (3) a notice of proposed regulation for Florida avocados was published in the FEDERAL REGISTER (41 FR 17748); (4) the regulation herein specified, except for one minor correction, is the same as the proposed regulation.

#### § 915.318 Avocado Regulation 18.

(a) Order. (1) During the period May 31, 1976, through April 30, 1977, no

handler shall handle any avocados unless such avocados grade at least U.S. No. 3 grade: *Provided*, That avocados which fall to meet the requirements of such grade may be handled within the production area, if such avocados meet all other applicable requirements of this section and are handled in containers other than the containers prescribed in § 915.305, as amended (7 CFR Part 915; 40 F.R. 52605), for the handling of avocados between the production area and any point outside thereof;

(2) On and after the effective date of this regulation, except as otherwise provided in subparagraphs (10) and (11) of this paragraph, no avocados of the varieties listed in Column 1 of the following Table I shall be handled prior to the date listed for the respective variety in Column 2 of such table, and thereafter each such variety shall be handled only in conformance with subparagraphs (3), (4), (5), (6), (7), (8), and (9) hereof.

(3) From the date listed for the respective variety in Column 2 of Table I to the date listed for the respective variety in Column 4 of such table, no handler shall handle any avocados of such variety unless the individual fruit weighs at least the ounces specified for the respective variety in Column 3 of such table or is of at least the diameter specified for such variety in said Column 3;

(4) From the date listed for the respective variety in Column 4 of Table I to the date listed for the respective variety in Column 6 of such table, no handler shall handle any avocados of such variety unless the individual fruit weighs

at least the ounces specified for the respective variety in Column 5 of such table or is of at least the diameter specified for such variety in said Column 5;

(5) From the date listed for the respective variety in Column 6 of Table I to the date listed for the respective variety in Column 8 of such table, no handler shall handle any avocados of such variety unless the individual fruit weighs at least the ounces specified for the respective variety in Column 7 of such table or is of at least the diameter specified for such variety in said Column 7;

(6) No handler shall handle (i) prior to August 23, 1976, any Lisa variety avo-

cados, (ii) during the period August 23, 1976, through August 29, 1976, any Lisa variety avocados unless the individual fruit in each lot of such avocados weighs at least 12 ounces, (iii) during the period August 30, 1976, through September 5, 1976, any Lisa variety avocados unless the individual fruit in each lot of such avocados weighs at least 11 ounces, (iv) during the period September 6, 1976, through September 12, 1976, any Lisa variety avocados unless the individual fruit in each lot of such avocados weighs at least 10 ounces, (v) during the period September 13, 1976, through September 19, 1976, any Lisa variety avocados unless the individual fruit in each lot of such avocados weighs at least 9 ounces;

(7) No handler shall handle (i) prior to September 13, 1976, any Booth 8 variety avocados, (ii) during the period September 13, 1976, through October 3, 1976, any Booth 8 variety avocados unless the individual fruit in each lot of such avocados weighs at least 16 ounces, or is at least 3 3/4 inches in diameter, or (iii) during the period October 4, 1976, through October 17, 1976, any Booth 8 variety avocados unless the individual fruit in each lot of such avocados weighs at least 14 ounces, or is at least 3 3/4 inches in diameter, or (iv) during the period October 18, 1976, through October 31, 1976, any Booth 8 variety avocados unless the individual fruit in each lot of such avocados weighs at least 12 ounces, or is at least 3 3/4 inches in diameter, or (v) during the period November 1, 1976, through November 14, 1976, any Booth 8 variety avocados unless the individual fruit in each lot of such avocados weighs at least 10 ounces or is at least 3 3/4 inches in diameter.

(8) Except as otherwise provided in paragraphs (a) (10) and (11) of this section, varieties of the West Indian type of avocados not listed in Table I shall not be handled except in accordance with the following terms and conditions:

(i) Such avocados shall not be handled prior to July 5, 1976.

(ii) From July 5, 1976, through August 1, 1976, the individual fruit in each lot of such avocados shall weigh at least 18 ounces.

(iii) From August 2, 1976, through September 5, 1976, the individual fruit in each lot of such avocados shall weigh at least 16 ounces.

(iv) From September 6, 1976, through October 3, 1976, the individual fruit in each lot of such avocados shall weigh at least 14 ounces.

(9) Except as otherwise provided in paragraphs (a) (10) and (11) of this section, varieties of avocados not covered by paragraphs (a) (2) through (8) hereof shall not be handled except in accordance with the following terms and conditions:

(i) Such avocados shall not be handled prior to September 20, 1976.

(ii) From September 20, 1976, through October 17, 1976, the individual fruit in each lot of such avocados shall weigh at least 15 ounces.

(iii) From October 18, 1976, through December 19, 1976, the individual fruit in each lot of such avocados shall weigh at least 13 ounces.

(10) Notwithstanding the provisions of paragraphs (a) (2) through (9) hereof regarding the minimum weight or diameter for individual fruit, up to 10 percent, by count, of the individual fruit contained in each lot may weigh less than the minimum specified weight and be less than the minimum specified diameter: *Provided*, That such avocados weigh not more than two ounces less than the applicable specified weight for the particular variety as prescribed in Columns 3, 5, or 7 of Table I or in paragraphs (a) (6), (7), (8), and (9). Such tolerances shall be on a lot basis, but not to exceed double such tolerances shall be permitted for an individual container in a lot.

(11) The provisions of paragraphs (a) (2) through (10) of this section shall not apply to any variety, except the Linda variety, of avocados which, when mature, normally change color to any shade of red or purple and any portion of the skin of the individual fruit has changed to the color for that fruit when mature.

(b) Terms used in the amended marketing and order, when used herein, have the same meaning as is given to the respective term in said marketing agreement and order; the term "diameter" shall mean the greatest dimension measured at right angles to a line from the stem to the blossom end of the fruit; and the term "U.S. No. 3" shall have the same meaning as set forth in the United States Standards for Florida avocados (7 CFR 51.3050-51.3069).

(c) The provisions of this regulation shall become effective May 31, 1976.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.)

Dated: May 20, 1976, to become effective May 31, 1976.

CHARLES R. BRADER,  
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

## Title 20—Employees' Benefits

## CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Regulations Nos. 1 and 5]

## PART 401—DISCLOSURE OF OFFICIAL RECORDS AND INFORMATION

## PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED (1965—)

Disclosure of Information Where Physician Frequently Submits Erroneous Certifications or Inappropriate Plans of Treatment; Presumed Coverage of Post-Hospital Services

On July 9, 1975, there was published in the FEDERAL REGISTER (40 FR 28810) a Notice of Proposed Rule Making with

## RULES AND REGULATIONS

21339

proposed amendments to Regulations No. 1 and Subparts A and P of Regulations No. 5 of the Social Security Administration (20 CFR Parts 401, 405). The proposed amendments implement section 228 of Pub. L. 92-603, the Social Security Amendments of 1972 which provides for limited periods of presumed coverage of post-hospital extended care and post-hospital home health services for those individuals who have those specific medical conditions designated in the regulations and whose physicians submit the required certifications and plans of treatment. The amendments also provide authority to disclose the name of a physician whose certifications or plans of treatment have been found not to be acceptable for purposes of the presumed coverage provision to any provider, claimant, or prospective claimant for benefits or payments, his duly authorized representative, and to other parties in interest. However, the proposed amendments provide that such a physician must be afforded a reasonable opportunity for an administrative hearing before such a finding is implemented.

Interested parties were given the opportunity to submit in writing on or before August 8, 1975, and subsequently extended to August 23, 1975, any data, views, or arguments pertaining to the proposed amendments. Comments were received from a variety of sources including representatives of national, State, and local organizations. The comments and suggestions received, responses thereto, and changes made in the regulations as proposed are discussed below.

1. A large group of comments received mistakenly interpreted the regulations as placing new limitations on post-hospital coverage or expressed the fear that the regulations would result in such limitations unless it was made very clear to intermediaries that the periods of guaranteed coverage are not the maximum period allowable under Medicare. To avoid such limitations, some of the comments recommended that the regulations include an additional provision to guarantee payment for more home health visits or skilled nursing facility days than those specified in the regulations where an individual patient's condition warrants. Since the law directs that the time periods guaranteed for the various medical conditions should be the minimum generally required for such conditions, this approach could not be adopted. However, the regulations have been modified to clearly emphasize that the presumed number of skilled nursing facility days or home health visits are not the maximum number for which payment will be made and that additional days or visits are reimbursable where the patient's condition indicates that the additional care is required. The operating instructions which are being prepared for providers and intermediaries will also make this point clear.

2. Many of the comments received expressed concern over the requirement that the physician's certification and plan of treatment for home health serv-

ices be submitted in writing prior to the first home health visit. The comments stated that this requirement would be extremely difficult, if not impossible, to meet in cases in which the physician orders care to start immediately upon discharge from the institution but the home health agency is not notified of the patient's need for services until the day of discharge from the hospital or skilled nursing facility. It was, therefore, suggested that the regulations be revised to permit oral compliance with this requirement prior to the first visit to be followed as soon as practical by written compliance. The Department recognizes the merit of the concerns expressed. However, it is felt that a presumption of eligibility before services begin should be based on written evidence and that without written documentation the possibility of erroneous payment exists. The only way to assure that correct payment is being made for a condition listed in the regulations is for the physician to submit the necessary documentation in writing prior to the first chargeable visit. Thus, the requirement that the physician's certification and plan of treatment be submitted in writing prior to the first visit, while not specifically stated in the statute, is considered an inherent requirement of the statute and, therefore, must be retained.

3. Many of the comments received also expressed concern with the statement in the regulations that the number of home health visits designated is predicated on the assumption that the length of such visits will be the usual and customary time for a skilled visit, i.e., that the required skilled service can be furnished in one hour or less. It was stated that because of the amount and variety of services that are performed by nurses during a nursing visit such visits may require more than an hour. This statement in the regulations has been modified to indicate that the length of time for visits should be the usual and customary time needed for such services.

4. A number of the comments received viewed the regulations as restricting or discouraging a home health agency from furnishing the presumed visits on a daily basis or more frequently than specified in the medical conditions. It is not the intent of the regulation to in any way restrict the way a plan of treatment may allocate the number of visits shown for any given condition within the presumed period. Accordingly, the regulations have been revised to make clear the flexibility with which the guaranteed visits may be allocated.

5. Some comments expressed the opinion that the method followed in the regulations of giving only the largest number of home health visits where a patient requires several types of nursing services may not allow sufficient time for adequate treatment of home health patients with multiple or secondary medical conditions. It was suggested, therefore, that the total number of visits for each type of nursing service required should be

granted. This comment was not accepted. It was recognized that patients having multiple conditions may require care over a longer period of time than those with a single condition. However, it was felt that where an individual needed several types of nursing service in most instances he would need to receive them simultaneously. Therefore, since various types of nursing services can be provided during a single visit even though the services are for different purposes, it was felt that allowing the longer of the two periods was equitable and consistent with the intent of the law that payment be guaranteed for only the minimum period for which covered care may be presumed to exist for a particular medical condition.

6. Many comments expressed the view that the presumed coverage periods are too narrow with respect to the number of home health visits and the time frames in which the visits are presumed to be covered. As a result of the reevaluation of the presumed periods in light of these comments some changes have been made in both the time frames and the number of visits guaranteed for some services.

7. Some comments suggested that additional medical conditions be added to the final regulations and that for certain of the conditions already listed in the regulations additional sub-categories be included. It would require considerable time to complete the identification and development of additional medical conditions. Since this would delay the adoption and implementation of these regulations, it was decided not to make such changes at this time. However, the Department agrees that it is desirable to add to the medical conditions listed in the regulations, and the regulations will be revised periodically in the future for this purpose. In addition, the Department will examine from time to time those conditions listed in the regulations with a view to determining whether the descriptions or the time frames established for the conditions should be modified on the basis of additional program experience and changes in medical care practice.

8. The comment was made that certain intermediaries have already devised presumed coverage plans which are superior to that provided for in the regulations, i.e., are more liberal. While intermediaries may apply preliminary screening parameters to identify cases in which payment will very probably be made, these regulations provide the only procedures by which payment may be guaranteed in advance.

9. Many of the comments suggested that (a) presumed coverage for home health services not be limited to Part A but be extended to Part B as well; (b) the requirement which stipulates that the physician has the responsibility for developing and establishing and signing the plan of treatment be modified to permit other health professionals such as the licensed nurse, occupational therapist, or physical therapist to establish the plan of treatment; and (c) presumed

coverage for home health services be extended to occupational therapy, home health aide visits and medical social services. Because these are specific statutory requirements or limitations these suggestions could not be adopted.

10. Some comments suggested that the regulations be revised to indicate whether the use of the presumed coverage provision is optional or mandatory. The regulations have been modified to make it clear that use of the provision is optional with the physician and is dependent upon his certifying that his patient has one of the listed medical conditions for which program payment can be guaranteed and submitting the necessary plan of treatment.

11. A few comments suggested that there should be a clear-cut delineation, as there is in state licensure practice acts, between physical therapy and nursing services, where the regulations specify that the skilled services the patient needs would be covered as either a skilled nursing or physical therapy visit. Since professional advice received indicates that the skilled services with respect to which such a choice is provided are those which are legally and appropriately a function of either discipline and could be performed by either one, these comments were not adopted. Which professional will be used depends on the physician's plan of treatment.

12. Comments were also received which expressed the view that the subject regulations penalize those patients living in regions where shorter hospital stays are the norm by not allowing correspondingly more post-hospital care. Although the length of hospital stays was taken into consideration in developing the presumed coverage periods, the variations in lengths of hospital stays were not considered significant since the presumed periods were developed with the objective of guaranteeing program payment for minimum periods of time.

13. Other comments included the opinion that skilled nursing facilities are receiving a greater share of the presumed coverage benefit than home health agencies and that this favoritism will encourage transfer of patients to skilled nursing facilities and discourage home health utilization. In a similar vein, the comment was made that because of the limited number of proposed medical conditions and the limited number of visits allowed, the regulations will tend to produce longer institutionalization and consequently reduce home care. The Department does not agree with these comments. Since coverage of care in a skilled nursing facility is contingent upon the patients requiring daily skilled care which as a practical matter can only be provided on inpatient basis in a skilled nursing facility, it is not possible to equate the skilled nursing facility benefit with the home health benefit and make valid comparisons between lengths of stay and number of visits.

14. One comment expressed the view that the number of home health visits proposed for an aphasic patient is not

adequate for a patient who has not had post-hospital extended care. Since the presumed coverage period established is the minimum number of visits generally needed by patients irrespective of whether or not the patient has had post-hospital extended care prior to his discharge to his home, this comment was not accepted.

15. Another comment suggested that a physician found to have been submitting, with some frequency, erroneous certifications or inappropriate treatment plans should receive an administrative hearing prior to any determination by the Secretary. The regulations have been modified to indicate that a physician will receive a notice of the proposed determination and will be given the opportunity to request an administrative hearing before such determination becomes effective. After the hearing, or based on the evidence on the record if a hearing is not requested, the physician will be sent written notice of the determination at least 15 days before the effective date of such determination.

16. Several comments expressed concern regarding the relatively short time frame within which the physician must request a hearing in view of the uncertainty of the mails. This comment was adopted. The time limit for requesting an administrative hearing has been extended from 10-working days to 30-calendar days from the mailing date of such notice of proposed determination.

17. Comments were also received suggesting that the term "with some frequency" as it is used in connection with the Secretary's determination that a physician is submitting erroneous certifications or inappropriate plans of treatment be defined. The Department agrees there is a need for criteria to be used to determine whether a physician is submitting "with some frequency" erroneous certifications or inappropriate plans of treatment. However, since additional time is required to ensure the establishment of valid criteria for this purpose, the Department felt that issuance of these regulations should not be delayed pending completion of the development of such criteria. When developed they will be issued as amendments to these regulations.

18. A comment was received which suggested that the regulations be revised to protect providers from retroactive denials in cases where the Secretary has determined a physician's certifications or plans of treatment to be unacceptable for purposes of the presumed coverage provision by authorizing payment until the provider has been properly notified of the Secretary's decision. Although the instructions to be issued to all intermediaries and providers will make provision for timely notice to providers in these cases, the statute is not broad enough to provide a guarantee of payment under those circumstances.

19. Another comment suggested the elimination of the requirement that the physician who establishes the home health plan of treatment must also be

the same person who signs the certification. This suggestion was not adopted. As the regulations indicate, the Secretary is charged with the responsibility of determining whether a physician is submitting with some frequency erroneous certifications or inappropriate plans of treatment in connection with the presumed coverage provision. Since the plan of treatment in effect documents the physician's certification that the individual needs the covered care for a condition set out in the regulations, it is felt that the statute contemplates these functions be performed by the same physician. These requirements complement and reinforce each other. If the physician's responsibility for the plan of treatment and certification were separated, the Secretary would find it very difficult to make the determination as to whether a physician is in fact submitting with some frequency erroneous certifications or inappropriate plans of treatment. In addition, with respect to home health care, it would be unusual to have more than one physician with a detailed knowledge of a patient's condition. Since the same principle applies to presumed coverage cases involving post-hospital extended care services, the regulations have been modified to state that in such cases, the same physician who submits the certification must also establish the plan of treatment.

20. Comments were also received which expressed concern that the regulations will result in increased paperwork or administrative costs due to the belief that in order to receive further home health reimbursement after the presumed period, the physician will have to recertify the patient's need for continuing care and establish a new plan of treatment. It was felt that physicians may be unwilling to go to this extra effort and as a result may stop referring patients for home health care. The regulations have been revised to make it clear that it is not necessary for the physicians to recertify the patient's need for continuing care and establish a new plan of treatment at the end of the presumed coverage period but rather that the usual 60-day recertification requirement applies. Additionally, the regulations have been revised to indicate that when the physician establishes the original plan of treatment he must specify all the services to be provided, irrespective of the fact that all of these services may not be guaranteed under the presumed coverage provision; e.g., if the patient requires home health aide services or medical social services the physician plan of treatment must so indicate.

21. One comment objected to the provision for termination of a presumed coverage period when a utilization review committee determines that the stay or further stay is not medically necessary and argued that the inclusion of this requirement is inconsistent with the intent of the presumed coverage provision, which is to encourage the use of post-hospital services without the fear of retroactive denial. This comment further stated that if the patient meets the cri-

teria for presumed coverage established in the regulations, there should be no retroactive denial for the period specified for any reason. The utilization review committee provision is included in the regulations to reflect and be consistent with section 1814(a)(7) of the Act, which provides that payment may not be made in any cases where the utilization review committee of a skilled nursing facility determines, in the course of a sample or other review of admissions, that post-hospital extended care services are not medically necessary. The Department believes it would be inconsistent to presume that the patient still requires posthospital extended care services, and inappropriate to continue to pay for that care, after a medical judgment has been made by a utilization review committee that such care is not medically necessary. The presumed coverage amendment did not intend that the Medicare program should pay for an entire presumed coverage period of skilled nursing facility care notwithstanding the fact a utilization review committee has determined that the care was noncovered upon admission, or that due to a change in the beneficiary's medical condition covered care is no longer required. Moreover, since there would be no retroactive denials in such situations, in that the law provides that payment may be terminated only prospectively in cases involving an adverse utilization review committee decision, i.e., 3 days following notice to the provider of the decision, the Department believes that the termination of payment in such cases is not inconsistent with the intent of the presumed coverage provision and the requirement has therefore been retained. A question was also raised as to whether a skilled nursing facility's utilization review committee is required to review each presumed coverage case upon admission to the skilled nursing facility and whether the physician would have an opportunity to defend his position in the event of an adverse decision by the utilization review committee. As the cross reference in § 405.133(a)(4) indicates, the regulatory requirements relating to adverse decisions made by a skilled nursing facility's utilization review committee are set out in §§ 405.166 and 405.1137 (e) of the regulations. As § 405.1137(e) indicates, a skilled nursing facility's utilization review committee is required only to review a sample of admissions. Accordingly, a skilled nursing facility's utilization review committee is not required to review all presumed coverage cases. However, the utilization committee is required to notify the physician of a proposed adverse decision and give him the opportunity to present his views. Therefore, if a utilization review committee proposes to make an adverse decision on any presumed coverage case reviewed as part of the committee's sample review of admissions, the physician will be notified of the proposed decision and be given an opportunity to present his views.

Accordingly, with these changes and additions, the proposed amendments are adopted as set forth below.

(Secs. 205, 1102, 1106, 1814 (h) and (i), and 1871, 49 Stat. 624 as amended, 49 Stat. 647 as amended, 53 Stat. 1398, as amended, 86 Stat. 1407 and 79 Stat. 331 (42 U.S.C. 405, 1302, 1306, 1395f (h) and (i), and 1395hh).)

Effective date: These amendments shall be effective June 24, 1976.

(Catalog of Federal Domestic Assistance Program No. 13.800, Health Insurance for the Aged—Hospital Insurance.)

Dated: March 12, 1976.

J. B. CARDWELL,  
Commissioner of Social Security.

Approved: May 12, 1976.

MARJORIE LYNCH,  
Acting Secretary of Health,  
Education, and Welfare.

#### PART 401—DISCLOSURE OF OFFICIAL RECORDS AND INFORMATION

1. Section 401.3 is amended by adding thereto new paragraph (w) to read as follows:

§ 401.3 Information which may be disclosed and to whom.

Disclosure of any such file, record, report, or other paper, or information, is hereby authorized in the following cases and for the following purposes:

(w) To any provider, claimant or prospective claimant for benefits or payments, his duly authorized representative, and to other parties in interest, the name of any physician who has been found by the Secretary to have been submitting, with some frequency, in connection with title XVIII claims falling within the scope of § 405.133 of this chapter:

(1) Certifications that erroneously indicate that the patient's medical condition is among those listed in § 405.133(c) or § 405.133(d); or

(2) Plans for providing services which are inappropriate and do not reflect a level of care which would qualify an individual for post-hospital extended care services or post-hospital home health services, i.e., a covered level of care (see § 405.133(a)); except that the name of any such physician shall not be disclosed pursuant to such a finding unless such physician has first been afforded a reasonable opportunity for an administrative hearing before the Secretary's finding becomes effective (see § 405.133(b)).

#### PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

2. § 405.133 is added to read as follows:

§ 405.133 Post-hospital extended care and post-hospital home health services; presumed coverage procedure.

(a) *Eligibility for presumed coverage.* To qualify for extended care benefits upon admission to a skilled nursing facility a beneficiary must need on a daily basis skilled nursing care (provided directly by or requiring the supervision of skilled nursing personnel) or other skilled rehabilitation services, which as a practical matter can only be provided

in a skilled nursing facility on an inpatient basis, for any of the conditions with respect to which he was receiving inpatient hospital services prior to transfer to the skilled nursing facility (see §§ 405.126-405.128(a)). To qualify for part A home health benefits upon admission to care by a home health agency following a qualifying inpatient stay a beneficiary must be confined to his home, under the care of a physician and must be in need of skilled nursing care on an intermittent basis, physical therapy or speech therapy (speech pathology) for a condition for which he received medically necessary inpatient hospital services or post-hospital extended care services. An individual who has a medical condition listed in paragraph (c) of this section (in the case of post-hospital extended care services) or paragraph (d) of this section (in the case of post-hospital home health services) is presumed to require this level of care for the period of time or number of visits specified for such condition provided:

(1) A physician submits in writing the required certification (see §§ 405.165, 405.170, 405.182, and 405.183) to the provider prior to or at the time of such individual's admission to a skilled nursing facility or in a timely fashion prior to the first chargeable post-hospital home health visit made to the individual;

(2) The certification indicates that the individual's medical condition is a condition set out in paragraph (c) or paragraph (d) of this section;

(3) The physician's certification is accompanied by a written plan of treatment for providing the required post-hospital extended care services or the post-hospital home health services;

(4) There is no adverse finding by the skilled nursing facility's utilization review committee that the stay or any further stay is medically unnecessary (see §§ 405.165 and 405.1137(e)); and

(5) The Secretary has not determined for purposes of the presumed coverage provision that the physician is submitting, with some frequency, erroneous certifications or plans for providing services which are inappropriate (see paragraph (b) of this section).

Where any of these requirements are not met, i.e., the physician does not submit a certification because the individual does not have a medical condition described in the regulations or the physician does not elect to certify to one of the medical conditions contained in the regulations, or one of the other requirements listed is not met, the individual is not eligible for a presumed period of coverage. However, although payment cannot be guaranteed in advance in such cases, payment under the program would nevertheless be made in such cases where the facts in the individual case establish a need for covered post-hospital extended care services or post-hospital home health services. In any case all other pertinent requirements for entitlement to post-hospital extended care or post-hospital home health benefits must

be met. (See §§ 405.120 and 405.131). An individual is not eligible for more than one period of presumed coverage for each skilled nursing facility admission or admission to care by a home health agency following a qualifying inpatient stay. The periods of presumed coverage which have been established for the medical conditions designated in the regulations are not intended to encompass the entire period of care an individual may require. Individuals who require covered care beyond the presumed coverage period (or within the presumed coverage period, in the case of individuals who require additional those included in the visits specified in the regulations for their medical conditions) would be eligible to have payment made for such care where the facts show in the individual case that the care needed is the type which would qualify an individual for post-hospital extended care benefits or post-hospital home health benefits. The medical conditions designated in the regulations represent an initial listing of those conditions which generally require a covered level of extended care services or home health services following hospitalization, taking into account such factors as the medical severity of such conditions, the degree of incapacity, the type of services required and the minimum length of stay in a skilled nursing facility or the minimum period of home confinement generally needed for such conditions. These regulations will be revised periodically to include additional medical conditions which subsequent program experience indicates are the type which require covered care.

(b) *Unacceptable physician certifications and plans of treatment.* Where the Secretary determines that a physician is submitting with some frequency:

(1) Certifications that erroneously indicate that the patient's medical condition is among those listed in paragraph (c) or paragraph (d) of this section, or

(2) Plans for providing services which are inappropriate and do not reflect a level of care which would qualify an individual for post-hospital extended care services or post-hospital home health services, i.e., a covered level of care (see paragraph (a) of this section), certifications and plans of treatment executed by such a physician on or after the effective date of the notice to the physician of the Secretary's final determination will not be acceptable for purposes of the presumed coverage provision.

(i) *Notice of proposed determination.* Whenever the Secretary proposes, on the basis of appropriate evidence, to make a finding that a physician has submitted with some frequency erroneous certifications or inappropriate treatment plans, as outlined in paragraph (b) (1) and (2) of this section, he shall give written notice to the physician of his intention not to accept the physician's certifications and treatment plans for purposes of the presumed coverage provision, and to disclose the physician's name to any provider, claimant, prospective claimant for benefits or payments, his duly authorized

representative, and to other parties in interest within the provisions of Regulation No. 1 (20 CFR 401.3(w)). Such notice of the proposed determination shall be mailed to the physician's last known address. It shall state the reasons for the proposed determination and advise the physician that he may, within 30-calendar days from the mailing date of such notice of proposed determination, submit a written request for an administrative hearing; and that he may submit any pertinent evidence as to why the proposed determination should not be put into effect. The notice shall inform the physician that should he not request a hearing within the time period prescribed, the proposed determination of the Secretary shall become the final determination.

(ii) *Conduct of the administrative hearing.* The administrative hearing shall be conducted before a hearing officer of the Social Security Administration who has not had any involvement in the proposed determination. The hearing officer shall inquire fully into the matter at issue and shall receive in evidence the testimony of witnesses and any documents which are relevant and material. The physician shall be entitled to examine and question the evidence and to present and cross-examine witnesses. The physician may be represented by counsel or any other qualified representatives.

(iii) *Hearing officer's decision.* As soon as practicable after the close of an administrative hearing, the hearing officer shall make a decision in the case which shall be based upon the evidence adduced at the hearing or otherwise included in the hearing record. The decision shall be made in writing and contain findings of fact and statement of reasons. A copy shall be mailed to the physician at his last known address. If the hearing officer determines that the proposed determination not to accept the physician's certifications and plans of treatment is correct, the hearing decision shall indicate that it shall be effective 15 days from the date of notice thereof.

(iv) *Notice of final determination.* In those cases in which a hearing is requested, the hearing officer's decision, described in paragraph (b) (2) (iii) of this section, shall constitute the final determination of the Secretary. In those cases where no hearing is requested within the 30-day period described in paragraph (b) (2) (i) of this section, the Secretary shall send the physician final notice of the decision after the 30-day period has elapsed. The notice shall state that the determination of the Secretary is now final and that it shall be effective 15 days after the date of the notice.

(v) *Effect of final determination.* A determination shall remain in effect until the Secretary finds that there is reasonable assurance that the reasons for his determination will not recur.

(c) *Medical conditions eligible for presumed coverage of post-hospital extended care services.* An individual whose eligibility for post-hospital extended care services is based on one of the following

medical conditions and who meets all of the requirements of paragraph (a) of this section is presumed, to require on a daily basis skilled nursing care (provided directly by or requiring the supervision of skilled nursing personnel) or other skilled rehabilitation services, which as a practical matter can only be provided in a skilled nursing facility on an inpa-

tient basis, for the period of time specified below for each condition. Where an individual has more than one of the conditions specified below, the individual is eligible for the presumed period of coverage for the condition which presumes the longest period of coverage for extended care services.

	Presumed period of covered skilled nursing facility care (days)
<i>Medical condition:</i>	
1. Acute cerebrovascular accident (CVA) resulting from hemorrhage, thrombosis, embolism, brain injury, or tumor (CVA reason for qualifying hospital stay or occurred during hospital stay). <i>Qualifying criteria:</i> Hemiplegia and/or aphasia which requires on a daily basis skilled nursing care, physical therapy, occupational therapy, speech therapy (speech pathology), or a combination thereof—admitted directly from the hospital to skilled nursing facility.	15
2. Fracture of femur—neck or shaft, and/or fracture of pelvis or acetabulum. <i>Qualifying criteria:</i> Nonweight bearing stage following surgery or reduction, complicated by presence of infection, delayed union or aseptic necrosis; and/or a complicating secondary medical condition(s), necessitating daily skilled nursing observation and/or skilled management—admitted directly from hospital to skilled nursing facility.	15
A. Open reduction	15
B. Closed reduction	21
3. Post-arthroplasty of hip with prosthetic device (surgery performed during the hospitalization immediately prior to admission to skilled nursing facility)—admitted directly from hospital to skilled nursing facility.	15
4. Malignancies. <i>Qualifying criteria:</i> Admitted directly from hospital to skilled nursing facility for:	
A. Administration of anticarcinogenic chemotherapeutic agents	14
B. Postoperative care	10
C. Terminal care—Patient in terminal stage of illness and is unable to function outside of skilled nursing facility because of need for skilled management of care required on a daily basis.	14
5. Diabetes Mellitus <i>Qualifying Criteria:</i> Admitted directly from hospital to skilled nursing facility with:	
A. Presence of gangrene, ulceration, or unstable peripheral neuropathy	14
B. Below knee amputation requiring prosthesis (amputation performed during the hospitalization immediately prior to admission to skilled nursing facility)	14
C. Above knee amputation requiring prosthesis (amputation performed during the hospitalization immediately prior to admission to skilled nursing facility)	21
6. Disease of digestive system which required colostomy, ileostomy, or gastrostomy. <i>Qualifying criteria:</i> Admitted directly from hospital to skilled nursing facility for: Diet control and training required (surgery performed during hospitalization immediately prior to admission to skilled nursing facility)	10
7. Congestive heart failure complicated by disorders of rhythm and/or requiring additional drug or anticoagulant stabilization—admitted directly from hospital to skilled nursing facility	10
8. Myocardial infarction with recurring bouts of angina and/or complicated by disorders of rhythm and/or congestive heart failure—admitted directly from hospital to skilled nursing facility	14
9. Chronic obstructive pulmonary disease complicated by acute respiratory infection and/or congestive heart failure—admitted directly from hospital to skilled nursing facility	14

(d) *Medical conditions eligible for presumed coverage of post-hospital home health services.* An individual whose eligibility for post-hospital home health services is based on the need for one of the skilled services described below for the treatment of his medical

condition and who meets all of the requirements of paragraph (a) of this section is presumed to require skilled nursing care on an intermittent basis or physical therapy or speech therapy (speech pathology) for the number of home health visits designated below. The

number of home health visits designated is predicated on the assumption that the length of such visits will be the usual and customary time for such visits. Where an individual's medical condition necessitates more than one of the types of skilled services specified below, and each type requires the same kind of visit, e.g., both require nursing visits, the individual is eligible for the presumed number of visits for the skilled service which presumes the largest number of home health

visits. However, where each type of skilled service needed requires different kinds of visits, e.g., skilled nursing and speech therapy (speech pathology) visits, the individual is eligible for the presumed number of visits for each type of skilled services (see § 405.133(a)). The number of visits designated may be allocated in any combination so long as the visits do not exceed the total number of visits shown or the total time frame specified.

Skilled services	Presumed number of covered home health visits
1. Skilled observation for any unstabilized condition characterized by significant fluctuations in vital signs or marked edema or elevated blood sugar levels.	Nine skilled nursing visits in a 3-week period.
2. Application of dressings involving prescription medications and aseptic techniques because of the presence of open wounds, extensive decubitus ulcers, or other widespread skin disorders.	Ten skilled nursing visits in a 2-week period.
3. A. Instructions in colostomy, ileostomy, or gastrostomy care. B. Instructions in the routine care of an indwelling catheter. C. Instruction in tube feeding technique.	Five skilled nursing visits in a 2-week period. Three skilled nursing visits in a 2-week period. Six skilled nursing visits in a 1-week period.
D. Instruction of a newly diagnosed diabetic in a diabetic regimen, i.e., training in diet, the administration of insulin injections, urine tests, skin care, etc.	Eight skilled nursing visits in a 3-week period.
E. Instruction of a recent hip fracture patient, or family member, in an exercise program and/or in the use of crutches, a walker, or a cane.	Four skilled nursing or four physical therapy visits in a 2-week period.
F. Instruction of a recent post-arthroplasty of hip patient or a recent above or below knee amputation patient in the use of a prosthetic device.	Four skilled nursing or four physical therapy visits in a 2-week period.
G. Instruction of a patient who requires respiratory therapy in the use of special equipment such as an IPPB machine or oxygen units.	Three skilled nursing visits in a 2-week period.
H. Instruction in postural drainage procedures and pulmonary exercises.	Three skilled nursing or three physical therapy visits in a 2-week period.
I. Administration of anticarcinogenic chemotherapeutic agents.	Four skilled nursing visits in a 2-week period.
4. Skilled physical therapy services and/or speech therapy (speech pathology) services to restore functions impaired by a recent cerebrovascular accident resulting in hemiplegia and/or aphasia.	Five physical therapy and/or five speech therapy (speech pathology) visits in a 2-week period.

<sup>1</sup> Recent means the medical condition was either the reason for the qualifying hospital or skilled nursing facility stay or occurred during the qualifying stay.

3. § 405.165 is revised to read as follows:

§ 405.165 Payment for post-hospital extended care services; conditions.

Payment may be made under this Subpart A for post-hospital extended care services only if:

(a) Written request for such payment is filed by or on behalf of the individual to whom such services were furnished; and

(b) When required, a physician (other than a doctor of podiatry or surgical chiropody) certifies and recertifies (see Subpart P of this part) that such services are or were required to be given because the individual needs or needed on a daily basis skilled nursing care (provided directly by or requiring the supervision of skilled nursing personnel) or other skilled rehabilitation services, which as a practical matter can only be provided in a skilled nursing facility on an inpatient basis:

(1) For any of the conditions with respect to which he was receiving inpatient hospital services (or services which

would constitute inpatient hospital services if the institution had met the necessary requirements relating respectively to a utilization review plan (see § 405.1035) and such other requirements as the Secretary finds necessary in the interest of health and safety (see § 405.1001 et seq. for qualification as a "hospital")) prior to transfer to the skilled nursing facility; or

(2) For a condition requiring such extended care services which arose after such transfer and while he was still in the facility for treatment of any of the conditions for which he was receiving such inpatient hospital services; and

(c) In the case of a presumed period of coverage of post-hospital extended care services the requirements of § 405.133 are met; and

(d) The prohibitions against payment, described in §§ 405.166 and 405.167, are not applicable.

4. § 405.170 is amended by revising paragraphs (b) (3) and (b) (4) and adding new paragraph (c) to read as follows:

§ 405.170 Payment for post-hospital home health services; Conditions.

Payment may be made under this Subpart A for post-hospital home health services only if:

(b) When required a physician (other than a doctor of podiatry or surgical chiropody) certifies and recertifies (see Subpart P of this part) that:

(3) A written plan for furnishing such services to such individual has been established and is periodically reviewed by a physician (other than a doctor of podiatry or surgical chiropody);

(4) The services were furnished while the individual was under the care of a physician (other than a doctor of podiatry or surgical chiropody); and

(c) In the case of presumed coverage of post-hospital home health visits the requirements of § 405.133 are met.

5. In § 405.1632, paragraphs (a) and (c) are revised to read as follows:

§ 405.1632 Post-hospital extended care services; certification and recertification.

(a) Certification. (1) The required physician's statement should certify that: (i) Post-hospital extended care services are or were required to be given because the individual needs or needed on a daily basis skilled nursing care (provided directly by or requiring the supervision of skilled nursing personnel) or other skilled rehabilitation services, which as a practical matter can only be provided in a skilled nursing facility on an inpatient basis, for any of the conditions with respect to which he was receiving inpatient hospital services (see § 405.116) or services which would constitute inpatient hospital services if the institution met the conditions of participation for hospitals (see Subpart J of this Part 405) except those relating to utilization review and health and safety requirements, prior to transfer to the skilled nursing facility; and (ii) in a presumed coverage case (see § 405.133) that the medical condition of the individual is a condition designated in regulations.

(2) The certification should be signed by the physician responsible for the case or, where so authorized by the responsible physician, by a physician on the staff of the skilled nursing facility or the physician who is available in case of an emergency who has knowledge of the case. In a presumed coverage case (see § 405.133), the physician certification must be submitted to the skilled nursing facility prior to or at the time of admission to the skilled nursing facility and must be accompanied by a written plan of treatment for providing the required post-hospital extended care services, established by the same physician who makes the required certification. In all other cases the physician's certification should be obtained at the time of admission, or as soon thereafter as is reasonable and practicable.

(c) Timing of recertification. In cases not involving a period of presumed coverage (see § 405.133), the first recertification is required no later than as of the 14th day of extended care services. A skilled nursing facility may, at its option, provide for the first recertification to be made earlier, or it can vary the timing of the first recertification within the 14-day period by diagnostic or clinical categories. Subsequent recertifications are to be made at intervals not exceeding 30 days. Such recertifications may be made at shorter intervals as established by the utilization review committee and the skilled nursing facility. At the option of the skilled nursing facility, review of a stay of extended duration, pursuant to the facility's utilization review plan, may take the place of the second and any subsequent physician recertifications. The skilled nursing facility should have available in its files a written description of the procedure it adopts with respect to the timing of recertifications—that is, the intervals at which recertifications are required, and whether review of long-stay cases by the utilization review committee serves as an alternative to recertification by a physician in the case of the second or subsequent recertifications. In cases involving a period of presumed coverage, the timing of the first recertification will depend upon the length of the presumed period of coverage. Where the presumed period of coverage is 13 days or less the recertification requirements are the same as those for cases not involving a period of presumed coverage. However, where the presumed period of coverage is 14 days or more the first recertification is required no later than as of the last day of the presumed period of coverage with subsequent recertifications being required at intervals not exceeding 30 days.

6. In § 405.1633, paragraphs (a) (2) and (b) are revised to read as follows:

§ 405.1633 Home health services; certification and recertification

(a) \* \* \*

(2) In addition, for post-hospital home health services under the hospital insurance program, the required physician's statement should certify that the services were needed to treat any of the conditions for which the beneficiary received inpatient hospital services (or services which would constitute inpatient hospital services if the institution met the conditions of participation for hospitals (see Subpart J of this Part 405), except those relating to utilization review and health and safety), or post-hospital extended care services during the related hospital or skilled nursing facility stay (see § 405.131) and, in a presumed coverage case, that the medical condition of the individual is a condition designated in regulations (see § 405.133). The certification should be signed by the same physician who establishes the plan of treatment. In a presumed coverage case the physician certification must be submitted in a timely fashion (see § 405.131)

to the home health agency prior to the first chargeable post-hospital home health visit made to the patient and be accompanied by a written plan of treatment showing not only the home health services to be furnished which are covered under the presumed coverage provision but all other covered home health services required as well (see § 405.133). In all other cases the physician's certification should be obtained at the time the plan is established or as soon thereafter as possible.

(b) A recertification is required at intervals of at least once every two months, should be signed by the physician who reviews the plan of treatment and should preferably be obtained at a time when the plan of treatment is reviewed. The recertification statement should indicate the continuing need for services and should estimate how long home health services will be needed. Recertifications in connection with care furnished after a period of presumed coverage (see § 405.133) would also have to be made at the same intervals.

[FR Doc. 76-15061 Filed 5-24-76; 8:45 am]

#### Title 21—Food and Drugs

#### CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[FRL 648-1; FAP4H5053/T15]

#### PART 561—TOLERANCES FOR PESTICIDES IN ANIMAL FEEDS ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

##### 2-Ethoxy-2,3-Dihydro-3,3-Dimethyl-5-Benzofuranyl Methanesulfonate

On February 11, 1975, the Environmental Protection Agency (EPA) announced (40 FR 6325) that in response to a petition (FAP 4H5053) submitted by Fisons Corp., Agricultural Chemicals Div., Two Preston Court, Bedford MA 01730, a food additive regulation had been established (21 CFR 561.235) permitting the use of the herbicide 2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate on growing sugarbeets with a tolerance of 0.5 part per million (ppm) for residues of the herbicide and its metabolites 2-hydroxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate and 2-hydroxy-2,3-dihydro-3,3-dimethyl-2-oxo-5-benzofuranyl methanesulfonate (both calculated as the parent compound) in sugarbeet molasses, in accordance with a temporary permit that was issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). This experimental program expired February 4, 1976. On March 11, 1976 the Agency announced (41 FR 10426) that the expiration date of this experimental program had been extended for two months and was to expire April 4, 1976.

Fisons Corp. has requested a one-year renewal of this tolerance both to permit continued testing to obtain additional data and to permit the marketing of sugarbeet molasses produced from sugarbeets treated in accordance with three

experimental use permits (the original temporary permit which is to be renewed as an experimental use permit), and two which are to be issued, concurrently under FIFRA.

The scientific data reported and other relevant material have been evaluated, and it has been determined that the pesticide may be safely used in accordance with the provisions of the experimental use permits issued under FIFRA. It has further been determined that since residues of the pesticide may result in sugarbeet molasses from the agricultural uses provided for by the experimental use permits, the one-year renewal of the food additive regulation, 21 CFR 561.236, requested by the petitioner should include a tolerance limitation.

Accordingly, a food additive regulation is established as set forth below. Any person adversely affected by this regulation may on or before June 24, 1976, file written objections with the Hearing Clerk, Environmental Protection Agency, East Tower, Room 1019, 401 M St. SW, Washington DC 20460. Such objections should be submitted in triplicate and should specify both provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective June 24, 1976, § 561.235 is revised as set forth below.

Dated: May 19, 1976.

EDWIN L. JOHNSON,  
Deputy Assistant Administrator  
for Pesticide Programs.

(Sec. 409(c) (1) and (4) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346 (c) (1) and (4)).)

Section 561.235 is revised to read as follows:

§ 561.235 2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate.

(a) A tolerance of 0.5 part per million is established for combined residues of the herbicide 2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate and its metabolites 2-hydroxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate and 2-hydroxy-2,3-dihydro-3,3-dimethyl-2-oxo-5-benzofuranyl methanesulfonate (both calculated as the parent compound) in sugarbeet molasses resulting from application of the herbicide to growing sugarbeets. Such residues may be present therein only as a result of application of the herbicide in accordance with the provisions of three experimental use permits that expire May 17, 1977.

(b) Residues in sugarbeet molasses not in excess of 0.5 part per million resulting from use described in paragraph (a) of this section remaining after expiration of the experimental use program will not be considered to be actionable if the herbicide is legally applied

during the term of and in accordance with the provisions of the experimental use permits and feed additive tolerance.

(c) Pisens Corp. shall immediately notify the Environmental Protection Agency of any findings from the experimental use that have a bearing on safety. The firm shall also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the Environmental Protection Agency or the Food and Drug Administration.

## CHAPTER II—DRUG ENFORCEMENT ADMINISTRATION, DEPARTMENT OF JUSTICE

### PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

#### Exempt Chemical Preparations

The Administrator of the Drug Enforcement Administration has received applications pursuant to § 1308.23 of Title 21 of the Code of Federal Regulations requesting that several chemical preparations containing controlled substances be granted the exemptions provided for § 1308.24 of Title 21 of the Code of Federal Regulations.

The Administrator hereby finds that each of the following chemical preparations and mixtures is intended for laboratory, industrial, education, or special research purposes, is not intended for general administration to a human being or other animal, and either (a) contains no narcotic controlled substances and is packaged in such a form or concentration that the package quantity does not present any significant potential for abuse, (b) contains either a narcotic or non-narcotic controlled substance and one or more adulterating or denaturing agents in such a manner, combination, quantity, proportion or concentration, that the preparation or mixture does not present any potential for abuse, or (c) the formulation of such preparation or mixture incorporates methods of denaturing or other means so that the controlled substance cannot in practice be removed, and therefore the preparation or mixture does not present any significant potential for abuse. The Administrator further finds that exemption of the following chemical preparations and mixtures is consistent with the public health and safety as well as the needs of researchers, chemical analysts, and suppliers of these products.

Therefore, pursuant to section 202(d) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 812(d)), and under the authority vested in the Attorney General by sections 301 and 501(b) of the Act (21 U.S.C. 821 and 871(b)), and delegated to the Administrator of the Drug Enforcement Administration by, and in accordance

with, Regulations of the Department of Justice (Title 28 of the Code of Federal Regulations, Part 0), the Administrator of the Drug Enforcement Administration hereby orders that Part 1308 of Title 21 of the Code of Federal Regulations be amended as follows:

Manufacturer or supplier	Product name and supplier's catalog No.	Form of product	Date of application
Hoffmann-La Roche, Inc.	Abuscreen™ Radio-immunoassay for Cocaine Metabolite I antigen reagent.	Glass vial: 30 ml and 500 ml.	Feb. 6, 1976
Do.	Abuscreen™ Radio-immunoassay for Cocaine Metabolite Positive Urine Control.	Glass vial: 6 ml and 500 ml.	Do.
Nuclear Medical Laboratories, Inc.	Thyroidbinding Globulin T-4-121.	French square bottle: 2 oz; Boston round bottle: 16 oz.	Jan. 20, 1976
Do.	T-4 Antiserum (Rabbit) and T-4 RIA Diluent.	Boston round clear bottle: 4 oz; clear bottle: 7 dr and 1 dr.	Do.
Do.	Liothyronine-T3-121.	Boston round amber bottle: 2 oz and 16 oz.	Do.
Stan-Tech Laboratories.	Acid Phosphate Substrate, catalog No. 6101055.	Bottle: 4 oz, 8 oz, 12 oz, and 32 oz.	Mar. 8, 1976
Do.	Alkaline Phosphatase Substrate, catalog No. 6101100.	do.	Do.
Do.	Thymol Buffer, catalog No. 6120015.	do.	Do.
Do.	Barbital Buffer 0.1M pH 8.5.	do.	Do.
Do.	Tris Barbital Buffer pH 8.5.	do.	Do.
Do.	Hematoxylin, Mayer.	do.	Do.

#### b. By amending § 1308.24(i) by deleting the following chemical preparations:

Manufacturer or supplier	Product name and supplier's catalog No.	Form of product	Date of application
Hoffmann-La Roche, Inc.	Abuscreen™ Radio-immunoassay for Cocaine Metabolite I antigen reagent.	Glass vial: 20 ml and 500 ml.	Feb. 6, 1976
Do.	Abuscreen™ Radio-immunoassay for Cocaine Metabolite Positive Urine Control.	Glass vial: 4 ml and 100 ml.	Do.
Nuclear Medical Laboratories, Inc.	Thyroidbinding.	French square bottle: 2 oz; Boston round bottle: 16 oz.	Jan. 20, 1976
Do.	T-4 Antiserum (Rabbit).	Boston round clear bottle: 4 oz; clear bottle: 7 dr and 1 dr.	Do.

Effective date: This order is effective May 25, 1976. Any person interested may file written comments on or objections to the order on or before July 19, 1976. If any such comments or objections raise significant issues regarding any finding of fact or conclusion of law upon which the order is based, the Administrator shall immediately suspend the effectiveness of the order until he may reconsider the application in light of the comments and objections filed. Thereafter, the Administrator shall reinstate, revoke or amend his original order as he determines appropriate.

Dated: May 13, 1976.

PETER B. BENSINGER,  
Administrator,  
Drug Enforcement Administration.  
[FR Doc. 76-15071 Filed 5-24-76; 8:45 am]

### Title 47—Telecommunications CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION PART 0—COMMISSION ORGANIZATION

Reorganization of the Rules, Standards and Research and Education Divisions of the Broadcast Bureau

1. On March 19, 1976, the Commission adopted changes in the organization and functions of several divisions in the

a. By amending § 1308.24(i) by adding the following chemical preparations:

§ 1308.24 Exempt chemical preparations.  
(1) . . . . .

Broadcast Bureau designed to strengthen the bureau's policy development activities and improve its efficiency. A new Policy & Rules Division with additional functions was created in place of the Rules & Standards Division. This new division will be responsible in addition to other responsibilities, for analyzing social and economic problems relating to broadcasting and conducting or monitoring studies necessary for the development of new or revised policies. The Research and Education Division was abolished. The research functions were reassigned to the Policy & Rules Division and the educational broadcasting functions were reassigned to the Broadcast Facilities Division. The reorganization took place May 1, 1976. Part 0 of the Rules & Regulations, which describes the organization of the Commission, is being amended to reflect those changes.

2. The amendments adopted herein pertain to agency organization. The prior notice, procedure and effective date provisions of Section 4 of the Administrative Procedure Act are therefore inapplicable. Authority for the amendments adopted herein is contained in sections 4(i) and 5(b) of the Communications Act of 1934, as amended, and in § 0.231(d) of the Commission's rules.

3. In view of the foregoing, *It is ordered*, effective May 28, 1976, That Part

0 of the rules and regulations is amended as set forth below.

Adopted: May 18, 1976.

Released: May 19, 1976.

(Secs. 4, 5, 303, 48 Stat., as amended, 1966, 1968, 1962; 47 U.S.C. 154, 163, 305.)

### FEDERAL COMMUNICATIONS COMMISSION, R. D. LICHTWARDT, Executive Director.

1. Section 0.72 is amended to read as follows:

§ 0.72 Units in the Bureau.

- (a) Office of the Bureau Chief.
- (b) Broadcast Facilities Division.
- (c) Renewal & Transfer Division.
- (d) Hearing Division.
- (e) Policy & Rules Division.
- (f) License Division.
- (g) Office of Network Study.
- (h) Complaints & Compliance Division.

2. § 0.74 is amended to read as follows:

§ 0.74 Broadcast Facilities Division.

The Broadcast Facilities Division is responsible for all functions indicated in the statement contained in § 0.71, insofar as such functions pertain to standard (AM), FM, television, international, experimental, and auxiliary broadcast services, excluding functions stated in §§ 0.75, 0.76, 0.77, and 0.81, and advises Bureau & Commission with respect to the development and promotion of the educational broadcasting services.

3. Section 0.77 is amended to read as follows:

§ 0.77 Policy & Rules Division.

The Policy & Rules Division is responsible for all functions indicated in the statement contained in § 0.71 insofar as such functions relate to the development or revision of rules and standards, engineering and legal support involving international agreements relating to the broadcasting and conducts studies necessary and economic problems relating to broadcasting and conducts studies necessary for development of new or revised policies.

§ 0.79 [Reserved]

4. Section § 0.79 is deleted.

[Docket No. 20480, RM-2519; Docket No. 20518, RM-2530, RM-2569]

### PART 73—RADIO BROADCAST SERVICES Table of Assignments, FM Broadcast Stations

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Kalkaska, Michigan) and amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Charlevoix and Traverse City, Michigan).

1. The Commission herein consolidates for consideration its Notice of Proposed Rule Making in Docket No. 20480,<sup>1</sup> and

<sup>1</sup> 40 FR 22002, May 20, 1975.

its Notice of Proposed Rule Making in Docket No. 20518.<sup>2</sup> Consolidation of the two dockets is deemed both necessary and expeditious inasmuch as certain of the proposals and counter proposals in the latter proceeding are mutually exclusive with the proposal advanced in the former.

2. In Docket No. 20480 (RM-2519), the petitioner, Roy E. Henderson ("Henderson"), sought the assignment of Channel 249A to Kalkaska, Michigan, as a first FM assignment to the community. The assignment would be of the "drop-in" variety and would require no other change in the FM Table of Assignments. In Docket No. 20518 (RM-2530, RM-2569), New Broadcasting Corporation, licensee of AM station WVOY,<sup>3</sup> Charlevoix, Michigan ("WVOY"), sought the assignment of Channel 290 to Charlevoix as a first FM assignment to the community. In response to the issuance of the Notice in Docket No. 20518, Radio Station WCCW, Inc. ("WCCW"), licensee of Station WCCW and WCCW-FM, Channel 221A, Traverse City, Michigan, submitted a "Petition for Rule Making and Issuance of Show Cause Order" proposing the assignment of Channel 290 to Traverse City and the modification of petitioner's existing license to specify operation on Channel 290 rather than Channel 221A. In accordance with the cutoff procedures utilized by the Commission (and set forth in the Appendix to the Notice), WCCW's petition will be considered as a counterproposal.<sup>4</sup> Since, under the Commission's minimum mileage separation requirements,<sup>5</sup> Channel 290 cannot be assigned to both Charlevoix and Traverse City,<sup>6</sup> the proposals of WVOY and WCCW to assign Channel 290 to Charlevoix or Traverse City, respectively, must be considered as being mutually exclusive. In subsequent pleadings filed in Docket No. 20518, WCCW pointed to the possibility of allocating Class C channels to both Charlevoix and Traverse City by assigning Channel 248 to Charlevoix and Channel 290 to Traverse City as originally requested. WCCW added that this alternative would require the assignment of Channel 240A rather than Channel 249A at Kalkaska (as requested by Henderson) and the substitution of Channel 240A for unoccupied and unapplied for Channel 249A at Rogers City, Michigan.<sup>7</sup> Thus, the alternative suggestion mentioned by WCCW conflicts with Henderson's proposal advanced in Docket No. 20480.

Henderson filed comments in Docket No. 20518 opposing WCCW's alternative suggestion that Channel 240A instead of Channel 249A be assigned to Kalkaska. 3. The deadlines for the filing of comments and reply comments in Docket No. 20480 were July 7, 1975, and July 28, 1975, respectively. No extensions of time for the filing of comments were granted. Nevertheless, on February 19, 1976, some five and a half months after the expiration of the reply comment deadline in Docket No. 20518, WCCW filed a "Petition for Leave to File Supplement to Reply Comments" with the Commission. Thereafter, Henderson submitted comments opposing WCCW's petition<sup>8</sup> and WVOY filed a "Motion to Strike or in the Alternative Petition to Accept Further Statement." WCCW responded with reply comments.

4. In urging the Commission to accept its "Supplement to Reply Comments," WCCW asserted first, that certain of the parties did not properly perceive WCCW's position, and secondly, that it had become aware of what it said were certain factual errors within the record. With regard to the former, WCCW emphasized that it continued to believe that the assignment of a Class C channel to Charlevoix was unwarranted. WCCW said it merely brought to the Commission's attention the technical feasibility of assigning Class C channels to both communities (Channel 290 to Traverse City and Channel 248 to Charlevoix) as a means of accommodating the desires of both WCCW and WVOY. WCCW said it did not propose such an allocation to Charlevoix. As for the second point, WCCW noted that its earlier preliminary engineering estimate of 1 mV/m service to be provided by a Channel 290 assignment at either Traverse City or Charlevoix required some revision in that the earlier 1 mV/m service to be provided by the assignment of Channel 290 at Charlevoix was now predicted to cover 68,000 persons instead of 57,000 persons as previously projected. The projection of 1 mV/m coverage for 110,000 persons with a Channel 290 assignment at Traverse City remained unchanged. Despite the revision, said WCCW, it was still apparent that the assignment of Channel 290 at Traverse City would result in a more efficient use of the channel. Finally, WCCW, seeking

<sup>4</sup> 40 FR 26046, June 20, 1975.

<sup>5</sup> On September 25, 1975, the Commission granted authority to New Broadcasting for unlimited-time operation on WVOY (BP-19672).

<sup>6</sup> A Public Notice to that effect was issued by the Commission on July 25, 1975.

<sup>7</sup> See Section 73.207(a) of the Commission's Rules.

<sup>8</sup> The minimum mileage separation is 180 miles for stations operating on the same channel. Charlevoix and Traverse City are less than 60 miles apart.

<sup>9</sup> Under WCCW's alternate suggestion, Channel 249A could not be assigned to Kalkaska since it would be short-spaced with the proposed Channel 248 assignment at Charlevoix.

<sup>10</sup> Henderson asserts that since WCCW's "Petition for Rule Making" was not timely filed prior to July 7, 1975, the cut-off date for comments in Docket No. 20480 (the "Kalkaska" proceeding), the counterproposal cannot be properly considered. This overlooks the fact that WCCW's "Petition for Rule Making" was, in fact, timely filed in Docket No. 20518, the proceeding in which the assignment of Channel 290 was in question. We must therefore deny Henderson's request that we exclude the WCCW petition from consideration.

to reemphasize the importance of Traverse City as a regional center for comprehensive planning and development, submitted materials describing the origin, objectives, and activities of the Northwest Michigan Regional Planning and Development Commission. Urging the Commission to deny the "Petition for Leave to File Supplement to Reply Comments," WVOY responded by contending that WCCW had "totally failed to present good cause for filing its untimely comments" and asserted that the fact that WCCW had "ineptly framed its position in previous pleadings is clearly not a basis for filing additional comments."

5. We will deny WCCW's "Petition for Leave to File Supplement to Reply Comments." As we have said before,<sup>9</sup> though the public interest test is paramount, "[n]evertheless we need to be concerned with procedure as well as substance in determining what best serves the public interest. Unless the applicable procedural requirements are observed, we would face difficulties in exercising our regulatory responsibilities, hardly a situation to benefit the public." "[D]eviations can be warranted but requests for such special relief must adequately demonstrate the presence of an overriding public interest justification and adequately explain the failure to observe the applicable procedural requirements." WCCW demonstrates no overriding public interest which compels acceptance of the late-filed pleading; further, no explanation is offered as to why some five and a half months elapsed before the information was proffered.<sup>10</sup>

6. In support of its petition to assign Channel 249A to Kalkaska (pop. 1,478),<sup>11</sup> Henderson describes the community (which is the county seat of Kalkaska County (pop. 5,272)) as being located fifty-five miles south of the Mackinaw Bridge which connects the "Northern Neck" of Michigan with the lower peninsula of Northern Michigan. Further, Kalkaska lies approximately 20 miles east of Traverse City. Though located in a remote area, Henderson cites recent population growth in Kalkaska and attributes that growth to the exploration and discovery of oil and gas deposits in

the area. Henderson also notes that the Kalkaska area continues to be known for its sports and recreational activities. Kalkaska has no local aural service and must rely instead on distant signals from radio stations located in other communities. Henderson argues that Kalkaska has a need for its own broadcast station to serve as an outlet for expression about local needs and problems.

7. Charlevoix (pop. 3,519), the county seat of Charlevoix County (pop. 16,541), is situated on the shores of Lake Michigan, 160 miles north of Grand Rapids, Michigan, and 200 miles northeast of Milwaukee, Wisconsin. Originally a community whose economy rested primarily on lumbering, WVOY says Charlevoix's economy is now based on a combination of fruit production, general farming, and tourism. Local aural service at Charlevoix is provided by the petitioner's AM station WVOY. The population of Charlevoix is said to have increased nearly twenty-eight percent in the decade from 1960 to 1970. It is contended that the wide-area coverage of a Class C facility is needed at Charlevoix in order to provide service to the widely scattered population pockets in the area, and also to overcome the severe terrain features which, it is asserted, would impede satisfactory FM radio reception. WVOY also urges that a Class C station is needed at Charlevoix in order to provide a second FM service to persons residing in the Beaver Islands, a sizeable collection of islands located approximately twenty-four miles northwest of Charlevoix in Lake Michigan.

8. Traverse City (pop. 18,048), the county seat of Grand Traverse County (pop. 39,175), is located approximately 120 miles due north of Grand Rapids. In support of its petition, WCCW submits substantial amounts of data demonstrating that Traverse City is an economic, commercial, and industrial center as well as a regional location for many state and federal agencies. WCCW also points to the role played by agricultural production, area educational institutions, tourism, and the community's medical facilities. Traverse City is presently served by five radio stations including two AM facilities (one of which is licensed to the petitioner) and three FM outlets (the petitioner's facility, WCCW-FM, Channel 221A; WLOR, Channel 270, licensed to Great Northern Broadcasting System, Inc.; and WTCM-FM, Channel 278, licensed to Midwestern Broadcasting Co.). Other outlets for local expression include two local TV stations and one daily newspaper.

9. Inasmuch as the Notices in both dockets have discussed the merits of the two initial proposals (RM-2519 and RM-2530), we shall place those matters to the side for the time being and focus instead on the counterproposal and alternative suggestion submitted by WCCW which raise the basic conflicts among the three parties. Henderson's request for the assignment of Channel 249A to Kalkaska does not conflict with WCCW's counterproposal in Docket

20518 to assign Channel 290 to Traverse City and both assignments could therefore be made. However, a conflict does arise between Henderson's request to assign Channel 249A to Kalkaska and WCCW's alternative suggestion to assign Channel 290 to Traverse City, Channel 248 to Charlevoix, and Channel 240A to Kalkaska. Henderson, planning to co-locate a Channel 249A transmitting antenna on an existing cable television receiving antenna tower in Kalkaska, says that if Channel 240A is assigned, the transmitter site will have to be located outside of the community necessitating what Henderson implies would be a prohibitive outlay of financial resources. As a result, says Henderson, should Channel 240A rather than Channel 249A be assigned to Kalkaska, he can offer no assurances that an application for operation of a station on the channel would be filed. WVOY is even more specific, asserting that if Channel 248, rather than Channel 290, is assigned to Charlevoix, it will not apply for authority to operate a station on that channel. WVOY says its decision is prompted by the fact that a transmitter site for a station operating on Channel 248 would have to be located some 15 miles northeast of Charlevoix across the bay in the vicinity of Harbor Springs, Michigan, and would require traveling 28 miles by land route and that the use of such a site would pose substantial financial and technical difficulties. Thus it appears that if we adopted the alternative suggestion mentioned by WCCW, Traverse City would be assigned a third Class C channel while Kalkaska and Charlevoix would continue to be left without local FM service—a wholly unacceptable result. We therefore conclude that the alternative suggestion is without merit since it would result in little, if any, benefit to the public interest.

10. We turn now to a consideration of the merits of Henderson's proposal. Upon review of the record, it is clear that Kalkaska is in need of a first FM channel. Further, demand for a channel has been expressed and a party has stepped forward indicating that it will seek broadcast authority if the channel is assigned. Thus, we think Channel 249A should be assigned to Kalkaska. Such an assignment is consistent with the Commission's channel assignment priorities<sup>12</sup> and would enhance the public interest by providing the community with its first local aural service and a first aural outlet for local expression.

11. Preclusion created by the assignment of Channel 249A to Kalkaska affects a sizeable land area north and east of Kalkaska, however, alternate channels are available for assignment to those communities located in the area of pre-

<sup>12</sup> See Anamosa and Iowa City, Ia., supra, citing Further Notice of Proposed Rule Making, Docket No. 14185, adopted July 25, 1962 (FCC 62-887) and incorporated by reference in para. 25 of the Third Report and Memorandum Opinion and Order, 40 F.C.C. 747 (1963).

clusion that do not presently have FM channels.

12. Due to the Commission's minimum mileage separation rules, the assignment of Channel 249A to Kalkaska proscribes the assignment of Channel 248 to Charlevoix, as proposed by WCCW. We are left, therefore, with the task of determining whether Channel 290 should be assigned to Traverse City or to Charlevoix.

13. Assigning Channel 290 to Traverse City provides the Commission with an opportunity to remove an existing "intermixture" situation and the alleged competitive imbalance which is said to result from that "intermixture." WCCW also notes that Channel 290 is the last Class C channel available for assignment to Traverse City. On the basis of Roanoke Rapids/Anamosa showings submitted by WCCW, the assignment would provide a second FM service to 195 persons and a third service to nearly 20,000 persons in the Traverse City area. On the other side of the balance sheet, no first FM service would be provided. Moreover, the assignment of Channel 290 would result in the placement of three Class C FM facilities in a community of slightly over 18,000 persons, a result that does not accord with established Commission policies.<sup>13</sup>

14. The assignment of Channel 290 to Charlevoix would provide that community with both a first local FM service and a second fulltime aural service. Though no first FM service would result, a second FM service would be provided to some 317 persons in an area of approximately 90 square miles consisting principally of the Beaver Islands.<sup>14</sup> WCCW's principal objection to the assignment of Channel 290 to Charlevoix is premised on our policy (to which we have on occasion made exceptions) of declining to assign Class C channels to communities the size of Charlevoix.

15. We conclude that the public interest would be better served by assigning Channel 290 to Charlevoix. First, the assignment is more consistent with the mandate of Section 307(b) of the Communications Act of 1934, as amended, which requires this Commission to effectuate a "fair . . . and equitable" distribution of radio services among the states and communities. Traverse City

<sup>13</sup> Further Notice of Proposed Rule Making, Docket 14185, and incorporated by reference in para. 25, Third Report and Memorandum Opinion and Order, 40 F.C.C. 747 (1963).

<sup>14</sup> WVOY submitted Roanoke Rapids showings which suggested that a Channel 290 assignment at Charlevoix would create a second FM service for 2,218 people in an area of 255.3 square miles, however, a staff engineering analysis indicates that the showings were not properly made since they failed to consider the operating facilities of certain stations at reasonable facility values and relied instead on existing operating values which are lower. Since the purpose of a Roanoke Rapids study is the projection of future coverage, reasonable facility values must be used even though the stations involved are presently operating below such values.

is, in our estimation, amply served by its current complement of assignment broadcast outlets; Charlevoix is not. Further, the assignment to Charlevoix is, in our estimation, amply served by its current complement of assigned priorities<sup>15</sup> which accord substantial importance to assignments which will provide a first local FM service. We believe these factors, whether considered individually or as a whole, outweigh the benefits which, it is said, would result if the assignment of Channel 290 was made to Traverse City. The elimination of a "competitive imbalance" at Traverse City does not, in our opinion, outweigh the public interest to be gained in providing Charlevoix with its first local FM service. Nor can we say that the assignment of Channel 290 to Traverse City outweighs the public benefits to be derived from the fact that both the residents of the Beaver Islands and the sizeable transient population that visits the area will receive a second source of FM broadcast programming.

16. In arguing that a Class C channel should not be assigned to Charlevoix, WCCW contends that Charlevoix is not a sufficiently important community, that the existence of widely-scattered sparse population and hilly terrain is not of such weight as to compel the assignment, and that population located in the "grey" (underserved) area that would be served by the assignment of Channel 290 at Charlevoix bears little relationship to the community of Charlevoix. We are not persuaded by these arguments. Besides being the county seat of Charlevoix County, Charlevoix is the largest city in the county and is surrounded by a number of smaller communities, the citizens of which could reasonably be expected to look to Charlevoix for a variety of goods and services as well as news and information. Charlevoix, as the focus of a large rural county whose economy rests on farming and fruit production, is clearly isolated from any large population centers.<sup>16</sup> We have made assignments of higher power Class B or Class C facilities to smaller communities in order to assure that citizens living in remote areas near those communities will have access to one or more sources of local aural programming.<sup>17</sup> We have also made assignments of Class B or Class C channels so that there will be sufficient signal strength to overcome adverse terrain features.<sup>18</sup> We believe the detailed topographic data supplied by WVOY in its engineering report consti-

tutes a sufficient showing that a "potential for extreme shadowing" exists and that Class C facilities are needed to overcome the "shadowing" problem. The assignment to Charlevoix of a Class C channel with its greater power and antenna height represents, in our estimation, the more preferable method of assuring that listeners in the Charlevoix area will be provided with a dependable broadcast signal of acceptable quality. Finally, we believe that those persons located in the "underserved" area of the Beaver Islands do have common social, economic and political ties to Charlevoix. The principal means of access to the islands consists of commercial boat and charter aircraft transportation from Charlevoix. Further, highway maintenance, law enforcement, and schools in the Beaver Islands are provided by Charlevoix County. Moreover, WVOY notes that the citizens of the Beaver Islands have two representatives on the Charlevoix County Township Board of Supervisors and vote for other elected county positions. It seems clear, therefore, that the residents of the Beaver Islands do have a special interest in receiving a local FM service from Charlevoix. With the assignment to Charlevoix of Class C Channel 290 it is possible to obtain what we believe are significant public interest benefits.

17. The assignment of Channel 290 at Charlevoix will create preclusion on the U.S. side of the U.S.-Canadian border on Channels 288A, 289, 290, 291 and 292A. In all cases the affected communities located within the preclusion areas have local FM assignments or receive FM service from nearby communities.

18. Canadian concurrence in the assignment of Channel 249A to Kalkaska and Channel 290 to Charlevoix has been obtained.<sup>19</sup>

19. Accordingly, *it is ordered*, That effective June 30, 1976, § 73.202(b) of the Commission's Rules (the FM Table of Assignments) is amended to read as follows for the communities designated below:

City:	Channel No.
Charlevoix, Mich.	290
Kalkaska, Mich.	249A

<sup>15</sup> Any application for this channel must specify an effective radiated power of 100 kW and antenna height of 500 feet above average terrain or equivalent.

20. *It is further ordered*, That the "Petition for Rule Making" submitted by Roy E. Henderson is granted.

21. *It is further ordered*, That the "Petition for Rule Making" submitted by New Broadcasting Corporation is granted.

22. *It is further ordered*, That the "Petition for Rule Making and Issuance of Order to Show Cause" submitted by Radio WCCW, Inc. is denied.

<sup>16</sup> Pursuant to the 1947 U.S.-Canadian FM Working Agreement all FM channel assignments made within 250 miles of the U.S.-Canadian border must have the concurrence of the Canadian Government.

<sup>9</sup> Anamosa and Iowa City, Iowa, 46 F.C.C. 2d 520, 521 (1974).

<sup>10</sup> We have, in our discretion, reviewed the material submitted by WCCW in its "Supplement to Reply Comments." We find WCCW's reiteration of its position with regard to the assignment of a Class C channel at Charlevoix and its submission of materials relating to the Northwest Michigan Regional Planning and Development Commission to be repetitious and cumulative. Moreover, with regard to the information relating to the Planning Commission, it is clear that Attachments 2 and 3 of Appendix B were available and could have been submitted within the filing period. With respect to the engineering statement containing WCCW's upward revision of the mV/m projection for coverage on Channel 290 at Charlevoix, we find the information to be decisively insignificant.

<sup>11</sup> All population statistics are cited from the 1970 U.S. Census.

**FEDERAL COMMUNICATIONS COMMISSION,**

[SEAL] WALLACE E. JOHNSON,  
Chief, Broadcast Bureau.

[FR Doc. 76-15214 Filed 5-24-76; 8:45 am]

[Docket No. 20578; FCC 76-448]

**PART 76—CABLE TELEVISION SERVICES**  
Technical Changes Regarding Franchise Fees

1. On August 13, 1975, the Commission released a Notice of Proposed Rulemaking in Docket 20578, FCC 75-961, 40 Fed. Reg. 34613, FCC 2d \_\_\_\_\_ (1975), in which it proposed to change the wording of Section 76.31(b) of its Rules so that applications for certificates of compliance containing franchise fees inconsistent with the Rules, might be processed with less unnecessary delay. The rulemaking proposal grew out of the Report and Order in Docket 20272, FCC 75-897, 54 FCC 2d 855 (1975), in which the Commission addressed the problem of duplicative and excessive over-regulation of the cable television industry. Only four comments were filed in this proceeding, all representing operators of cable television systems. They unanimously support adoption of the proposed rule change.

2. In the Cable Television Report and Order, FCC 72-108, 36 FCC 2d 143 (1972), the Commission determined that franchise fees imposed on operators of cable television systems should not exceed 3-5 percent of gross subscriber revenues. This was codified as Section 76.31(b) of the Commission's Rules. The limitation, it was felt, would "insure reasonableness" in that federal goals could be achieved while allowing adequate revenues to defray the costs of local regulation. Presently, applicants for certificates of compliance whose franchise fee exceeds those limits are required to return to their franchising authority and renegotiate their franchise before receiving certification. Often this leads to prolonged delay in the certifying process and, as a result, in the initiation of cable service to the community. In the majority of instances, however, the franchise eventually is amended to conform with the Rules and the certificate is issued.<sup>1</sup>

Similarly, cable service provided by existing systems is subject to interruption at those communities where the local franchising authority may be hesi-

tant or unwilling to accept a fee within the prescribed limits.

3. In Docket 20272, the Commission recognized its responsibility to review its regulatory procedures as part of the total effort toward reducing excessive or burdensome regulations on the cable television industry. It determined that "some of the most significant delays" in processing certificate of compliance applications occur when franchises are submitted that do not comply with the Rules. Thus, processing procedures were changed so that certificate applications no longer are held pending excision of the inconsistent franchise provisions by the franchising authority. Instead, certificates are issued, but the violative provisions are "considered null and void, having been preempted by federal regulations." However, due to technical language in Section 76.31(b), the new procedure was not applied to inconsistent franchise fees. Therefore, this rulemaking proceeding was initiated to change that language to allow for uniform application of the processing procedures.

4. The proposed change will enable the Commission to treat as "null and void" any franchise fee to the extent it violates the limit imposed by § 76.31(b) of the rules and for which a waiver is not obtained. As is the case with other inconsistent franchise provisions, both the franchisee and the local authority will be notified of the inconsistent fee, and an opportunity will be provided for them to either seek a waiver of the rule or to furnish a justification. If neither occurs, or if the waiver is denied, the Commission will grant the certificate of compliance but declare the inconsistent portion of the fee to be null and void. In those cases where the local franchising authority deems the action so material as to affect the continuing validity of the franchise agreement it would be a matter of local law as to the actions it might then decide to take. The net effect of the rule will remain unchanged, but the Commission will be able to uniformly and efficiently process franchises containing fee provisions inconsistent with § 76.31(b) of the rules.

5. The comments unanimously favor adoption of the proposed rule change.

<sup>1</sup> At paragraph 15 of Docket 20272, the exact processing procedure is detailed as follows:

Upon receipt of an application with a franchise that contains provisions inconsistent with the federal rules we will continue, as we do now in appropriate cases, to inform the applicant and the franchising authority, by letter, of the inconsistencies and the need for justifications or waivers. Both parties will also be notified that if supported waiver requests are not forthcoming in a time specified, the Certificate will be issued but the violative provisions will be considered null and void, having been preempted by federal regulations. Similarly, if waiver requests are denied relating to federally preempted provisions we will grant the requested Certificate but notify both the applicant and the franchising authority of the preempted provisions.

They argue that present processing procedures lead to unnecessary and protracted delays while the franchising authority excises the inconsistent provision. The amended rule on the other hand, would enable the Commission to eliminate inconsistent provisions without delaying cable service in the community. They add that no significant differences exist between an inconsistent franchise fee provision and other provisions inconsistent with the rules which justify different processing procedures, and that a dual set of procedures causes confusion and uncertainty. Even more important, they say, is the situation in which an existing cable system applies for certification. If the local authority refuses to amend the franchise fee, the system operator will be faced with the alternative of continuing to operate illegally and risking a cease and desist order, or terminating his operations and selling the system for scrap value. The proposed rule, it is argued would eliminate the operator's vulnerability to such a situation.

6. We have concluded that the proposed rule change should be adopted. In our Report and Order in Docket 20272, supra, we expressed our desire to eliminate the unnecessary delays incurred by applicants with franchises containing provisions inconsistent with our rules. Our experience declaring "null and void" inconsistent provisions in the areas of "pay cable," technical standards, access, and other federally preempted areas indicates that the process works well and aids in avoiding unnecessary delays. We will be able to act directly to eliminate inconsistent fee provisions and thereby foster prompt cable television service to subscribers. Having carefully considered the comments submitted in response to our Notice we believe the new processing procedure effected by the rule change will serve the public well.

7. We also have determined that another slight change in the wording of § 76.31(b) will make clearer our position with respect to what constitutes a "reasonable" fee. The rule permits fees in excess of three percent of gross subscriber revenues upon proper justification but in no case beyond five percent. Therefore, it should be understood that any fee exceeding five percent of gross subscriber revenues is generally inconsistent with § 76.31(b). An explanation of the type of justification required for fees exceeding 3 percent of a system's gross subscriber revenues is contained in the Clarification, FCC 74-384, 46 FCC 2d 175 (1974).

8. Although the changes adopted herein are procedural in nature and do not constitute a change in the permissible level of franchise fees that may be collected by state and local authorities, we think it important to reiterate briefly why we have felt it necessary to adopt such limitations. Congress enacted the Communications Act of 1934 in order, among other things, to facilitate rapid, efficient, nation-wide and world-wide

wire and radio communication service with adequate facilities at reasonable charges. 47 U.S.C. 1. Pursuant to the provisions of the federal statute, cable television is regulated by the Commission with a view not merely to protect but to promote the objectives for which the Commission has been assigned jurisdiction over broadcasting. "(T)o define the Commission's power in terms of the protection, as opposed to the advancement, of broadcasting objectives would artificially restrict the Commission in the achievement of its statutory purposes and be inconsistent with our recognition in Southwestern that it was precisely because Congress wished 'to maintain, through appropriate administrative control, a grip on the dynamic aspects of radio transmission,' . . . that it conferred upon the Commission a 'unified jurisdiction' and 'broad authority.'" (Citation omitted.) *United States v. Midwest Video Corp.*, 408 U.S. 648, 665 (1972); cf. *United States v. Southwestern Cable Co.*, 392 U.S. 157 (1968).

9. When § 76.31(b) was adopted, we noted that franchise fees as high as 36 percent were being levied on cable operations. We noted that such fees levied an indirect and regressive tax on cable subscribers and that such fees were inconsistent with federal objectives in the regulation of cable television to the extent they rendered cable systems economically unable to carry out their part in our national communications policy. We indicated that the rules adopted were intended to strike a balance "that permits the achievement of federal goals and at the same time allows adequate revenues to defray the costs of local regulation." Cable Television Report and Order, supra at paragraph 185. See also Clarification, FCC 74-384, 46 FCC 2d 175 (1974), paragraph 91 et seq. We continue to regard § 76.31(b) as a reasonable method of assuring that unduly burdensome franchise fees do not result in the frustration of national goals for cable television and believe that the revisions adopted herein will aid in the administration of its provisions and eliminate some of the delay presently associated with its implementation. Accordingly, we are adopting the amendment to § 76.31(b) substantially as proposed.

Authority for the adoption of the rules is contained in sections 2, 3, 4 (1) and (j), 301, 303, 307, 308, and 309 of the Communications Act of 1934, as amended.

Accordingly, *it is ordered*, That Part 76 of the Commission's Rules and Regulations, *is amended*, effective June 24, 1976, as set forth below. *It is further ordered*, That this proceeding *is terminated*.

Adopted: May 12, 1976.

Released: May 17, 1976.

(Secs. 2, 3, 4, 301, 303, 307, 308, 309, 48 Stat. as amended, 1064, 1065, 1066, 1081, 1082, 1083,

1084, 1085; 47 U.S.C. 152, 153, 154, 301, 303, 307, 308, 309.)

**FEDERAL COMMUNICATIONS COMMISSION,**  
[SEAL] VINCENT J. MULLINS,  
Secretary.

Part 76 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

Section 76.31(b) is revised to read as follows:

§ 76.31 Franchise Standards.

(b) Franchise fees shall be no more than 3 percent of the franchisee's gross subscriber revenues per year from cable television operations in the community (including all forms of consideration, such as initial lump sum payments). If the franchise fee is in the range of 3 to 5 percent of such revenues, the fee shall be approved by the Commission if reasonable upon showings: (1) by the franchisee, that it will not interfere with the effectuation of federal regulatory goals in the field of cable television, and (2) by the franchising authority, that it is appropriate in light of the planned local regulatory program. With respect to a cable television system that was in operation prior to March 31, 1972, the provisions of this paragraph shall not be effective until the end of a system's current franchise period, or March 31, 1977, whichever occurs first.

**Title 49—Transportation**  
**CHAPTER X—INTERSTATE COMMERCE COMMISSION**  
**SUBCHAPTER C—ACCOUNTS, RECORDS AND REPORTS**  
[No. 36126]

**Confidential Annual Report Supplement for Class I Carriers and Revision to the Railroad Annual Report**

At a General Session of the Interstate Commerce Commission held at its office in Washington, D.C., on the 9th day of April 1976.

Consideration having been given to the matters involved in this proceeding and the said Commission, on the date hereof, having made and filed a report herein containing its findings and conclusions, which report is hereby made a part hereof:

*It is ordered*, That Parts 1241, 1249, 1250 and 1251 of Title 49 of the Code of Federal Regulations be, and they are hereby revised to read as shown below.

*It is further ordered*, That the prescribed revisions shall be effective for the year ended December 31, 1975.

*And it is further ordered*, That, service of this order be made on all affected carriers; and to the Governor of every State and to the Public Utilities Commissions or Boards of each State having jurisdiction over transportation; and that notice of this order shall be given to the

general public by depositing a copy in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and by filing a copy with the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER. (49 U.S.C. 12, 20, 220, 313, 412.)

By the Commission.

ROBERT L. OSWALD,  
Secretary.

**REPORT OF THE COMMISSION**

By notice of proposed rulemaking dated April 4, 1975, served May 9, 1975, and published in the FEDERAL REGISTER on May 22, 1975 (40 CFR 22466), we announced that we had under consideration certain revisions to the annual, special and periodic reports of Class I or Class A Railroads, Electric railways, Common and contract motor carriers of passengers, Common and contract motor carriers of property, Inland and coastal waterways carriers, Freight forwarders, and Express companies, Pipeline carriers, Refrigerator car lines, and Maritime carriers with annual operating revenues of \$1 million or more.

All interested parties were given the opportunity to submit their views in writing by June 13, 1975. The response date was subsequently extended until July 14, 1975.

**BACKGROUND**

The confidential reporting technique was an outgrowth of legal proceedings concerning certain provisions of the Commission's report and order in Annual Reports of Class I Railroad Companies, 341 I.C.C. 205 (1972). These provisions called for disclosure of Federal income tax information in the railroad annual report. The Commission's Order was set aside by a United States District Court order which ruled that such information should not be available to public inspection due to its confidential nature *Assn. of American Railroads v. United States*, 371 F. Supp. 114 (D.C. D.C. 1974).

Federal income tax information presently provided in annual reports has proven to be insufficient to enable the Commission to effectively evaluate the tax transactions which affect the financial stability of carriers. We believe the proposed confidential annual report supplement provides complete information about the relationship between the reporting carrier and its affiliates as it may affect the tax liability of the carrier. As a result, the true impact of the affiliation on the tax situation of the carrier can be determined.

**REPRESENTATIONS OF THE PARTIES**

The public notification of the proposed rulemaking in the FEDERAL REGISTER provided that any person desiring to participate could do so by filing, within a prescribed time, written statements of facts, views or arguments. Comments were received from three industry associations, thirteen pipeline companies, one railroad, eleven motor carriers of

property, three waterways carriers and one state regulatory commission. Their comments are summarized below. Respondents and other persons submitting views are referred to using their short titles as shown in Appendix Q<sup>1</sup> of this report.

**Maintenance of confidentiality.**—AAR, Okan, Mobil, Exxon, Nu-Car, Pinto, Texas, Continental, Colonial, CRA, Atchison, Gates, Sun, and Gulf objected to the proposal, citing an alleged inability of the Commission and its personnel to guarantee that information submitted on a confidential basis will remain confidential. They contend there is a distinct possibility that information contained in the files of the Commission might be made available to sources outside the Commission in proceedings where such information is relevant and material. They also request notice of procedures to be employed to insure confidentiality.

Tax information should be verified through the audit process.—AAR, Colonial, Warrior, DSI and Ohio believe the Commission's auditors should review and verify the required information during carrier audits. This will allow carriers to provide underlying data and explanations on complex transactions and eliminate concern about the Commission's ability to keep the information confidential.

The proposed schedules appear excessive, burdensome and their usefulness is questionable.—MAPCO, Warrior, Sun, Ohio, Georgia, Exxon, Nu-Car, Pinto, IML, Leaseway, Puget and NAFC object to the excessive and burdensome nature of the report. They question the purpose of the required disclosures and their use in fulfilling the regulatory responsibilities of the Commission.

The proposed rules are outside the scope of the Commission's statutory authority and in direct conflict with the Internal Revenue Code.—NAMBO, Atchison, ARCO, Texas, Marathon, Gates, CRA, Amoco, Mobil and NAFC contend the Commission is acting outside its statutory authority in requiring disclosure of confidential tax information, particularly from non-regulated entities.<sup>2</sup> They also contend the proposed rules circumvent the provisions of the Internal Revenue Code.

Need for schedule and instruction revisions.—NAFC, Shippers, Texas, AAR and MAPCO recommend that the proposed schedules and instructions be revised to accommodate certain tax rules. DSI contends Schedule C and parts of Schedule B are not applicable to carriers filing under Section 1552(A)(2) of the Internal Revenue Code. Texas recommends that a line item for the preference tax be

inserted where appropriate, and Shippers questions the applicability of the proposed report to carrier partnerships.

**Objective of proposed schedules.**—NAFC, EFL, Garrett and American contend the proposed schedules do not accomplish the Commission's objective. They believe the schedules should emphasize financial relationships rather than complex tax calculations. NAFC presented alternative schedules emphasizing financial relationships and comparing tax rates among members of the consolidated group.

#### DISCUSSION AND CONCLUSIONS

The following discussion is organized according to the principal arguments made by the various respondents.

#### MAINTENANCE OF CONFIDENTIALITY

We realize the right to protection of confidential tax information is an essential part of the income taxation scheme. The policy of confidentiality for income tax data encourages full disclosure of income and expenses by individuals and corporations and assures them the general public and competitors will not be apprised of sensitive information.

The respondents contend there are no assurances that the privacy and confidentiality of tax information reported to the Commission will be maintained. Atchison stated the Commission has no experience to rely upon in protecting the confidentiality of the information, and Commission employees do not appear to be covered by any statutory prohibitions against disclosure.

#### USEFULNESS AND PURPOSE OF REPORT

The respondents questioned the usefulness and purpose of the proposed report. They contend the proposed report is excessive, burdensome, and unnecessary for fulfillment of the Commission's regulatory responsibilities. These contentions are without merit.

Effective regulations and administration of responsibilities is dependent upon access to all types of financial data. In the long run, the consequences of informative disclosure benefit the economic and financial fitness of all carriers. In this respect, these regulations will not only benefit the Commission by providing it with the necessary data in a compact form on a confidential basis and with the consequent reductions in its day-to-day tasks, but it will, more importantly, provide respondents with definitive guidelines in complying with Commission regulations. Sound regulatory principles demand that the regulated carrier be made aware, where feasible, of its obligations prior to taking any action rather than after the fact.

The tax information request has been found to be readily available from tax returns and supporting information. Our auditors have prepared the proposed schedules for several railroads and motor carriers on a test basis. The auditors experienced little difficulty in obtaining the information and preparing the report which tends to discredit the respondents' contention.

The objective of the proposed schedules is to determine the benefits or inequities attributable to filing a consolidated tax return. The schedules enable the Commission to determine, in terms of actual tax liability, the true effect of the consolidation on the tax situation of the carrier.

The Commission will use the information disclosed to effectively evaluate and interpret the financial condition of responding carriers. The information will also facilitate early detection and resolution of questionable accounting procedures in the area of income taxes. This information will be used in considering the advisability of proposing rules regarding carrier participation in consolidated tax returns.

The Commission reevaluated the applicability of the reporting requirement to certain carriers. We determined that the reports' objectives can be achieved by further limiting the applicability of the reporting requirement. We have decided that only carriers with annual operating revenues of \$10 million or more need comply with the reporting requirement. This limitation will ease the reporting burden of smaller carriers and insure only significant tax information is reported.

#### VERIFICATION THROUGH THE AUDIT PROCESS

Respondents' recommendation that the tax information be reviewed and verified through the audit process is not a workable alternative. We have determined that in order to be effective and meet established objectives the required disclosures should be obtained on an annual basis. The frequency of audits on carriers subject to the proposed rules varies. For example, the largest Class I railroads are audited annually whereas electric railways, pipeline and maritime carriers are audited on three and six year cycles, respectively. To adopt the respondents' proposal, audits of carriers subject to the proposed rules would have to be performed on annual cycles. This procedure would be a disruptive burden on carriers subject to the proposed regulations.

#### SCHEDULE OBJECTIVES

We believe the schedules in the confidential report accomplish the objective of the proceeding which is to enable us to determine, in terms of actual taxes paid by regulated carriers, the advantages or disadvantages of being affiliated with a group that files a consolidated tax return. The amended schedules in appendices F through O also complement the tax disclosures in annual reports filed with us.

NAFC recommends the adoption of alternative schedules. However, NAFC's major revision to Schedule C of the report is unacceptable and defeats the objective of the report. NAFC proposes to disclose the percentage relationship between the provision for taxes including deferred taxes and pretax accounting income. A variance between this percentage and the normal corporate tax percentage will initiate further investigation. This

revision ignores the actual effect of the consolidation on the carriers tax liability which is our major concern. As a result, we cannot accept this part of NAFC's recommendation and Schedule C will remain unchanged. The NAFC recommendation for prescribing consolidated reporting rules in the instructions is adopted.

The respondents' contentions are erroneous in both respects. The Commission has experience in the accumulation and retention of confidential information and strictly enforces internal rules and procedures to maintain confidentiality of this information. Piggy-back traffic statistics, quarterly reports on additions and betterments and supplemental filing of freight commodity statistics are presently reported on a confidential basis to the Commission. These reports are segregated from reports open to public inspection. The Commission strictly scrutinizes the use and retention of this data by Commission employees.

Adequate safeguards presently exist to protect the confidentiality of information reported. The Criminal Code, 18 U.S.C. Section 1905, prohibits Federal employees from disclosing business data or trade secrets received in the course of their official duties. In addition, 49 CFR Part 1001.4 provides specific procedures which must be followed to request permission to inspect Commission records not considered public information. Finally, 26 U.S.C. Section 7213 makes it unlawful for a Federal employee to divulge data contained in a tax return, copy of return or any book containing abstracts or particulars thereof.

We believe the internal rules and regulations and statutory penalties applicable to Federal officials and employees are more than adequate protection for the confidentiality guaranteed carriers. Our record and experience in dealing with other forms of confidential information further support this contention.

#### COMMISSION AUTHORITY

The respondents contend the Commission lacks specific statutory authority to compel reporting of Federal income tax information and, therefore, the provisions provided in the Internal Revenue Code, 26 U.S.C. Section 6103, should govern. Section 6103 prescribes formal procedures Federal agencies must follow to obtain Federal income tax information.

This Commission is authorized by the Interstate Commerce Act to require regulated carriers to disclose directly to us such information as we deem necessary or proper to aid in fulfilling our responsibilities under the provisions of the Act. Advancement of sound economic and financial conditions in the transportation industry is aided by the disclosure of Federal income tax information.

Section 6103 was enacted to prevent the wholesale revelation of confidential information to persons having no legitimate interest. This provision for confidentiality should not be interpreted to apply to a Federal agency whose sole function is to preserve sound economic

conditions in the transportation industry. Carriers cannot have legitimate interests in denying information, crucial to their financial solvency, to the regulatory body charged with overseeing them.

Whether Section 6103 was intended to be the exclusive means of granting access to tax information filed with the Internal Revenue Service is the central issue in the respondents' argument. There are no judicial precedents to date addressing the limitations of Section 6103 in the regulatory context.

Mobil cited the cases of *Federal Savings and Loan Insurance Corporation v. Kreuger*, 555 F.R.D. 512 (D.C.N.D. Ill. 1972), and *Association of American Railroads v. The United States*, 371 F. Supp. 114 (D.C.D.C. 1974), in support of its contention that Section 6103 is exclusive. However, reliance on decisions in these cases is misplaced.

Mobil contends the *Kreuger* case centered on the court's refusal to permit a Federal agency to compel reproduction of tax information because the agency had an alternative means of obtaining the information under Section 6103. However, the court found the Federal agency was acting as a receiver for private interests and had not established good cause to invoke the discovery process. The decision in this case is not relevant to the Commission's proposal since the case involved essentially private litigants who failed to establish good cause and a relevant need for the information. *The Association of American Railroads* case concerned whether the prohibition in Section 6103 applies to only the original return or to copies of the return as well. The court ruled the prohibitions applied to both the original and copies of the return. However, the court emphasized disclosure to a Federal agency was not at issue, but rather disclosure to the public in general. The question of whether the agency might acquire these data through confidential reports was expressly left open.

The Interstate Commerce Act provides us with authority to prescribe confidential disclosure of Federal income tax information. The absence of a judicial precedent in this regard and the decisions in the aforementioned cases lend further support to this contention.

#### SCHEDULE REVISIONS

We thoroughly reviewed the respondents' recommendations for revisions to the proposed report, and adopted those revisions which facilitate schedule and instruction interpretations and enhance the objectives of the proposal. AAR's recommendation to exclude carriers subject to Internal Revenue Code regulation 1552(A)(2) from completing Schedule C and parts of Schedule B was not adopted. AAR contends that carriers subject to Section 1552 consolidated tax reporting rules are allocated a consolidated tax liability equal to the liability they would have borne filing separate tax returns; therefore, the tax affiliation has little, if any, impact on the tax situation of the regulated carrier.

Section 1552(A)(2) states, "The tax liability of the group shall be allocated to the several members of the group on the basis of the percentage of the total tax which the tax of such member if computed on a separate return would bear to the total amount of the taxes for all members of the group so computed". The AAR's interpretation of this regulation is only valid under certain circumstances where no tax benefits are contributed to the consolidation. This appears to be the exception rather than the rule. Affiliated groups are formed to take advantage of the tax benefits available in consolidated tax reporting rules. When members of an affiliated group contribute tax benefits such as capital losses, tax credits or net operating losses, the consolidated tax liability allocated to each member of the group can be both greater or less than the separate return basis liability of each member. As a result, we cannot accept the AAR's contention and, therefore, will not exempt carriers filing under section 1552(A)(2) from completing the proposed schedules.

Consolidated reporting rules, as described in Internal Revenue Code regulations 1501 through 1563, are prescribed in the instructions at the recommendation of NAFC. This will eliminate laborious computations and assure uniform and consistent reporting. DSI contends the October 31 due date is unreasonable. We established this date to insure information would be received on a timely basis. In order to maximize effective use of this information the due date cannot be revised. However, in cases where the tax return filing date is changed or extended and complying with the October 31 due date causes an undue hardship or burden, carriers may file for relief with the Commission. In addition, the instructions have been revised to provide for disclosure of the preference tax, and to exempt carrier partnerships from complying with the reporting regulations.

#### FINDINGS

We find the amended revisions to the Commission's reporting regulations, concerning the establishment of a confidential annual report supplement for disclosure of Federal income tax information and reinstatement of information in the railroad annual report, reflected in the appendices hereto, should be approved and adopted effective for the year ended December 31, 1975. Commencing with the report for the year ending December 31, 1975, carriers will file the report by October 31 of the following year.

We further find this decision is not a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

An appropriate order will be entered.<sup>3</sup>

<sup>3</sup> Dissenting statements by Chairman Stafford and Commissioner Gresham filed as part of the original document.

<sup>1</sup> Appendices P through Q filed as part of the original document.

<sup>2</sup> On March 18, 1976, the Commission in its Part No. 320, Investigation into the Management, Business Inter-Relationships and Transactions of the Below-Named Railroads, Their Controlling Holding Companies and Affiliated Companies, instituted an investigation relating to conglomerate activities. ## APPENDIX A

## PART 1241—ANNUAL, SPECIAL OF PERIODIC REPORTS: CARRIERS SUBJECT TO PART I OF THE INTERSTATE COMMERCE ACT

1. Section 1241.11 is amended by designating the existing text as paragraph (a) and adding paragraph (b). As amended the instruction reads:

## § 1241.11 Forms prescribed for Class I railroads.

(a) Commencing with the year . . .

(b) Commencing with reports for the year ended December 31, 1975, and thereafter, until further order, all railroads, with annual operating revenues of \$10 million or more, as described in § 1240.1 of this chapter, subject to the provisions of the Interstate Commerce Act, shall be required to file Annual Report Supplement R-1(a). Such annual report supplement shall be of a confidential nature and not available for public inspection. Annual Report Supplement R-1(a) shall be filed in duplicate with the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before October 31 of the year following the year to which it relates.

2. Section 1241.21 is amended by designating the existing text as paragraph (a) and adding paragraph (b). As amended the instruction reads:

## § 1241.21 Annual reports of electric railroads.

(a) Commencing with reports . . .

(b) Commencing with reports for the year ending December 31, 1975, and thereafter, until further order, all electric railroads, with annual operating revenues of \$10 million or more, as described in § 1240.3 of this chapter, subject to the provisions of the Interstate Commerce Act, shall be required to file Annual Report Supplement R-5(a). Such annual report supplement shall be of a confidential nature and not available for public inspection. Annual Report Supplement R-5(a) shall be filed in duplicate with the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before October 31 of the year following the year to which it relates.

3. Section 1241.31 is amended by designating the existing text as paragraph (a) and adding paragraph (b). As amended the instruction reads:

## § 1241.31 Annual reports of express companies.

(a) Commencing with the year . . .

(b) Commencing with reports for the year ended December 31, 1975, and thereafter, until further order, all express companies, with annual operating revenues of \$10 million or more, subject to the provision of the Interstate Commerce Act, shall be required to file Annual Report Supplement H(a). Such annual report supplement shall be of confidential nature and not available for public inspection. Annual Report Supplement H(a) shall be filed in duplicate with the

Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before October 31 of the year following the year to which it relates.

4. Section 1241.61 is amended by designating the existing text as paragraph (a) and adding paragraph (b). As amended the instruction reads:

## § 1241.61 Annual reports of carriers by pipeline.

(a) Commencing with the year . . .

(b) Commencing with reports for the year ended December 31, 1975, and thereafter, until further order, all pipeline carriers, with annual operating revenues of \$10 million or more, subject to the provisions of the Interstate Commerce Act, shall be required to file Annual Report Supplement P(a). Such annual report supplement shall be of a confidential nature and not available for public inspection. Annual Report Supplement P(a) shall be filed in duplicate with the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before October 31 of the year following the year to which it relates.

5. Section 1241.70 is amended by designating the existing text as paragraph (a) and adding paragraph (b). As amended the instruction reads:

## § 1241.70 Annual reports of refrigerator car lines owned or controlled by railroad companies.

(a) Commencing with reports . . .

(b) Commencing with reports for the year ended December 31, 1975, and thereafter, until further order, all refrigerator car lines, with annual operating revenues of \$10 million or more, subject to the provisions of the Interstate Commerce Act, shall be required to file Annual Report Supplement B-1(a). Such annual report supplement shall be of a confidential nature and not available for public inspection. Annual Report Supplement B-1(a) shall be filed in duplicate with the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before October 31 of the year following the year to which it relates.

## APPENDIX B

## PART 1249—REPORTS OF MOTOR CARRIERS

1. Section 1249.1 is amended by designating the existing text as paragraph (a) and adding paragraph (b). As amended the instruction reads:

## § 1249.1 Annual reports of class I carriers of property.

(a) Commencing with reports . . .

(b) Commencing with reports for the year ending December 31, 1975, and thereafter, until further order, all carriers of property, with annual operating revenues of \$10 million or more, subject to the provisions of the Interstate Commerce Act, shall be required to file An-

ual Report Supplement M-1(a). Such annual report supplement shall be of a confidential nature and not available for public inspection. Annual Report Supplement M-1(a) shall be filed in duplicate with the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before October 31 of the year following the year to which it relates.

## APPENDIX C

2. Section 1249.5 is amended by designating the existing text as paragraph (a) and adding paragraph (b). As amended the instruction reads:

## § 1249.5 Annual reports of class I carriers of passengers.

(a) Commencing with reports . . .

(b) Commencing with reports for the year ending December 31, 1975, and thereafter, until further order, all carriers of passengers, with annual operating revenues of \$10 million or more, as described in § 1240.4 subject to the provisions of the Interstate Commerce Act, shall be required to file Annual Report Supplement MP-1(a). Such annual report supplement shall be of a confidential nature and not available for public inspection. Annual Report Supplement MP-1(a) shall be filed in duplicate with the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before October 31 of the year following the year to which it relates.

## APPENDIX D

## PART 1250—REPORTS OF WATER CARRIERS

1. Section 1250.10 is amended by designating the existing text as paragraph (a) and adding paragraph (b). As amended the instruction reads:

## § 1250.10 Annual reports of class A and B water carriers on inland and coastal waterways.

(a) Commencing with the year . . .

(b) Commencing with reports for the year ending December 31, 1975, and thereafter, until further order, all inland and coastal waterway carriers, with annual operating revenues of \$10 million or more, as described in § 1240.2 of this chapter, subject to the provisions of the Interstate Commerce Act, shall be required to file Annual Report Supplement W-1(a). Such annual report supplement shall be of a confidential nature and not available for public inspection. Annual Report Supplement W-1(a) shall be filed in duplicate with the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before October 31 of the year following the year to which it relates.

2. Section 1250.20 is amended by designating the existing text as paragraph (a) and adding paragraph (b). As amended the instruction reads:

## § 1250.20 Form prescribed for maritime carriers.

(a) Commencing with the year . . .

(b) Commencing with reports for the year ended December 31, 1975, and

thereafter, until further order, all maritime carriers, with annual operating revenues of \$10 million or more, subject to the provisions of Section 313, Part III, of the Interstate Commerce Act, shall be required to file Annual Report Supplement M(a). Such annual report supplement shall be of a confidential nature and not available for public inspection. Annual Report Supplement M(a) shall be filed in duplicate with the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before October 31 of the year following the year to which it relates.

## APPENDIX E

## PART 1251—REPORTS OF FREIGHT FORWARDERS

Section 1251.1 is amended by designating the existing text as paragraph (a) and adding paragraph (b). As amended the instruction reads:

## § 1251.1 Annual reports of Class A freight forwarders.

(a) Commencing with reports . . .

(b) Commencing with reports for the year ending December 31, 1975, and thereafter, until further order, all freight forwarders, with annual operating revenues of \$10 million or more, as described in § 1240.6 of this chapter, subject to the provisions of the Interstate Commerce Act, shall be required to file Annual Report Supplement F-1(a). Such annual report supplement shall be of a confidential nature and not available for public inspection. Annual Report Supplement F-1(a) shall be filed in duplicate with the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, on or before October 31 of the year following the year to which it relates.

Title 5—Administrative Personnel  
CHAPTER I—CIVIL SERVICE COMMISSION

## PART 213—EXCEPTED SERVICE

## Federal Deposit Insurance Corporation

Section 213.3333 is amended to show that one position of Secretary to a Member of the Board of Directors is excepted under Schedule C.

Effective May 25, 1976, § 213.3333(h) is added as set out below:

## § 213.3333 Federal Deposit Insurance Corporation.

(h) One Secretary to a Member of the Board of Directors.  
(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1956 Comp., p. 218.)

## UNITED STATES CIVIL SERVICE COMMISSION,

[SEAL] JAMES C. SPRY,  
Executive Assistant  
to the Commissioners.

## proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

### DEPARTMENT OF THE INTERIOR

#### Fish and Wildlife Service

##### [ 50 CFR Part 17 ]

#### ENDANGERED AND THREATENED WILDLIFE AND PLANTS

##### Proposal To List 27 Species of Primates as Endangered or Threatened Species; Correction

In FEDERAL REGISTER Document 76-11189, appearing at page 16466 of the issue for Monday, April 19, 1976, the following change should be made:

In the second column on page 16468, delete the words "sale or" appearing on the 10th line and on the 11th line of the paragraph headed "Effects of the Proposed Rulemaking." The sentence should now read "There would, however, be no restrictions on interstate movement of these species if such movement is not in the course of . . . ."

Dated: May 18, 1976.

GEORGE W. MILLAS,  
Acting Director,  
Fish and Wildlife Service.

[FR Doc. 76-15357 Filed 5-24-76; 8:45 am]

### DEPARTMENT OF AGRICULTURE

#### Animal and Plant Health Inspection Service

##### [ 7 CFR Part 330 ]

#### REQUIREMENTS FOR INSPECTION OF VESSELS AND AIRCRAFT AND OF PRODUCTS AND ARTICLES THEREON

##### Extension of Time To Submit Written Comments

● Purpose: To extend comment period date from May 24 to June 24 on proposal to amend 7 CFR Part 330. ●

Notice is hereby given pursuant to the administrative procedure provisions of 5 U.S.C. 553, that the time for submitting written comments with respect to the proposal to amend 7 CFR Part 330 by adding a new subpart, "Notification and Documents Presentation Requirements for Inspection of Vessels and Aircraft and of Products and Articles Thereon," as published in the FEDERAL REGISTER, April 23, 1976 (41 FR 16970), is hereby extended to June 24, 1976.

Airline associations have requested such extension in order to have sufficient time for their membership to complete discussions and make comments on the proposal. Since the Department is interested in receiving meaningful comments, these circumstances are considered sufficient justification for an extension of time originally allotted for filing comments.

Any person wishing to submit written data, views, or arguments concerning the proposed amendments may do so by filing them with the Regulatory Support Staff, Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Federal Building, Hyattsville, Maryland 20782, by June 24, 1976.

All written submissions made pursuant to this notice will be made available for public inspection in Room 633, Federal Building, Hyattsville, Maryland 20782, during regular hours of business, unless the person makes the submission to the Regulatory Support Staff, Plant Protection and Quarantine Programs, and requests that it be held confidential. A determination will be made whether a proper showing in support of the request has been made on grounds that its disclosure could adversely affect any person by disclosing information in the nature of trade secrets or commercial or financial information obtained from any person and privileged or confidential. If it is determined that a proper showing has been made in the support of the request, the material will be held confidential; otherwise, notice will be given of denial of such request and an opportunity afforded for withdrawal of the submission. Requests for confidential treatment will be held confidential (7 CFR 1.27(c)).

Done at Washington, D.C., this 20th day of May 1976.

J. W. GENTRY,  
Acting Deputy Administrator,  
Plant Protection and Quarantine Programs, Animal and Plant Health Inspection Service.

[FR Doc. 76-15356 Filed 5-24-76; 8:45 am]

#### Rural Electrification Administration

##### [ 7 CFR Part 1701 ]

#### EQUAL EMPLOYMENT OPPORTUNITY IN CONSTRUCTION FINANCED WITH REA LOANS

##### REA Policy and Procedures on Employment Data and Proposed Guidelines for Developing and Implementing an Affirmative Action Program

Notice is hereby given that, pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to issue a revision of REA Bulletin 20-15: 320-15, "Equal Employment Opportunity in Construction Financed with REA Loans." The purpose of the revised bulletin is to delete annual employment data requirements and to propose a set of guidelines for developing

and implementing an Affirmative Action Program. On issuance of the revised bulletin, Appendix A to part 1701 will be modified accordingly.

Persons interested in this revision may submit written data, views, or comments to the Civil Rights Coordinator, Rural Electrification Administration, Room 4313 South Building, U.S. Department of Agriculture, Washington, D.C. 20250, on or by June 24, 1976. All written submissions made pursuant to this notice will be made available for inspection by interested parties.

A copy of the proposed revision of REA Bulletin 20-15: 320-15 may be secured in person or by written request from the Civil Rights Coordinator.

A summary of proposed substantive changes in REA Bulletin 20-15: 320-15 is as follows:

1. Section IV G (page 6), Submission of Employment Data to REA by Borrowers, will be deleted. Future requests for employment data will be at five-year intervals beginning in 1980.

2. Section IV H, Affirmative Action Compliance Program, will now become "Section IV G." This section has been revised to reflect editorial changes such as deleting the word "sample" in the Affirmative Action Program and revising the last sentence to make it more definitive. The last paragraph in this section is new. The revision reads as follows:

**Borrowers:** Each borrower, unless exempt, having 50 or more employees is required to develop and carry out a written affirmative action program. Guidelines for developing such a program are set forth in Appendix F. A report of the results of the program shall be compiled annually, and the program updated at that time. The affirmative action program and its accomplishments shall be readily available for inspection. The evaluation of the program is an integral part of the compliance review activities.

In addition, REA believes that it is good business for all borrowers to develop and implement an affirmative action program.

3. Appendix F, "Contractor's Affirmative Action Plan for Equal Employment Opportunity Under Executive Order 11246 and Executive Order 11375," has been changed to Appendix E. Appendix E, "Suggested Approaches for Developing an Affirmative Action Program," has been changed to Appendix F. Appendix F (formerly Appendix E) has been revised in detail in order to provide more definitive information and guidelines to the borrower for use in developing and implementing an affirmative action program. The revision of this Appendix is as follows:

#### SUGGESTED APPROACHES FOR DEVELOPING AN AFFIRMATIVE ACTION PROGRAM

An Affirmative Action Program consists of a detailed plan which is "results-oriented" to the extent that when implemented in good faith, it will bring about the full utilization of minorities and women at all levels and in all categories of the work force.

#### THE CONTENTS OF AN AFFIRMATIVE ACTION PROGRAM

I. **Policy commitment by the Board of Directors.**—Unless the board of directors sets forth a strong and effective policy, identifying its attitude toward equal employment opportunity, and directs management to move forthrightly in bringing this effort to fruition, nothing meaningful in the equal employment opportunity program will be accomplished.

II. **Responsibility and authority.** A management official should be assigned the responsibility and given the authority for developing and implementing the Affirmative Action Program. The official should:

A. Develop policy statement and set forth procedures for communicating this statement internally and externally.

B. Assist department managers in collecting and analyzing employment data, identifying problem areas, setting goals and timetables and developing programs to achieve those goals.

C. Design, implement, and monitor internal audit and reporting systems to measure the effectiveness of the program and identify areas of strong and weak points and take needed action to strengthen the weak areas.

D. Report quarterly to the manager on the progress made in each level of employment category.

E. Serve as liaison between the organization and the government, minority group and women organizations and other community groups.

III. **Analyze present work force and identify problem areas.** In order to analyze the work force and identify problem areas, the following steps should be taken:

A. List each job title as it appears in the collective bargaining agreement or payroll records.

B. Rank employees from the lowest to the highest paid in each department or similar organizational unit including department or unit supervision personnel.

C. Where there are separate work units or lines of progression within a department, provide a separate list for each work unit or line including unit supervisors.

D. For lines of progression, show the order of jobs in the line through which an employee can move to the top of the line. Where there are no formal progression lines or usual promotional sequences, list job titles by department, or job "families," in order to wage rates or salary ranges.

E. For each job title, give the total number of incumbents, the number of

male and female incumbents, and the number of male and female incumbents in each of the following groups: Blacks, Spanish-surnamed Americans, American Indians, and Orientals.

F. Give the wage rate or salary range for each job title.

G. List all job titles, including all managerial job titles.

IV. **Utilization analysis.** After the work force analysis is presented, jobs should be grouped for further analysis. A job group is one or a group of jobs having similar content, wage rates and opportunities. Job groups should relate to the data contained in Manpower Information for Affirmative Action Programs obtained from the local state employment security agencies. When data on detailed skills is available, more detailed job groups can be used.

In making the utilization analysis, the borrower should:

A. Conduct such analysis separately for minorities and women. The analysis should include specific percentages of minority persons and women (minority and non-minority) from the state employment security agency. Percentages should be stated separately for Blacks, Spanish-surnamed Americans, American Indians and Orientals whenever any of these groups exceeds two percent or more of the population in the labor area.

B. Prepare a separate analysis for each job group.

C. Check with the local Security Employment Agency serving the county where headquarters of the organization is located and from which it draws its work force to determine the following population information:

1. Total population	-----
(Number)	(Number)
2. Total minority population	-----
(Percent)	(Percent)
3. Total female population	-----
(Number)	(Number)
4. Total labor force	-----
(Number)	(Number)
5. Total female labor force	-----
(Number)	(Number)
6. Total minority labor force	-----
(Number)	(Number)
7. Unemployment rate	-----
(Percent)	(Percent)
8. Minority unemployment rate	-----
(Percent)	(Percent)
9. Female unemployment rate	-----
(Percent)	(Percent)

In establishing goals, the borrower should consider the percent that employed minorities and women is to the total employed population in the area where the headquarters is located and from which the system draws its labor force.

D. In determining whether minorities are being underutilized in any job group,

#### PROPOSED RULES

the borrower should consider at least the following factors:

1. The minority population of the labor area surrounding facility.

2. The size of the minority unemployment force in the labor area surrounding the facility.

3. The percentage of the minority work force as compared with the total work force in the immediate labor area.

4. The general availability of minorities having requisite skills in the immediate labor area. (Consider data from the appropriate labor market area on occupations of employed persons, unemployed persons and job applicants for factors 4 and 5.)

5. The availability of minorities having requisite skills in an area in which the borrower can reasonably recruit.

6. The availability of promotable and transferable minorities within the borrower's organization.

7. The existence of training institutions capable of training persons in the requisite skills.

8. The degree of training which the borrower is reasonably able to undertake as a means of making all jobs available to minorities.

E. In determining whether women are being underutilized in any job group, consider at least the following factors:

1. The size of the female unemployment force in the labor area surrounding the facility.

2. The percentage of the female work force as compared with the total work force in the immediate labor area.

3. The general availability of women having requisite skills in the immediate labor area. (Consider data on occupations of employed and unemployed persons for factors 3 and 4.)

4. The availability of women having requisite skills in an area in which the borrower can reasonably recruit.

5. The availability of women seeking employment in the labor or recruitment area of the borrower. (Consider data on job applicants obtained from the local state employment service.)

6. The availability of promotable and transferable female employees within the borrower's organization.

7. The existence of training institutions capable of training persons in the requisite skills.

8. The degree of training which the borrower is reasonably able to undertake as a means of making all job classes available to women.

In both the analysis for minorities and the analysis for women, data regarding promotable and transferable employees, community training facilities should be prepared by the borrower and related to the locality for factors 6, 7 and 8.

Underutilization is defined as having fewer minorities or women in a particular job group than would reasonably be expected by their availability. Availability is determined by considering at least the eight factors for minorities and the eight factors for women in the utilization analysis for each job group. At no time should availability be deter-

mined by considering only one factor such as occupations or opportunities through training and recruitment.

Whenever the percentage of any minority group exceeding two percent or more of the population in the labor area, or of women, is lower than the percentage of such persons determined to be available, the affirmative action program should specifically state the underutilization exists in that job group.

V. *Establishment of goals and timetables.* A. Specific goals and timetables should be established separately for minorities and women considering at least the factors cited in the utilization analysis. Goals, timetables and affirmative action commitments should be designed to correct any identifiable deficiencies.

B. A long range goal should be established for each job group in which underutilization exists and should be designed to completely correct the underutilization. The goal should be stated as a percentage of the total employees in the job group and should be equal to the percentage of minorities or women available for work in the job group in the applicable labor market.

1. A single goal for minorities is acceptable unless through the company's evaluation it is determined that one minority group is underutilized in a substantially disparate manner.

2. Separate goals and timetables for such minority groups may be established individually, and where appropriate, separate goals may be established within the minority groups by sex.

C. For each job group in which underutilization exists, a specific timetable should be established for reaching the ultimate goal in the minimum feasible time period. In establishing timetables, the borrower should consider the anticipated expansion, contraction, and turnover of the work force, as well as the number of jobs to be filled through upgrading.

D. For each job group in which underutilization exists, the borrower should establish annual rates of hiring and/or promoting minorities and women until the ultimate goal is reached. These rates should be the maximum rates that can be achieved through putting forth every good faith effort, including the use of available recruitment and training facilities, and should not be lower than the percentage rate set in the ultimate goal. Numerical goals based on projected openings should be established but should not be used in place of percentage goals. Goals should be stated both as actual numbers and as percentages for backup goals. For example, a borrower may establish a goal of ten women based on an expected 20 vacancies for hires or promotions, but actual vacancies may vary. As a contingency, the percentage goal (e.g., 50 percent of hires) would apply if opportunities exceed current estimates.

E. Support data for the required analysis and program should be compiled and maintained as part of the borrower's

affirmative action program. This data should include but not be limited to progression line charts, seniority rosters, applicant flow data, and applicant rejection ratios indicating minority and sex status.

F. Copies of affirmative action programs and/or copies of support data must be made available to the compliance agency or the Office of Federal Contract Compliance, at the request of either, for such purposes as may be appropriate to the fulfillment of their responsibilities under Executive Order 11246, as amended.

#### THE COMPLIANCE STATUS

No borrower's compliance status shall be judged alone by whether or not it

reaches its goals and meets its timetables. Rather, each borrower's compliance posture shall be reviewed and determined by reviewing the contents of its program, the extent of its adherence to this program, and its good faith efforts to make its program work toward the realization of the program's goals within the timetables established by the borrower for completion.

4. A new Appendix G, "Suggested Steps for Developing an Affirmative Action Program," will be added in order to provide the borrower with a suggested format to be used in writing up an affirmative action program. (See below.)

Dated: May 18, 1976.

RICHARD F. RICHTER,  
Acting Administrator.

#### APPENDIX G.—Suggested steps for developing an affirmative action program

Item	Action needed	By whom	When
I. Purpose.....	State the purpose of the AAP.....	Board of directors.....	Immediately
II. Policy.....	Make an effective and strong statement that the corporation will not discriminate in any of its employment practices.....	.....do.....	Do.
III. Responsibility for implementation of policy.....	Give the name and state the authority of such person who will have to implement the policy.....	.....do.....	Do.
IV. Dissemination of policy.....	State how policy will be disseminated to all employees (internally) and nonemployees (externally).....	Personnel supervisor <sup>1</sup> or manager.....	Do.
V. Initiating and implementing the AAP.....	1. Publish statement about corporation's policy and intent on equal employment opportunity.....	Board of directors.....	Do.
	2. Distribute corporation's policy statement and intent to all employees and applicants for employment.....	Personnel supervisor <sup>1</sup> or manager.....	Do.
	3. Include information on corporation's policy and intent on equal opportunity employment in corporation's publications.....	.....do.....	Do.
	4. Include "An Equal Opportunity Employer" statement in all advertisements.....	.....do.....	Do.
	5. Write letters to all recruitment sources advising them of the corporation's policy on equal opportunity employment.....	.....do.....	Annually.
	6. Conduct recruitment visits to include schools with substantial or predominate members of minority group students.....	.....do.....	Continuing.
	7. Maintain liaison with public and private agencies serving minority groups and women and keep record of contacts.....	.....do.....	Continuing.
	8. Make periodic reports to the board of directors on corporation's progress in achieving the goals of AAP.....	.....do.....	Continuing.
VI. Development and promotion of qualified employees.....	1. Inform minority group and women employees on available on-the-job training programs.....	Personnel supervisor <sup>1</sup> and department heads.....	Immediately and update annually.
	2. Determine if job descriptions, entrance qualifications and qualification standards for promotion are discriminatory to minority groups and women.....	.....do.....	Continuing.
	3. List type of kind of training needed and where such training can be secured to achieve corporation's objective in obtaining minority group and women representation.....	.....do.....	Immediately and update annually.
	4. List by ethnic category persons who have been upgraded, promoted, transferred, or dismissed, or who have left your employment during the last 12 months.....	.....do.....	Do.
VII. A. Work force analysis.....	1. List each job title as it appears on the payroll, ranking from lowest to highest paid in each department, including supervisors.....	Personnel supervisor.....	Do.
	2. Make separate list when work units are separate or where there are lines of progression within a department.....	.....do.....	Do.
	3. For each job title, give the total number of incumbents; the total number of male and female incumbents; the wage rate or salary range by job title and ethnic category.....	.....do.....	Do.
B. Group jobs.....	List jobs together that have similar content, wage rates and opportunities.....	.....do.....	Do.
VIII. Availability analysis.....	From the State employment agency serving the county or area concerned, secure: a. Total population ..... (number). b. Total minority population ..... (number) ..... (percent). c. Total female population ..... (number) ..... (percent). d. Total labor force ..... (number). e. Total female labor force ..... (number) ..... (percent). f. Total minority labor force ..... (number) ..... (percent).	.....do.....	Do.

Footnote at end of table.

#### APPENDIX G.—Suggested steps for developing an affirmative action program—Continued

Item	Action needed	By whom	When
	g. Unemployment rate ..... (percent)..... h. Minority unemployment rate ..... (percent)..... i. Female unemployment rate ..... (percent)..... Secure the above percentages by ethnic category when such category exceeds 2 percent of the total population in the labor force area (see app. F).	.....do.....	Do.
IX. Underutilization analysis.....	1. Turn to app. E to see items needed for evaluation.....	.....do.....	Do.
	2. Show the evaluation in numbers and percentages.....	.....do.....	Do.
X. New hires and terminations.....	1. Show the percentage of new employees needed.....	.....do.....	Do.
	2. Develop schedule showing new hires for the past 12 months by jobs and ethnic category.....	.....do.....	Do.
	3. Develop schedule showing termination by jobs and ethnic category for the past 12 months.....	.....do.....	Do.
XI. Establish goals and timetables.....	1. Develop schedule showing or projecting new hires for the next 12 months.....	.....do.....	Do.
	For each job title where there are underutilization of minority groups and women, give the percentage of the goal you hope to achieve during the next 12 months.....	.....do.....	Do.

<sup>1</sup> If the organization does not have a position for personnel supervisor, designate individual who ordinarily performs such duties.

[FR Doc.76-15141 Filed 5-24-76;8:45 am]

#### CIVIL SERVICE COMMISSION

##### [5 CFR Part 890]

##### HEALTH BENEFITS

#### Application for Approval of Health Benefits Plans

Notice is hereby given that under authority of section 8913 of title 5, United States Code, it is proposed to amend §§ 890.203(a), 890.301(d) and 890.306(c) of 5 CFR Part 890 to provide for a semi-annual review of applications submitted by comprehensive medical plans seeking to participate in the Federal Employees Health Benefits Program.

It is the opinion of the Civil Service Commission that such amendments to the existing health benefits regulations are necessary to facilitate access to the Federal Employees Health Benefits Program by qualified comprehensive medical plans.

Carriers and other interested persons may submit written comments, objections or suggestions to the Bureau of Retirement, Insurance, and Occupational Health, Room 4445, U.S. Civil Service Commission, Washington, D.C. 20415, on or before June 24, 1976.

Accordingly, it is proposed to amend 5 CFR Part 890 as follows:

1. By amending paragraph (a) of § 890.203 to read as follows:

§ 890.203 Application for approval of, and proposal of amendments to, health benefit plans.

(a) Application for approval of comprehensive medical plans may be made by letter to the U.S. Civil Service Commission, Washington, D.C. 20415. This letter application is to be accompanied by such descriptive material, financial data and documentation as the Commission may require in its review process and in the format specified by the Commission. Participation of an approved plan becomes effective either on the January 1st or on the July 1st which is (1) at

least nine months after the Commission receives the application and (2) at least six months after the Commission receives all evidence to demonstrate that the plan has met all requirements for approval.

2. By amending paragraph (d) of § 890.301 to read as follows:

§ 890.301 Opportunities to register to enroll and change enrollment.

(d) *Open season.* (1) During the period November 15, 1975, through December 31, 1975, and the period November 15 through November 30 of each year thereafter beginning with 1976, an employee who is not registered to be enrolled may register to be enrolled, and an enrolled employee or annuitant may change his or her enrollment from one plan or option to another, or from self only to self and family, or both.

(2) The Commission may announce and conduct special open seasons for newly approved comprehensive medical plans, except that enrollment during a special open season shall be limited to approved comprehensive medical plans which have qualified under subpart B of this part for public participation effective July 1, 1977, or any July 1 thereafter. During a special open season, which shall take place at such time as the Commission may specify, an enrolled employee or annuitant living in the enrollment area of a newly approved plan may change his or her enrollment from the plan in which he or she is already enrolled to the newly approved plan. The election must be for the same type of coverage (self only or self and family) as the present enrollment unless a change of type is otherwise authorized by this part. The Commission shall determine the effective date of a change in enrollment elected during a special open season.

3. By amending paragraph (c) of § 890.306 as follows:

§ 890.306 Effective dates.

(c) (1) The effective date of a change in enrollment under section 890.301(d) (1) is the first day of the first pay period which begins in January of the next following year, except that a change in enrollment for the open season for employees ending April 14, 1972, and for annuitants ending April 30, 1972, is effective on the first day of the first pay period which begins after April 14, 1972.

(2) The effective date of a new enrollment under section 890.301(d) (1) is the first day of the first pay period which begins in the next following year and which follows a pay period during any part of which the employee is in pay status, except that the effective date of a new enrollment for the open season ending April 14, 1972, is the first day of the first pay period which begins after April 14, 1972, and which follows a pay period during any part of which the employee is in pay status.

UNITED STATES CIVIL SERVICE COMMISSION,

[SEAL] JAMES C. SPRY,  
Executive Assistant to  
the Commissioners.

[FR Doc.76-15348 Filed 5-24-76;8:45 am]

#### COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

[41 CFR Parts 51-3, 51-4, and 51-5]

##### WORKSHOPS FOR THE OTHER SEVERELY HANDICAPPED

#### Designation of Central Nonprofit Agencies

In 1971, Public Law 92-28 extended the priority previously afforded blind workshops to workshops serving the other severely handicapped. Under the provision of Section 2(c) of that Act, the Committee designated six national organizations as central nonprofit agencies to represent workshops for the other severely handicapped. On October 1, 1974, the Committee designated the National Industries for the Severely Handicapped as a central nonprofit agency representing workshops serving the other severely handicapped. The National Industries for the Severely Handicapped was created to replace the six national organizations and eventually to assume responsibility for representing all non-blind workshops. In the interim period since October 1, 1974, the Committee has continued to recognize the six other national organizations as central nonprofit agencies. Effective July 1, 1976, the central nonprofit agency functions for all non-blind workshops is being transferred exclusively to the National Industries for the Severely Handicapped and the designation of the six other national agencies as central nonprofit agencies in § 51-3.1 is being withdrawn.

Changes in wording in § 51-3.3, paragraphs (b) and (d) of § 51-4.1, and para-

## PROPOSED RULES

graph (b) of § 51-5.1-2 are also required to reflect the fact that the Committee will be dealing with only two central nonprofit agencies, the National Industries for the Blind and the National Industries for the Severely Handicapped. Other minor changes in wording in these sections have been incorporated for clarification.

The above changes are proposed to become effective July 1, 1976.

Comments and views regarding this proposed change may be filed with the Committee no later than June 24, 1976. Communications should be addressed to the Executive Director, Committee for Purchase from the Blind and Other Severely Handicapped, 2009 Fourteenth Street North, Suite 610, Arlington, Virginia 22201.

1. Section 51-3.1 is proposed to read as follows:

§ 51-3.1 General.

Under the provisions of section 2(c) of the Act, the following are designated central nonprofit agencies:

- (a) To represent the workshops for the blind: National Industries for the Blind.
- (b) To represent the workshops for other severely handicapped: National Industries for the Severely Handicapped, Inc.

2. Paragraphs (b) and (d) of § 51-3.3 are revised to read as follows:

§ 51-3.3 Assignment of commodity or service.

(b) Within 60 days after notification by the Committee that a commodity or service has been proposed for development by a workshop, Federal Prison Industries, Inc. (for commodities only), and National Industries for the Blind (for commodities and services proposed by National Industries for the Severely Handicapped) shall notify the Committee of their decision to exercise or waive their priorities on the commodity or service.

(d) When National Industries for the Blind exercises its priority for a commodity or service requested by National Industries for the Severely Handicapped, the Committee shall assign the commodity or service to National Industries for the Blind. If National Industries for the Blind has not completed the essential steps to place the commodity or service on the Procurement List within nine months after assignment, the Committee shall reassign it to National Industries for the Severely Handicapped. The nine-month period may be extended for a reasonable period of time when National Industries for the Blind has been delayed by conditions beyond its control.

3. Section 51-4.1 is revised to read as follows:

§ 51-4.1 General.

To participate under the Act, a workshop shall be represented by the appropriate central nonprofit agency. The designation of the central nonprofit agency shall not be changed without prior written approval of the Committee.

4. Paragraph (b) of § 51-5.1-2 is revised to read as follows:

§ 51-5.1-2 Allocations and orders.

(b) Letter requests for allocation shall be submitted to the appropriate central nonprofit agency listed below:

Agency	Agency Symbol
National Industries for the Blind, 1511 K St., Suite 1043, Washington, D.C. 20005.	IB
National Industries for the Severely Handicapped, 4350 East-West Highway, Suite 1120, Washington, D.C. 20014.	SH

By the Committee.

C. W. FLETCHER,  
Executive Director.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 547-6]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Proposed Revision to the New York State Implementation Plan

The State of New York submitted to the EPA, Region II Office, on March 16, 1976, proposed revisions to the New York State implementation plan. This revision request was submitted in accordance with all applicable EPA requirements as contained in 40 CFR Part 51. The proposed revisions consisted of administrative orders signed by the commissioner of the New York State Department of Environmental Conservation which establish three special limitations under 6 NYCRR 225.2(b) and three special limitations under 6 NYCRR 225.2(c). These orders and the limitations contained therein become effective upon EPA approval. In addition to copies of the administrative orders establishing the special limitations, the State also submitted a technical analysis which attempted to show that contravention of national standards for sulfur oxides would not occur when the fuel specified in the special limitations was utilized.

The sources and areas granted the special limitations are as follows:

- (a) Pursuant to section 225.2(b): (i) Southern Tier East AQCR;
- (ii) Central AQCR; and
- (iii) Northern AQCR, with the exception of all sources in the City of Glens Falls and sources with total rated heat input capacities greater than 100 million Btu/hr in the Town of Queensbury.
- (b) Pursuant to § 225.2(c): (i) LILCO Port Jefferson Power Plant, units 3 and 4;
- (ii) LILCO Northport Power Plant; and
- (iii) Niagara Mohawk Oswego Power Plant.

Section 225.2(b) allows the Commissioner to grant special limitations to the applicable sulfur in fuel limitation to sources not having a rated total heat input in excess of 250 million Btu/hr and § 225.2(c) allows the issuance of special limitations to individual sources which have rated heat input capacities of greater than 250 million Btu/hr. In both cases, the maximum permissible sulfur in fuel limitations are 3.0%, by weight, for oil and 2.8 pounds per million Btu gross heat content for coal usage.

The technical analysis submitted by the State utilizes diffusion modeling for the three power plants and proportional modeling for the three AQCRs in question. The Regional Office has preliminarily determined that the power plant analysis is adequate in that it is conservative in nature and does not show contravention of national standards for sulfur oxides when the fuel specified in the special limitations is utilized. The special limitations, if approved by EPA, will allow the sale, offering for sale, purchase and use of fuel with the following sulfur in fuel content, by weight:

- (i) LILCO Port Jefferson Power Plant, units 3 and 4—2.8%;
- (ii) LILCO Northport Power Plants, units 1 and 2—2.5%;
- (iii) Niagara Mohawk Oswego Power Plant, units 1-5—2.8%.

The special limitations are to extend until May 31, 1977. In addition, the administrative orders adopting the special limitations require the affected sources to institute a program of continuous monitoring and fuel switching if national ambient air quality standards for sulfur oxides are exceeded.

The technical analysis for the three AQCRs, on the other hand, is not adequate since the State did not utilize diffusion modeling but used proportional modeling. The proportional modeling technique is incapable, except in very limited areas, of accurately estimating the anticipated air quality impact. In addition, this method is never capable of estimating short term air quality impacts. The conditions necessary for its accurate use, which are not satisfied, are the following:

- (1) A very dense sulfur oxide monitoring network;
- (2) A homogeneity of contributing sources; and
- (3) A nonindependence of impact upon wind direction.

In order for the special limitations for the AQCRs to be found approvable to EPA some type of diffusional analysis would have to be performed.

The Regional Office has notified the State of New York as to what would constitute an acceptable technical justification for the three AQCRs in question. If this justification is submitted during the 15-day public comment period, it is the intention of the Regional Office to make this information available to the public. Should the justification be submitted after the close of the public comment period, the Regional Office will provide additional time for comment by the public.

This notice is issued, as required by section 110 of the Clean Air Act, to advise the public that comments may be submitted on whether the proposed revision should be approved or disapproved. Only comments received during the 15-day public comment period will be considered. The Administrator's decision to approve or disapprove the proposed plan will be based on whether such revision meets the requirements of Section 110 (a) (2) (A)-(H) and EPA regulations in 40 CFR Part 51.

The Agency finds that there is good cause for establishing a 15-day comment period. This is because of the extensive public participation that has already occurred at the State level and the need for prompt administrative action to allow the affected facilities to learn at the earliest reasonable time what special sulfur in fuel limitations will apply.

Copies of the proposed plan revision are available for public inspection during normal business hours at the Air Branch, EPA, Region II, 26 Federal Plaza, New York, New York 10007, and at the New York State Department of Environmental Conservation, Division of Air Resources, 50 Wolf Road, Albany, New York 12233. Additional copies are available for inspection at the Public Information Research Unit, 401 M Street, S.W., Washington, D.C. 20460. All comments should be addressed to the Regional Administrator, Environmental Protection Agency, Region II, 26 Federal Plaza, New York, New York 10007.

Dated: May 13, 1976.

G. M. HANSLER,  
Regional Administrator,  
Environmental Protection Agency.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 20802 RM-2518]

CIRCULAR OR ELLIPTICAL POLARIZATION

Transmission Standards and Changes

In the matter of amendment of Subpart E, Part 73, of the Commission's Rules and Regulations, to permit Television Broadcast Stations to Employ Circular or Elliptical Polarization.

1. The Commission has before it a Petition for Rule Making filed by American Broadcasting Companies, Inc. (ABC) (RM-2518) requesting amendment of § 73.682(a)(14) of the Commission's rules and regulations to permit the use, on a permissive basis, of circular or elliptical polarization for television broadcast.

As ABC notes, linear (horizontal or vertical) polarization and circular polarization are special instances of "elliptical polarization." In the former case, the polarization ellipse has no minor axis and is linear; in the latter, the major and minor axes are identical, making the ellipse circular. While true "circular" polarization is not necessarily achievable in practice, ABC uses that

## PROPOSED RULES

cast transmissions, much as is presently permitted, and generally used in the FM broadcast service.

2. Before examining the merits and ramifications of the ABC proposal, it is appropriate to review the historical genesis of horizontal polarization. The rules presently provide that all television broadcast stations employ horizontal polarization. This provision was incorporated into the TV technical standards upon the recommendation of the National Television System Committee (NTSC), in a report to the Commission, January 27, 1941. At that time, the NTSC was considered either vertical (as employed in AM broadcasting) or horizontal polarization. Confronted with a meager amount of measured data, which was not conclusive, a unanimous agreement of the Committee could not be attained. Horizontal polarization became a standard for lack of better information.

3. It is well documented at this Commission, by the broadcast industry, and the viewing public, that horizontal polarization is an inappropriate means for minimizing such problems as reflections (ghosts), spotty coverage, and multipath interference. Furthermore, horizontal polarization requires critical antenna orientation for maximum signal and minimum distortion. We are cognizant that the above deficiencies have proven to be a source of serious viewer consternation. For this reason, the overall public interest requires expeditious action on the ABC Petition; we are therefore opening this proceeding with the objective of revising the television rules to permit circular polarization.

4. In its Petition as filed February 12, 1975 and as supplemented by its May 1975, Report on Field Test of Circular Polarization in Television conducted on WLS-TV, Chicago, Illinois, ABC contends that the theoretical advantages of circular polarization over horizontal polarization are indeed observed in practice. More specifically, from data based in large measure on the experiments conducted under Commission authorization at WLS-TV, channel 7, Chicago, ABC makes the following points:

A. The use of circular polarization does not appreciably change a station's service area (based on the horizontal transmission component, the approach used in FM broadcasting).

term to differentiate the proposed technique from the conventional (linear) technique.

Section 73.316(a) of the rules provides in pertinent part, "It shall be standard to employ horizontal polarization; however, circular or elliptical polarization may be employed if desired."

As attachments A and B to its Petition, ABC submitted an interim engineering report on the results of tests conducted at WLS-TV, Chicago, Illinois, under an experimental authorization granted by the Commission in 1973, and a paper on "Circular Polarized TV Transmissions", written by Dr. M. S. Sukola of RCA.

B. The use of circular polarization does not appreciably change a station's interference impact on co-channel stations operating with conventional polarization, and where both stations operate with circular polarization, a decrease in interference can be expected.

C. The use of circular polarization is beneficial for two reasons. First, it tends to eliminate or reduce visible ghosts on the receiver screen if the viewer employs a circularly polarized receiving antenna. Second, even with a conventional receiving antenna, reception may be improved, due to the additional energy radiated in the vertical plane (which might be received by certain portions of a conventional receiving antenna, particularly where that antenna has not been properly mounted and/or connected).

5. The Association of Maximum Service Telecasters (AMST) has filed comments strongly supporting the concept of circular polarization, but raising certain engineering matters on which further data, partially covered by ABC's subsequent reports, were deemed advisable.

6. The Commission is of the view that the instant proposal is one meriting industry comments, on both its technical and economic aspects. From a theoretical standpoint the alleged benefits are logical to expect, and no significant adverse effects should result. Even though administered on a permissive basis, circular polarization can be implemented only through substantial broadcast station expenditure. However, we are ready to accept the proposal based on the belief that the broadcaster will not implement it without good reason. Here, our experience with FM circular polarization has shown that broadcasters have adopted the approach almost as a standard. Throughout a station's service area, the freedom of its signal from distortion and other aberrations may provide a significant competitive advantage. Circular polarization appears promising as a state-of-the-art method to reduce station reception difficulties. Thus, we are satisfied that a competitive incentive will be generated by the instant proposal; thereby, assuring significant benefits to a substantial number of viewers.

7. On this basis, it is herein proposed that § 73.682(a)(14) of the Commission's rules be modified, as ABC suggests, to read as follows:

It shall be standard to employ horizontal polarization. However, circular or elliptical polarization may be employed if desired, where clockwise (right-hand) rotation shall be used. The supplemental vertically polarized, effective radiated power resulting from circular or elliptical polarization shall in no event exceed the effective radiated power authorized.

8. In addition, to preclude any ambiguity in the determination of antenna height above average terrain, it is proposed to add the following sentence to the definition of antenna height above average terrain, contained in § 73.681:

Where circular or elliptical polarization is employed, the antenna height above average terrain shall be based upon the height of the radiation center of the antenna which transmits the horizontal component of radiation.

9. General comments on this proposal are accordingly requested. Further, based upon the comments of AMST and the advice of the FCC staff, the Commission specifically requests information and knowledgeable views on the following matters:

A. Experimental data is presently available largely from WLS-TV, channel 7, Chicago, Illinois. Recently received from the Jampro Antenna Company is a report on the results of circular polarization using the facilities of KLOC-TV, channel 19, Modesto, California. The Jampro report corroborates the conclusions drawn by ABC, thus implementation in the UHF band appears an immediate and viable reality. At this time, low-band VHF has not had similar experimental testing. Although we would anticipate no deviation from the data collected by KLOC-TV and WLS-TV, we would welcome theoretical or laboratory information on this subject.

B. As yet, no field data has been submitted regarding the effects of circular polarization in instances where indoor, home receiving antennas are employed. While it is expected that improved reception would result, the extent and nature of the improvement achievable in practice has yet to be established for the record.

C. The data presently on file in connection with the WLS-TV experiments represent the observations made along a single radial, and the effects of ghosting were observed at only six locations along that radial. Additional measurement data would be welcomed.

D. Even though the WLS-TV data suggest that no increase in the interference received by a conventional, horizontally polarized antenna would result from circular polarization, the added vertical-signal component might be expected to be picked up by the antenna's downlead. It appears that information on this subject is needed for a proper evaluation of potential receiver effects.

E. The WLS-TV data show that the horizontal pattern of a circularly polarized receiving antenna in a circularly polarized field is similar to a cardioid, with a broad beam-width and a single, deep null approximately opposite the point of maximum field. If such a pattern would be typical of such receiving antennas, this would indeed be a significant advantage, in that antenna orientation would be less critical and interfering signals arriving from the rear of the antenna could be effectively "nulled-out." However, the performance of the

\*Certain previous experimental data is also available in our files, resulting from earlier testing at WTA-TV, channel 10, Altoona, Pennsylvania.

antenna employed by WLS-TV was checked at only one location. Given the many variables which could effect such performance, additional data on that antenna would be useful. In fact since the full value of circular polarization can be seen only where a circularly polarized receiving antenna is employed, the Commission believes it important to receive information on such receiving antennas and to what extent various designs would achieve the desired results. Specifically, information on cost, size, electrical characteristics and estimated availability is desired.

F. Two unexpected findings are included in the WLS-TV measurement data. First, ABC notes that an improvement in picture quality for a given value of receiver input voltage seemed to result with circular polarization, even with a conventional receiving antenna. ABC is unable to explain this result, and further data is logically needed. Second, ABC shows that the location variation factor is not improved by circular polarization, which is counter to expectation. Further data on this subject would be useful.

10. Comments are also requested on the possible impact of the instant proposal on the UHF band. Preliminary engineering specifications on file from broadcast antenna manufacturers seem to indicate that circularly polarized UHF antennas will have less gain than their VHF counterparts. Similarly, a doubling of transmitter output power as an alternative for high gain antenna may be unrealistic to expect of UHF licensees. We note, however, that the proposed rule amendment allows a station latitude in choosing the amount of power radiated vertically, up to the maximum effective radiated power authorized. On the other hand, it has been suggested that a one-to-one relationship between horizontal and vertical ERP be required. Prototype antennas appear designed with an axial ratio as low as the state-of-the-art permits, thus equal power distribution would maximize the ghost reducing benefits to the public, provided, circularly polarized receiving antennas are employed. Although this approach is not favored, we welcome any discussion on the above issues.

11. Further, as stated above, we are inclined to agree with ABC that the proposed rule should parallel that now contained in the Commission's FM rules, except that "right-hand" circular polarization should be specified.<sup>5</sup> We believe there would be no useful purpose in specifying further limitations on the employment of circularly polarized transmission (axial ratio, polarization ratio, etc.), since such details are often a function of the physical factors associated with a

\*In FM broadcasting, while right-hand circular polarization has become the industry standard, the direction of rotation is not critical in that service. In television, however, such consistency is necessary to the effectiveness of the system, and must be formalized.

particular antenna design. However, the proposed rule will allow elliptical polarization as well, achievable in practice by adjusting the magnitude of the horizontal and vertical components. As indicated in paragraph 10 supra, equivalent ERP in both planes is not considered necessary, but the commission is considering that time and space phase quadrature be required of the two components, in order to maximize the partial circular polarization benefits. We recognize, though, that parties may have opposing views, and we wish to receive them.

12. The above points are not intended to limit discussion on this proposal. Instead, they are intended to delineate the particular areas of concern in the matter, and all pertinent information on the subject will be welcomed.

13. Pursuant to applicable procedures set forth in section 1.415 of the Commission's rules, interested persons may file comments on or before June 24, 1976, and reply comments on or before July 6, 1976. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments involved in this Notice.

14. In accordance with the provisions of § 1.419 of the rules, an original and 11 copies of all comments, replies, pleadings, briefs and other documents shall be furnished the Commission. All filings made in this proceeding will be made available for examination by interested persons during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C. 20554.

Adopted: May 11, 1976.

Released: May 25, 1976.

FEDERAL COMMUNICATIONS  
COMMISSION,  
(SEAL) VINCENT J. MULLINS,  
Secretary.

1. It is proposed to add the following sentence to the definition of antenna height above average terrain contained in § 73.681:

§ 73.681 Definitions.

Antenna height above average terrain . . . . .

Where circular or elliptical polarization is employed, the antenna height above average terrain shall be based upon the height of the radiation center of the antenna which transmits the horizontal component of radiation.

2. It is proposed to amend § 73.682(a) (14) to read as follows:

§ 73.682 Transmission standards and changes.

(a) . . . . .  
(14) It shall be standard to employ horizontal polarization. However, circular or

elliptical polarization may be employed if desired, where clockwise (right-hand) rotation shall be used. The supplemental vertically polarized, effective radiated power resulting from circular or elliptical polarization shall in no event exceed the effective radiated power authorized.

[47 CFR Part 73]

(Docket No. 20811, RM-2681)

# FM BROADCAST STATIONS TABLE OF ASSIGNMENTS Billings, Montana

1. *Petitioner, Proposal and Comments:* (a) Petition for rule making filed September 2, 1975, by Radio Billings, Inc. ("RBI") licensee of AM Station KBMY, Billings, Montana, proposing the assignment of Channel 223 to Billings as a fifth FM assignment.<sup>1</sup>

(b) The channel may be assigned without affecting any existing FM assignments.

(c) The transmitter site for Channel 223 must be located at least 6 miles south of Billings to meet the spacing requirement to Station KPQX(FM) (Channel 223), Havre, Montana.<sup>2</sup>

2. *Demographic Data:* (a) *Location:* Billings, the seat of Yellowstone County, is located approximately 220 miles south of the Canada-United States border and approximately 175 miles southeast of Great Falls, Montana.

(b) *Population:* (1970 U.S. Census)—Billings, 61,581; Yellowstone County, 87,367. Billings is included in the Billings Urbanized Area (pop. 71,197) and the Billings SMSA (made up of Yellowstone County) (pop. 87,367).

(c) *Present aural services:* Local service is provided by five AM stations—KBMY (Class IV, unlimited-time), licensed to petitioner; KGHJ (Class III, unlimited-time); KOOK (Class III, unlimited-time); KOYN (Class III, daytime-only); KURL (Class II, daytime-only) and three FM stations—KOYN-FM (Channel 227); KURL-FM (Channel 246); and KBMS (Channel 253). Additionally, Channel 275 has recently been assigned and is not yet occupied.

(d) *Economic considerations:* Petitioner states that Billings is the largest city in Montana and has become one of the fastest growing areas in the country due to its coal reserve and industry po-

<sup>1</sup>RBI submitted this proposal as a counterproposal in Docket No. 20644 in which a proposed fourth Class C FM channel for Billings was adopted. We decided to pursue this proposal to assign a fifth channel to Billings in a separate proceeding rather than consolidate the two proposals for reasons stated in that Docket and which are repeated herein, para. 5.

<sup>2</sup>The minimum mileage separation requirements for co-channel Class C channels is 180 miles under Section 73.207(a) of the Commission's Rules.

tenial, especially in energy production. Billings is also the major trade center for its region, according to petitioner. In addition, petitioner notes that the Commission's market data shows that the stations comprising the Billings radio market have shown net profits of \$98,730, \$168,316 and \$65,251 for the years 1971, 1972 and 1973, respectively.

3. *Additional considerations:* Petitioner concedes that Billings would not qualify for a fifth FM channel under the Commission's population guidelines.<sup>3</sup> However, it argues that the criteria should not be rigidly applied in light of the combined factors of the competitive market conditions, population and economic growth trends and projections, and the abundance of channel assignments available to precluded areas.

4. In the attached engineering report, petitioner proposes a facility operating at 100 kW at 750 feet HAAT, which it claims would provide a first FM service to 2,511 persons and a second FM service to 3,476 persons in an area of 5,987 square miles. It should be noted that our Roanoke Rapids criteria is based upon the reasonable values of 75 kW and 500 feet for a Class C station. According to the engineering study, preclusion would occur on Channels 221A, 222, 223 and 224A. However, Channel 223 represents one of the more efficient assignments from the standpoint of preclusion relative to other available channels, especially in the higher frequencies. Should any communities in the precluded areas express an interest in a channel, a number of assignments could be made.

5. We have treated this proposal in a separate rule making proceeding contrary to petitioner's wishes to include it in Docket No. 20544, adopted May 6, 1976, 41 Fed. Reg. 20172 (1976), where a fourth FM channel (Channel 275) was assigned to Billings. We did so to elicit comments on the need for a fifth FM channel at Billings in light of our population criteria, the areas of preclusion and the suggestion that this proposal was made in part to avoid a comparative hearing. It is our policy to require that submitted proposals result in a fair and equitable distribution of available facilities and that a proposed assignment which merely seeks to avoid a comparative hearing will not normally be considered a sufficient showing. Policy to Govern Requests for Additional FM Assignments, 8 F.C.C. 2d 79 (1967).

6. As it now stands, both petitioner and the proponent for Channel 275 at Billings in Docket No. 20544, Mattco, Inc., have expressed an intent to apply for Channel 275 after its assignment becomes effective. Petitioner has also stated its interest in applying for Channel 223, if assigned. In the event an applicant should obtain a construction permit on

<sup>3</sup>Further Notice of Proposed Rule Making in Docket No. 14185, 27 Fed. Reg. 7797 (1962), incorporated by reference in Third Report, Memorandum Opinion and Order in Docket No. 14185, Para. 26, 40 F.C.C. 747, 758 (1968).

Channel 275 before Channel 223 is assigned, we might not have a party interested in pursuing a construction permit for Channel 223. To avoid that possibility we would expect a clear statement of intent from either petitioner herein, Mattco, Inc., or any other interested person as to whether they would file an application for Channel 223, if assigned, and as the case may be, would concurrently withdraw their application for Channel 275, if it is still pending. In addition, should either be unsuccessful in obtaining Channel 275 at the time Channel 223 is assigned, each should state whether it would then file an application for Channel 223.

7. Since Billings is within 250 miles of the Canada-United States border, this proposal is subject to Canadian approval under the provisions of the Working Arrangement under the Canada-United States FM Agreement of 1947.

8. In view of the above, the Commission proposes to amend the FM Table of Assignments (§ 73.202(b) of the Commission's Rules) with regard to the community listed, as follows:

§ 73.202 [Amended]

City	Channel No.	
	Present	Proposed
Billings, Mont.	227, 246, 253, 275	223, 227, 246, 253, 275

9. The Broadcast Bureau's authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained in the attached Appendix and are incorporated herein.

10. Interested parties may file comments on or before July 2, 1976, and reply comments on or before July 22, 1976.

Adopted: May 13, 1976; released May 19, 1976.

FEDERAL COMMUNICATIONS  
COMMISSION,  
WALLACE E. JOHNSON,  
Chief, Broadcast Bureau.

## APPENDIX

(Docket No. 20811, RM-2681)

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, Section 73.202 (b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only re-submits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build

the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule-making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in Sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[FR Doc. 76-15186 Filed 5-24-76; 8:45 am]

#### [ 47 CFR Part 73 ]

[Docket No. 20810, RM-2580]

#### FM BROADCAST STATIONS TABLE OF ASSIGNMENTS Pinckneyville, Illinois

1. The Commission has for its consideration a petition filed by the Du Quoin Broadcasting Company (Du Quoin), licensee of Stations WQDN and WQDN-FM in Du Quoin, Illinois, on May 16, 1975, for rule making to delete Channel 280A from Pinckneyville, Illinois (1970 pop. 3,377). This petition is opposed by Coalbelt Broadcasters (Coalbelt), not presently a licensee, but the original petitioner for this channel, and present applicant before the Commission for an FM construction permit which proposes operation on the channel. Du Quoin has filed a reply to Coalbelt's opposition. We shall also consider in this proceeding the pleadings filed by the parties in both the application proceeding (BPH-9320) and the original rule making proceeding (Docket No. 19963; RM-2290; sub nom.

Johnstown, Ohio, et al.). An appendix is attached which summarizes the history of the Pinckneyville assignment.

2. Du Quoin contends that the Commission acted upon misleading information as to the availability of a transmitter site in making the original channel assignment. Du Quoin seeks deletion of what it claims is an erroneous and defective assignment. Coalbelt denies Du Quoin's contention, but has requested a waiver of Section 73.207, the minimum mileage separation rule, in the application proceeding because of changed circumstances since the original assignment. Coalbelt states in the application that a non-short-spaced transmitter site is not available at the present time.

3. The Commission's unvarying policy is that FM channel assignments fully comply with our minimum mileage separation requirements. We would not intentionally make a short-spaced assignment. FCC Rule 73.208(a)(4) states:

(4) Where the distance between the reference point in a community to which a channel is proposed to be assigned and the reference point in another community or communities does not meet the minimum separation requirements of § 73.207, the channel may be assigned to such community upon a showing that a transmitter site is available that would meet the minimum separation requirements of § 73.207 and the minimum field intensity requirements of § 73.315.

The Commission made the assignment to Pinckneyville, over Du Quoin's objections, based upon a showing by Coalbelt that its amended "reference site" met minimum separation and coverage requirements. Since a showing of an available transmitter site is one of the requirements of assignment, we took Coalbelt's "reference site" to be its intended (and available) transmitter site, since no other site was named. While Du Quoin's objections raised a question in the proceeding of site availability, we felt sufficiently assured of availability to make the assignment and resolve the issue in the application proceeding.

4. Now, however, Coalbelt itself says (in its replies to Du Quoin's petition and Du Quoin's opposition to the application) that its "reference site" was not an intended transmitter site, but "was used only to determine minimum mileage separations." If so, the Commission misunderstood Coalbelt's assertions in the rule making proceeding with regard to transmitter site availability. Had we known that no available transmitter site had been specified by Coalbelt, we would not have assigned the channel. In light of Coalbelt's statements that a non-short-spaced transmitter site is now unavailable, and that it did not specifically identify one in the rule making proceeding, the Commission will re-examine the Pinckneyville assignment.

5. If the assignment was defective for lack of identifying an available transmit-

<sup>1</sup> Du Quoin's allegations of misrepresentation and lack of candor against Coalbelt are matters for later consideration in an application or hearing context, if still in issue.

ter site, we would prefer to remedy the defect rather than delete the channel. Therefore, even in view of Coalbelt's failure to provide the Commission with the information, we would be inclined to uphold the assignment if it could be shown that a specific transmitter site was available at the time of the assignment that met the spacing and coverage requirements. Unless otherwise convinced, it appears to us that Coalbelt was put on notice that its amended "reference site" was not an available transmitter site at the time of the rule making, because the site was owned by a coal company that refuses to sell or lease its land. We have not been informed as to whether Coalbelt knew or should have known that other non-short-spaced transmitter sites were unavailable due to the airport plans at the time of the rule making.

6. Therefore, we ask that the parties specifically address, in detail, the matter of the availability of a non-short-spaced transmitter site at the time of the assignment, including the specific dates on which petitioner knew or should have known that specific sites had become unavailable. We are still of the view that Pinckneyville is in need of an FM channel, but we will adhere to our minimum separation requirements in rule making proceedings. Therefore, we invite comments on the proposal to delete FM Channel 280A from Pinckneyville, Illinois, amending the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with respect to the community listed below:

#### § 73.202 [Amended]

City	Channel No.	
	Present	Proposed
Pinckneyville, Ill.	280A	

7. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix B and are incorporated herein.

8. Interested parties may file comments on or before July 2, 1976, and reply comments on or before July 22, 1976.

Adopted: May 11, 1976; released May 20, 1976.

FEDERAL COMMUNICATIONS COMMISSION,  
[SEAL] WALLACE E. JOHNSON,  
Chief, Broadcast Bureau.  
APPENDIX A  
BACKGROUND

1. Coalbelt originally petitioned the Commission to assign Channel 280A to Pinckneyville, Illinois on November 8, 1973, promising to construct a facility at or near its proposed transmitter location and reference point. The Commission issued a Notice of Proposed Rule Making (Docket 19963; adopted March 7, 1974; released March 12, 1974) stating that the transmitter site must be located at least 8 miles from Pinckneyville to meet the minimum mileage separation requirements and questioning the

availability of a suitable site from which the station would be able to provide the requisite city grade signal over the community.

2. The comments of Coalbelt on April 12, 1974, contained a letter from a real estate agent stating that land was available for sale in sections 28, 29, 32, and 33 of Township 8 S., Range 2 W., of Perry County, "which is the area in question relative to a site at or very near the reference point." Du Quoin filed comments in opposition on the same day demonstrating that the proposed transmitter location would not enable a station to place the requisite city grade signal over the entire community. By reply comments of May 8, 1974, it presented a letter from an attorney for United Electric Coal Company (owner of some of the land in the reference area) stating that it was the owner's policy not to sell or lease any of the properties in Sections 28 and 29.

3. Upon learning that its proposed transmitter site could not provide the requisite signal over all of the community, Coalbelt on May 9, 1974, by reply comment, changed its reference site to a point which met minimum separation requirements and provided the requisite coverage. Neither party addressed the issue of whether a transmitter site was available at or near this reference site. (Coalbelt in its application pleadings now indicates that this reference site is in Township Section 21 and that land is owned by the United Electric Coal Company and therefore not available for sale or lease.)

4. The Commission assigned the channel in its Report and Order of July 9, 1974 (47 F.C.C. 2d 887) finding that the public interest would be thereby served. The Commission considered the question of whether the site was legally available to be marginal, and a matter more capable of resolution in the application proceeding.

5. Coalbelt, on January 17, 1975, filed its application for a construction permit requesting a waiver of the Commission's minimum mileage separation requirements stating that it could not obtain the property at its reference site which was owned by the United Electric Coal Company. Coalbelt stated that it had attempted to locate other property which would comply with the Commission's requirements, however, a new airport plan for Pinckneyville made all other non-short-spaced sites unavailable. Coalbelt has amended its waiver request and now seeks a site 0.6 miles short-spaced to KMOX-FM, St. Louis, Missouri, and 1.2 miles short-spaced to WNOI(FM), Flora, Illinois. Du Quoin has opposed the Coalbelt application for construction permit and in the alternative has required a hearing on the issues in that proceeding. The Commission asked for and received a letter from the managing partner of Coalbelt to support its claim that considerable effort was expended in searching for another site which would not involve short-spacing and that no such sites were available.

#### APPENDIX B

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, Section 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only re-

submits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[FR Doc. 76-15188 Filed 5-24-76; 8:45 am]

#### [ 47 CFR Part 73 ]

[Docket No. 20812, et al.]

#### FM BROADCAST STATIONS TABLE OF ASSIGNMENTS

Saegertown, Pennsylvania, et al.

1. The Commission has under consideration four petitions which propose amending § 73.202(b) of the rules, the FM Table of Assignments, by assigning a first FM channel to each of the above-mentioned communities. None of these four communities is located near an urbanized area. All of the proposed channels could be assigned to the respective communities in conformity with the Commission's minimum mileage separation rule and without affecting any of the presently assigned FM channels. No oppositions were filed to any of the proposals. All petitioners state that, if their proposed assignment is made by the Commission, they will promptly apply for the facility and, if authorized, will construct a station. The specific channel

that has been proposed for each locality and the identity of the respective petitioners are as follows:

RM-2647 Channel 232A to Saegertown, Pennsylvania (Corry Broadcasting, Inc.)  
RM-2660 Channel 269A to Carpinteria, California (Israel Sinofsky)  
RM-2671 Channel 269A to Two Harbors, Minnesota (FM Station Atlas)  
RM-2672 Channel 221A to Grass Valley, California (Mother Lode Broadcasting Co.)

A brief description of each petition follows:

2. *Saegertown, Pennsylvania (RM-2647).* Corry Broadcasting, Inc. (petitioner) filed a petition on January 28, 1976, proposing the assignment of Channel 232A to Saegertown, Pennsylvania. Saegertown (pop. 1,348)<sup>1</sup> is located in Crawford County (pop. 81,342) and is situated in the northwestern part of Pennsylvania. It has no local broadcast transmission service.

3. *The Canadian Government has given its concurrence to the assignment of Channel 232A to Saegertown, Pennsylvania.*

4. *Petitioner states that Saegertown's principal industries are component parts for radio and television, electrical components, soft drinks, bolt and screw parts molding and equipment, manufacturing of bonded adhesives, and tool and die operations. It adds that the proposed assignment would serve as a local outlet for public expression since the only other local media in the Saegertown area is the Meadville Tribune. In review of the need for a first full-time local service in Saegertown we believe the proposal for the assignment of a first Class A FM channel to Saegertown merits consideration in a rule making proceeding.*

5. *Carpinteria, California (RM-2660).* Israel Sinofsky (petitioner) filed a petition on February 26, 1976, proposing the assignment of Channel 269A to Carpinteria, California. Carpinteria (pop. 6,982) is located in Santa Barbara County (pop. 264,324) and situated 78 miles northwest of Los Angeles and 11 miles southeast of Santa Barbara. It has no local broadcast transmission service.

6. *Petitioner states that, between 1960 and 1970, the population of Carpinteria increased from 4,998 to 6,982, and that a recently completed Master Plan for the city calls for a planned growth to a population of 18,000 in 1995. He notes that the major employers in Carpinteria include Electro-Optics Division of Infra-red Industries, Inc. and Sambo's restaurant training and service center with the economic spotlight focusing on the burgeoning horticulture industry that employs more than 800 people with an annual payroll of more than \$5.5 million. Petitioner adds that the proposed assignment will afford the city and surrounding area a first local radio source for information, expression and advertising. He also points out that a community need now exists for over-the-air reports of local events, referendums, city council meetings, and school information. In view of*

<sup>1</sup> All population data are taken from the 1970 U.S. Census.

## PROPOSED RULES

the above, we believe consideration of the proposal for the assignment of Channel 269A to Carpinteria, California, is warranted.

7. *Two Harbors, Minnesota (RM-2671).* FM Station Atlas (petitioner) filed a petition on March 12, 1976, proposing the assignment of Channel 269A to Two Harbors, Minnesota. Two Harbors (pop. 4,437) the seat of Lake County (pop. 13,351), is located approximately 18 miles northeast of Duluth, Minnesota. There is no local broadcast transmission in Two Harbors or Lake County.

8. In support of its request, petitioner states that industry in Two Harbors is diversified, encompassing arts and crafts manufacturing, the manufacturing of heavy equipment used in logging, and year-round dock loading facilities for Great Lakes shipping of ore pellets called Taconite. It points out that, because of severe winter weather in this part of northeastern Minnesota, it is desirable to have a local radio station on the air to announce school closings and to broadcast city council meetings or news. In view of the foregoing information and the fact that there is no local broadcast service in Two Harbors or Lake County, we believe the above proposal to assign Channel 269A to Two Harbors, Minnesota, merits exploration in a rule making proceeding.

9. *Grass Valley, California (RM-2672).* Mother Lode Broadcasting Co. (petitioner) filed a petition on March 16, 1976, proposing the assignment of Channel 221A to Grass Valley, California. Grass Valley (pop. 5,149), is located in Nevada County (pop. 26,346) and situated about 50 miles northeast of Sacramento. There is no local broadcast transmission service in Grass Valley or Nevada County.

10. Petitioner states that Green Valley has experienced a population increase of 5.6% since 1960. It adds that Grass Valley and Nevada County have several large industries and retail and service establishments. Petitioner further states that the addition of a locally programmed FM broadcast station to this city would provide a medium through which critical community needs such as earthquake warnings, weather alerts, etc. could be met. In view of the above, we believe consideration of the proposal for the assignment of Channel 221A to Grass Valley, California, is warranted.

11. Since Two Harbors, Minnesota, is within 250 miles of the U.S. Canadian border, the assignment of the channel to this community requires coordination with the Canadian Government. Carpinteria, California, is within 199 miles of the Mexican-U.S. border and therefore requires coordination with the Mexican Government.

12. In light of the foregoing, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations as follows with regard to the communities listed:

## § 73.202 [Amended]

City	Channel No.	
	Present	Proposed
Carpinteria, Calif.	269A	269A
Grass Valley, Calif.	221A	221A
Two Harbors, Minn.	269A	269A
Sagertown, Pa.	232A	232A

13. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained in the attached Appendix and are incorporated herein.

14. Interested parties may file comments on or before July 2, 1976, and reply comments on or before July 22, 1976.

Adopted: May 13, 1976; released May 20, 1976.

FEDERAL COMMUNICATIONS  
COMMISSION,  
WALLACE E. JOHNSON,  
Chief, Broadcast Bureau.

## APPENDIX

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, Section 73.202 (b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in Sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on be-

half of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[FR Doc.76-15190 Filed 5-24-76; 8:45 am]

## [47 CFR Part 73]

[Docket No. 20809, RM-2651]

TELEVISION BROADCAST STATIONS  
TABLE OF ASSIGNMENTS  
Cheyenne, Oklahoma

1. The Commission has under consideration a petition for rule making filed by the Oklahoma Educational Television Authority (OETA). The petition seeks the amendment of Section 73.606(b) of the Commission's Rules, the Television Table of Assignments, by the assignment of Channel 12 to Cheyenne, Oklahoma. Reservation of the channel for noncommercial educational use is requested.

2. Petitioner is the Oklahoma governmental entity charged with providing educational television service to the residents of that state. As such, it presently is the licensee of noncommercial educational television stations KETA-TV (Channel \*13), Oklahoma City, and KOED-TV (Channel \*11), Tulsa. In addition, the Commission recently assigned Channel \*3 to Eufaula, Oklahoma, at the request of OETA (Report and Order in Docket 20583, released December 3, 1975).<sup>1</sup>

3. In conjunction with CATV systems within the state, we are told, approximately 85% of the Oklahoma population receives service from OETA's Tulsa and Oklahoma City stations. The Cheyenne assignment is sought to provide service to significant unserved areas of the western portion of the state, petitioner notes, including the western panhandle.

4. The Community of Cheyenne (pop. 892) is the seat of Roger Mills County (pop. 4,452) and is located approximately 110 miles west of Oklahoma City and 20 miles east of the Oklahoma-Texas border. It was selected as the site for the proposed assignment on the basis of meeting the Commission's mileage separation requirements and permitting

<sup>1</sup> An application for the use of the Eufaula assignment has been submitted by OETA.

rendition of service to the western area of the state. (Analogous criteria was employed by OETA in selecting Eufaula.)

5. A transmitter site approximately 2.3 miles south of Cheyenne has been selected by OETA in order to meet the Commission's spacing requirements to all pertinent co- and adjacent channel stations. A change in the carrier offset of one existing station will be required, however, if the proposed Cheyenne assignment is to maintain the triangular grid pattern associated with co-channel assignments. The affected station is KFDW-TV in Clovis, New Mexico. Assuming a positive offset for the proposed assignment, the offset of the Clovis station must be modified from positive to negative. No other offset changes are required.

6. As a result of our consideration of the OETA petition, we are requesting comments on the proposal to assign Channel \*12 to Cheyenne. Petitioner is specifically requested to comment upon its willingness to reimburse the licensee of KFDW-TV for all reasonable expenses that may be incurred in modifying its offset if the Commission decides to assign Channel \*12 to Cheyenne. In view of the foregoing, we therefore propose to consider the following revision in the Television Table of Assignments (Section 73.606(b) of the Rules), with respect to the cities listed below:

## § 73.606 [Amended]

City	Channel No.	
	Present	Proposed
Cheyenne, Okla.	12+	*12+
Clovis, N. Mex.	12+	12-

7. *It is ordered,* That pursuant to section 316 of the Communications Act of 1934, as amended:

(a) Bass Broadcasting Co., licensee of Station KFDW-TV, Clovis, New Mexico, shall show cause why its license should not be modified to specify operation on Channel 12— instead of Channel 12+ if the Commission in this proceeding finds it in the public interest to assign Channel \*12+ to Cheyenne, Oklahoma, and to substitute Channel 12— for Channel 12+ at Clovis, New Mexico; this Order being made with the understanding that the permittee of Channel \*12+ at Cheyenne, Oklahoma, will pay reasonable reimbursement of expenses incurred in the change of channel offset of Station KFDW-TV at Clovis, New Mexico.

(b) Pursuant to Section 1.87 of the Commission's Rules and Regulations, the licensee of Station KFDW-TV, Clovis, New Mexico, may, not later than July 22, 1976, request that a hearing be held on the proposed modification. Pursuant to Section 1.87(f), if the right to request a hearing is waived, Bass Broadcasting Co. may, not later than July 22, 1976, file a written statement showing with particularity why its license should not be modified as proposed in this Order

## PROPOSED RULES

to Show Cause. In this case, the Commission may call on Bass Broadcasting Co. to furnish additional information, designate the matter for hearing, or issue without further proceedings, an Order modifying the license as provided in the Order to Show Cause. If the right to request a hearing is waived and no written statement is filed by the date referred to above, Bass Broadcasting Co. will be deemed to consent to modification as proposed in the Order to Show Cause and a final Order will be issued by the Commission, if the channel changes mentioned above are found to be in the public interest.

8. *It is directed,* That the Secretary of the Commission shall send a copy of this Notice of Proposed Rule Making by certified mail, return receipt requested, to Bass Broadcasting Co., Clovis, New Mexico, the party to whom the Order to Show Cause is directed.

9. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

10. Interested parties may file comments on or before July 2, 1976, and reply comments on or before July 22, 1976.

Adopted: May 13, 1976; released May 19, 1976.

FEDERAL COMMUNICATIONS  
COMMISSION,  
WALLACE E. JOHNSON,  
Chief, Broadcast Bureau.

## APPENDIX

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules, it is proposed to amend the TV Table of Assignments, Section 73.606 (b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial

comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

## [47 CFR Part 73]

[Docket No. 20781, RM-2585]

TABLE OF ASSIGNMENTS, TELEVISION  
BROADCAST STATIONS  
Huntsville, Alabama

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations (Huntsville, Alabama).

1. On April 19, 1976, the Commission adopted a notice of proposed rule making in the above-entitled proceeding (41 F.R. 17785). The dates for filing comments and reply comments are presently June 3 and June 23, 1976, respectively.

2. On May 10, 1976, counsel for Tennessee Valley Radio and Television Corporation (Tennessee Valley), requested that the time for filing comments be extended to and including July 2, 1976. Counsel states Tennessee Valley is represented by a small law firm which faces pre-existing business and personal commitments between now and the present due date for comments. He adds that this two-man law firm is scheduled for hearings in June on other matters and in view of the intense scheduling the requested additional time is necessary in order to prepare adequate comments in this proceeding.

3. We are of the view that the public interest would be served by extending the time in this proceeding. Accordingly, it is ordered, That the dates for filing comments and reply comments are extended to and including July 2 and July 22, 1976, respectively.

4. This action is taken pursuant to authority found in Sections 4(i), 5(d)(1) and 303(r) of the Communications Act

# FEDERAL ENERGY ADMINISTRATION [10 CFR Part 430] ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Notice of Extension of Public Hearings, Extension of Written Comment Period, and Intent to Publish Further Notice of Proposed Rulemaking Regarding Energy Efficiency Improvement Targets

On May 10, 1976, the Federal Energy Administration (FEA) issued proposed energy efficiency improvement targets for ten types of appliances, pursuant to Part B of Title III (42 U.S.C. 6291-6309) of the Energy Policy and Conservation Act (Act) (Pub. L. 94-163). The proposed targets were set forth in a notice appearing in 41 FEDERAL REGISTER 19977 et seq., May 14, 1976. This notice provided an opportunity for written comment through June 7, 1976 and an opportunity to make oral presentations at public hearings from May 24 through June 1, 1976.

On May 21, 1976, in Civil Action No. 76-911, the United States District Court for the District of Columbia ordered:

- (1) That the conducting of public hearings scheduled to commence on May 24, 1976 commence on that date;
- (2) That these hearings continue through June 9, 1976; and
- (3) That the period for written comment continue through June 15, 1976.

Pursuant to this order and as set forth below, FEA is commencing the public hearings on May 24, 1976 as originally scheduled; is extending the date for submission by interested persons of written data, views, or arguments; and is scheduling additional dates for public hearings in addition to those announced in the notice appearing in the FEDERAL REGISTER of May 14, 1976.

The date for submission by interested persons of written data, views, or arguments is extended until 4:30 p.m., e.d.t., June 15, 1976. Procedures for such submissions set forth in the May 14 FEDERAL REGISTER notice pertain as applicable.

The public hearings on the additional days will be held, from June 2, 1976 to June 9, 1976, beginning each day at 9:30 a.m. in Room 3000A, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461. The schedule for such hearings is as follows:

June 2, 1976—Clothes dryers and clothes washers  
June 3, 1976—Dishwashers and water heaters  
June 4, 1976—Refrigerators and refrigerator-freezers and freezers  
June 7, 1976—Kitchen ranges and ovens

June 8, 1976—Room air conditioners and television sets  
June 9, 1976—Home heating equipment, not including furnaces

Procedures regarding public hearings set forth in the May 14 FEDERAL REGISTER notice pertain to these further public hearing dates as well, with the following exceptions. The written request for an opportunity to make an oral presentation must be received before 4:30 p.m., e.d.t., on May 28, 1976. The agency will also receive until this time oral requests for an opportunity to make an oral presentation if a written request is subsequently received at any time prior to the hearing in question. Such oral requests should be directed to Linda Hagge, (202) 254-5201. A person making a request for an opportunity to make an oral presentation should give a phone number where he or she can be reached through June 15, 1976. Each person selected to be heard will be notified by FEA before 4:30 p.m., e.d.t., June 1, 1976, and must submit 100 copies of his or her statement before 4:30 p.m., e.d.t., June 1, 1976. Any interested person may submit questions, to be asked of any person making a statement at the hearing, before 4:30 p.m., e.d.t., June 1, 1976. The opportunity, pursuant to section 336(a) (1) (B) of the Act, for any interested person to question employees of the United States who have made written presentations may be availed of by submission of written questions which must be received by June 18, 1976.

After completion of these hearings and subsequent to the close of the written comment period, FEA intends to publish in the FEDERAL REGISTER a further notice of proposed rulemaking regarding energy efficiency improvement targets for these ten types of appliances, with further opportunity for written and oral comment. (Energy Policy and Conservation Act, Pub. L. 94-163; Federal Energy Administration Act of 1974, Pub. L. 93-275; E.O. 11790, 39 FR 231851.)

Issued in Washington, D.C., May 24, 1976.

DAVID G. WILSON,  
Acting General Counsel,  
Federal Energy Administration.

# FEDERAL TRADE COMMISSION [16 CFR Part 437] FOOD ADVERTISING

Change of Dates for the Washington, D.C. Hearings on Proposed Trade Regulation Rule

On March 2, 1976, the Presiding Officer published in the FEDERAL REGISTER (41 F.R. 8980) Final Notice of proposed trade regulation rulemaking proceedings concerning Food Advertising. The Notice included a schedule of dates and places of public hearings to be held in that proceeding.

As published in such Final Notice the date set for commencement of the hearings in Washington, D.C. was June 7, 1976. This date has now been changed

to November 15, 1976. Thus, public hearings will be held commencing on November 15, 1976 at 9 a.m. in Washington, D.C., Room 332, Federal Trade Commission Building, Pennsylvania Avenue at 6th Street, NW., Washington, D.C.

Since it is now anticipated that the Washington D.C. hearings will be of longer duration than those of the other sites selected, persons desiring to present their views orally in Washington should so inform the Commission's representative listed below no later than September 21, 1976:

Ms. Lois Dimore [202-724-1489], Division of National Advertising, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580.

All other provisions of the Final Notice of March 2, 1976, including the dates and places of the other hearings, remain the same and the instructions and requirements set forth therein should be observed.

Issued: May 20, 1976.

WILLIAM D. DIXON,  
Presiding Officer.

[FR Doc.76-15172 Filed 5-24-76;8:45 am]

# POSTAL SERVICE [39 CFR Part 111] BULK THIRD CLASS

Reporting on or Segregating Local Mail; Extension of Comment Period

This notice extends the period for comments to the notice, published April 20, 1976 (41 FR 16579), proposing to require mailers of third-class bulk mail at certain post offices to use Postal Service Form 3602 to report separately the number of pieces in each mailing that are addressed for delivery by the post office where the permit imprint was issued. Alternatively, such mailers could segregate this local mail from the rest of the mailing in separate trays, so that the accepting postal employee could easily ascertain and record the weight of the local component of the mailing.

A request for an extension of time was submitted by Associated Third Class Mail Users (ATCMU), which requested that the comment period be extended to June 19, 1976. ATCMU stated that the proposed new rule on the reporting and segregating of local bulk third-class mail would have a substantial impact on its approximately 600 members, who are users of bulk third-class mail, and that additional time was needed to confer with these members and prepare comments. ATCMU stated that the requested extension would provide adequate time to do this.

The Postal Service has decided to grant the request for an additional comment period, and thus the comment period is hereby extended to June 19, 1976. The original closing date was May 20, 1976.

(39 U.S.C. 401)

ROGER P. CRAIG,  
Deputy General Counsel.

## notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-12453; File No. SR-CBOE-1976-9]

### CHICAGO BOARD OPTIONS EXCHANGE, INC.

#### Self-Regulatory Organizations; Rule Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

#### STATEMENT BY EXCHANGE OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE PRIVATELY COMMUNICATED PRICE INFORMATION

Rule 4.19. No member or person associated with a member, for an account in which such member or person has an interest, or for an account with respect to which such member or person exercises investment discretion, shall engage in the practice of entering orders or making bids or offers for options on the basis of price information as to a trade in the underlying security obtained by such member or person by or through any private communication system set up, designed or utilized for the purpose of obtaining such information in advance of the time such information is publicly disseminated via a tape or communications network, until such information has been so disseminated.

#### INTERPRETATIONS AND POLICIES

01 Rule 4.19 prohibits members and persons associated with members from knowingly engaging in the practice of trading in options on the basis of price information concerning transactions in underlying securities transmitted to them via telephone or other private communications arrangements from the floor of an exchange (or other market) on which the underlying securities are traded in advance of the time such information is publicly available. Public outcry on the floor of the Exchange shall not be deemed to make such information publicly available for purposes of this Rule, except in unusual circumstances with the advance approval of a Floor Official. Rule 4.19 is not addressed to market information obtained other than by private communication from the market in which the underlying security is traded. In respect of nonpublic market information not covered by this Rule, members should be aware of Rule 4.18 covering nonpublic information concerning block transactions.

#### STATEMENT BY EXCHANGE OF BASIS AND PURPOSE

The purpose of proposed Rule 4.19 and the related interpretation is to stop the activity commonly known as "tape racing" from taking place on the floor of CBOE.

This activity takes advantage of the fact that there is inevitably some delay between the time a transaction in an underlying security takes place on the floor of the New York Stock Exchange and the time it is reflected on the last sale price display on the floor of CBOE. This delay presents an opportunity for certain members to establish their own private communications links between the two exchanges (utilizing such techniques as combinations of hand signals and telephone lines) and thereby receive on the CBOE floor information concerning transactions on NYSE prior to the time this information is generally available.

Once a member of CBOE is in possession of nonpublic price information concerning NYSE transactions, it may be used by him in several ways. First, the member may be able to conclude that certain bids or offers currently being made on the CBOE floor by or on behalf of persons not privy to this information do not accurately reflect the true value of the option in light of the latest price, and that opportunities exist to buy or write these options at advantageous prices. The member would thus be in a position to accept those bids or offers which he believes to be attractively priced in advance of the time the person making the bid or offer was aware of the NYSE transaction. Such bids or offers could be those of market-makers, those of floor brokers representing the bids and offers of customers, or bids and offers in the Board Broker's book.

Nonpublic market information of this sort can also be used to facilitate the execution of spread orders, since a member on the floor holding a spread order who knows that the price of the underlying stock had just increased on NYSE would execute the long side of his spread prior to the time the NYSE transaction prints, and then would execute the short side after the transaction prints. Where the advance information from NYSE reflects a downtick in the underlying stock, the spread would be executed in reverse—first the short side and then the long.

Although CBOE recognizes the value of arbitrage transactions in keeping prices in line between markets, where such arbitrage is based upon nonpublic price information privately communicated to the CBOE floor, it has the following undesirable consequences. First, market-makers are reluctant to fulfill their obligations to make bids or offers knowing that they may be selectively accepted by other members on the basis of information not available to the market-makers. Second, floor brokers are unable to compete, particularly in the execu-

tion of customers' spread orders or orders contingent upon the price of the underlying stock. Third, Board Brokers find it difficult to administer their posts in the situation where bids and offers in the crowd tend to follow the lead of the member known to have advance NYSE prices, rather than to reflect the diverse opinions of competing market-makers trading on the basis of equal information. For these reasons, CBOE is proposing Rule 4.19 to put an end to this practice.

Although representations have been made to CBOE that the recent installation of a high speed communication line from the NYSE floor to various display devices, including those on the CBOE floor, has so reduced the interval between the time a transaction takes place on NYSE and the time it is reported on the CBOE floor as to make tape racing not practical, CBOE's own studies show that this is not the case. The high speed line has undoubtedly improved the timeliness of price reporting, but tests made with the cooperation of dual member firms show that, depending upon the physical location of the member's communication booth on the NYSE floor in relation to the post where a particular stock is traded, it is possible to communicate last sale price information to the CBOE floor an average of about two minutes before the information appears on the high speed line. Of course, the best evidence that the time delay is sufficient to permit tape racing to take place is the observation of CBOE floor members that tape racing does in fact continue to occur in at least one stock on a regular basis. CBOE remains hopeful that continued improvements in the speed of communicating last sale information from the NYSE floor will in time make successful tape racing impractical. Until then, however, CBOE believes that proposed Rule 4.19 is an appropriate measure to deal with the present situation.

It is important to note that proposed Rule 4.19 has as its purpose only the limited one of eliminating tape racing as described above. The Rule is not directed at other questions concerning the use of nonpublic market information, nor is it intended to interfere with bona fide arbitrage transactions, except in the limited circumstance where such arbitrage depends upon private communication of price information to the CBOE floor in advance of its public dissemination. CBOE recognizes that the general subject of nonpublic market information raises many complex and difficult questions, and by proposing Rule 4.19, CBOE does not intend to take any position concerning these other questions.

Proposed Rule 4.19 has as its basis under the Act the provisions of Section 6(b) (5) requiring that exchange rules be designed "to prevent fraudulent and manipulative acts and practices and to promote just and equitable principles of trade, . . . and, in general, to protect investors and the public interest."

Comments of members concerning proposed Rule 4.19 generally fall into two categories. On the one hand, certain members, mostly those performing one or more floor functions, have urged the adoption of a rule directed broadly at uses of nonpublic market information. On the other hand, certain members whose activities commonly include arbitrage transactions, with or without involvement in options, have expressed concern that any rule adopted by CBOE in this area would interfere with legitimate arbitrage activity to the detriment of securities markets generally. Although the latter category of commenting members do not necessarily engage in or support tape racing, they urge that on balance the problems presented by tape racing are not of sufficient magnitude to justify the risks to legitimate arbitrage which they believe will follow from adoption of an anti-tape racing rule. CBOE has attempted to reflect the interests of both groups of members in adopting a rule of narrow scope which will effectively end tape racing but will not restrict bona fide arbitrage.

No burden of competition is or will be imposed by proposed Rule 4.19.

On or before June 29, 1976 or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Washington, D.C., 20549. Copies of the filing with respect to the foregoing and all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted within 30 days of the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

MAY 18, 1976.

#### CORPORATE DISCLOSURE

##### Request for Comments on Issues

At the request of the Advisory Committee on Corporate Disclosure (the "Committee"), the Securities and Exchange Commission today published the Committee's "Solicitation of Public Comments on Issues to be Addressed."

The Commission wishes to note that this solicitation is being made by the Committee and that the Commission is merely providing its facilities to assist the Committee in soliciting public comment.

By the Commission.

GEORGE A. FITZSIMMONS,  
Secretary.

MAY 18, 1976.

On February 2, 1976, Chairman Rodrick M. Hills of the Securities and Exchange Commission announced the appointment of an Advisory Committee on Corporate Disclosure to examine the "corporate disclosure system that has developed in this country." As a result of formal public meetings held on February 24th and April 20th of this year, the Advisory Committee authorized a questionnaire case study of thirty public companies and the disseminators, financial analysts and investment decision-makers that utilize and process information regarding those companies. The case study, which has been announced, will be conducted through the use of detailed questionnaires (copies of which are available to interested persons or organizations) and followup interviews by members of the staff of the Advisory Committee.

The Advisory Committee believes it is most important that it be apprised of the viewpoints on corporate disclosure of all persons and entities associated with and affected by the corporate disclosure system, including members of the general public, individual investors, publicly owned companies, interested professionals, members of the investment community, members of the financial media and associations. At various stages in the course of its study, the Advisory Committee intends directly to solicit the views of all interested parties. This constitutes the first such invitation of written views on certain specific issues the Advisory Committee intends to address in the course of its study.

Accordingly, the Advisory Committee hereby invites all interested parties to submit their views, in writing, on any or all of the issues set forth below or, indeed, on any other corporate disclosure matter which the writer would care to address. To the extent feasible within its limited budget, the Advisory Committee will provide multiple copies of the release to organizations wishing to distribute it to their members. Because of time constraints affecting the Committee's work schedule, it is requested that the position statements be submitted not later than September 30, 1976.

If at all possible, the written response to any particular issue should begin on a new sheet of paper. All responses should be submitted to: Mary E. T. Beach, Staff Director, Advisory Committee on Corporate Disclosure, Securities and Exchange Commission, 500 North Capitol St., Washington, D.C. 20549.

ISSUES TO BE ADDRESSED IN POSITION STATEMENTS

1. What should the objectives of a corporate disclosure system be?

2. How should the standard of "materiality" be defined under the federal securities laws?

3. Should the SEC require corporate filings to set forth more forward-looking and analytical information regarding the company's business operations? (Please consider the legal liability and competitive problems associated with such a requirement, and whether such information should be reviewed by auditors.)

4. Should the SEC require corporate filings to set forth more information regarding general economy and industry factors that relate to the company's business operations? (Please consider the possibility of requiring this information in a statistical and/or analytical format.)

5. Should the SEC require corporate filings to contain more information regarding environmental and other socially-significant matters not traditionally considered of direct relevance to investment or shareholder voting decisions? (Please consider what criteria should be utilized by the SEC in determining which such information to require in corporate filings.)

6. Should the concept of "differential disclosure" be further incorporated into the federal securities laws, for example, by requiring SEC corporate filings to be bifurcated into "summary" and "detailed" portions with the "summary" portion being the document distributed to the public, such "summary" portion containing an undertaking by the company to furnish at its expense the "detailed" portion to investors who request it? (Please consider the legal liability problems that may be associated with such a requirement, and the kinds of information that should be included in the "summary" portion of the respective filings.)

7. Should the SEC put more emphasis on the continuous reporting obligations of companies under the 1934 Act so that when a security offering is made under the 1933 Act, the registration statement would incorporate by reference all documents on file with the SEC and contain only data regarding the particular offering and such other information as is necessary to make the documents incorporated by reference not misleading?

8. What information does the SEC presently require in corporate filings that is not useful to investment or shareholder voting decisions? (You may wish to examine typical corporate filings such as 10-K Annual Report to Shareholders, Proxy Statement, 1933 Act Registration Statement and 10-Q Quarterly Report, and mark those sections of the filings you do not consider useful to investment decisions and those sections you do not consider useful to shareholder voting decisions.)

9. A. What information not presently required in SEC corporate filings would be useful to investment decisions?

B. What revisions could be made to the disclosure requirements of the SEC proxy rules and regulations to assist shareholders in making voting decisions?

10. How could the proxy rules be revised to improve the process by which shareholders participate in the corporate electoral process?

("corporate democracy")? You may wish to consider matters such as how stockholders participate in routine and contested elections of directors and stockholder and management proxy proposals.

11. How could the corporate disclosure system be improved to make information regarding companies available to all interested persons on a more equitable basis? (Please consider both the kinds of information available and the timing of information availability.)

12. How could the federal securities laws be revised to improve the corporate disclosure system?

[FR Doc. 76-15200 Filed 5-24-76; 8:45 am]

[Release No. 19532; (70-5851)]

#### DELMARVA POWER & LIGHT CO.

Proposed Issue and Sale of Short-Term Notes to Banks and/or Commercial Paper to a Dealer in Commercial Bidding and Exception From Competitive Bidding

MAY 18, 1976.

Notice is hereby given that Delmarva Power & Light Company, 800 King Street, Wilmington, Delaware, 19899, ("Delmarva"), a registered holding company and a public-utility company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a) and 7 of the Act and Rules 50(a) (2) and 50(a) (5) (C) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

Delmarva proposes to issue from time to time until December 31, 1977, short-term securities in an aggregate principal amount not to exceed \$75,000,000 outstanding at any one time. The company requests that for a period ending on December 31, 1977, the exemption from the provisions of Section 6(a) of the Act afforded to it by the first sentence of Section 6(b) thereof, relating to the sale of short-term notes, be increased so as to permit the issuance and sale of said \$75,000,000 of short-term securities. On April 17, 1973, Delmarva, at its annual meeting of stockholders, obtained the consent of the holders of preferred stock and common stock, voting separately as classes, to amend its Certificate of Incorporation to liberalize the unsecured debt limitation to permit issuance, without further consent of preferred stockholders, of up to 20% of capitalization as long as no more than 10% of such indebtedness has maturities of less than ten years. At the same meeting, the company obtained the consent of preferred stockholders to waive the 10% limitation on indebtedness with maturities of less than ten years until June 30, 1977, and then only for unsecured debt maturing before January 1, 1978, provided the total unsecured debt does not exceed 20% of capitalization.

The proposed securities will be in the form of short-term notes issued to banks or commercial paper issued to a dealer in such securities. The notes to banks will be limited to an aggregate of \$75,-

000,000 outstanding at any one time. The commercial paper will be limited only to the extent that, when added to short-term notes to banks actually outstanding on the date of issuance, the total will not exceed the \$75,000,000 of proposed borrowings. The proceeds of the proposed bank notes and commercial paper will be used to finance part of Delmarva's 1975 and 1976 construction program of about \$258,123,000, including an allowance for funds used during construction of \$15,-782,000. Delmarva intends to repay such borrowings from the net proceeds of the sale of first mortgage bonds and/or equity securities prior to December 31, 1977.

The bank notes will be unsecured, will bear interest at the prime rate in effect at the lending bank on the date of issue and adjusted from time to time as required by the bank, and will be prepayable at any time without premium or penalty except that the company may not prepay any note in whole or in part from the proceeds of any subsequent bank loan at a lower rate of interest. The notes will mature not more than 270 days from the date of issue and in any event not later than June 30, 1978. The purpose of the bank lines of credit is to establish an alternative source of credit to back up the company's commercial paper. Delmarva expects to borrow from the following banks up to the maximum amount listed:

	In thousands
Wilmington Trust Co., Wilmington, Del.	\$5,560
Bank of Delaware, Wilmington, Del.	\$3,800
Farmers Bank of the State of Delaware, Wilmington, Del.	\$1,500
Delaware Trust Co., Wilmington, Del.	\$2,000
First National Bank of Baltimore, Salisbury and Baltimore, Md.	\$8,050
Irving Trust Co., New York, N.Y.	10,000
Manufacturers Hanover Trust Co., New York, N.Y.	15,000
Bankers Trust Co., New York, N.Y.	5,000
Chemical Bank, New York, N.Y.	5,000
The Fidelity Bank, Philadelphia, Pa.	2,000
First National Bank of South Jersey, Pleasantville, N.J.	2,000
Continental Illinois National Bank & Trust Co. of Chicago, Ill.	2,250
Maryland National Bank, Salisbury, Md.	5,000
American Security & Trust Co., Washington, D.C.	2,000
Provident National Bank, Philadelphia, Pa.	2,000
Mid Atlantic National Bank/South, Englewood, N.J.	2,000
Truckers & Savings Bank, Salisbury, Md.	600
The Equitable Trust Co., Baltimore, Md.	500
Peoples Bank & Trust Co., Wilmington, Del.	350
Baltimore Trust Co., Seabrook, Del.	300
Atlantic National Bank, Ocean City, Md.	90
	75,000

Delmarva will be required to maintain balances in the above banks to the extent of 10 percent of unused bank lines and 20 percent of such lines when in use. Substantially all of the balance requirements for those lines marked with an asterisk above will be provided through

operating balances which are part of the company's normal operating funds. If all of the necessary balances were maintained solely to satisfy compensating balance requirements, the effective interest cost on such bank lines of credit when fully utilized, assuming a 6% percent prime rate, would be 8.44 percent.

Delmarva also proposes to issue and sell, from time to time to mature not later than December 31, 1977, commercial paper in the form of short-term promissory notes to a dealer in commercial paper, A. G. Becker & Co., Incorporated ("dealer"), of up to \$75,000,000 face amount to be outstanding at any one time. The total amount of commercial paper and bank loans outstanding at any one time will not exceed \$75,000,000. The commercial paper notes will be of varying maturities, with no such notes maturing more than 270 days after the date of issue. Such notes, in denominations of not less than \$50,000 and not more than \$1,000,000, will be issued and sold by Delmarva directly to the dealer at a discount which will not be in excess of the discount rate per annum prevailing at the date of issuance for commercial paper of comparable quality and of like maturity sold by issuers thereof to commercial paper dealers. The application states that no commercial paper notes will be issued having a maturity of more than 90 days at an effective interest cost which exceeds that at which Delmarva could borrow from banks.

It is stated that no commission or fee will be payable in connection with the issue and sale of the commercial paper notes. The dealer, as principal, will reoffer such notes at a discount of 1/2 of 1 percent per annum less than the prevailing discount rate to Delmarva. The notes will be reoffered in a manner which will not constitute a public offering to no more than 200 identified and designated customers in a list (nonpublic) prepared in advance by the dealer.

Delmarva requests exception from the competitive bidding requirements of Rule 50 for the proposed issue and sale of its commercial paper pursuant to paragraphs (a) (2) and (a) (5) thereof. Delmarva also requests authority to file certificates under Rule 24 with respect to the proposed transactions within 30 days after the end of each calendar quarter.

The application states that fees and expenses related to the proposed transactions are estimated at \$11,000, including legal fees of \$2,000. It is further stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than June 11, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy

of such request should be served personally or by mail upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application as filed or as it may be amended, may be granted as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

[FR Doc. 76-15203 Filed 5-24-76; 8:45 am]

[File No. 500-1]

#### ENERGY RESERVE, INC.

##### Suspension of Trading

MAY 19, 1976.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the securities of Energy Reserve, Inc. being treated on a national securities exchange or otherwise is required in the public interest and for the protection of investors;

Therefore, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 1:40 p.m. (EDT) on May 19, 1976 through May 28, 1976.

By the Commission.

GEORGE A. FITZSIMMONS,  
Secretary.

[FR Doc. 76-15204 Filed 5-24-76; 8:45 am]

[Rel. No. 19635; (70-5864)]

#### INDIANA & MICHIGAN ELECTRIC CO.

##### Proposed Agreement With Municipal Authority for Construction of Pollution Control Equipment Financed by Sale of Revenue Bonds

MAY 19, 1976.

Notice is hereby given that Indiana & Michigan Electric Company, 2101 Spy Run Avenue, Fort Wayne, Indiana, 46801 ("I&M"), an electric utility subsidiary company of American Electric Power Company, Inc., a registered holding company, has filed a declaration with this Commission designating sections 9(a) and 12(d) of the Public Utility Holding Company Act of 1935 ("Act") and Rule 44(b)(3) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the declaration, which is

summarized below, for a complete statement of the proposed transactions.

I&M states that in order to comply with prescribed environmental quality control standards of the State of Indiana it has been and will be necessary to construct certain high efficiency electrostatic precipitators ("Project") for particulate emission control and related facilities at its Tanners Creek Plant. By resolution of October 15, 1973, the City of Lawrenceburg, Indiana ("City"), determined that it would authorize and issue one or more series of its pollution control revenue bonds ("Revenue Bonds") to finance the cost of engineering, design, acquisition, and construction of the Project and to reimburse or repay I&M in connection with I&M's expenditures relating to the Project.

I&M proposes to enter into an agreement of sale ("Agreement") with the City whereby the City will construct and equip the Project. To finance the Project, the City will issue Revenue Bonds in an initial principal amount of \$25,000,000 ("Series A Bonds") and additional Revenue Bonds in principal amounts presently estimated not to exceed \$71,000,000, sufficient to cover construction costs of the Project. The proceeds from the sale of the Series A Bonds will be deposited by the City with the Trustee ("Trustee") under an indenture to be entered into between the City and such Trustee (the "Indenture") pursuant to which the Series A Bonds are to be issued and secured. Such proceeds will be applied to payment of the cost of construction of the project. The Agreement also will provide for the sale of the Project to I&M, the payment by I&M of the purchase price of the Project in semi-annual installments over a term of years, and the assignment and pledge to the Indenture Trustee of the City's interest in, and of the monies receivable by the City under, the Agreement.

The Agreement will provide that each installment of the purchase price for the Project payable by I&M will be in such an amount (together with other monies held by the Trustee under the Indenture for the purpose) as will enable the City to pay, when due, (i) the interest on the Revenue Bonds, any additional bonds and any refunding bonds, (ii) the principal amount of the Revenue Bonds, any additional bonds and any refunding bonds payable at the time of their respective stated maturities and (iii) amounts, including any accrued interest, payable in connection with any mandatory redemption of the Revenue Bonds, any additional bonds or any refunding bonds. The Agreement also obligates I&M to pay the fees and charges of the Trustee, as well as certain administrative expenses of the City. The Agreement further provides that I&M may prepay the purchase price of the Project (i) by paying, under certain conditions, amounts sufficient to redeem all the Revenue Bonds then outstanding and all other amounts payable under the Indenture or (ii) at any time by depositing in the Indenture's Bond Fund or delivering

to the Trustee amounts sufficient to provide for the release of the Indenture. Upon prepayment, I&M may terminate the Agreement.

I&M proposes to convey equipment previously constructed (the "Existing Facilities"), subject to I&M's First Mortgage Lien to the City and I&M will receive out of the Revenue Bond proceeds, an amount equal to I&M's original cost of the Existing Facilities. The Existing Facilities will be included in the Project which I&M will repurchase from the City pursuant to the Agreement. The proceeds realized from the sale of the Existing Facilities will be used to retire unsecured short-term debt of I&M, including the financing of part of its construction program. As of May 6, 1976, there were notes payable to banks and commercial debt outstanding in the amount of \$80,600,000 and it is expected that I&M will have short-term debt outstanding not to exceed \$100,000,000 at the time of the transfer of the Existing Facilities. The estimated cost of I&M's construction program for 1976 is \$140,000,000, exclusive of construction costs in connection with the Donald C. Cook Nuclear Plant by I&M's wholly owned subsidiary, Indiana & Michigan Power Company. Said costs for the Cook plant are estimated at \$80,000,000 for 1976. I&M had expended \$22,900,000 for the Existing Facilities as of March 31, 1976, it is estimated that it will have expended \$35,000,000 at the time of the transfer of these facilities.

It is contemplated that the Revenue Bonds will be sold by the City pursuant to arrangements with a group of underwriters represented by E. F. Hutton & Company, Inc. In accordance with the laws of the State of Indiana, the interest rate to be borne by the Revenue Bonds will be fixed by the common council of the City. While I&M will not be a party to the underwriting arrangements for the Revenue Bonds, the Agreement will provide that the terms of the Revenue Bonds and their sale by the City shall be satisfactory to I&M.

I&M has been advised that the annual interest rates on obligations, interest on which is tax exempt, historically have been and can be expected at the time of issue of the Revenue Bonds to be 1½ percent to 2½ percent lower than the rates on obligations of like tenor and comparable quality, interest on which is fully subject to federal income tax.

The Series A Bonds will be dated on or about the first day of the month in which they are issued, will bear interest semi-annually and will mature at a date or dates not more than 30 years from the date of their issuance. It is expected that the Series A Bonds will not be redeemable at the option of the City within 10 years from their issue date except under certain circumstances. Series A Bonds will be subject to mandatory redemption under the circumstances and terms specified in the Indenture.

The declaration states that the fees and expenses incident to the proposed disposition of the Existing Facilities and

the acquisition of the Project (as distinguished from and excluding fees and expenses incident to the sale of the Revenue Bonds by the City payable out of the proceeds of such sale) will be supplied by amendment. It is stated that the execution of, delivery of and performance under the Agreement of I&M, the disposition of the Existing Facilities and the acquisition of the Project is possibly subject to the jurisdiction of the Michigan Public Service Commission and the Public Service Commission of Indiana, and that no other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Notice is further given that any interested person may, not later than June 11, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed, or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

[Release No. 19633; (70-5863)]

#### MIDDLE SOUTH UTILITIES, INC.

##### Proposed Issue and Sale of Short-Term Promissory Notes to Banks Under a Revolving Credit Agreement

MAY 18, 1976.

Notice is hereby given that Middle South Utilities, Inc. ("Middle South"), 225 Baronne Street, New Orleans, Louisiana 70112, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating sections 6(a) and 7 of the Act as applicable to the following proposed transactions. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transactions.

Middle South proposes, under a revolving credit agreement with a group of banks headed by Manufacturers Hanover Trust Company of New York ("MHTC"), to issue and sell its unsecured short-term promissory notes in an aggregate amount not to exceed \$218,500,000 outstanding at any one time.

The initial borrowing under the credit agreement will be used for the payment of \$97.5 million of short-term notes issued by Middle South to MHTC and various commercial banks under a prior credit agreement dated May 1, 1975, as amended, which borrowings were approved by this Commission (HCAR No. 19035). Such borrowings were utilized by Middle South to purchase, at various times, the common stocks of certain of its subsidiary companies. Subsequent borrowings under the new credit agreement will be used by Middle South to purchase additional common stock of its subsidiaries. The issuance, sale, and acquisition of such common stock will be the subject of separate filings with this Commission.

Under the terms of the revolving credit agreement, Middle South may borrow and reborrow until June 30, 1977, up to an aggregate of \$218,500,000 outstanding at any one time, to be evidenced by its unsecured promissory notes payable 90 days from the date of issuance thereof, but in no event later than June 30, 1977. The names of the banks joining in the credit agreement and their respective participation are as follows:

Name of bank:	Maximum amount to be borrowed and designation	
Manufacturers Hanover Trust Co., New York, N.Y.	\$61,300	B
The First National Bank of Chicago, Chicago, Ill.	35,000	A
Bank of America National Trust & Savings Assn., Los Angeles, Calif.	25,000	B
Continental Illinois National Bank & Trust Co. of Chicago, Ill.	20,000	B
The First National Bank of Boston, Mass.	15,000	B
The Northern Trust Co., Chicago, Ill.	11,100	A
Irving Trust Co., New York, N.Y.	11,100	B
Morgan Guaranty Trust Co. of New York, N.Y.	10,000	A
North Carolina National Bank, Charlotte, N.C.	10,000	B
First Pennsylvania Bank, N.A., Philadelphia, Pa.	5,000	A
The Fidelity Bank, Philadelphia, Pa.	5,000	A
Crocker National Bank, San Francisco, Calif.	5,000	A
Union Bank, Los Angeles, Calif.	5,000	A
Total	218,500	

Each borrowing and each payment by Middle South will be made *pro-rata* among the lending banks according to their original commitment, with appropriate adjustment for the interest rate differential. The notes issued to those banks designated as A banks in the credit agreement will bear interest from the date thereof on their unpaid principal amount at a rate per annum equal to

110 percent of the commercial loan rate of MHTC from time to time in effect on borrowings having a 90-day maturity by its most responsible and substantial domestic corporate borrowers ("MHTC Rate"); and the notes issued to those banks designated as B banks in the credit agreement will bear interest from the date thereof on their unpaid principal amount at a rate per annum equal to 122 percent of the MHTC rate.

Middle South will pay quarterly to each participating bank a commitment fee for the period from and including June 1, 1976 to June 30, 1977 (or any earlier date of termination of the commitments), computed at the rate of ½ of 1 percent per annum on the average daily unused portion of the commitments in effect during the period for which payment is made.

It is stated that, based on a 6½ percent prime rate, the effective interest cost of the A and B banks assuming balances of 10 percent on the borrowing from the A banks, would be 8.24 percent and 7.43 percent, respectively.

Middle South presently intends to repay the principal of the notes out of the proceeds of the sale of additional shares of its common stock. The notes will be prepayable at any time on two business days' notice in whole or in part without premium. Middle South will have the right at any time on three business days' notice to the participating banks to terminate or, from time to time, to reduce the commitments.

The declaration states that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions. No special or separate expenses are anticipated in connection with the proposed transactions.

Notice is further given that any interested person may, not later than June 11, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if

ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

[Rel. No. 19631; (70-5857)]

**JERSEY CENTRAL POWER & LIGHT CO.**  
**Proposed Issuance and Sale of First**  
**Mortgage Bonds at Competitive Bidding**  
**MAY 18, 1976.**

Notice is hereby given that Jersey Central Power & Light Company ("Jersey Central"), Madison Avenue at Punch Bowl Road, Morristown, New Jersey, 07960, an electric utility subsidiary company of General Public Utilities Corporation, a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating section 6(b) of the Act and Rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transaction.

Jersey Central proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 under the Act, up to \$35,000,000 aggregate principal amount of First Mortgage Bonds, to mature in not less than 5 years and not more than 30 years. The interest rate (which will be a multiple of 1/4 of 1 percent) and the price (which will be not less than 98 percent and not more than 101 percent of the principal amount of the Bonds, plus accrued interest from June 1, 1976, to the date of delivery) will be determined by competitive bidding. The bidding procedure will not establish a minimum or maximum interest rate within which bids may be submitted. The bonds will be issued under the Indenture, dated as of March 1, 1946, between Jersey Central and Citibank, Trustee, as heretofore supplemented and amended, and as to be further supplemented and amended by a Thirtieth Supplemental Indenture to be dated as of June 1, 1976. None of the bonds may be redeemed at the option of Jersey Central prior to June 1, 1981, if the funds for such redemption are obtained at an interest cost lower than the yield of the Bonds, except under certain circumstances. Jersey Central shall notify prospective bidders no later than 72 hours prior to the time designated for the submission of bids of the maturity date of the bonds.

The entire proceeds (exclusive of any premium or discount and accrued interest) from the sale of the bonds will be applied to the payment at or before maturity of a portion of Jersey Central's \$55,000,000 of short-term bank loans expected to be outstanding at the date

**NOTICES**

of sale of the bonds or for construction purposes. The estimated cost of Jersey Central's 1976 construction program is approximately \$145,000,000 (including allowance for funds used during construction). At April 30, 1976, Jersey Central had short-term bank loans outstanding of \$38,100,000.

The fees and expenses to be incurred by Jersey Central in connection with the proposed transaction and the fees and expenses of counsel for the underwriters, to be paid by the successful bidders, will be supplied by amendment. It is stated that the Board of Public Utility Commissioners of New Jersey has jurisdiction over the proposed transaction and that no other state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than June 11, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

[FR Doc. 76-15208 Filed 5-24-76; 8:45 am]

[Rel. No. 19534; (70-5543)]

**NEW ENGLAND ENERGY INC. AND NEW**  
**ENGLAND ELECTRIC SYSTEM**

**Proposed Extension of Time for Holding**  
**Company To Make Investments in Sub-**  
**sidary Fuel Company and Proposed In-**  
**crease in Investments by Fuel Company**  
**Through 1979**

MAY 19, 1976.

Notice is hereby given that New England Electric System ("NEES"), a registered holding company, and New England Energy Incorporated ("NEEI"), 20

Turnpike Road, Westborough, Massachusetts, 01581, a fuel subsidiary of NEES, have filed post-effective amendments to their application-declaration, as amended, previously filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6(a), 7, 9 (a), 10 and 12 of the Act and Rules 43 and 45(a) promulgated thereunder as applicable to the following proposed transactions.

By order dated October 30, 1974 (HCAR No. 18635, 5 SEC Docket 372) issued in this proceeding, NEES was authorized to acquire the common stock of NEEI and to make subordinated loans to NEEI in a total aggregate amount not to exceed \$20,000,000. NEEI was also authorized to enter into a partnership arrangement with Samedan Oil Corporation ("Samedan") to explore for and develop oil and gas deposits. NEES and NEEI were granted an exception from the tax allocation requirements of Rule 45(b) (6) and jurisdiction was reserved over any transactions between NEEI and its associates which are subject to sections 12(f) or 13 of the Act and Rules 80-95 thereunder.

NEES has executed a Capital Funds Agreement with NEEI under which NEES has agreed to invest up to \$20,250,000 in NEEI during the period ending July 31, 1976. It is now proposed to amend this agreement to provide that NEES may invest a total of up to \$45,000,000 in NEEI to be outstanding at any one time during the period through December 31, 1979. It is anticipated that the loans to NEEI will be repaid by NEEI from its operations or from the proceeds of permanent financing or borrowing arrangements.

The agreement, as amended, will provide that the additional investment in NEEI may be in the form of common stock, capital contributions or subordinated notes. In the case of subordinated notes, as with existing loans to NEEI, each such additional loan will bear interest at an annual rate equal to (i) the overall effective interest cost being paid from time to time by NEES on its then outstanding borrowings from banks or (ii) if NEES has no outstanding bank borrowings, then 125 percent of the prime commercial rate charged from time to time during the period by The First National Bank of Boston. Based on the current prime rate of 6.75 percent, the effective interest cost equals 8.44%. Such loans will mature in not more than 20 years and are prepayable in any amount at any time without penalty.

Proceeds of the investments in NEEI are proposed to be used in the following manner: (i) to continue the Samedan project, (ii) to engage in possible additional transactions of a nature similar to Samedan with parties other than Samedan, involving the purchase of interests and/or participations in similar ventures relating to oil and gas exploration, development and production; and (iii) to enable NEEI to assume various fuel procurement and inventory activi-

ties now carried on by other NEES subsidiaries.

NEEI also requests a continuation of the exception from the consolidated tax allocation provisions of Rule 45(b) (6).

It is stated that no state commission and no federal commission, other than this Commission, has jurisdiction over the proposed transactions. Fees and expenses to be incurred in connection with the proposed transactions through December 31, 1979, are to be performed at cost by New England Power Service Company and are estimated to amount to \$11,500.

Notice is further given that any interested person may, not later than June 16, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration, as further amended by said post-effective amendments, which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration as further amended by said post-effective amendments, or as it may be further amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,  
Secretary.

Occupational Safety and Health  
Administration

## MARYLAND STATE STANDARDS

## Notice of Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under Section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrations for Occupational Safety and Health (hereinafter called the Regional Administrations) under a delegation of authority from the Assistant Secretary of Labor of Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On July 5, 1973, notice was published in the FEDERAL REGISTER (38 FR 17844) of the approval of the Maryland plan and the adoption of Subpart 0 to 29 CFR Part 1952 containing the decision.

The Maryland plan provides for the adoption of Federal standards as State standards after comments and public hearing. Section 1952.210 of Subpart 0 sets forth the State's schedule for the adoption of Federal standards. By letter dated October 24, 1975 from Harvey A. Epstein, Commissioner, Maryland Division of Labor and Industry to David H. Rhone, Assistant Regional Director, and incorporated as part of the plan, the State submitted State standards comparable to the revisions, amendments, and corrections to 29 CFR Parts 1910 and 1926, as published in the FEDERAL REGISTER (40 FR 13809, 40 FR 14992, 40 FR 16221) dated May 28, 1975, June 9, 1975, June 27, 1975, and July 28, 1975. These standards were promulgated after public comment requested on August 6, 1975, hearings held on September 11, 1975, and a resolution adopted by the Commissioner on September 22, 1975, pursuant to the Maryland Occupational Safety and Health Law of 1973.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards it has been determined that the State standards are identical to the Federal standards.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copies during normal business hours at the following locations: Office of the Regional Administrator, Suite 15220, Gateway Bldg., 3535 Market St., Philadelphia, Pennsylvania 19104; Office of the Commissioner, Maryland Division of Labor and Industry, 203 East Baltimore St., Baltimore, Maryland 21202 and Office of the Associate Assistant Secretary for Regional Programs, Room N-3603, 200 Constitution Ave., NW., Washington, D.C. 20210.

4. *Public Participation.* Under § 1953.2 (c) of this chapter, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Maryland State plan as a proposed change and making the Assistant Regional Director's approval effective upon publication for the following reasons:

7. The standards are identical to the Federal standards and are therefore deemed to be at least as effective.

2. The standards were adopted in accordance with the procedural requirements of State law and further public participation and notice would not be necessary.

This decision is effective \_\_\_\_\_ (Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Philadelphia, Pennsylvania, this 8th day of March 1976.

DAVID H. RHONE,  
Regional Administrator.

NATIONAL ADVISORY COMMITTEE ON  
OCCUPATIONAL SAFETY AND HEALTH

## Meeting

Notice is hereby given of a meeting of the National Advisory Committee on Occupational Safety and Health (NACOSH), established under section 7(a) of the Occupational Safety and Health Act of 1970. The purpose of this Committee is to advise the Secretary of Labor and the Secretary of Health, Education, and Welfare on matters relating to the administration of the Act.

The meeting will be held June 24 and 25, 1976, starting at 9:00 a.m. in Conference Room B, Departmental Auditorium, Constitution Avenue between 12th and 14th Streets, Washington, D.C. The public is invited to attend.

Agenda items will include a Bureau of Labor Statistics presentation that will explain the types of occupational statistics available and possible uses by NACOSH. In addition, the Committee will be informed about activities of its Subgroups on Budget, Compliance, Standards, and Policy and Issues. Depending on the outcome of Subgroup meetings that will be held prior to June 24th, Subgroups will present recommendations to NACOSH on the following matters: The definition of repeated violations; funding for statistics in OSHA's FY 1978 budget; the concept of the action level which is included in several proposed health standards, and the impact of OSHA on small business.

For additional information on these items, please contact:

Nancy L. Huckle, National Advisory Committee on Occupational Safety and Health, Department of Labor—OSHA, Committee Management Office, Room N-3835, Third Street and Constitution Avenue, NW., Washington, D.C. 20210, Phone: (202) 523-8024.

Any written data or views concerning any agenda item which are received by the Committee Management Office before the meeting, preferably with 20 copies, will be presented to the Committee and included in the official record of the meeting.

Anyone wishing to request an oral presentation should notify the Committee Management Office before the meeting. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the content of the presentation. Oral presentations will be scheduled at the discretion of the Committee Chairman, depending on the extent to which time permits.

Official records of the meeting will be available for public inspection at the above address.

Signed at Washington, D.C. this 18th day of May 1976.

J. GOODSELL,  
Executive Secretary.

## BETHLEHEM STEEL CORP.

## Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On April 30, 1976 the Department of Labor received a petition dated April 15, 1976 which was filed under section 221 (a) of the Trade Act of 1974 ("the Act") by the United Steelworkers of America on behalf of the workers and former workers of Lanman Bolt plant, East Chicago, Indiana, a subsidiary of Bethlehem Steel Corp., Bethlehem, Pa. (TA-W-865). Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with bolts produced by Bethlehem Steel Corporation or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than \_\_\_\_\_.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave., N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 30th day of April 1976.

MARVIN M. FOOKS,  
Director, Office of  
Trade Adjustment Assistance.

[TA-W-761]

## CONTINENTAL COPPER

## Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-761: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 29, 1976 in response to a worker petition received on March 29, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing tool steel at the Continental Copper, Braeburn Alloy Steel Division, Lower Burrell, Pennsylvania.

The notice of investigation was published in the FEDERAL REGISTER on April 23, 1976 (41 FR 17029). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Braeburn Alloy Steel, its customers, the U.S. De-

partment of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

*Significant total or partial separations.* Employment of production workers at the Braeburn Alloy steel plant declined 28 percent in 1975 compared to 1974. Employment declined in each quarter of 1975 compared to the like quarter in 1974.

*Sales or production, or both, have decreased absolutely.* Annual sales of tool steel at the Braeburn Alloy Steel plant increased 18 percent in quantity from 1973 to 1974. Sales declined 40 percent in quantity in 1975 compared to 1974. Annual production of tool steel increased 13 percent from 1973 to 1974. Production declined 42 percent in 1975 compared to 1974.

*Increased imports.* Imports of tool steel declined 27.8 percent in 1971 compared to 1970. Imports increased 18.1 percent in 1972 compared to 1971 and increased 44.7 percent in 1973 compared to 1972. Imports declined 36.9 percent in 1974 compared to 1973. Imports increased 39.4 percent in 1975 compared to 1974. The ratios of imports to domestic shipment and consumption increased from 12.1 percent and 11.6 percent, respectively in 1974 to 27.7 percent and 23.4 percent, respectively in 1975.

*Contributed importantly.* The Department's investigation revealed that customers of Braeburn Alloy Steel have indicated that they have reduced purchases from Braeburn and increased purchases of competitive imported products. The price differential between domestic and imported steel was the factor cited most frequently when purchases were switched from domestic to foreign suppliers.

*Conclusion.* After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with tool steel produced by the Braeburn Alloy Steel plant contributed importantly to the total or

partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of tool steel at the Continental Copper, Braeburn Alloy Steel Division located in Lower Burrell, Pennsylvania who became totally or partially separated from employment on or after March 20, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 9th day of May 1976.

JAMES F. TAYLOR,  
Director, Planning and  
Evaluation Staff.

[TA-W-610]

#### LADY MARLENE BRASSIERE CORP.

#### Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-610: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 20, 1976 in response to a worker petition received on February 20, 1976 which was filed by the Corset and Brassiere Workers' Union, Local 32, ILGWU, on behalf of former workers manufacturing brassieres and girdles at the Lady Marlene Brassiere Corporation, New York, New York.

The notice of investigation was published in the FEDERAL REGISTER on March 12, 1976 (41 FR 10642). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the parent firm, Lady Marlene Brassiere Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, the Corset and Brassiere Workers Union, Local 32, ILGWU, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in each workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales, production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation revealed that all criteria have been met.

**Significant total or partial separations.** The average number of production workers at the Lady Marlene Brassiere Corporation declined 33 percent in the first quarter of 1975 compared to the same period of 1974. All production workers were separated from employment by May 21, 1975 when the plant closed.

**Sales or production or both, have decreased absolutely.** Sales of brassieres and girdles at Lady Marlene decreased 32 percent in 1974 compared to 1973 and decreased 49 percent in the first two quarters of 1975 compared to the same period in 1974. Production ceased on May 21, 1975 when the plant closed.

**Increased imports.** Imports of brassieres increased in each year from 1970 through 1975. Imports increased from 6,187,000 dozens in 1974 to 6,921,000 dozens in 1975 or increased 11 percent. The ratios of imports to domestic production and consumption increased from 31.7 percent and 30.1 percent, respectively, in 1973 to 35.4 percent and 37.0 percent, respectively in 1974.

Imports of girdles decreased in 1971 compared to 1970, increased in 1972, decreased again in 1973 and then increased 71 percent in 1974 and 17 percent in 1975. Imports increased from 113,000 dozens in 1974 to 133,000 dozens in 1975. The ratios of imports to domestic production and consumption both increased from 1.4 percent in 1973 to 2.6 percent in 1974.

**Contributed importantly.** The Department's investigation indicated that customers of the Lady Marlene Brassiere Corporation shifted their purchases from domestic to less expensive, imported brassieres and girdles.

**Conclusion.** After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with brassieres and girdles produced by Lady Marlene Brassiere Corporation, New York, New York contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provision of the act, I make the following certification:

All workers engaged in employment at Lady Marlene Brassiere Corporation, New York, New York who became totally or partially separated from employment on or after February 12, 1975 and before June 30, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 30th day of April 1976.

JAMES F. TAYLOR,  
Director,  
Planning and Evaluation Staff.

[TA-W-608]

#### SPLENDORFORM BRASSIERE, INC.

#### Certification of Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-608: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 20, 1976 in response to a worker petition received on February 20, 1976 which was filed on behalf of workers formerly producing brassieres at the New York sewing plant of Splendorform Brassiere, Inc., a subsidiary of Splentex, Incorporated, New York, New York.

The notice of investigation was published in the FEDERAL REGISTER on March 12, 1976 (41 FR 10651). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Splendorform Brassiere, Inc., its customers, the U.S. Department of Commerce, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four criteria have been met.

**Significant total or partial separations.** The average number of sewing operators declined 29 percent in 1975 compared to 1974. In the second, third and fourth quarters of 1975, the average number of sewing operators declined 41 percent, 30 percent and 29 percent, respectively compared to the same quarters in 1974. All sewing operators were laid off in December 1975.

**Sales or production, or both, have decreased absolutely.** Production declined, 51 percent in 1975 compared to 1974. Production ceased in December 1975.

**Increased imports.** U.S. imports of brassieres increased in every year from 1970

through 1975. In 1975, imports were 6.9 million dozens compared to 6.2 million dozens in 1974 and 4.1 million dozens in 1970.

**Contributed importantly.** Customers of Splendorform reported that the proportion of imported brassieres among their total brassiere purchases increased during the period 1973-1975. Splendorform's parent corporation, Splentex, Incorporated reported that its imports of brassieres increased more than 200 percent in 1975 compared to 1974.

**Conclusion.** After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with brassieres produced at the plant of Splendorform Brassiere, Inc., located at 632 Broadway, New York, New York contributed importantly to the total or partial separation of the sewing operators of that plant. In accordance with the provisions of the Act, I make the following certification:

All sewing operators engaged in employment related to the production of brassieres at the plant of Splendorform Brassiere, Inc., located at 632 Broadway, New York, New York who became totally or partially separated from employment on or after February 12, 1975 and before December 31, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 3rd day of May 1976.

JAMES F. TAYLOR,  
Director,  
Planning and Evaluation Staff.

[TA-W-849]

#### TEXTRON, INC.

#### Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On April 30, 1976, the Department of Labor received a petition dated April 15, 1976, which was filed under Section 221(a) of the Trade Act of 1974 ("the Act") by the United Steelworkers of America on behalf of the workers and former workers of Fabco, West Newton, Pa., a subsidiary of Textron, Inc., Providence, Rhode Island (TA-W-849).

Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with washers, special and standard fasteners produced by Textron, Incorporated, or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under

investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than \_\_\_\_\_.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave., N.W., Washington, D.C. 20210.

Signed at Washington, D.C. this 30th day of April 1976.

[TA-W-850]

#### VEEDER INDUSTRIES, INC.

#### Investigation Regarding Certification of Eligibility To Apply for Worker Adjustment Assistance

On April 30, 1976 the Department of Labor received a petition dated April 15, 1976 which was filed under Section 221(a) of the Trade Act of 1974 ("the Act") by the United Steelworkers of America on behalf of the workers and former workers of MAC-IT Company Division East Lancaster, Pennsylvania, a division of Veeder Industries, Inc. (TA-W-850). Accordingly, the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted an investigation as provided in Section 221(a) of the Act and 29 CFR 90.12.

The purpose of the investigation is to determine whether absolute or relative increases of imports of articles like or directly competitive with special steel fasteners produced by Veeder Industries, Inc., or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision. The investigation will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved. A group meeting the eligibility requirements of Section 222 of the Act will be certified as eligible to apply for adjustment assistance under

Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90.

Pursuant to 29 CFR 90.13, the petitioner or any other person showing a substantial interest in the subject matter of the investigation may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than \_\_\_\_\_.

The petition filed in this case is available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 3rd St. and Constitution Ave., N.W., Washington, D.C. 20210.

Signed at Washington, D.C., this 30th day of April 1976.

#### Wage and Hour Division

[Administrative Order No. 645]

#### INDUSTRY COMMITTEE FOR VARIOUS INDUSTRIES IN PUERTO RICO

#### Appointment; Convention; Notice of Hearings

On April 9, 1976, Administrative Order No. 644 was published in FEDERAL REGISTER (41 FR 15085) appointing Industry Committees to review wage rates for various industries in Puerto Rico under the Fair Labor Standards Act of 1938 as amended. Beginning January 1, 1977, the \$200,000 exemption in section 13(a) of the Act is eliminated for employees employed by a retail or service establishment in an enterprise whose annual gross volume of sales made is not less than \$250,000 as provided in section 3 of the Act. Because of the expiration of this exemption there may be some employers and employees in the motion picture theater classification who are unaware of their new coverage. To call this to the attention of this group of interested people, subpart II of subparagraph c of paragraph (2) of Administrative Order No. 644 is clarified and amended as follows:

2(c)ii. The motion picture theaters classification comprises every theater where motion pictures are exhibited, including all activities in establishments of an enterprise which have an annual dollar volume of \$250,000. The current \$200,000 exemption for establishments in an enterprise is no longer effective after December 31, 1976. The date for submitting data to be considered in this amended classification is extended to June 11, 1976.

Signed at Washington, D.C. this 21st day of May, 1976.

W. J. USERY, Jr.,  
Secretary of Labor.

## DEPARTMENT OF STATE

(Public Notice 490)

BROWNSVILLE, TEXAS  
Request for Bridge Permit

On May 12, 1976, Cameron County, Texas filed with the Secretary of State an Application for a Presidential Permit to build an international bridge across the Rio Grande River at Brownsville, Texas. Copies of the application will be circulated to interested governmental agencies, and are available to the public at the Office of the Assistant Legal Adviser for Economic and Business Affairs, Room 6420, Department of State, Washington, D.C. 20520.

An assessment of environmental impact will be prepared by the Department of State, circulated to interested governmental agencies, and similarly made available to the public.

Comments on the Application should be submitted to the Assistant Legal Adviser for Economic and Business Affairs, Room 6420, Department of State, Washington, D.C. 20520.

PHILLIP R. TRIMBLE,  
Assistant Legal Adviser for  
Economic and Business Affairs.

## Fiscal Service

[Dept. Circ. 570, 1975 Rev., Supp. No. 20]

SURETY COMPANIES ACCEPTABLE ON  
FEDERAL BONDS

## American Reserve Insurance Company

Resolute Insurance Company, a Rhode Island corporation, has formally changed its name to American Reserve Insurance Company, effective November 18, 1975. Documents evidencing the change of name are on file in the Treasury.

A new Certificate of Authority as an acceptable surety on Federal bonds dated November 18, 1975, has been issued by the Secretary of the Treasury to American Reserve Insurance Company, under Sections 6 to 13 of Title 6 of the United States Code, to replace the certificate issued July 1, 1975 (40 FR 29256, July 10, 1975) to the company under its former name, Resolute Insurance Company. The underwriting limitation of \$342,000 previously established for the company remains unchanged.

The change in name of Resolute Insurance Company does not affect its status or liability with respect to any obligation in favor of the United States or in which the United States has an interest, which it may have undertaken pursuant to the Certificate of Authority issued by the Secretary of the Treasury.

Certificates of Authority expire on June 30 each year, unless sooner revoked, and new certificates are issued on July 1, so long as the companies remain qualified (31 CFR Part 223). A list of qualified companies is published annually as of July 1, in Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Copies of the circular, when issued, may be obtained from the Audit Staff, Bureau of Government Financial Operations, Department of the Treasury, Washington, D.C. 20226.

Dated: May 17, 1976.

DAVID MOSSO,  
Fiscal Assistant Secretary.

[FR Doc. 76-15169 Filed 5-24-76; 8:45 am]

## Internal Revenue Service

Labor-Management Services Administration  
[Application No. D-158]

## EMPLOYEE BENEFIT PLANS

Exemption Relating to Transactions Involving the Citizens and Southern National Bank Retirement Trust, et al.

Notice is hereby given of the pendency before the Department of Labor (the Department) and the Internal Revenue Service (the Service) of a proposed exemption from the restrictions of section 408(a) of the Employee Retirement Income Security Act of 1974 (the Act) and from the taxes imposed by section 4975 (a) and (b) of the Internal Revenue Code of 1954 (the Code), by reason of section 4975(c)(1) (A) through (D) of the Code. The pending exemption was requested in an application filed by the trustees of the Citizens and Southern National Bank Pension Trust (Pension Trust) and the trustees of the Citizens and Southern National Bank Profit Sharing Trust (Profit Sharing Trust) to exempt the sale of certain plan assets to parties in interest or disqualified persons.

The application was filed pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75-26, 1975-1 C.B. 722.

**Summary of Representations.** The application contains representations with regard to the pending exemption, which are summarized below. Interested persons are referred to the application on file with the Department and the Service for the complete representations of the trustees of the Pension Trust and the Profit Sharing Trust.

The Citizens and Southern National Bank (Bank) is a national banking association. The Citizens and Southern Holding Company (Holding Company) is a wholly owned subsidiary of the Bank and is subject to both federal and state banking laws. Until October 31, 1974, the Holding Company owned 5 percent of the outstanding common stock of certain correspondent associate banks in the State of Georgia (Correspondent Associates).

The Bank, the Holding Company and virtually all of the Correspondent Associates have each adopted both a qualified profit-sharing plan and a qualified pension plan (the Plans).

The trust assets held in conjunction with the Plans have been commingled for administrative and investment purposes. The assets of the profit-sharing plans are held by the Profit Sharing Trust and the assets of the pension plans are held by the Pension Trust.

In 1971, the Independent Bankers Association of Georgia (IBA) brought a suit against the Georgia Commissioner of Banking & Finance (Banking Commissioner), the Bank, the Holding Company and 10 of the Correspondent Associates contending, inter alia, that the ownership of the 5 percent interest by the Holding Company in the 10 Correspondent Associates violated the Georgia Bank Holding Company Act (Georgia Code Annotated section 13-207) and that the failure of the Banking Commissioner to take action against this violation subjected him to an action for mandamus. The Georgia Supreme Court, in an opinion dated March 5, 1973, generally upheld the contentions of the IBA. After a second appeal to the Georgia Supreme Court, a Superior Court of Georgia ordered the Banking Commissioner to bring the Holding Company into compliance with the Georgia Supreme Court's decision no later than May 24, 1975. Pursuant to the Superior Court's directive, the Banking Commissioner on May 24, 1974, ordered the Holding Company to divest itself of its 5 percent stock interests in the 10 Correspondent Associates by November 1, 1974, and in an additional 15 Correspondent Associates by February 1, 1975.

Prior to the end of 1974, and in an effort to comply with the Banking Commissioner's divestiture order, the Holding Company sold to the trustees of the Profit Sharing Trust and the Pension Trust the stock it owned in the Correspondent Associates (Divestiture Stock) and the trustees of both Trusts continue to own the Divestiture Stock.

On March 7, 1975, the Attorney General of the State of Georgia gave his opinion that the sale of the Divestiture Stock by the Holding Company to the Trustees was not an adequate divestiture because the trustees were not sufficiently independent of the Bank and the Holding Company to satisfy the Supreme Court's decision. On the basis of the Attorney General's opinion, the Banking Commissioner ordered a rescission of such sale of the Divestiture Stock. On May 22, 1975, however, the Banking Commissioner permitted the Trustees to transfer the Divestiture Stock to an escrow agent approved by the Banking Commissioner, in order to satisfy the Supreme Court's decision while not entering into a prohibited transaction under the Act and the Code by reselling the Divestiture Stock to the Holding Company. The escrow agent is George E. Manners, Sr., former Dean of the Graduate School at Georgia State University.

Pursuant to the terms of the escrow agreement dated May 22, 1975, the escrow agent has accepted delivery of the Divestiture Stock. Furthermore, the escrow agent is expressly authorized to exercise the voting rights accorded to the Divestiture Stock at any meetings of stockholders of the issuers and he will exercise his own judgment in voting the Divestiture Stock.

The escrow agent is permitted to sell the Divestiture Stock at a price which he deems to be not less than fair market value and on terms which he deems reasonable except as otherwise limited by law or prohibited by the May 24, 1974, order of the Banking Commissioner. The escrow agent is not permitted to sell the Divestiture Stock to the Holding Company, the trustees of the Profit Sharing Trust or the Pension Trust or any person who is a party in interest as defined by the Act or a disqualified person as defined by the Code unless an exemption from the prohibited transaction provisions of the Act or the Code has been obtained. Further, the escrow agent may not sell any of the Divestiture Stock to any purchaser who fails or refuses to execute, under oath, a written statement that said purchaser is not a policy making officer or director or the spouse of such officer or director of the Holding Company or the Bank; that the sale of the Divestiture Stock does not otherwise violate the Banking Commissioner's Order of May 24, 1974; and that the purchaser does not purchase such stock for the purpose of sale or other transfer to or holding for the benefit of, and will not sell to or hold for the benefit of any such policy making officer or director, spouse thereof, or any other person who is prohibited from purchasing or acquiring beneficial interest in the Divestiture Stock.

The escrow agreement also requires the escrow agent to report all sales of the Divestiture Stock to the Banking Commissioner within 15 days of the date of such sales. Such report will identify the issuer, the number of shares sold, the purchaser, the price and such other information as the Banking Commissioner may request.

The trustees and the escrow agent attempted, but were unable to locate purchasers for shares of the Correspondent Associates stock who are not disqualified persons or parties in interest.

Accordingly, the trustees have requested an exemption to permit the sale of the stock of the Correspondent Associates to parties in interest or disqualified persons. The exemption was requested to permit the Bank, the Holding Company and the trusts to comply with the orders of the state banking authorities and to eliminate a costly and inefficient arrangement whereby certain assets of the Profit Sharing Trust and Pension Trust are held by an escrow agent, who also votes such shares of stock at his own discretion without instruction from the trustees of the Profit Sharing Trust and Pension Trust, despite the fact that such trustees are the

individuals responsible for protecting the interests of participants and beneficiaries.

In the event that it is determined that the price of the shares sold by the escrow agent to disqualified persons or parties in interest is less than the fair market value of such shares at the time of sale, the Holding Company will pay to the trusts the amount of such deficiency plus interest on such amount from the date of sale to the date of correction at the rate determined under section 6621 of the Code.

Notice of the pending exemption as published in the FEDERAL REGISTER will be published in the "Pay Day Newsletter" which is distributed semi-monthly to all employees of the Bank, the Holding Company and the Correspondent Associates. Additionally, copies of this notice will be posted for at least 30 days on the personnel bulletin board at all personnel locations of the Bank, the Holding Company, and the Correspondent Associates. This notice will also be mailed to all retired participants or beneficiaries who are receiving periodic distributions from either the Profit Sharing or the Pension Trusts.

**General Information.** The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary with respect to a plan to which the exemption is applicable from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interest of the plan's participants and beneficiaries and in a prudent fashion in accordance with subsection (a)(1)(B) of section 404 of the Act, nor does it affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The pending exemption, if granted, will not extend to transactions prohibited under section 406(b) of the Act and section 4975(c)(1)(E) and (F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department and the Service must find that the exemption is administratively feasible, in the interests of the plans and of their participants and beneficiaries, and protection of the rights of such participants and beneficiaries; and

(4) The pending exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory exemptions and transitional rules. Furthermore, the fact that a transaction is the subject of an exemption is not dis-

positive of whether the transaction would have been a prohibited transaction in the absence of such exemption or, though it would have been a prohibited transaction, is exempt by operation of a statutory or other exemption or a transitional rule.

All interested persons are invited to submit written comments on the pending exemption. All written comments (preferably six copies) should be addressed to the Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224. Attention: E:EP:PT (D-158).

In order to receive consideration, such comments must be received by the Internal Revenue Service on or before July 12, 1976. The application for exemption referred to herein and such comments will be open to public inspection at the Internal Revenue Service National Office Reading Room, 1111 Constitution Avenue, NW., Washington, D.C. 20224.

**Pending Exemption.** Based upon the application, hereinabove described, the Service and the Department have under consideration the granting of the requested exemption, under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975) and Rev. Proc. 75-26, 1975-1 C.B. 722, whereby the restrictions of section 406(a) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code, by reason of section 4975(c)(1) (A) through (D) of the Code, shall not apply to any sale of the Divestiture Stock made pursuant to the escrow agreement dated May 22, 1975, and pursuant to the terms, conditions and representations set forth in the application.

The pending exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions to be consummated pursuant to the exemption.

Signed at Washington, D.C. this 14th day of May, 1976.

DONALD C. ALEXANDER,  
Commissioner of Internal Revenue.

JAMES D. HUTCHINSON,  
Administrator of Pension and  
Welfare Benefit Programs,  
U.S. Department of Labor.

#### Office of the Secretary

#### DIAMOND TIPS FOR PHONOGRAPH NEEDLES FROM THE UNITED KINGDOM

##### Tentative Determination to Modify or Revoke Dumping Finding

A finding of dumping with respect to diamond tips for phonograph needles from the United Kingdom was published as Treasury Decision 72-91 in the FEDERAL REGISTER of April 1, 1972 (37 F.R. 6665).

After due investigation, it has been determined tentatively that diamond tips for phonograph needles produced and sold by Fidelitone International Ltd., Peebles, Scotland are no longer being, nor likely to be, sold in the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.)

#### Statement of Reasons on Which This Tentative Determination Is Based.

The investigation indicated that sales of diamond tips for phonograph needles by Fidelitone International Ltd. during a recent period of more than 2 years have been at not less than fair value. Also, the manufacturer has given written assurances that it will make no future sales at less than fair value.

Accordingly, notice is hereby given that the Department of the Treasury intends to modify the finding of dumping with respect to diamond tips for phonograph needles from the United Kingdom to exclude such merchandise produced and sold by Fidelitone International Ltd., Peebles, Scotland.

In accordance with § 153.37, Customs Regulations (19 CFR 153.37), interested persons may present written views or arguments or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Ave., N.W., Washington, D.C. 20229, in time to be received by his office not later than 10 days from the date of publication of this notice in the FEDERAL REGISTER. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than June 24, 1976.

This notice is published pursuant to § 153.41(c) of the Customs Regulations (19 CFR 153.41(c)).

Dated: May 20, 1976.

JAMES B. CLAWSON,  
Acting Assistant Secretary  
of the Treasury.

#### DEPARTMENT OF THE INTERIOR

##### Bureau of Land Management ROCK SPRINGS DISTRICT MULTIPLE USE ADVISORY BOARD

#### Meeting

MAY 18, 1976.

Notice is hereby given that the Rock Springs District Multiple Use Advisory Board will meet at 8:00 a.m., June 29, 1976, and at 8:30 a.m., June 30, 1976, at the Bureau of Land Management District Office, Rock Springs, Wyoming.

The agenda will include a field tour June 29 of representative allotments in the Sandy Grazing Environmental Im-

pact Statement study area and a business meeting June 30 to discuss issues identified during the field tour and to receive public comments.

The meeting will be open to the public. Oral or written statements may be submitted for the Board's consideration during the second day of the meeting. Any interested person wishing to make an oral statement must inform the District Manager, Bureau of Land Management, Box 1869, Rock Springs, Wyoming 82901. Time limits for oral presentations may be established by the Chairman to ensure that all will be heard within the time available for such statements. Any interested person or organization may file a written statement with the Board for its consideration. Such statements may be submitted at the meeting or mailed to the District Manager, Bureau of Land Management, Box 1869, Rock Springs, Wyoming 82901.

Further information concerning the meeting may be obtained from Mr. Ronald Herdt, Public Affairs Officer, Bureau of Land Management, Box 1869, Rock Springs, Wyoming 82901. His telephone is (307) 362-6613.

NEIL F. MORCK,  
District Manager.

#### National Park Service

##### ALIBATES FLINT QUARRIES AND TEXAS PANHANDLE PUEBLO CULTURE NATIONAL MONUMENT, TEXAS

#### Negative Declaration

An environmental assessment of four alternatives for the preservation and development of the Alibates Flint Quarries and Texas Panhandle Pueblo Culture

National Monument was made available December 11, 1975. Public workshops were held January 15 and 16, 1976 in Amarillo and Borger, Texas.

As a result of the workshops and letters received commenting upon the assessment, an environmental review has been completed and an alternative plan has been selected. Recommended actions include land acquisition, access, fencing, visitor services and management support facilities, interpretive trails and signing, and a name change to Alibates Flint Quarries National Monument.

The National Park Service, based on the environmental review, has decided not to prepare an environmental statement on the general management plan for the monument.

Copies of the environmental review are on file and available upon request at the following locations: Southwest Regional Office, National Park Service, P.O. Box 728, Santa Fe, New Mexico 87501; Superintendent, Lake Meredith Recreation Area, P.O. Box 1438, Fritch, Texas 79036; and National Park Service, Room 10-G-3, Fritz G. Lanham Federal Center, 819 Taylor Street, Fort Worth, Texas 76102.

The National Park Service will proceed to implement the plan.

Dated: April 21, 1976.

JOSEPH C. RUMBURG, Jr.,  
Regional Director,  
Southwest Region.

#### MINUTE MAN NATIONAL HISTORICAL PARK ADVISORY COMMISSION

#### Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Minute Man National Historical Park Advisory Commission will be held, commencing at 2:00 p.m. on Friday, 18 June 1976, at the North Bridge Visitor Center, off Liberty Street, in Concord, Massachusetts.

The Commission was established by Public Law 86-321 to advise the Secretary of the Interior on the development of Minute Man National Historical Park.

The members of the Advisory Commission are as follows:

The Honorable F. Bradford Morse, Chairman,  
New York, New York  
Mr. James DeNormandie, Lincoln, Massachusetts  
Mr. Donald Nickerson, Lexington, Massachusetts  
Mrs. Lucy Richardson, Concord, Massachusetts  
Mrs. Katherine S. White, Lincoln, Massachusetts

At this meeting the Superintendent will submit a report. Discussion will take place on the report of the National Park Study Committee and future policies in respect to reports of this nature.

The meeting will be open to the public; however, space is limited and it is expected that not more than 15 persons can be accommodated. Any member of the public may file with the Commission

## PICTURED ROCKS NATIONAL LAKESHORE ADVISORY COMMISSION

## Meeting

Notice is hereby given in accordance with Public Law 92-463 that a meeting of the Pictured Rocks National Lakeshore Advisory Commission will be held June 18, 1976 at 1:00 p.m. (e.d.t.) in headquarters building of Pictured Rocks National Lakeshore, Sand Point, Munising, Michigan. The Commission was

established by Public Law 89-668 to meet and consult with the Secretary of the Interior on general policies and specific matters related to the administration and development of the Pictured Rocks National Lakeshore.

Members of the Commission are:

Mr. Edward N. Locke (Chairman)  
Mr. Leo Gariepy (Vice Chairman)  
Mr. Glenn C. Gregg  
Mr. David C. West  
Mr. James Becker

Matters to be discussed at the meeting include:

1. Management objectives for Pictured Rocks National Lakeshore.
2. Emergency plans for the Lakeshore.
3. Park operations for the coming summer.

The Commission will tour the Miners Castle construction area at the conclusion of the meeting.

The meeting is open to the public. It is expected that 25 persons will be able to attend the session in addition to the Commission members. Interested persons may file written statements with the official listed below prior to the meeting.

Further information concerning this meeting may be obtained from Robert L. Burns, Superintendent, Pictured Rocks National Lakeshore, P.O. Box 40, Munising, Michigan 49862, telephone (906) 387-2607. Minutes of the meeting will be available for public inspection two weeks after the meeting at Pictured Rocks National Lakeshore headquarters at Sand Point, four miles east of Munising, Michigan.

Dated: May 12, 1976.

MERRILL D. BEAL,  
Regional Director,  
Midwest Region.

## DEPARTMENT OF AGRICULTURE

## Agricultural Marketing Service

## FLUE-CURED TOBACCO ADVISORY

## COMMITTEE

## Meeting

The Flue-Cured Tobacco Advisory Committee will meet at 1 p.m., on Thursday, June 17, 1976, in the Tobacco Division, Agricultural Marketing Service, United States Department of Agriculture, Laboratory, Room 223 Flue-Cured Tobacco Cooperative Stabilization Corporation, 1304 Annapolis Drive, Raleigh, North Carolina 27605.

The purpose of the meeting is to discuss marketing area opening dates and selling schedules for the flue-cured tobacco to be sold in each marketing area for the 1976 season. Also, matters, as specified in 7 CFR Part 29, Subpart G, § 29.9404 will be discussed.

The meeting is open to the public but space and facilities are limited. Public participation will be limited to written statements submitted before or at the meeting unless their participation is otherwise requested by the Committee Chairman. Persons, other than members,

who wish to address the Committee at the meeting should contact Mr. J. W. York, Director, Tobacco Division, Agricultural Marketing Service, 300 12th Street, S.W., Washington, D.C. 20250 (202) 447-2567.

Dated: May 20, 1976.

**Animal and Plant Health Inspection Service  
FLEMING KEY ANIMAL IMPORT CENTER,  
KEY WEST, FLORIDA**

**Availability of Final Environmental  
Statement**

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Animal and Plant Health Inspection Service, Department of Agriculture, has prepared a final environmental statement for the proposed Fleming Key Animal Import Center, Key West, Florida, USDA-APHIS-ADM-75-2-F.

This final statement was transmitted to the Council on Environmental Quality on April 27, 1976.

Copies of this statement are available for inspection during regular working hours at the following locations:

USDA, APHIS, ASD, Architectural Engineering Branch, Room 713, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782.

Monroe County Public Library, 700 Fleming Street, Key West, Florida 33040.

USDA, APHIS, Veterinary Services, 5255 NW, 87th Avenue, Suite 110, Koger Executive Center, Miami Springs, Florida 33166.

A limited number of single copies are available, upon request, from the Architectural Engineering Branch, Administrative Services Division, Animal and Plant Health Inspection Service, United States Department of Agriculture, Room 713, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782.

Copies of the environmental statement have been sent to various Federal, State, and local agencies in accordance with the Council on Environmental Quality Guidelines.

Dated: May 19, 1976.

**Forest Service  
CENTRAL NEVADA PLANNING UNIT  
Notice of Availability of Final  
Environmental Statement**

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Central Nevada Planning Unit, Toiyabe National Forest, Nevada. The Forest Service report number is USDA-FS-FES (Adm) R4-75-16.

The environmental statement identifies and evaluates the probable effects of land uses for the planning unit, evaluates possible alternative courses of action, and provides a summary record of public participation in development of the land use plan. The purpose of the land use plan is to allocate National Forest lands and resources to specific uses and activities; establish management objectives; provide a record of management direction and decisions for specific areas and units of land; coordinate management between different resources uses and activities; and establish protective measures and standards to keep adverse environmental effects to a minimum.

This final environmental statement was transmitted to CEQ on May 17, 1976.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. and Independence Ave., S.W., Washington, D.C. 20250.

Regional Planning Office, USDA, Forest Service, USDA, Forest Service, Federal Building, Room 4408, 324-25th Street, Ogden, Utah 84401.

Forest Supervisor, Toiyabe National Forest, 111 North Virginia Street, Room 601, Reno, Nevada 89501.

District Forest Ranger, Austin Ranger District, Austin, Nevada 89310.

District Forest Ranger, Tonopah Ranger District, P.O. Box 939, Tonopah, Nevada 89049.

A limited number of single copies are available upon request to Forest Supervisor John J. Lavin, Toiyabe National Forest, 111 North Virginia Street, Room 601, Reno, Nevada 89501.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

Dated: May 17, 1976.

**Soil Conservation Service  
THREE-MILE AND SULFUR DRAW  
WATERSHED PROJECT, TEXAS  
Availability of Final Environmental Impact  
Statement**

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; Part 1500 of the Council on Environmental Quality Guidelines (38 FR 20550, August 1, 1973); and Part 650 of the Soil Conservation Service Guidelines (39 FR 19650, June 3, 1974); the Soil Conservation Service, U.S. Department of Agriculture, has prepared a final environmental impact statement (EIS) for the Three-Mile and Sulfur Draw Watershed Project, Culberson and Hudspeth Counties, Texas USDA-SCS-EIS-WS-(ADM)-75-4-(F)-TX.

The EIS concerns a plan for watershed protection and flood prevention. The planned works of improvement include conservation land treatment, supplemented by two single purpose floodwater retarding structures and 10.4 miles of floodwater diversion.

A limited supply of copies is available at the following location to fill single copy requests:

Soil Conservation Service, USDA, 16-20 South Main Street, P.O. Box 848, Temple, Texas 76501.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Services.)

Dated: May 11, 1976.

**JOSEPH W. HAAS,**  
*Deputy Administrator for Water  
Resources, Soil Conservation  
Service.*

**CYPRESS CREEK WATERSHED PROJECT,  
ALABAMA AND TENNESSEE**

**Availability of Final Environmental Impact  
Statement**

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; Part 1500 of the Council on Environmental Quality Guidelines (38 FR 20550, August 1, 1973); and Part 650 of the Soil Conservation Service Guidelines (39 FR 19650, June 3, 1974); the Soil Conservation Service, U.S. Department of Agriculture, has prepared a final environmental impact statement (EIS) for the Cypress Creek Watershed project, Lauderdale County, Alabama, and Wayne County, Tennessee, USDA-SCS-EIS-WS-(ADM)-75-2(F)-AL.

The environmental impact statement concerns a plan for watershed protection and flood prevention. The planned works of improvement include conservation land treatment, supplemented by 19 floodwater retarding structures and 14.4 miles of channel work. The channel work will involve bedload removal on about 6.3 miles of existing channels, clearing and shaping on about 7.5 miles of existing channels, and 0.6 mile of new channel excavation. The channel work proposed will be on perennial streams except the new channel which will be a realignment of existing channels.

The final EIS has been filed with the Council on Environmental Quality.

A limited supply is available at the following location to fill single copy requests:

Soil Conservation Service, USDA, 138 South Gay Street, Auburn, Alabama 36830.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Services.)

Dated: May 11, 1976.

**JOSEPH W. HAAS,**  
*Deputy Administrator for Water  
Resources, Soil Conservation  
Service.*

**PEMBROKE AREA FLOOD PREVENTION  
AND DRAINAGE RESOURCE CONSERVATION  
& DEVELOPMENT (RC&D) MEASURE,  
GEORGIA**

**Availability of Negative Declaration**

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; part 1500.6(e) of the Council on Environmental Quality Guidelines (38 FR 20550) August 1, 1973; and part 650.8 (b) (3) of the Soil Conservation Service Guidelines (39 FR 19651) June 3, 1974; the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Pembroke Area Flood Prevention and Drainage Measure, Bryan County, Georgia.

The environmental assessment of this federal action indicates that the measure will not create significant adverse local, regional, or national impacts on the en-

vironment and that no significant controversy is associated with the measure. As a result of these findings, Mr. Dwight M. Treadway, State Conservationist, Soil Conservation Service, USDA, 206 Federal Building, 355 East Hancock Avenue, Athens, Georgia 30601, has determined that the preparation and review of an environmental impact statement is not needed for this measure.

The measure consists of a plan for watershed protection on 1,710 acres. The planned works of improvement include conservation land treatment and 2.8 miles of multiple-purpose channels for flood prevention. All but 900 feet of the channel work will be in areas in which flow is ephemeral and where no, or practically no, defined channel exists. The 900 feet will be enlargement of a man-made channel in which flow is intermittent.

The environmental assessment file is available for inspection during regular working hours at the following location:

Soil Conservation Service, USDA, Federal Building, 355 East Hancock Avenue, Athens, Georgia 30601.

The negative declaration is available for single copy requests at the above location.

No administrative action on implementation of the proposal will be taken until June 9, 1976.

(Catalog of Federal Domestic Assistance Program No. 10.901, National Archives Reference Services.)

**COMMERCIAL DEVELOPMENT OF THE  
OCEANS CONFERENCE**

**Revised Notice of Meeting**

In F.R. Doc. 76-13410, appearing in the FEDERAL REGISTER on May 6, 1976 (41 FR 18696), Notice was published of a conference on commercial development of the oceans to be held June 9 to June 12, 1976 and to be sponsored by the Maritime Administration and the National Oceanic and Atmospheric Administration within the Department of Commerce in cooperation with the Energy Research and Development Administration and

the Department of the Interior. It was announced that the first day of the conference was to be in the Department of Commerce Auditorium and the last three days at Airlie House, Airlie, Virginia.

Said notice is hereby revised to clarify that the conference will be open to the public. The purpose of the conference will be to discuss the technology that will be needed in the coming days to properly develop the oceans resources. The areas being considered are: Oil and Gas, Hard Minerals, Living Resources, Ocean Siting, and Municipal Services.

Any person interested in attending the conference, and any person desiring further information regarding the meeting should contact John J. Roche in Room 4884 of the Office of Market Development, Maritime Administration, Department of Commerce, 14th and E Streets, N.W., Washington, D.C. 20230, telephone number 202-377-4113.

Dated: May 19, 1976.

So ordered by the Assistant Secretary of Commerce for Maritime Affairs/ Maritime Administration.

*Secretary.*

[FR Doc. 76-15253 Filed 5-24-76; 8:45 am]

**Office of the Secretary**

**PROPOSED VOLUNTARY CONSUMER  
PRODUCT INFORMATION LABELING  
PROGRAM**

**Operation and Procedures**

In his confirmation hearings, Secretary of Commerce Richardson made the following statements on the subject of consumer information:

I strongly favor the provision of consumer product testing information to consumers in those product lines where inadequate information exists. I intend to pursue the development of voluntary programs in which industry works with Government to make meaningful performance information available to the marketplace.

This notice announces the intention of the Department of Commerce to develop, in cooperation with consumers, manufacturers, producers, distributors, retailers, and other interested groups, a voluntary consumer product information labeling program, provided that substantial need and support for such a program is demonstrated at the three scheduled public hearings described later in this notice. The purpose of the program would be to facilitate consumer purchasing decisions by making available at the point of sale comparative information on key product performance characteristics and to provide manufacturers an opportunity to convey to the public the particular advantages of their products. To operate and carry out this Program, there are set out at the conclusion of this notice proposed procedures.

Presidents Kennedy, Johnson, Nixon, and Ford have affirmed that consumers have a basic right to be kept informed. In a Presidential Consumer Message in 1969, it was stated:

No matter how alert and resourceful a purchaser may be, he is relatively helpless unless he has adequate, trustworthy information about the product he is considering and knows what to make of that information. The fullest product description is useless if a consumer lacks the understanding or the will to utilize it.

In the same vein, the National Business Council for Consumer Affairs, in a 1973 report, made the following recommendation:

Wherever appropriate, manufacturers should promote the development of mechanisms for providing consumers with performance information on consumer durables.

The Council was also of the view that government agencies could help in assuring that appropriate product characteristics are chosen and measured in a manner that would be fair and equitable to manufacturers and consumers.

U.S. consumers today are unable in many cases to make rational and accurate marketplace decisions because of lack of comparative, easily comprehensible information at the point of sale on important product performance characteristics, including durability, capacity, and efficiency. This lack of information often results in consumer purchases being made on a trial-and-error basis or on the basis of unsubstantiated performance claims, with consequent consumer financial loss, dissatisfaction, and inconvenience.

At least eight European countries—Denmark, Finland, Norway, Sweden, France, West Germany, Netherlands, and Switzerland—are operating voluntary national information labeling programs that provide consumers with the type of information discussed above. These programs have four features in common:

1. Manufacturer participation is on a voluntary basis;
2. The programs report levels of performance but do not set minimum levels;
3. The programs deal principally with measurable performance characteristics; and
4. The programs utilize fixed labeling formats that present information to consumers in simplified form.

Three examples from these programs are set out in Appendix A to this notice.

#### Public Comments Requested

Comments are requested on this proposed Program, the proposed procedures at the end of this notice, and on the following areas of inquiry.

1. *Beneficial or adverse impacts on product cost, quality or availability.* What effects, either beneficial or adverse, could the Program be expected to have on the cost, quality or availability of consumer products? What effect is it likely to have on consumers, retailers, manufacturers, producers or the economy in general? What studies are now available that indicate the probable effects of such programs?

2. *Product selection criteria and process.* How should products that will be covered by the Program be selected? What should be the selection criteria? Would it be desirable to establish a prod-

uct selection committee(s)? If so, what criteria should be utilized to select the membership?

3. *Information label designs.* How should the effectiveness of label designs pertaining to specific product categories be evaluated? How much field testing would be necessary to determine the nature of public reaction to the labels? Could proposed label designs be effectively tested using Consumer Sounding Boards or similar consumer groups in lieu of field testing?

4. *Consumer education approaches.* What is the best way to make the public aware of this Program? Would it be feasible for the Department to cooperate in some way with the advertising departments or agencies of participating manufacturers and producers to enhance the total impact of the Program?

5. *Benefits to manufacturers.* What would be the principal advantages of this Program to manufacturers? Would a better understanding by consumers of the performance characteristics of manufacturers' products result in a reduction in the return rate of such products and in a decrease in the number of consumer complaints? Would the operation of this Program improve the ability of manufacturers to structure their model mix to meet consumer needs and desires?

6. *Methods of establishing fees to help defray program costs.* On what basis should equitable and reasonable fees be established? Would a fixed fee covering one product category discriminate against smaller manufacturers or producers who might wish to participate in the Program? Would a fee on a per unit basis as provided in the proposed procedures be administratively burdensome or constitute an unwarranted invasion of proprietary data?

7. *Monitoring and certification procedures.* How and to what extent should the Department monitor the Program? Would manufacturer and producer self-certification, or industry certification, be effective as an aid in the monitoring of this Program?

The Department also encourages the submission of any other proposals or suggestions that might better carry out a voluntary program to assist consumers in making accurate purchase decisions by providing meaningful point-of-sale information on key product performance characteristics.

Written comments should be submitted in four copies to the Assistant Secretary for Science and Technology, Room 3862, U.S. Department of Commerce, Washington, D.C. 20230, on or before (45 days from the date this notice is published). Oral comments may be made at informal hearings open to the public, in accordance with the following schedule and procedures.

#### Informal Hearings

The Department will hold three informal hearings on the proposed Program. The first hearing will be held on Wednesday, June 23, 1976, at 10 a.m. Pacific

Daylight Saving Time in Los Angeles, California. The second hearing will be held on Tuesday, June 29, 1976, at 10 a.m. Central Daylight Saving Time in Chicago, Illinois. The third hearing will be held on Wednesday, June 30, 1976, at 10 a.m. Eastern Daylight Saving Time in the Auditorium of the Department of Commerce, Main Commerce Building, 14th Street between E Street and Constitution Avenue, N.W., Washington, D.C.

Meeting places for the hearings in Los Angeles and Chicago have not been finalized. However, the precise meeting place in those two cities will appear in the FEDERAL REGISTER on Wednesday, June 2, 1976, which will be three weeks before the first of the scheduled hearings is held. Anyone who misses the June 2, 1976 notice and wishes information on the precise meeting place for any of the scheduled hearings may call or write Dr. Melvin R. Meyerson, Chief, Product Systems Analysis Division, National Bureau of Standards, Washington, D.C. 20234, telephone number (301) 921-2907 on or after June 2, 1976.

Persons desiring to testify at these hearings should notify the Assistant Secretary for Science and Technology, Room 3862, U.S. Department of Commerce, Washington, D.C. 20230, as promptly as possible, and not later than 48 hours prior to the date of the hearing at which they will testify. Persons desiring to testify should also submit to the Assistant Secretary for Science and Technology four copies of their statement, not later than 48 hours prior to the start of the hearing at which they will testify.

The following procedures are established for the informal hearings:

1. *Purpose.* The purpose of the informal hearings is to provide all interested segments of the public with the opportunity to comment on whether the Department should initiate a voluntary consumer product information labeling program.

2. *Conduct of hearings.* (a) These hearings shall be informal, non-adversary proceedings at which there will be no formal pleadings or adverse parties. Witnesses may submit written presentations for the record.

(b) The presiding officer shall have the right to apportion in an equitable manner the time available for making presentations, and to terminate or shorten the presentation of any witnesses when, in his or her opinion, such presentation is repetitive or not relevant to the purpose of the hearings.

(c) The presiding officer and other Department representatives shall have the right to question witnesses on their testimony and other matters relating to the proposed Program.

(d) The presiding officer has the right to exercise authority necessary for the equitable and efficient conduct of the hearings and to maintain order.

3. *General provisions.* (a) These informal hearings shall be open to the members of the public whether or not such members wish to testify at the hearings.

(b) A transcript will be made of the informal hearings.

(c) Copies of the transcript and all materials presented by the witnesses at the hearings as well as all written comments received shall be available for inspection and copying in the Central Reference and Records Inspection Facility, Room 7068, Main Commerce Building, 14th Street between E Street and Constitution Avenue, N.W., Washington, D.C. 20230.

Issued: May 19, 1976.

BETSY ANCKER-JOHNSON,  
Assistant Secretary for  
Science and Technology.

#### PROPOSED PROCEDURES

##### PROCEDURES FOR A VOLUNTARY CONSUMER PRODUCT INFORMATION LABELING PROGRAM

1. *Purpose.* The purpose of this part is to establish procedures under which a national voluntary consumer information labeling program administered by the Department of Commerce will function.

2. *Description and Goal of Program.* (a) The Department's Voluntary Consumer Product Information Labeling Program would make available to consumers, at the point of sale, information on consumer product performance in an understandable and useful form. It would also educate consumers, distributors, and retailers in the use of the product performance information displayed and would provide manufacturers with an opportunity to convey to the public the particular advantages of their products. These objectives would be accomplished by:

- (i) Selecting or developing standardized test methods by which selected product performance characteristics could be measured;
- (ii) Developing labeling methods by which information concerning product performance could be transmitted in useful form to consumers at the point of sale;
- (iii) Encouraging manufacturers to voluntarily test and label their products according to the selected or developed methods; and
- (iv) Encouraging consumers through various informational and educational programs to utilize the product performance information provided.

(b) The Program would involve voluntary labeling by licensed participants of selected categories of consumer products with information concerning selected performance characteristics of those products. The performance characteristics selected would be only those that are of demonstrable importance to consumers, that consumers cannot evaluate through mere inspection of the product, and that can be measured objectively and reported understandably to consumers. The consumer products covered would be those for which incorrect purchase decisions can result in substantial financial loss, dissatisfaction, or inconvenience. This Program shall seek to avoid the duplication of other Federal programs under which performance characteristics are labeled by exempting those performance characteristics from this Program.

(c) For selected categories of consumer products, the Program would include advertising guidelines covering situations where

quantitative performance values are stated in advertising or where qualitative comparisons are made of the performance of different products.

3. *Definitions.* (a) The term "Secretary" means the Secretary of Commerce or his designee.

(b) The term "consumer" means the first person who purchases a consumer product for purposes other than resale.

(c) The term "manufacturer" means any person engaged in the manufacturing or assembling of consumer products or in the importing of such products for resale. The term also includes private brand labelers.

(d) The term "consumer product" means any article produced or distributed for sale to a consumer for the use, consumption, or enjoyment of such consumer.

(e) The term "person" means an individual; a manufacturer; distributor; retailer; importer; government agencies at the Federal, State and local level; consumer organizations; industry and trade associations; standards writing bodies; professional societies; or any other group or organization of industries, companies, or individuals.

(f) The term "consumer product performance" means those characteristics of a consumer product such as durability, capacity, composition, color-fastness, and strength that are often difficult or impossible for consumers to evaluate or ascertain without actually buying and using the product under consideration.

4. *Finding of Need to Establish a Specification for Labeling a Consumer Product.* (a) Any person may request the Secretary to find that there is a need to label a particular consumer product with information concerning one or more specific performance characteristics of that product.

(b) Such a request shall be in writing and will, as a minimum, include the following information:

- (1) Identification of the consumer product;
- (2) Extent that the product identified in subparagraph (1) above is used by the public and, if known, what the production or sales volume is of such product;
- (3) Nature and extent of difficulty experienced by consumers in making informed purchase decisions because of a lack of knowledge regarding the performance characteristics of the identified consumer product;
- (4) Potential or actual loss to consumers as a result of an incorrect decision based on an inadequate understanding of the performance characteristics of the identified consumer product;
- (5) Extent of incidence of consumer complaints arising from or reasonably traceable to lack of knowledge regarding the performance characteristics of the identified consumer product;
- (6) If known, whether there currently exists test methods which could be used to test the performance characteristics of the identified consumer product and an identification of those test methods; and
- (7) Reasons why it is felt, in cases where existing test methods are identified in responding to subparagraph (6) above, that such test methods are suitable for making objective measurements of the performance characteristics of the identified consumer product.

(c) For selected categories of consumer products, the Program would include advertising guidelines covering situations where

quantitative performance values are stated in advertising or where qualitative comparisons are made of the performance of different products.

(d) The Secretary may ask for more information to support a request made under paragraph (a) of this section if he feels it is necessary to do so or, if he deems it to be in the public interest, may develop such information himself. If the Secretary determines that there is no need to establish a specification for labeling the requested consumer product performance characteristics, or because of a lack of resources, he will decline to act further on the request. The Secretary shall act expeditiously on all requests and shall notify the requester of his decision in writing. In those instances where the Secretary declines a request, he shall state the reasons for so declining.

(e) If the Secretary finds that a need exists to establish a specification for labeling a consumer product that would identify one or more performance characteristics of the consumer product identified in paragraph (b) of this section, he shall publish a notice in the FEDERAL REGISTER indicating that such finding is a preliminary finding. The notice shall include a statement as to the basis for the Secretary's finding and shall provide at least a thirty (30) day period for the submission of written comments thereon by interested persons. In the event that a public hearing or hearings are held on this preliminary finding as authorized under paragraph (c) of this section, the period allowed for the submission of written comments shall be extended to the date on which such hearing or hearings are held.

(f) Interested persons wanting to express their views regarding the Secretary's preliminary finding of need in an informal hearing shall notify the Secretary of that desire within fifteen (15) days after the notice is published in the FEDERAL REGISTER. Upon receipt by the Secretary of such request, informal public hearings shall be held so as to give all interested persons an opportunity for the oral presentation of data, views, or arguments, in addition to the opportunity to make written submissions. If deemed appropriate by the Secretary, such hearings may be held at several locations within the United States. Notice of such hearings shall be published in the FEDERAL REGISTER at least twenty (20) days in advance thereof. A transcript shall be kept of any oral presentations.

(g) All written and oral comments will be filed in the Central Reference and Records Inspection Facility, Room 7068, Commerce Building, 14th Street between E Street and Constitution Avenue, N.W., Washington, D.C. 20230, and will be available for public inspection and copying at that location.

(h) After evaluating the comments received, the Secretary shall publish a notice in the FEDERAL REGISTER making a final finding of need made under paragraph (d) of this section. The notice shall state the basis for the Secretary's final finding of need or for the withdrawal of his preliminary finding.

(i) The Secretary may make a preliminary finding of need to establish a specification for labeling a consumer product with information concerning one or more performance characteristics of that product when such action is deemed by him to be in the public interest, notwithstanding the absence of a request from an outside source. The procedural requirements set out in paragraphs (d), (e), (f) and (g) of this section are applicable to the preliminary finding of need

made by the Secretary under this paragraph.

5. *Development of Performance Information Labeling Specifications.* (a) If the Secretary makes a final finding of need pursuant to section 1 above, he will then proceed to develop a performance information labeling Specification. Each Specification shall as a minimum include:

(1) A description of the performance characteristics of the consumer product covered;

(2) The test methods to be used in measuring the performance characteristics. The test methods shall be methods described in existing nationally-recognized voluntary standards (preferably ANSI standards) where such methods are appropriate. Where appropriate test methods do not exist, they will be developed by the Department of Commerce in cooperation with interested parties;

(3) A prototype label and directions for displaying the label on or with the consumer product concerned; and

(4) Conditions of participation by manufacturers.

(b) The Secretary upon development of a proposed Specification shall publish in the FEDERAL REGISTER a notice giving the complete text of the proposed Specification, and any other pertinent information, and inviting any interested person to submit written comments on the proposed Specification within 45 days after its publication in the FEDERAL REGISTER, unless another time limit is provided by the Secretary. Interested persons wanting to express their views in an informal hearing may do so if, on or before June 9, 1976, they request the Secretary to hold a hearing. Such informal hearings shall be held so as to give all interested persons an opportunity for the oral presentation of data, views, or arguments in addition to the opportunity to make written submissions. Notice of such hearings shall be published in the FEDERAL REGISTER. A transcript shall be kept of any oral presentations.

(c) The Secretary, after consideration of all written and oral comments and other materials received in accordance with paragraph (b) of this section, shall publish in the FEDERAL REGISTER within 30 days after the final date for receipt of comments, or as soon as practicable thereafter, a notice either:

(1) Giving the complete text of a final Specification, including conditions of use, and stating that any manufacturer of consumer products desiring voluntarily to use the Department of Commerce Mark developed under section 9 of these Procedures must advise the Department of Commerce; or

(2) Stating that the proposed Specification will be further developed before final publication; or

(3) Withdrawing the proposed Specification from further consideration.

6. *Establishment of Fees and Charges.* (a) The Secretary in conjunction with the use of the Working Capital Fund of the National Bureau of Standards, as authorized under section 12 of the Act of March 3, 1901, as amended (15 U.S.C. 278b), for this Program, shall establish fees and charges for use of the Department of Commerce Label and Mark on each product. The fees and charges established by the Secretary, which may be revised by him when he deems it appropriate

to do so, shall be in amounts calculated to maximize the self-sufficiency of the operation of this Program. A separate notice will be published in the FEDERAL REGISTER simultaneously with the notice of each proposed Specification referred to in section 5(b). Such notice will set out a schedule of estimated fees and charges the Secretary proposes to establish. The notice would be furnished for informational and guidance purposes only in order that the public may evaluate the proposed Specification in light of the expected fees to be charged.

(b) At such time as the Secretary publishes the notice announcing the final Specification referred to in section 5(c)(1), he shall simultaneously publish a separate notice in the FEDERAL REGISTER setting forth the final schedule of fees that will be charged participating manufacturers. The effective date of such final schedule of fees shall be the same as the date on which the final Specification takes effect.

(c) Revisions, if any, to the fees and charges established by the Secretary under paragraph (b) of this section shall be published in subsequent FEDERAL REGISTER notices and shall take effect on or before June 24, 1976.

7. *Participation of Manufacturers.* (a) Manufacturers desiring to participate in this program will so notify the Secretary. The notification will identify the particular Specification to be used and the manufacturer's identification and model numbers for the products to be labeled. The notification will also state that the manufacturer will abide by all conditions contained in the Specification, agrees to pay the fees and charges established by the Secretary, and will desist from using the Department of Commerce Label and Mark if requested by the Secretary under the provisions of section 8.

(b) The conditions for participation will be set out in the Specification and will include, but not be limited to, the following:

(1) Prior to the use of a Label the manufacturer will make or have made the measurements to obtain the information required for inclusion on the Label and, if requested, will forward within 30 days such measurement data to the Secretary. Such measurement data will be kept on file by the manufacturer or his agent for two years after that product is no longer manufactured unless otherwise provided in the Specification.

(2) The manufacturer will describe the test results on the Label as prescribed in the Specification.

(3) The manufacturer will display or arrange to display, in accordance with the appropriate Specification, the Label on or with each individual product of the type covered except for units exported from the U.S. Manufacturers who utilize more than one brand name may participate by labeling some or all of the brand names. All models with the same brand name must be included in the Program unless they are for export only.

(4) The manufacturer agrees at his expense to comply with any reasonable request of the Secretary to have products manufactured by him tested to determine that testing has been done according to the relevant Specification.

(5) Manufacturers may reproduce the Department of Commerce Label and Mark in advertising provided that the entire Label, complete with all information required to be displayed at the point of retail sale, is shown legibly.

8. *Termination of Participation.* (a) The Secretary upon finding that a manufacturer is not complying with the conditions of participation set out in these Procedures or in a Specification may terminate upon 30 days notice the manufacturer's participation in the Program; Provided, that the manufacturer shall first be given an opportunity to show cause why the participation should not be terminated. Upon receipt of a notice of termination, a manufacturer may request within 30 days a hearing under the provisions of 5 U.S.C. 558.

(b) A manufacturer may at any time terminate his participation and responsibilities under this Program with regard to a specific type of product by giving written notice to the Secretary that he has discontinued use of the Department of Commerce Label and Mark for all consumer products of the type involved.

9. *The Department of Commerce Mark.* The Department of Commerce shall develop a Mark which shall be registered in the U.S. Patent and Trademark Office under 15 U.S.C. 1054 for use on each Label described in a Specification.

10. *Amendment or Revision of a Performance Information Labeling Specification.* The Secretary may by order amend or revise any Specification published under section 5. The Procedure applicable to the establishment of a Specification under section 5 shall be followed in amending or revising such Specification. Such amendment or revision shall not apply to consumer products manufactured prior to the effective date of the amendment or revision.

11. *Consumer Education.* The Secretary, in close cooperation and coordination with interested Government agencies, appropriate industry trade associations and industry members, organizations, and other interested persons shall carry out a program to educate consumers relative to the significance of the labeling program. Some elements of this Program shall also be directed toward informing retailers and other interested groups about the Program.

12. *Coordination with State and Local Programs.* The Secretary will establish and maintain an active program of communication with appropriate State and local government offices and agencies and will furnish and make available information and assistance that will promote uniformity in State, local and Federal programs for the labeling of performance characteristics of consumer products.

13. *Annual Report.* The Secretary will prepare an annual report of activities under the Program, including an evaluation of the Program and a list of participating manufacturers and types of consumer products.

AUTHORITY: Sec. 2, 31 Stat. 1449, as amended, sec. 1, 64 Stat. 371; (15 USC 272), Reorganization Plan No. 3 of 1946, Part VI.

## VDN SPECIFICATIONS

Capacity: 9-10 deciliters

Temperature - retaining properties: If jug is kept closed  
boiling liquid (100°C) after 6 hours at least 80°C  
cold liquid (6°C) not more than 8°C after 17 hours at least 70°C not more than 9°C

Figures assume that jug is full and is kept in ordinary room temperature (20°C). If the jug is only half full, the change in temperature will take place more rapidly as it also will if there is a still greater difference between the temperature of the content and that of the surrounding air.

Durability of the glass container: Rating for resistance against knocks against the casing: 3 (Scale is 1 to 5, where 5 represents the greatest strength). Will not crack if boiling hot liquid is poured in without previous warming up.

Tightness: Joint between the glass container and the casing is tight. Jug will not leak

Materials: Container: Glass  
Casing: SAN-plastic. Withstands temperatures of -40°C to + 90°C.

Stopper: Precious wood with expanding rubber seal.

Care: See attached folder

## MANUFACTURER

Care: Handle With Care. Since glass may explode, keep face away from opening.

**DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE****Alcohol, Drug Abuse, and Mental Health Administration****RAPE PREVENTION AND CONTROL ADVISORY COMMITTEE****Notice of Establishment**

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (5 U.S.C. Appendix 1), the Alcohol, Drug Abuse, and Mental Health Administration announces establishment by the Secretary, Department of Health, Education, and Welfare, on May 7, 1976, of the following advisory committee:

**Designation:** Rape Prevention and Control Advisory Committee.

**Purpose:** The Rape Prevention and Control Advisory Committee shall advise the Secretary and the Director, National Institute of Mental Health, on matters regarding the needs and concerns associated with rape in the United States and make recommendations pertaining to activities to be undertaken by the Department to address the problem of rape. The Committee shall advise on the policies, priorities, and activities of the National

Center for the Prevention and Control of Rape with regard to: (1) research, demonstration, consultation and education, and information exchange; (2) propose and recommend possible creative use of grants, contracts, demonstration projects, conferences, and other resources available to the Department as effective means for increasing program knowledge concerning the problems of rape and more effective prevention and treatment efforts; (3) develop and sustain communication linkages with individuals, groups, organizations, institutions and communities, and to obtain their views on appropriate research, training, and service programs to deal with the problem of rape; and (4) interpret the needs and concerns of women and others affected by the problem of rape for presentation to the Department.

The charter for this committee is effective through May 7, 1978.

Dated: May 19, 1976.

JAMES D. ISBISTER,  
 Administrator, Alcohol, Drug Abuse, and Mental Health Administration.

**Office of Education****NATIONAL ADVISORY COUNCIL ON INDIAN EDUCATION****Meeting**

Notice is hereby given, pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), that the next meeting of the Full Council of the National Advisory Council on Indian Education will be held June 17, 18, 19, 20, 1976, at the Holiday Inn Southwest, 2580 South Ashland, Green Bay, Wisconsin 54304.

The National Advisory Council on Indian Education is established under Section 442 of the Indian Education Act (P.L. 92-318, Title IV, 20 U.S.C. 1221g). The Council, among other things, is directed to:

(1) Advise the Commissioner of Education with respect to the administration (including the development of regulations and of administrative practices and policies of any program in which Indian children or adults participate, or from which they can benefit, including sections 241aa and 241ff and 887c of this title and with respect to adequate funding thereof;

(2) Review applications for assistance under sections 241aa to 241ff, 887c, and 1211a of this title, and make recommendations to the Commissioner with respect to their approval;

(3) Evaluate programs and projects carried out under any program of the Department of Health, Education, and Welfare in which Indian children or adults can participate, or from which they can benefit, and disseminate the results of such evaluations;

(4) Provide technical assistance to local educational agencies and to Indian educational agencies, institutions, and organizations to assist them in improving the education of Indian children;

(5) Assist the Commissioner in developing criteria and regulations for the administration and evaluation of grants made under section 303(b) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress); and

(6) To submit to the Congress not later than March 31 of each year a report on its activities, which shall include any recommendations it may deem necessary for the improvement of Federal education programs in which Indian children and adults participate, or from which they can benefit, which report shall include statement of the National Council's recommendations to the Commissioner with respect to the funding of any such programs.

The meeting on June 17, 18, 19, 20, 1976, will be open to the public beginning at 9:00 a.m. and ending at 5:00 p.m. each day. These meetings will be held at the Holiday Inn Southwest.

The proposed agenda includes:

JUNE 17, 1976

(1) Committee Discussions

JUNE 18, 19, 20, 1976

- (1) Executive Director's Report
- (2) Action on previous meeting minutes
- (3) Committee Reports
- (4) Special Reports
- (5) Review of NACIE policies
- (6) Report—Search for Office of Indian Education Deputy Commissioner
- (7) Regular Council Business
- (8) "Fellowships for Indian Students" Review
- (9) Plans for future NACIE activities

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on Indian Education located at 425 13th Street, N.W., Suite 326, Washington, D.C. 20004.

Signed at Washington, D.C. on May 19, 1976.

LINCOLN C. WHITE,  
 Executive Director, National Advisory Council on Indian Education.

[FR Doc.76-15220 Filed 5-24-76; 8:45 am]

**TEACHER CORPS****Meeting**

Notice is hereby given pursuant to the authority contained in Part B-1 of the Education Professions Development Act

of 1965, as amended (79 Stat. 1255-1258 as amended, 20 U.S.C. 1101-1107a), that the Teacher Corps will hold general orientation meetings for officials from Institutions of Higher Education and State and Local Education Agencies who are interested in submitting preapplications and/or applications for Teacher Corps grants to be awarded for the school year 1977-1978 (to begin July 1, 1977).

A meeting will be held between 9:00 a.m. and 5:00 p.m. on July 26, 1976 at the Hilton Inn, Atlanta Airport, Post Office Box 691, Atlanta, Georgia 30320, phone: 404-767-0281 and repeated between those times on the dates and locations listed:

July 27, 1976. Marriott Twin Bridges Hotel, 333 Jefferson Davis Highway, Arlington, Virginia 20001, phone: 703-628-4200.

July 28, 1976. O'Hare Hilton, O'Hare International Airport, Post Office Box 66414, Chicago, Illinois 60666, phone: 312-686-8000.

July 29, 1976. Stouffers Denver Inn, Denver Airport, 3203 Quebec Street, Denver, Colorado 80207, phone: 303-321-2444.

July 30, 1976. Hilton Inn, San Francisco International Airport, San Francisco, California 94128, phone: 415-589-0770.

The orientation meeting shall be opened to the public. The proposed agenda includes:

1. Review of current Teacher Corps legislative authority.

2. Preapplication and application procedures, including the specifications for the preparation of program and fiscal information.

3. Discussions of the development of demonstrations of training and retraining within the context of Teacher Corps mission and objectives.

4. Description of application review criteria as established under the Office of Education's General Provisions.

The choice of meeting place together with names of officials expected to attend such sessions should be mailed to: Teacher Corps, U.S. Office of Education, Washington, D.C. 20202, Attention: Conference Coordinator.

Dated: May 20, 1976.

WILLIAM SMITH,  
 Director, Teacher Corps.

[FR Doc.76-15171 Filed 5-24-76; 8:45 am]

**Office of Human Development  
 FLORIDA: FISCAL YEAR 1976 STATE PLAN****Notice of Hearing**

Notice is hereby given that in accordance with Section 101(b) of Title I of the Rehabilitation Act of 1973, as amended, and 45 CFR § 1361.4 of the Federal Regulations, and the request of the Secretary of the Florida Department of Health and Rehabilitative Services thereunder, the Commissioner, Rehabilitation Services Administration, will hold a hearing to decide whether the Fiscal Year 1976 State plan submitted by the State of Florida under Section 101(a) of the Act conforms to the Federal statutory requirements which per-

tain to the organizational unit for vocational rehabilitation and its responsibility and authority for the vocational rehabilitation program in the State under Title I of the Act.

Attached is the notice of hearing from the Commissioner to the State of Florida, which

1. States the time and place for the hearing, i.e., July 12, 1976, 9:00 a.m., Room 222, Peachtree Seventh Building, 50 Seventh Street, N.E., Atlanta, Georgia;

2. Sets forth the issues which will be considered;

3. Advises that Mr. Edward L. Bois-sere, 602 Ojai Avenue, Sun City Center, Florida has been designated to serve as presiding officer, and Mrs. Betty Hopkins, Room 713, Peachtree Seventh Building, 50 Seventh Street, N.E., Atlanta, Georgia has been designated to serve as the Rehabilitation Services Administration Hearing Clerk;

4. Encloses a copy of the Rules of Practice and Procedures established by the Commissioner for this hearing; and

5. Encloses a Statement of Deficiencies in the Florida State plan for vocational rehabilitation, to which the State is required to file an answer within 20 days of receipt.

Any individual or group wishing to participate in this forthcoming hearing as a party shall file a petition with Mrs. Betty Hopkins, Room 713, Peachtree Seventh Building, 50 Seventh Street, N.E., Atlanta, Georgia 30323 within 15 days after publication of this notice and shall serve a copy on each party of record at that time. Such petition shall state concisely (1) the petitioner's interest in the proceeding; (2) who will appear for the petitioner; (3) the issue on which the petitioner wishes to participate; and (4) whether the petitioner intends to present witnesses.

Individuals or groups may be recognized as parties if the issues to be considered at the hearing will cause or have caused them injury and their interest is within the zone of interests to be protected by the governing Federal statute. The presiding officer shall promptly determine whether each petitioner has the requisite interest in the proceedings and shall permit or deny participation accordingly. Where petitions to participate as parties are made by individuals or groups with common interests, the presiding officer may request that all such petitioners designate a single representative, or he may recognize one or more of such petitioners to represent all such petitioners. The presiding officer shall give each petitioner written notice of the decision on his petition, and if the petition is denied, he shall briefly state the grounds for denial.

Further information on the hearing may be obtained from Dr. Stephen Cornett, Director, Office of Rehabilitation Services, Room 737-A, 50 Seventh Street, N.E., Atlanta, Georgia 30323.

Dated: May 19, 1976.

ANDREW S. ADAMS,  
 Commissioner, Rehabilitation Services Administration.

REHABILITATION  
SERVICES ADMINISTRATION,  
OFFICE OF HUMAN DEVELOPMENT,  
May 12, 1976.

WILLIAM J. PAGE, JR.,  
Secretary, Department of Health and Re-  
habilitative Services, 1323 Winewood  
Boulevard, Tallahassee, Florida 32301.

DEAR MR. PAGE: I have received your tele-  
gram of April 12, 1976, advising that the  
State of Florida requests a hearing in re-  
sponse to my March 15, 1976 letter of intent  
to disapprove the Florida Fiscal Year 1976  
State plan for vocational rehabilitation, un-  
der Title I of the Rehabilitation Act, as  
amended. I wish to notify you that I have  
scheduled the hearing for 9:00 am July 12,  
1976, to be held in Room 222 Peachtree  
Seventh Building, 50 Seventh Street, N.E.,  
Atlanta, Georgia.

I am enclosing the rules of practice and  
procedures established for this proceeding.  
These rules have been adopted from those  
published by the Social and Rehabilitation  
Service for hearings on conformity of State  
public assistance plans to Federal require-  
ments, set forth at 45 CFR Part 213.

I have designated Mr. Edward L. Boisseree,  
602 Ojal Avenue, Sun City Center, Florida  
(813) 634-5972, as the presiding officer. I have  
designated as the Rehabilitation Services Ad-  
ministration Hearing Clerk, Mrs. Betty  
Hopkins, Room 713, Peachtree Seventh Build-  
ing, 50 Seventh Street, N.E., Atlanta, Georgia  
30323. Each of these individuals shall per-  
form the duties and responsibilities set forth  
in the rules of practice and procedure.

The issue to be considered at the hearing  
is whether the Florida FY 1976 State plan  
for vocational rehabilitation meets the re-  
quirements of the Rehabilitation Act of 1973,  
as amended, 29 U.S.C. § 721, and the im-  
plementing regulations (45 CFR Part 1361).

Under Section 101(a) of the Rehabilitation  
Act, in order to receive Federal grants and  
financial participation under Title I of the  
Rehabilitation Act of 1973, as amended, 29  
U.S.C. § 701, it is necessary that a State have  
for each fiscal year a State plan approved by  
the Commissioner, RSA, as meeting the re-  
quirements specified in the Federal Act and in  
45 CFR Part 1361.

Section 101(a)(2)(A) of the Rehabilitation  
Act expressly requires that, except in the  
case of an independent State agency de-  
voted primarily to the VR or vocational and  
other rehabilitation of handicapped individ-  
uals, there must be a VR organizational unit  
within the designated sole State agency  
which: "(1) is primarily concerned with  
vocational rehabilitation, or vocational and  
other rehabilitation, of handicapped individ-  
uals, and is responsible for the vocational re-  
habilitation program of such State agency,  
(II) has a full-time director, and (III) has a  
staff employed on such rehabilitation work of  
such organizational unit all or substantially  
all of whom are employed full time on such  
work."

A number of pertinent regulations imple-  
ment this statutory language. These include  
regulations which require that the organiza-  
tional structure of the sole State agency pro-  
vide for clear lines of administrative and  
supervisory authority, and that all decisions  
affecting eligibility, the nature and scope of,  
and the provision of vocational rehabilitation  
services be made through the vocational re-  
habilitation organizational unit.

(45 CFR § 1361.6 and 1361.7)

The effect of the various statutory and reg-  
ulatory requirements as to the organizational  
unit is to establish that the administrator

of the VR unit must have responsibility and  
authority, including decision-making capac-  
ity, to direct and administer the VR program  
in the State.

As stated in my letter to Governor Reubin  
Askew, dated March 15, 1976, the FY 1976  
Florida plan for vocational rehabilitation  
does not fulfill the conditions specified in  
Section 101(a)(2)(A) of the Act because,  
under the plan, serious limitations are placed  
on the Director of the Vocational Rehabil-  
itation Program Office as the chief official of  
the organizational unit for vocational reha-  
bilitation. He is not given sufficient respon-  
sibility and authority to direct and adminis-  
ter the program. Closely tied to this deficiency  
in the Florida State plan are the diffusion  
and lack of clarity in the lines of administra-  
tive and supervisory authority for the voca-  
tional rehabilitation program. The Florida  
Reorganization Act of 1975 (Florida Statutes  
Annotated 20.19) and the FY 1976 State plan  
assign line responsibility and authority in  
areas such as personnel and budget, among  
others, to the eleven district administrators  
who are under the Assistant Secretary for  
Operations, rather than to the Director of the  
VR Program Office who reports to the As-  
sistant Secretary for Program Planning and  
Development.

The State plan does not establish whether  
the scope of the VR Program Director's re-  
sponsibility and authority to decide disputes or  
disagreements with the District Adminis-  
trators on State plan interpretation, execu-  
tion, and enforcement, extends to implement-  
ing plans, policies, and procedures, as well as  
initiating and achieving corrective action.  
Another problem is that the VR Program Di-  
rector does not have the authority to approve  
district cooperative agreements in the devel-  
oping and concluding stages for consistency  
with State VR program goals and statewide-  
ness.

The VR Program Office does not have re-  
sponsibility and authority for VR personnel  
management and budget, particularly on the  
District level.

The State plan designates the District Ad-  
ministrator as the official who selects, evalu-  
ates, and terminates the District VR Program  
Supervisor; the Director of the VR Program  
Office is limited to a concurring role in these  
actions. The Director of the Program Office  
does not have any responsibility and author-  
ity for the selection, evaluation, and termina-  
tion of the VR staff in the eleven district of-  
fices below the level of the District VR Pro-  
gram Supervisor, who is the chief VR per-  
son in each district office and operates under  
the line authority of the District Adminis-  
trator. The Director also does not have re-  
sponsibility and authority for determining  
personnel needs and the utilization of per-  
sonnel within and among districts. Lacking  
such responsibility and authority, the Direc-  
tor of the VR Program Office does not have  
control over the rehabilitation staff who de-  
liver vocational rehabilitation services.

The Director of the VR Program Office does  
not have responsibility and authority for  
VR district level budget development, ap-  
proval, and execution. Initiation and approval  
of adjustments in VR budgets within and  
among districts, during the course of the fis-  
cal year, for example, are not within the au-  
thority assigned to the VR Program Director.

Accompanying this notice is our Office of  
the General Counsel Statement of Deficien-  
cies in Florida's FY 1976 plan for vocational  
rehabilitation, which is intended to define  
further the issues to be resolved. As you will  
note, the State of Florida is required to file  
an answer to this Statement within 20 days  
of its receipt.

Should you or your counsel have any fur-  
ther questions, please contact our Regional  
Attorney, Mr. Carl H. Harper (404) 526-6381.  
Very sincerely,

ANDREW S. ADAMS,  
Commissioner of Rehabilitation Services.

ADMINISTRATIVE PROCEEDINGS IN THE DEPART-  
MENT OF HEALTH, EDUCATION, AND WELFARE  
DOCKET NO. RSA-1

In the Matter of the Florida Department of  
Health and Rehabilitative Services (Herein-  
after called "State of Florida").

The Department of Health, Education, and  
Welfare's Statement of Deficiencies in the  
Proposed Florida Vocational Rehabilitation  
Plan for Fiscal Year 1976:

You are notified and required within 20  
days from the service of this document, un-  
less such time be extended by order of the  
responsible Department official, to file with  
the Rehabilitation Services Administration  
Hearing Clerk, Department of Health, Educa-  
tion, and Welfare, Room 713, Peachtree  
Seventh Building, 50 Seventh Street, N.E., At-  
lanta, Georgia 30323, an original and two  
copies of an answer to the allegations here-  
in. An additional copy shall be mailed or de-  
livered to the attorneys in the Office of the  
General Counsel whose address is indicated  
below their signatures hereon.

Answers shall admit or deny specifically  
and in detail each allegation of this State-  
ment unless the State of Florida is without  
knowledge in which case the answer should  
so state, and the Statement will be deemed  
a denial. Allegations of fact in this Statement  
not denied or controverted by answer shall  
be deemed admitted. Failure of the State of  
Florida to file an answer within the 20-day  
period following service of the Statement  
may be deemed an admission of all matters  
of fact recited in the Statement.

The General Counsel, Department of  
Health, Education, and Welfare acting on be-  
half of said Department alleges as follows:

1. In order for a State to be eligible for  
grants for any fiscal year from the allot-  
ments of funds under Title I of the Rehabil-  
itation Act of 1973, P.L. 93-112, 29 U.S.C.  
§ 701, it is necessary for a State to submit for  
each fiscal year a State plan which must  
meet the requirements specified in 29 U.S.C.  
§ 721 and 45 CFR 1361.

2. Pursuant to the above, the State of  
Florida submitted a proposed State Voca-  
tional Rehabilitation Plan, as revised Janu-  
ary 30, 1976, for Fiscal Year 1976 to the Re-  
habilitation Services Administration within  
the Department of Health, Education, and  
Welfare for a determination of eligibility  
for Federal financial participation in the  
case of the Florida Vocational Rehabilitation  
program for Fiscal Year 1976 from the allot-  
ments of funds under Title I of the Rehabil-  
itation Act of 1973.

3. It is required by 29 U.S.C. § 721(b) that  
the Secretary of Health, Education, and Wel-  
fare shall approve any plan which he finds  
fulfills the conditions specified in subsec-  
tion (a) of 29 U.S.C. § 721, and he shall dis-  
approve any plan which does not fulfill such  
conditions.

4. On February 7, 1975, the Secretary of  
Health, Education, and Welfare delegated his  
authority to approve or disapprove such  
State plans for vocational rehabilitation un-  
der Title I of the Rehabilitation Act of 1973,  
as amended, to the Commissioner of the Re-  
habilitation Services Administration. Vol. 40  
No. 27 FEDERAL REGISTER, p. 5809.

5. Pursuant to the above-mentioned dele-  
gation of authority, the Commissioner of the

Rehabilitation Services Administration on  
March 15, 1976 issued a letter to the Hon-  
orable Reubin Askew, Governor of Florida, con-  
veying his intention to disapprove the pro-  
posed Florida State plan for Fiscal Year 1976,  
effective April 15, 1976, on the basis that it  
does not fulfill the conditions specified in  
§ 101(a)(2)(A) of the Rehabilitation Act of  
1973, as amended. Pending a decision follow-  
ing an administrative hearing, the State of  
Florida will continue to receive Federal grant  
funds under Title I of the Rehabilitation Act  
of 1973, P.L. 93-112, 29 U.S.C. § 701.

6. § 101(a)(2)(A) of the Rehabilitation  
Act of 1973 29 U.S.C. § 721(a)(2), P.L. 93-112,  
provides that when the State agency is a  
multi-program or umbrella agency such as  
the Florida Department of Health and Re-  
habilitative Services, there must be a "re-  
habilitation bureau, division or other orga-  
nizational unit which (I) is primarily con-  
cerned with vocational rehabilitation, or vo-  
cational and other rehabilitation, of handi-  
capped individuals, and is responsible for the  
vocational rehabilitation program of such  
State agency, (II) has a full-time director,  
and (III) has a staff employed on such re-  
habilitation work of such organizational unit  
all or substantially all of whom are employed  
full time on such work . . ."

The above-mentioned section of the statu-  
te is further interpreted by regulations  
which state in part:

" . . . (2) The internal structure of the  
State agency. The organizational structure  
shall provide for all the vocational rehabilita-  
tion functions for which the State agency is  
responsible, for clear lines of administrative  
and supervisory authority . . . (b) . . .  
the State plan shall . . . include a vocational  
rehabilitation bureau, division or other or-  
ganizational unit which: (1) is primarily  
concerned with vocational rehabilitation, or  
vocational and other rehabilitation of  
handicapped individuals, and is responsible  
for the administration of such State agency's  
vocational rehabilitation program, which  
must include the determination of eligibility  
for and the provision of vocational rehabili-  
tation services under the State plan; (2) has  
a full time administrator . . . (3) has a  
staff employed on such rehabilitation work  
of such organizational unit, all or substan-  
tially all of whom are employed full time on  
such work. (c) . . . in evaluating . . . the  
organizational status of the unit, the Com-  
missioner will give consideration to such  
factors as . . . the extent to which the ad-  
ministrator of the organizational unit for  
vocational rehabilitation can determine the  
scope and policies of the vocational rehabili-  
tation program; and the kind and degree of  
authority delegated to the administrator of  
the organizational unit for administration of  
the vocational rehabilitation program (45  
CFR 1361.7(a)).

The Florida legislature in providing for the  
reorganization of the Florida Department of  
Health and Rehabilitative Services pursuant  
to the Florida Reorganization Act of 1975,  
Florida Statutes Annotated 20.19, relegates  
program directors to staff positions under  
the direction of an Assistant Secretary for  
Program Planning and Development, and en-  
joins the program directors from exercis-  
ing any line authority over the operating  
staff that must execute the several categori-  
cal programs. Administration, thereby, is  
functionally severed from program policy  
making and direction. All operating staffs of  
all categorical programs are consolidated at  
the State level under the direction of an As-  
sistant Secretary for Operations and at the  
district level under the direction of a district

administrator who is accountable to the As-  
sistant Secretary for Operations, but not to  
the program directors for program direction.

Since the Vocational Rehabilitation Pro-  
gram Director is expressly enjoined by Sec-  
tion 2 of the Florida Reorganization Act  
of 1975 (Florida Statutes Annotated 20.19)  
from having line authority over service pro-  
gram operations, he has no line authority  
over the staff working at the district level  
who must carry out the program. The or-  
ganizational unit which previously adminis-  
tered and carried out the categorical voca-  
tional rehabilitation program in the Florida  
Department of Health and Rehabilitative  
Services has been horizontally dismembered.

The Rehabilitation Act of 1973, P.L. 93-112,  
29 U.S.C. 721, expressly requires that there  
be an organizational unit in the State agency  
devoted primarily to the vocational rehabili-  
tation program or vocational and other re-  
habilitation. Regulations implementing these  
statutory provisions specify that the State  
plan must provide for "clear lines of  
administrative and supervisory authority"  
45 CFR 1361.7(a)(2). Florida's State plan  
does not so provide. All decisions affecting  
eligibility for, and the scope and provision  
of rehabilitation services must be made  
through the vocational rehabilitation unit,  
45 CFR 1361.7(b)(1).

7. The foregoing requirements of the Re-  
habilitation Act of 1973, P.L. 93-112, 29  
U.S.C. 721, were communicated to Governor  
Askew of Florida and other State officials in  
a telegram from the Department of Health,  
Education, and Welfare's Regional Director,  
Dr. Frank Groschelle, dated May 1, 1975  
in advance of enactment of the Florida  
Reorganization Act of 1975.

8. The proposed Florida State Plan for  
Fiscal Year 1976, seriously limits the re-  
sponsibility and authority of the Director  
of the vocational rehabilitation organiza-  
tional unit, i.e., the Vocational Rehabil-  
itation Program Office, in administering the  
vocational rehabilitation program in viola-  
tion of Title I of the Rehabilitation Act of  
1973, P.L. 93-112, 29 U.S.C. § 721 and im-  
plementing regulations 45 CFR 1361.7 and  
1361.8 in that the program director is not  
given sufficient authority to administer the  
program and in addition no clear lines of  
authority are established in violation of 45  
CFR 1361.7.

9. The proposed Florida State Plan for  
Fiscal Year 1976 seriously limits the respon-  
sibility and authority of the Director of the  
State Vocational Rehabilitation Program Of-  
fice in the district vocational rehabilitation  
programmatic activities relating to the in-  
terpretation, execution and enforcement of  
implementing plans, policies, procedures and  
corrective action efforts since the district  
administrator is the official responsible for  
all line operations within each district in  
violation of Title I of the Rehabilitation Act  
of 1973, P.L. 93-112, 29 U.S.C. § 721 and  
implementing regulations including, but not  
limited to 45 CFR 1361.6, 1361.7 and 1361.10.

10. The proposed Florida State Plan for  
Fiscal Year 1976, Attachment 3.3(a)(A),  
page 11 of 16, fails to give the Director of  
the Vocational Rehabilitation Program Of-  
fice the responsibility and authority for the  
selection, evaluation and termination of the  
vocational rehabilitation staff in the eleven  
district offices up to and including the Dis-  
trict Vocational Rehabilitation Program  
Supervisor, who is the Chief Vocational Re-  
habilitation person in each district office and  
operates under the line authority of the  
district administrator who is under the As-  
sistant Secretary for Operations, in violation  
of Title I of the Rehabilitation Act of 1973,

as amended, P.L. 93-112, 29 U.S.C. § 721 and  
implementing regulations, including particu-  
larly 45 CFR 1361.7.

11. The proposed Florida State Plan for  
Fiscal Year 1976, Attachment 3.3(a)(A), page  
11 of 16, fails to give the Director of the Vo-  
cational Rehabilitation Program Office the  
responsibility for determining personnel  
needs and the utilization of personnel within  
and among districts so that he lacks control  
over key personnel management of the Vo-  
cational Rehabilitation staff who deliver Vo-  
cational Rehabilitation services, in viola-  
tion of Title I of the Rehabilitation Act of  
1973, as amended, P.L. 93-112, 29 U.S.C. § 721  
and implementing regulations including particu-  
larly 45 CFR 1361.7.

12. The proposed Florida State Plan for  
Fiscal Year 1976, Attachment 3.3(a)(A),  
pages 10 and 11 of 16, fails to give the Direc-  
tor of the Vocational Rehabilitation Program  
Office the responsibility and authority for  
Vocational Rehabilitation district level  
budget development, approval and execution  
as well as initiation and approval of budget  
adjustments within and among districts  
during the course of the fiscal year, in viola-  
tion of Title I of the Rehabilitation Act of  
1973, as amended, P.L. 93-112, 29 U.S.C. § 721  
and implementing regulations, including  
particularly 45 CFR 1361.7.

13. The proposed Florida State Plan for  
Fiscal Year 1976, Attachment 3.3(a)(A), page  
13 of 16, fails to give the Director of the Vo-  
cational Rehabilitation Program Office the  
authority to approve district cooperative  
agreements in the developing and concluding  
stages for consistency with State goals and  
statewide, in violation of Title I of the  
Rehabilitation Act of 1973, as amended, P.L.  
93-112, 29 U.S.C. § 721 and implementing regu-  
lations, including particularly 45 CFR  
1361.7.

Wherefore, the General Counsel prays that  
a recommendation be made to the Commis-  
sioner, RSA, finding that the proposed Flor-  
ida State Plan for FY 1976 does not meet the  
requirements of the Rehabilitation Act of  
1973, as amended, P.L. 93-112, 29 U.S.C. § 721  
and implementing regulations 45 CFR 1361.

For the General Counsel, Department of  
Health, Education, and Welfare.

CARL H. HARPER,

Attorney.

HARRY F. McDONAGH,

Assistant Regional Attorney.

EVE H. GOLDSTEIN,

Assistant Regional Attorney.

Department of Health, Education, and Wel-  
fare, Room 323, 50 Seventh Street, N.E., At-  
lanta, Georgia 30323.

CERTIFICATION OF SERVICE

We hereby certify that we caused one  
copy of the attached document to be  
mailed this date to the following persons  
at the addresses given:

William J. Page, Jr., Secretary, Florida De-  
partment of Health and Rehabilitative  
Services, 1323 Winewood Boulevard, Tal-  
lahassee, Florida 32301.

Reubin Askew, Governor, State of Florida,  
State Capitol, Tallahassee, Florida 32304.  
David St. John, General Counsel, Florida De-  
partment of Health and Rehabilitative  
Services, 1323 Winewood Boulevard, Tal-  
lahassee, Florida 32301.

Robert Shevin, State Attorney General, State  
Capitol, Tallahassee, Florida 32304.

We further certify that we caused the  
original and two copies of the aforemen-  
tioned document to be filed with:

Rehabilitation Services Administration Hearing Clerk, Department of Health, Education, and Welfare, Peachtree Seventh Building, Room 713, 50 Seventh Street, N.E., Atlanta, Georgia 30323.

Dated: May 2, 1976.

CARL H. HARPER,  
Regional Attorney.

HARRY F. McDONAGH,  
Assistant Regional Attorney.

EVE H. GOLDSTEIN,  
Assistant Regional Attorney.

Department of Health, Education, and Welfare, Room 223, 50 Seventh Street, N.E., Atlanta, Georgia 30323.

Ad Hoc Rules of Practice and Procedure for Hearings on Conformity of State Plans for Vocational Rehabilitation Services with Federal Requirements under Title I of the Rehabilitation Act of 1973, as amended.

adopted by the Rehabilitation Services Administration for hearing the appeal of the State of Florida on the intended disapproval of its proposed Fiscal Year 1976 State Plan for VR under Title I of the Rehabilitation Act of 1973, as amended.

- I. General.

- J. Record for decision.

IV. Posthearing Procedures, Decisions.

- A. Posthearing briefs.
- B. Decisions following hearing.
- C. Effective date of Commissioner's decision.

I. General.

- A. Scope of rules.

(1) The rules of procedure in this part govern the practice for the hearing afforded by the Commissioner, Rehabilitation Services Administration to the State of Florida pursuant to section 101(b) of the Rehabilitation Act of 1973, as amended, and section 1361.4 of the implementing regulations.

(2) Nothing in this part is intended to preclude or limit negotiations between the Rehabilitation Services Administration and the State, whether before, during, or after the hearing to resolve the issues which are, or otherwise would be, considered at the hearing. Such negotiations and resolution of issues are not part of the hearing, and are not governed by the rules in this part, except as expressly provided herein.

B. Definition.

For purposes of these rules of practice and procedure, the term "State plan" shall include either approved or proposed State plans, as appropriate.

C. Records to be public.

All pleadings, correspondence, exhibits, transcripts of testimony, exceptions, briefs,

decisions, and other documents filed in the docket in these proceedings may be inspected and copied in the office of the Rehabilitation Services Administration Hearing Clerk, Inquiries may be made to Director, Office of Rehabilitation Services, Department of Health, Education, and Welfare, 50 Seventh Street, N.E., Room 737-A, Atlanta, Georgia 30323.

D. Use of number.

As used in these rules, words importing the singular number may extend and be applied to several persons or things, and vice versa.

E. Suspension of rules.

Upon notice to all parties, the Commissioner or presiding officer, with respect to matters pending before him and within his jurisdiction, may modify or waive any rule in this part upon determination that no party will be unduly prejudiced and the ends of justice will thereby be served.

F. Filing and service of papers.

All papers in the proceedings shall be filed with the RSA Hearing Clerk, in an original and two copies. Originals only of exhibits and transcripts of testimony need to be filed. All papers in the proceedings shall be served on all parties by personal delivery or by mail. Service on the party's designated attorney will be deemed service upon the party.

II. Preliminary Matters—Notice and Parties.

A. Notice of hearing or opportunity for hearing.

Proceedings are begun by mailing a notice of hearing or opportunity for hearing from the Commissioner, Rehabilitation Services Administration to the State. The notice shall include a Statement of Deficiencies. The notice shall state the time and place for the hearing, and the issues which will be considered, and shall be published in the FEDERAL REGISTER.

B. Answer to Statement of Deficiencies.

The State shall file an answer to the Statement of Deficiencies within 20 days after service thereof. Answers shall admit or deny specifically and in detail each allegation of the Statement of Deficiencies, unless the State is without knowledge, in which case its answer should so state, and the statement will be deemed a denial. Allegations of fact in the Statement not denied or controverted by answer shall be deemed admitted. Matters alleged as affirmative defenses shall be separately stated and numbered. Failure of the State to file an answer within the 20-day period following service of the Statement of Deficiencies may be deemed an admission of all matters of fact recited in the Statement.

C. Time of hearing.

The hearing shall be scheduled by the Commissioner within a reasonable time but no more than 90 days after the date notice of the hearing is furnished to the State.

D. Place.

The hearing shall be held in the city in which the Regional Office of the Department is located or in such other place as is fixed by the Commissioner in light of the circumstances of the case with due regard to the convenience and necessity of the parties or their representatives, including accessibility of the building to the physically handicapped.

E. Issues at hearing.

(1) (a) The General Counsel of the Department may amend the Statement of Deficiencies once as a matter of course before an answer thereto is served, and the State may amend its answer once as a matter of course not later than 10 days before the date fixed for hearing but in no event later than 20 days from the date of service of its original answer. Otherwise the Statement or answer may be amended only by leave of the presiding officer. The State shall file its answer to an amended statement within the

time remaining for filing the answer to the original statement or within 10 days after service of the amended Statement, whichever period may be the longer, unless the presiding officer otherwise orders. Amendments pursuant to this paragraph do not have to be published in the FEDERAL REGISTER.

(1) (b) If such amended Statement is furnished to the State less than 20 days before the date of the hearing, the State or any other party at its request may be granted a postponement of the hearing by the presiding officer, in accordance with Section III (B) (1) (a) of the rules.

(2) If, as a result of negotiations between the RSA and the State, the submittal of an annual State plan for vocational rehabilitation under Title I of the Rehabilitation Act, as amended or a plan amendment, any issue is resolved in whole or in part, but new or modified issues are presented, as specified by the Commissioner, the hearing shall proceed on such new or modified issues.

(3) If at any time, whether prior to, during, or after the hearing, the Commissioner finds that the State has come into conformity with Federal requirements on any issue, in whole or in part, he shall remove such issue from the proceedings in whole or in part as may be appropriate. If all issues are removed, he shall terminate the hearing.

(4) The issues considered at the hearing shall be limited to those issues of which the State is notified as provided in Section II (A) and II (E) (1) (a) of these procedures, and new or modified issues described in Section II (E) (2) and shall not include issues or parts of issues removed from the proceedings pursuant to Section II (E) (3).

(5) Prior to the removal of any issue from the hearing, in whole or in part, the Commissioner, RSA shall provide all parties other than Rehabilitation Services Administration and the State with the statement of his intention, and the reasons therefor, and a copy of the State plan or provision on which the State and he have settled, and the parties shall have opportunity to submit in writing within 15 days, for the Commissioner's consideration and for the record, their views as to, or any information bearing upon, the merits of the plan or provision and the merits of the Commissioner's reasons for removing the issue from the hearing.

F. Request to participate in hearing.

(1) The Rehabilitation Services Administration and the State are parties to the hearing without making a specific request to participate.

(2) (a) Other individuals or groups may be recognized as parties, if the issues to be considered at the hearing have caused or will cause them injury and their interest is within the zone of interests to be protected by governing Federal statute.

(2) (b) Any individual or group wishing to participate as a party shall file a petition with the RSA Hearing Clerk within 15 days after notice of the hearing has been published in the FEDERAL REGISTER, and shall serve a copy on each party of record at that time, in accordance with Section I (F) of these procedures. Such petition shall concisely state (i) petitioner's interest in the proceedings, (ii) who will appear for petitioner, (iii) the issues on which petitioner wishes to participate, and (iv) whether petitioner intends to present witnesses.

(2) (c) Any party may within 5 days of receipt of such petition, file comments thereon.

(2) (d) The presiding officer shall promptly determine whether each petitioner has the requisite interest in the proceedings and shall permit or deny participation accordingly. Where petitions to participate as parties are made by individuals or groups with common interests, the presiding officer may request all such petitioners to designate a single representative, or he may recognize

one or more of such petitioners to represent all such petitioners. The presiding officer shall give each petitioner written notice of the decision on his petition, and if the petition is denied, he shall briefly state the grounds for denial.

(3) (a) Any interested person or organization wishing to participate as amicus curiae shall file a petition with the RSA Hearing Clerk before the commencement of the hearing. Such petition shall concisely state (i) the petitioner's interest in the hearing, (ii) who will represent the petitioner, and (iii) the issues on which petitioner intends to present argument. The presiding officer may grant the petition if he finds that the petitioner has a legitimate interest in the proceedings, that such participation will not unduly delay the outcome and may contribute materially to the proper disposition of the issues. An amicus curiae is not a party but may participate as provided in this paragraph.

(3) (b) An amicus curiae may present a brief oral statement at the hearing at the point in the proceedings specified by the presiding officer. He may submit a written statement of position to the presiding officer prior to the beginning of a hearing and shall serve a copy on each party. He may also submit a brief or written statement at such time as the parties submit briefs, and shall serve a copy on each party.

III. Hearing Procedures

A. Who presides.

(1) The presiding officer at this hearing shall be a hearing officer designated by the Commissioner.

(2) The resignation of the presiding officer shall be in writing. A copy of the designation shall be served on all parties.

B. Authority of presiding officer.

(1) The presiding officer shall have the duty to conduct a fair hearing, avoid delay, maintain order, and make a record of the proceedings. He shall have all powers necessary to accomplish these ends including, but not limited to, the power to:

(a) Change the date, time, and place of the hearing, upon due notice to the parties. This includes the power to continue the hearing in whole or in part.

(b) Hold conferences to settle or simplify the issues in these proceedings, or to consider other matters that may aid in the expeditious disposition of the proceedings.

(c) Regulate participation of parties and amici curiae and require parties and amici curiae to state their position with respect to the various issues in the proceedings.

(d) Administer oaths and affirmations.

(e) Rule on motions and other procedural items on matters pending before him, including issuance of protective orders or other relief to a party against whom discovery is sought.

(f) Regulate the course of the hearing and conduct of counsel therein.

(g) Examine witnesses.

(h) Receive, rule on, exclude, or limit evidence or discovery.

(i) Fix the time for filing motions, petitions, briefs, or other items in matters pending before him.

(j) Certify the entire record including his recommended findings and proposed decision to the Commissioner.

(k) Take any action authorized by the rules in this part or in conformance with the provisions of 5 U.S.C. 551-559.

(2) The presiding officer does not have authority to compel by subpoena the production of witnesses, papers, or other evidence.

(3) The presiding officer's authority pertains to the issues of conformity by a State with Federal requirements which are to be considered at the hearing, and does not extend to the question of whether in case

of any nonconformity, Federal payments will be made with respect to the entire State plan or will be limited to categories under or parts of the State plan affected by such nonconformity.

C. Discovery.

The Rehabilitation Services Administration and any party named in the Notice issued under section II (A) or joined pursuant to section II (F), shall have the right to conduct discovery (including depositions) against opposing parties. Rules 26-37 of the Federal Rules of Civil Procedure shall apply to such proceedings; there will be no fixed rule on priority of discovery. Upon written motion, the presiding officer shall promptly rule upon any objection to such discovery action initiated pursuant to this section. The presiding officer shall also have the power to grant a protective order or relief to any party against whom discovery is sought and to restrict or control discovery so as to prevent undue delay in the conduct of the hearing. Upon the failure of any party to make discovery, the presiding officer may, in his discretion, issue any order and impose any sanction (other than contempt orders) authorized by Rule 37 of the Federal Rules of Civil Procedure.

D. Rights of Parties.

All parties may:

(1) Appear by counsel or other authorized representative, in all hearing proceedings.

(2) Participate in any prehearing conference held by the presiding officer.

(3) Agree to stipulations as to facts which will be made a part of the record.

(4) Make opening statements at the hearing.

(5) Present relevant evidence on the issues at the hearing.

(6) Present witnesses who then must be available for cross-examination by all other parties.

(7) Present oral arguments at the hearing.

(8) Submit written briefs, proposed findings of fact, and proposed conclusions of law, after the hearing.

E. Evidentiary purpose.

The hearing is directed to receiving factual evidence and expert opinion testimony related to the issues in the proceedings. Argument will not be received in evidence; rather it should be presented in statements, memoranda, or briefs, as determined by the presiding officer. Brief opening statements, which shall be limited to statement of the party's position and what he intends to prove, may be made at the hearing.

F. Evidence.

(1) Testimony. Testimony shall be given orally under oath or affirmation by witnesses at the hearing. Witnesses shall be available at the hearing for cross-examination by all parties.

(2) Stipulations and exhibits. Two or more parties may agree to stipulations of fact. Such stipulations, or any exhibit proposed by any party, shall be exchanged at a prehearing conference or otherwise prior to the hearing if the presiding officer so requires.

(3) Rules of evidence. Technical rules of evidence shall not apply to this hearing, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where reasonably necessary by the presiding officer. A witness may be cross-examined on any matter material to the proceedings without regard to the scope of his direct examination. The presiding officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the parties and opportunity shall be given to refute facts and arguments advanced on either side of the issues.

G. Exclusion from hearing for misconduct. Disrespectful, disorderly, or contemptuous language or contemptuous conduct, refusal to comply with directions, or continued use of dilatory tactics by any person at the hearing before a presiding officer shall constitute grounds for immediate exclusion of such person from the hearing by the presiding officer.

H. Unpublished written material.

Letters expressing views or urging action and other unpublished written material regarding matters in issue in this hearing will be placed in the correspondence section of the docket of the proceedings. These data are not deemed part of the evidence or record in the hearing.

I. Official transcript.

The RSA will designate the official reporter for the hearing. The official transcript of testimony taken, together with any stipulations, exhibits, briefs, or memoranda of law filed therewith shall be filed with the RSA. Transcript of testimony in the hearing, may be obtained from the official reporter by the parties and the public at rates not to exceed the maximum rates fixed by the contract between the RSA and the reporter. Upon notice to all parties, the presiding officer may authorize corrections to the transcript which involve matters of substance.

J. Record for decision.

The transcript of testimony, exhibits, and all papers and requests filed in the proceedings, except the correspondence section of the docket, including rulings and any recommended or initial decision, shall constitute the exclusive record for the decision.

IV. Posthearing Procedures, Decisions

A. Posthearing briefs.

The presiding officer shall fix the time for filing posthearing briefs, which may contain proposed findings of fact and conclusions of law, and, if permitted, reply briefs.

B. Decisions following hearing.

(1) The presiding officer shall no later than 30 days after submission of posthearing briefs has expired, certify the entire record, including his recommended findings and proposed decision, to the Commissioner. The Commissioner shall serve a copy of the recommended findings and proposed decision upon all parties, and amici, if any.

(2) Any party may, within 20 days, file with the Commissioner exceptions to the recommended findings and proposed decision and a supporting brief or statement. The Commissioner shall offer opportunity for all parties to appear before him and present their views on the recommended findings and proposed decision.

(3) The Commissioner shall thereupon review the recommended decision and, within 60 days of its issuance, issue his own decision.

(4) If the Commissioner concludes that a State plan does not conform with Federal requirements, he shall specify what action shall be taken including, if applicable, whether further payments will be made to the State or whether, in the exercise of his discretion, payments will be limited to categories under or parts of the State plan not affected by such nonconformity. The Commissioner may ask the parties for recommendations or briefs or may hold conferences of the parties on this question.

(5) The decision of the Commissioner under this section shall be the final decision and shall constitute "final agency action" within the meaning of 5 U.S.C. 704 and a "final determination" within the meaning of section 101 (b) and (c) of the Act and implementing regulations. The Commissioner's decision shall be promptly served on all parties, and amici, if any.

C. Effective date of Commissioner's decision.

If the Commissioner concludes that a State plan does not conform with Federal requirements, his decision that further payments will not be made to the State, or that payments will be limited to categories under or parts of the State plan not affected, shall specify the effective date for the withholding of Federal funds. The effective date shall not be earlier than the date of the Commissioner's decision and shall not be later than the first day of the next calendar quarter. The provisions of this section may not be waived pursuant to section I(E).

Rehabilitation Services Administration,  
Office of Human Development.

Dated: May 12, 1976.

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

### Office of the Secretary

[Docket No. D-76-431]

### REGIONAL COUNSEL

#### Designation and Delegation of Authority

I hereby designate the Regional Counsel, Region V, to act in my stead, with authority to receive and act upon inquiries, requests for access and requests for correction or amendment of records under the Privacy Act of 1974, enacted December 31, 1974 as PL 93-579. The authority for this designation is 40 FR 39729 (August 28, 1975), as amended by 41 FR 13917 (April 1, 1976).

Effective date: This designation and delegation shall be effective as of April 19, 1976.

DON MORROW,  
Regional Administrator,  
Region V (Chicago).

## ADVISORY COUNCIL ON HISTORIC PRESERVATION

### PUBLIC INFORMATION MEETING

Notice is hereby given in accordance with the Federal Advisory Committee Act (P.L. 92-463) and § 800.5(c) of the Advisory Council's "Procedures for the Protection of Historic and Cultural Properties" (36 CFR Part 800) that on June 17, 1976, at 7:30 p.m., a public information meeting will be held in the Council Chambers at the Mishawaka City Hall, 204 East First Street, Mishawaka, Indiana. The purpose of this meeting is to provide an opportunity for representatives of national, State, and local units of government, representatives of public and private organizations and interested citizens to receive information and express their views on the proposed Mishawaka Neighborhood Development Program A-5, Area No. 2 (Central Business District) as it affects the 100 NW Block, Mishawaka, Indiana, a property included in the National Register of Historic Places.

A summary of the agenda of the public information meeting follows:

I. An explanation of the procedures and purpose of the meeting by a representative of the Executive Director of the Advisory Council.

II. An explanation of the undertaking and an evaluation of its effects on the property by the U.S. Department of Housing and Urban Development.

III. A statement by the Indiana State Historic Preservation Officer.

IV. Statements from local officials, private organizations, and the public on the effects of the undertaking on the property.

V. A general question period.

Speakers should limit their statements to approximately 10 minutes. Written statements in furtherance of oral remarks will be accepted by the Council at the time of the meeting. Additional information regarding the meeting is available from the Executive Director, Advisory Council on Historic Preservation, 1522 K Street, N.W., Suite 430, Washington, D.C. 20005 (202-254-3380).

ROBERT R. GARVEY, Jr.,  
Executive Director.

## CIVIL AERONAUTICS BOARD

[Order 76-5-83; Docket 27573, Agreement C.A.B. 25791 R-1 and R-2, Agreement C.A.B. 25792 R-1 through R-7, Agreement C.A.B. 25808, Agreement C.A.B. 25809 R-1 through R-3, Agreement C.A.B. 25812 R-1 through R-4, Agreement C.A.B. 25813 R-1 through R-4, Agreement C.A.B. 25816 R-1 through R-5]

### INTERNATIONAL AIR TRANSPORT ASSOCIATION

#### Agreements Relating to Cargo Rate Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 19th day of May 1976.

### ORDER

Agreements have been filed with the Board, pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act)

Agreement CAB	IATA No.	Title	Application
25791: R-1.....	022b	Expedited JT23/JT123 Special Rules for Sales of Cargo Air Transportation (Amending).....	2/3; 1/2/3.
25792: R-2..... R-3..... R-7.....	001LL 022k 001LL	Expedited Special Currency Escape Resolution—Mid Atlantic (New)..... Expedited—JT12 (Mid Atlantic) Special Rules for Sales of Cargo Air Transportation (Amending)..... Expedited Special Currency Escape Resolution—JT23/JT123 (New).....	1/2. 1/2. 2/3; 1/2/3.

Agreement CAB	IATA resolution
25808.....	100, 200, 300, JT12, JT23, JT31, JT123 (Mail) 513.

Agreement CAB	IATA No.	Title	Application
25809: R-1..... R-2.....	022a 0221i	TC3 Special Rules for Sales of Cargo Air Transportation (Amending)..... JT12 (Mid and South Atlantic) Special Rules for Sales of Cargo Air Transportation (Amending).....	3. 1/2.
25813: R-1..... R-2.....	022b 022mm	JT23/JT123 Special Rules for Sales of Cargo Air Transportation (Amending)..... JT23/JT123 Special Rules for Sales of Cargo Air Transportation (Amending).....	2/3; 1/2/3. 2/3; 1/2/3.

2. It is not found that the following resolutions, incorporated in the agreements indicated, and which indirectly affect air transportation as defined by the Act, are adverse to the public interest or in violation of the Act:

and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreements were adopted at the Composite Cargo Conference held in Geneva during March/April 1976.

The agreements would increase cargo rates within and between Traffic Conferences 2 (Europe/Middle East/Africa) and 3 (Far East/Australasia) by varying amounts through September 30, 1977, and would also amend ancillary currency adjustment resolutions in various areas. Additionally, Resolution 513 (Charges on Mixed Consignments) would be amended to provide, on a worldwide basis, that all restricted articles in a consignment be described on the face of the airway bill as well as on the extension list. We will herein approve all resolutions establishing rates between foreign points which are combinable with rates to/from U.S. points and which thus affect air transportation as defined by the Act. Jurisdiction will be disclaimed regarding non-combinable rates. The ancillary resolutions directly affecting U.S. points will be approved herein, but insofar as rate resolutions propose rate increases to/from the U.S. points Guam and American Samoa, they will be acted on at a later date in conjunction with overall trans-Pacific cargo agreements now pending before the Board.

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, makes the following findings:

1. It is not found that the following resolutions, incorporated in the agreements indicated, and which directly affect air transportation as defined by the Act, are adverse to the public interest or in violation of the Act:

Agreement CAB	IATA No.	Title	Application
25792: R-1..... R-4..... R-5..... R-6.....	001LL 554b 001LL 022L	Expedited Currency Escape Resolution—TC2 (New)..... Expedited Mid Atlantic General Cargo Rates (Amending)..... Expedited Special Currency Escape Resolution—South Atlantic (New)..... Expedited JT12 (South Atlantic) Special Rules for Sales of Cargo Air Transportation (Amending).....	2. 1/2. 1/2. 1/2.
25812: R-1..... R-3..... R-4.....	005f 022L 501	General Increases in Cargo Rates (New)..... JT12 (South Atlantic) Special Rules for Sales of Cargo Air Transportation (Amending)..... Minimum Charges for Cargo—South Atlantic (Amending).....	1/2 (South Atlantic). 1/2. 1/2.
25816: R-1..... R-2..... R-3..... R-5.....	023kk 022m 501 005ee	TC2 Special Rules for Sales of Cargo Air Transportation (Amending)..... TC2 Special Rules for Sales of Cargo Air Transportation (Amending)..... Minimum Charges for Cargo (Amending)..... TC2 General Increases in Cargo Rates (New).....	2. 2. 2. 2.

3. It is not found that the following agreements, incorporated in the agreements indicated, are adverse to the public interest or in violation of the Act to the extent they would establish rates wholly between foreign points, and thus indirectly affect air transportation as defined by the Act:

Agreement CAB	IATA No.	Title	Application
25791: R-2..... 25809: R-2..... R-3..... 25813: R-3..... R-1.....	555 501 005dd 501 005hh	Expedited JT23 and JT123 General Cargo Rates (Amending)..... Minimum Charges for Cargo (Amending)..... General Increase in Cargo Rates (New)..... Minimum Charges for Cargo (Amending)..... General Increase in Cargo Rates (New).....	2/3; 1/2/3. 3. 3. 2/3; 1/2/3. 2/3; 1/2/3.

4. It is not found that the following resolution, incorporated in the agreement indicated, affects air transportation as defined by the Act:

Agreement CAB	IATA No.	Title	Application
25816: R-1.....	521e	Shipper Packed Unit Rates (Amending).....	2

Accordingly, it is ordered, That:

1. Those portions of Agreements C.A.B. 25791, C.A.B. 25792, C.A.B. 25808, C.A.B. 25809, C.A.B. 25812, C.A.B. 25813, and C.A.B. 25816 set forth in finding paragraphs 1 and 2 above be and hereby are approved;

2. Those portions of Agreements C.A.B. 25791, C.A.B. 25809, and C.A.B. 25813 set forth in finding paragraph 3 above be and hereby are approved insofar as they would establish rates wholly between foreign points; and

3. Jurisdiction be and hereby is disclaimed with respect to that portion of Agreement C.A.B. 25816 set forth in finding paragraph 4 above.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] PHYLLIS T. KAYLOR,  
Acting Secretary.

[Docket 28970]

### TRANS WORLD AIRLINES, INC. Enforcement Proceeding, Postponement of Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that the hearing in this proceeding, now scheduled to be held on May 18, 1976 (41 F.R. 15362, April 12, 1976), is hereby postponed to

June 3, 1976, at 9:30 a.m., (local time) in Room 1003, Hearing Room D, Universal Building, 1875 Connecticut Avenue, N.W., Washington, D.C.

Dated at Washington, D.C., May 18, 1976.

[SEAL] RONNIE A. YODER,  
Administrative Law Judge.

[FR Doc.76-15242 Filed 5-24-76; 8:45 am]

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS EXEMPT COTTON, WOOL AND MAN-MADE FIBER TEXTILE PRODUCTS FROM THE REPUBLIC OF KOREA

### Officials Authorized To Issue Export Visas and Certifications

MAY 20, 1976.

On May 11, 1976, there was published in the FEDERAL REGISTER (41 F.R. 19252), a letter dated May 6, 1976 from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs, announcing that, effective on April 15, 1976, Mr. Park Young Dow, Chief, Quota Management Division, Ministry of Commerce and Industry, would be the official authorized by the Government of the Republic of Korea to issue export visas and certifications for exempt textile products from the Republic of Korea, replacing Mr. Yoo Ho Min. The purpose of this notice is to announce that, at the request of the Government of the Republic of Korea,

goods covered by visas or exempt certifications issued by Mr. Minn between April 15 and May 20, 1976 will not be denied entry.

Accordingly, there is published below a letter of May 20, 1976 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs implementing this action.

ALAN POLANSKY,  
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

### COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

MAY 20, 1976.

COMMISSIONER OF CUSTOMS,  
Department of the Treasury,  
Washington, D.C. 20229.

DEAR MR. COMMISSIONER: This directive amends, but does not cancel, the directive of May 6, 1976 from the Chairman of the Committee for the Implementation of Textile Agreements which authorized Mr. Park Young Dow, effective on April 15, 1976, to issue export visas and certifications for exempt cotton, wool, or man-made fiber textile products exported from the Republic of Korea, replacing Mr. Yoo Ho Min.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to the provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 26, 1975, as amended, between the Governments of the United States and the Republic of Korea, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, the directive of May 6, 1976 is hereby amended to authorize entry into the United States for consumption of goods exported from the Republic of Korea which are covered by visas or exempt certifications issued by Mr. Yoo Ho Min during the period April 15 through May 20, 1976.

The actions taken with respect to the Government of the Republic of Korea and with respect to imports of cotton, wool and man-made fiber textile products from the Republic of Korea have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ALAN POLANSKY,  
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

[FR Doc.76-15210 Filed 5-24-76; 8:45 am]

## CONSUMER PRODUCT SAFETY COMMISSION

### TECHNICAL ADVISORY COMMITTEE ON POISON PREVENTION PACKAGING Meeting

Notice is given that the Technical Advisory Committee on Poison Prevention Packaging will meet on June 15, 1976

(9:00 a.m. to 5:00 p.m.) and June 16, 1976 (9:00 a.m. to 12 Noon) at the Consumer Product Safety Commission, 1750 K Street, N.W., 6th Floor Conference Room.

The purpose of the Technical Advisory Committee is to provide advice and recommendations on the types and kinds of packaging that will protect children from injury or illness resulting from handling or ingestion of household substances.

The agenda for the June 15 meeting will include a discussion of outstanding petitions and the regulations covering ammonia. The afternoon session of the meeting will be devoted to further discussion of adult protocol.

On Wednesday, June 16, there will be a discussion of consumer oriented programs of the Consumer Product Safety Commission and presentation of certificates to the outgoing members of the Committee.

Persons wishing to make oral or written presentations to the Committee should notify the Secretary of the Consumer Product Safety Commission at least five days in advance of the meeting. The meeting is open to the public, however, space is limited. Further information concerning this meeting may be obtained from the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207, phone (202) 634-7700.

Dated: May 19, 1976.

SADYE E. DUNN,  
Secretary, Consumer Product  
Safety Commission.

[FR Doc. 76-15168 Filed 5-24-76; 8:45 am]

## ENVIRONMENTAL PROTECTION AGENCY

[FRL 547-7; OPP-42011A]

### COMMONWEALTH OF PENNSYLVANIA

#### Approval of State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), and the implementing regulations of 40 CFR Part 171 require each State desiring to certify applicators to submit a plan for its certification program under this section shall be maintained in accordance with the State Plan approved under this section.

On March 4, 1976, notice was published in the FEDERAL REGISTER (41 FR 9418) of the intent of the Regional Administrator, EPA Region III, to approve, on a contingency basis, the Commonwealth of Pennsylvania State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides (Pennsylvania State Plan). Contingency approval was requested by the Commonwealth of Pennsylvania pending promulgation of regulations pursuant to the "Pennsylvania Pesticide Control Act of 1973". Complete copies of the Pennsylvania State Plan were made available for public inspection at the Agency's Region

III office in Philadelphia, Pennsylvania, at the Bureau of Plant Industry, Pennsylvania Department of Agriculture, Harrisburg, Pennsylvania, and at the Agency's Technical Services Division, Federal Register Section, Office of Pesticide Programs, EPA Headquarters, Washington, D.C.

There were no comments received concerning the State Plan during the 30 day comment period.

The Pennsylvania State Plan will remain available for public inspection at Room 102, Agriculture Office Building, 2301 N. Cameron Street, Harrisburg, Pennsylvania.

It has been determined that the Pennsylvania State Plan will satisfy the requirements of Section 4(a)(2) of the amended FIFRA and of 40 CFR Part 171 if proposed regulations implementing the Pennsylvania Pesticide Control Act of 1973 are promulgated by the Pennsylvania Department of Agriculture. Accordingly, the Pennsylvania State Plan is approved contingent upon promulgation of implementing regulations in accordance with and as prescribed in the Pennsylvania State Plan.

This contingency approval shall expire one (1) year from its effective date, if these terms and conditions are not satisfied by that time. On or before the expiration of the period of contingency approval, a notice shall be published in the FEDERAL REGISTER concerning the extent to which these terms and conditions have been satisfied, and the approval status of the Pennsylvania State Plan as a result thereof.

Effective date: Pursuant to Section 4(d) of the Administrative Procedures Act, 5 U.S.C. 553(d), the Agency finds that there is good cause for providing that the one year contingency approval granted herein to the Pennsylvania State Plan shall be effective immediately. Neither the Pennsylvania State Plan itself nor this Agency's contingency approval of the Plan create any direct or immediate obligations on pesticide applicators or other persons in the Commonwealth of Pennsylvania. Delays in starting the work necessary to implement the Plan, such as may be occasioned by providing some later effective date for this contingency approval, are inconsistent with the public interest. Accordingly, this contingent approval shall become effective immediately.

Dated: April 15, 1976.

A. R. MORRIS,  
Acting Regional Administrator.

[FRL 548-2]

#### HEALTH RISK AND ECONOMIC IMPACT ASSESSMENTS OF SUSPECTED CARCINOGENS

##### Interim Procedures & Guidelines

In issuing the Interim Procedures and Guidelines for Health Risk and Economic Impact Assessments of Suspected Carcinogens, I think it appropriate to state once again EPA's approach to regulatory action for suspect carcinogens.

Cancer is the second ranking cause of death in this country; it has a particularly severe impact on the affected individuals and their families in terms of physical and mental suffering and economic costs. There is evidence that a substantial amount of human cancer is caused by chemical and physical agents in the environment. Bioassay programs, currently testing hundreds of substances, are beginning to show that some important industrial and agricultural chemicals are carcinogenic for animals and are, therefore, candidates for regulatory action.

The EPA, by law, has responsibility to regulate many agents which may either cause or promote the development of cancer. At present, EPA is charged with the responsibility to prohibit or restrict the use of carcinogenic pesticides. EPA also has authority to regulate those carcinogens which are emitted directly to the outside air by stationary sources (such as factories) and motor vehicles, or discharged into water from point sources, or found in drinking water. Other agencies such as the Occupational Safety and Health Administration and the Food and Drug Administration also have responsibilities to regulate carcinogens. It is important to emphasize that there are serious regulatory gaps which permit understandable exposure of the public to carcinogens. I have strongly advocated the passage of a toxic substances bill to help close those gaps.

Regulatory action against chemical carcinogens is relatively new. Until the late 1950's, no agents, either chemical or physical, had been regulated in this country on the basis of their carcinogenic action with the sole exception of ionizing radiation, which had been known to cause cancer since the turn of the century. Standards of permissible exposure to ionizing radiation were set by the arbitrary use of safety factors applied to exposure levels that were known to have produced damaging health effects. It was not assumed that these permissible exposure standards were safe but rather that they represented upper limits of exposure with the understanding that actual exposures were to be kept as low as possible. In the debate over the health effects of radioactive fallout from atomic weapons in the 1950's, the evidence for a no-threshold concept for cancer induction emerged, which supported the idea that there is no such thing as a completely safe dose; in other words any exposure, however small, will confer some risk of cancer on the exposed population.

Evidence has accumulated that indicates that the no-threshold concept can also be applicable to chemical carcinogens. On the basis of this concept, the first significant regulatory legislation relating to chemical carcinogens, the Delaney Clause of the Pure Food and Drug Act, imposed a complete ban on any food additive that showed evidence of tumorigenic activity for humans or animals. This statutory requirement represents the approach of eliminating all risk. However, it has become increasingly clear that in many areas risks cannot

be eliminated completely without unacceptable social and economic consequences.

Consonant with this view, the Federal Insecticide, Fungicide, Rodenticide Act (FIFRA), which is the enabling legislation for the control of health hazards for pesticides, requires a balancing of risks and benefits as the basis for final regulatory action. We, thus, have a comparable conceptual basis for the regulation of chemicals as for ionizing radiation where the philosophy has been to eliminate or reduce exposure to the greatest extent possible consistent with the acceptability of the costs involved.

I believe that it is important to emphasize the two-step nature of the decision-making process with regard to the regulation of a potential carcinogen. Although different EPA statutory authorities have different requirements, in general two decisions must be made with regard to each potential carcinogen. The first decision is whether a particular substance constitutes a cancer risk. The second decision is what regulatory action, if any, should be taken to reduce that risk.

With respect to the first decision—whether a particular substance constitutes a cancer risk—in very few cases is it possible to "prove" that a substance will cause cancer in man, because in most instances the evidence is limited to animal studies. In this regard, a substance will be considered a presumptive cancer risk when it causes a statistically significant excess incidence of benign or malignant tumors in humans or animals. However, the decision that a cancer risk may exist does not mean that the EPA will automatically take regulatory action. In the case of pesticides, the decision that a presumptive cancer risk exists will trigger the detailed and independent risk and economic assessments that form the basis for the second decision, namely, what, if any, regulatory action to take to eliminate or restrict the use of the pesticide. In other regulatory areas, for example those under the Clean Air Act, the Federal Water Pollution Control Act, or the Safe Drinking Water Act where a large number of suspect carcinogens may exist in the atmosphere or public water supplies, the detailed risk benefit assessment will, because of limited Agency resources, necessarily have to be carried out on a priority basis in terms of which agents appear to be the most important.

Once the detailed risk and benefit analyses are available, I must consider the extent of the risk, the benefits conferred by the substance, the availability of substitutes and the costs of control of the substance. On the basis of careful review, I may determine that the risks are so small or the benefits so great that no action or only limited action is warranted. Conversely, I may decide that the risks of some or all uses exceed the benefits and that stronger action is essential.

In considering the risks, it will be necessary to view the evidence for carcinogenicity in terms of a warning signal, the

strength of which is a function of many factors including those relating to the quality and scope of the data, the character of the toxicological response, and the possible impact on public health. It is understood that qualifications relating to the strength of the evidence for carcinogenicity may be relevant to this consideration because of the uncertainties in our knowledge of the qualitative and quantitative similarities of human and animal responses. In all events, it is essential in making decisions about suspect carcinogens that all relevant information be taken into consideration.

In my opinion, the current guidelines represent a significant improvement in the Agency's approach to the processes of decision-making for carcinogens by providing improved procedures for making risks and benefit assessments while providing the maximum opportunity for public review of the Agency's deliberations. However, while these guidelines should improve Agency procedures, I do not view them as representing a change in the Agency's cancer policy. Earlier regulatory decisions involving various pesticides were also based in each case on a comprehensive evaluation of the scientific evidence and a careful weighing of risks and benefits. These decisions in every instance resulted in selective control measures rather than a complete prohibition of use.

I want to emphasize that I will not permit these new procedural guidelines to unduly delay regulatory decision-making. I will be closely reviewing them to assure that they do not do so. If they do cause undue delay, they will be revised. I would like to point out that these guidelines provide a means of organizing available information rather than requirements for the acquisition of new information.

I believe that the approach presented here is a significant step toward the objective of achieving real benefits in improved public health while avoiding the burden of undesirable regulatory action. I recognize that the aspect of cancer research dealing specifically with the issues involved in decision-making is relatively undeveloped, but hopefully the commitment of this Agency and other Federal agencies to the development of new knowledge in this area will improve the scientific basis for regulatory decisions and that the Interim Procedures and Guidelines will thereby benefit from periodic revision.

I consider it extremely important that the leading government agencies work closely with each other and with experts outside the government in the field of carcinogenicity in the development of government procedures and policies concerning cancer. I am publishing these interim procedures and the guidelines in the FEDERAL REGISTER not only to provide public notice of the approach which EPA will be following in our current activities but also to stimulate commentary from all sources upon that approach. I am also furnishing copies of these Interim Procedures and Guidelines to and requesting the views of the Secretaries of Health,

Education, and Welfare, Interior, Labor, Commerce and Agriculture and also the Council on Environmental Quality, the National Academy of Sciences, the National Science Foundation, EPA's Pesticide Policy Advisory Committee and EPA's Science Advisory Board, among others. I also plan to meet personally with leading authorities in this area as part of a continuing process to discuss these cancer policies and exchange information and views.

RUSSELL TRAIN,  
Administrator.

MAY 19, 1976.

#### INTERIM ADMINISTRATIVE PROCEDURES FOR REGULATORY DECISIONS INVOLVING SUSPECTED CARCINOGENS

Procedures described in this paper provide a more uniform Agency approach to regulatory decisions involving cancer risk. Procedure A applies to pesticide decisions involving the cancellation, suspension and registration of potentially carcinogenic pesticides. Procedure B applies to other selected Agency decisions where the pivotal factor in the decision is cancer risk.

The purpose of these procedures is to assure that appropriate analyses of the risks and benefits of suspected carcinogenic chemicals are performed as part of the regulatory process. Appendices I and II establish guidelines for risk assessment and economic impact analyses. These guidelines are procedural guidelines and are not intended to affect the substantive regulatory standards of any statute. Therefore, the assessment of the risk posed by potentially carcinogenic substances will be made pursuant to the individual standards of the applicable statute and regulations. Furthermore, these analyses will be carried out within the constraints of Agency resources and will not delay actions by the Agency to address urgent environmental problems.

The Cancer Assessment Group (CAG) is an advisory body comprised of senior scientists from within the Agency with a liaison member from the Department of Health, Education and Welfare. It will also utilize, as appropriate, expert consultants and advisors from various Federal Agencies and the private sector. The CAG will conduct analyses of data related to risk and make recommendations to the lead program office and the appropriate Working Group concerning the risk associated with each suspect carcinogen. These analyses will be directed towards risk assessment and will be conducted independently of economic impact analyses. The CAG will also review the final risk assessment portion of the regulatory package.

##### APPLICABILITY

For all decisions involving the cancellation, suspension, reregistration and registration of potentially carcinogenic pesticides, Procedure A will be followed inclusive of the preparation of (1) a risk assessment pursuant to the interim guidelines contained in Appendix I and (2) an economic impact analysis pursuant to the interim guideline contained in Appendix II.

For the following rulemaking, where the pivotal factor in the decision is cancer risk, the procedures outlined in EPA Order 1000.6 will be followed, and in addition, a risk assessment pursuant to Appendix I will be prepared and will be reviewed in accordance with Procedure B:

1. Proposed regulations to augment the current list of toxic substances published

pursuant to Section 307(a) of the FWPCA and any standard proposed under this augmented list.

2. Primary drinking water regulations or revisions thereof under Section 1412 of SDWA.

3. Additions to or revisions of the water quality criteria (pursuant to Section 304(a) of FWPCA) currently pending publication, except that detailed exposure patterns and estimates of cancer risk need not be prepared.

4. Proposed technology-based regulations or revisions pursuant to Sections 301, 304, 305 307(b) and 307(c) of the FWPCA (proposed after April 1, 1977), and Section 111 of the CAA, except that detailed exposure patterns and estimates of cancer risk need not be prepared.

For all other rulemaking under existing legislation which involves the regulation of a potential carcinogen(s), and which is not currently under development, the determination of whether and to what extent to use Appendix I and Procedure B will be made at the time the Administrator approves the plan for such rulemaking.

Where the development of a surrogate parameter is being proposed to regulate one or more potential carcinogens and perhaps other pollutants (e.g., a total organic carbon standard for drinking water), the risk assessment, as required above, will address at least one of the potential carcinogens and should address, to the extent feasible, as many of the others as possible.

All risk assessments need only be based on currently available information. These procedures do not require the undertaking of research or monitoring to expand the available data base.

A. Procedure for pesticide decisions involving potential carcinogens. This procedure is similar to the current procedure for informal rulemaking set forth by EPA Order 1000.6.

1. Formation of the working group. The Deputy Assistant Administrator for Pesticides, in cooperation with the Office of Planning and Management, establishes a working group.

2. OPP working group responsibility. The Office of Pesticide Programs (OPP), in consultation with the Working Group, is responsible for developing a Data Summary Report, a Position Document (including health risk assessment and the economic impact analysis) and a proposed Federal Register notice at the appropriate points in the regulatory process. Guidelines for health risk assessment and economic analysis are included as Appendices I and II.

3. Review of a suspect chemical prior to reregistration or the issuance of a rebuttable presumption against registration (RPAR).

a. Data relevant to the carcinogenicity of a pesticide is submitted to the CAG for review and comment. Following review by the CAG, a Data Summary Report is prepared by OPP and the Working Group. This report includes a summary of all available data relevant to carcinogenicity.

b. A draft Position Document including the Data Summary Report, a summary of the issues surrounding potential regulatory actions, and a proposed Federal Register notice are presented to the Pesticide Chemical Review Committee (PCRC) which includes a representative from the CAG.

c. On the basis of PCRC comments, the OPP and the Working Group revise the draft Position Document and the Federal Register notice. The PCRC reviews the revised package.

d. The package recommending a reregistration or the issuance of a RPAR goes to the Deputy Assistant Administrator for Pesticide Programs for a final decision.

4. Post-RPAR: Issuance of a notice of intent to cancel, suspend or reregister.

a. After a RPAR is issued, and rebuttal information if any is submitted, the OPP and the Working Group develop a final Position Document. This document includes a summary of all information available in rebuttal of the RPAR, a recommended finding on whether or not the presumption against registration has been rebutted (including the risk assessment), economic impact analysis as necessary, a summary of the issues surrounding potential regulatory actions, and a draft Federal Register notice.

b. The final Position Document is reviewed by PCRC and the risk assessment is reviewed by CAG.

c. If the decision is to reregister the product, a notice to this effect is published in the Federal Register.

d. If the decision is to cancel or suspend the product, the proposed notice of intent to cancel or suspend is forwarded to USDA and the Scientific Advisory Panel for comment, pursuant to the 1975 amendments to Section 6(b) of FIFRA. However, if it is determined that suspension of the pesticide is necessary to prevent an imminent hazard to humans, the 1975 amendments provide for waiver of the requirement for consultation with USDA and the Scientific Advisory Panel.

The notice of intent to register, cancel or suspend, including the risk assessment and economic impact analyses, is circulated for General Counsel and Assistant Administrator concurrence and forwarded to the Administrator for a final decision.

B. Other rulemaking to regulate carcinogens. All other Agency decisions involving carcinogenesis as the pivotal factor will follow EPA Order 1000.6 with the following additions:

1. The CAG will review the relevant data during the development of the rulemaking and make recommendations to the lead office and the working group regarding the interpretation of the data and provide other advice, as appropriate, concerning the risk assessment.

2. The CAG will review that portion of the rulemaking package containing the risk assessment. CAG comments will be presented to the Steering Committee.

C. External scientific review. In addition to the external reviews required by statute and the 1000.6 process, other external scientific review will be obtained in appropriate cases as determined by the lead program office. This review may take place at any time in the development of the regulatory package.

While risk and economic impact analyses may be reviewed externally, regulatory recommendations will not normally be submitted for external review. Reviewers for risk analyses may be from the Science Advisory Board, National Cancer Institute, or other appropriate institutions.

#### APPENDIX I

##### INTERIM GUIDELINE FOR CARCINOGEN RISK ASSESSMENT

1.0 Introduction. This preliminary guideline describes the general framework to be followed in developing an analysis of carcinogen risks and some salient principles to be used in evaluating the quality of data and formulating judgments concerning the nature and magnitude of the cancer hazard from suspect carcinogens.

This guideline is to be used within the policy framework already provided by applicable statutes and does not alter such policies. The guideline provides a general format for analyzing and organizing available data. It does not imply that one kind of data or another is prerequisite for regulatory action to control, prohibit, or allow the use of a carcinogen. Also, the guideline does not change any statutory-prescribed standards as to which party has the responsibility of remonstrating the safety, or alternatively the risk, of an agent.

The analysis of health risks will be carried out independently from considerations of the socio-economic consequences of regulatory action.

The risk assessment document will contain or identify by reference the background material essential to substantiate the evaluations contained therein.

2.0 General Principles Concerning the Assessment of Carcinogenesis Data. The central purpose of the health risk assessment is to provide a judgment concerning the weight of evidence that an agent is a potential human carcinogen and, if so, how great an impact it is likely to have on public health.

Judgments about the weight of evidence involve considerations of the quality and adequacy of the data and the kinds of responses induced by the suspect carcinogen. The best evidence that an agent is a human carcinogen comes from epidemiological studies in conjunction with confirmatory animal tests. Substantial evidence is provided by animal tests that demonstrate the induction of malignant tumors in one or more species including benign tumors that are generally recognized as early stages of malignancies.

Suggestive evidence includes the induction of only those nonlife shortening benign tumors which are generally accepted as not progressing to malignancy, and indirect tests of tumorigenic activity, such as mutagenicity, in-vitro cell transformation, and initiation-promotion skin tests in mice. Ancillary reasons that bear on judgments about carcinogenic potential, e.g., evidence from systematic studies that relate chemical structure to carcinogenicity should be included in the assessment.

When an agent is judged to be a potential human carcinogen, estimates should be made of its possible impact on public health at current and anticipated levels of exposure. The available techniques for assessing the magnitude of cancer risk to human populations on the basis of animal data only are very crude due to uncertainties in the extrapolation of dose-response data to very low dose levels and also because of differences in levels of susceptibility of animals and humans. Hence, the risk estimates should be regarded only as rough indications of effect. Where appropriate, a range of estimates should be given on the basis of several modes of extrapolation.

Expert scientific judgments in the areas of toxicology, pathology, biometry, and epidemiology are required to resolve uncertainties about the quality, adequacy, and interpretation of experimental and epidemiology data to be used for the risk assessment.

3.0 Format of the Risk Analysis.

3.1 Exposure Patterns. This section should summarize the known and possible modes of exposure attendant to the various uses of the

This health risk assessment is part of the risk-benefit analyses. In actions taken to regulate pesticides, this assessment is made after a determination that a health risk exists.

agent. It should include or identify by reference available data on factors relevant to effective dosage, physical and chemical parameters, e.g., solubility, particle size for aerosols, skin penetration, absorption rates, etc. Interaction of agents which may produce a synergistic or antagonistic effect should also be indicated, if available.

3.2 Metabolic Characteristics. This section should summarize known metabolic characteristics including transport, fate and excretion, and biochemical similarities to other known classes of carcinogens at high and low dose levels and should provide comparisons between relevant species as well as variations in different strains of certain species.

3.3 Experimental Carcinogenesis Studies. Available experimental reports should be summarized. If some experiments are to be rejected for the risk assessment, give reasons for doing so. Reprints of key papers and reports should be included as appendices to the analysis.

Judgments should be provided on the quality of the experimental data and their interpretations for each study on the basis of (a) experimental protocols, (b) survival rates in controls particularly in relation to acceptance of negative results, (c) incidence of spontaneous tumors in the control compared to general laboratory experience for the same species or strain, (d) diagnostic criteria and nomenclature used for tumor characterization (additional evaluation of histological material should be obtained when appropriate), and (e) observed results of positive controls (i.e., a test group given a standardized exposure to a known carcinogen) in light of expected results.

3.4 Epidemiological Studies. Summarize epidemiological studies, together with critiques of the work with respect to its limitations and significance. Summarize other published critiques whether supportive or at variance with the judgement made here.

3.5 Cancer Risk Estimates.

3.5.1 Exposure Patterns. Describe likely exposure levels with respect to long-term temporal trends, short-term temporal patterns, and weighted averages for both the total exposed populations and for subgroups whose exposure patterns may be distinctly different from the average. Characterize, to the extent possible, the size of the exposed population for each of the above categories with an indication of whether the exposures are likely to involve children and pregnant women. Discuss the adequacy of the methods used to estimate exposures and indicate the range of uncertainty in the estimates.

3.5.2 Dose-Response Relationships. Both human and animal data should be used as available. Include available human data, even if inadequate for a characterization of the actual magnitude of risk, where such data could be helpful in interpreting animal responses in relation to human sensitivity.

3.5.3 Estimates of Cancer Risk. The procedure will involve a variety of risk extrapolation models, e.g., the linear non-threshold model and the log-probit model. Analyses will be done separately for all suitable experimental data and human epidemiological data. The results should be presented in terms of excess lifetime incidence, or average excess cancer rates; life-shortening estimates should also be made when the data permit. The uncertainty in the data and extrapolation techniques should be clearly indicated. The results predicted for humans should be presented in relationship to the current cancer experience in the assumed target organ(s).

Some judgements should be included regarding the relevance of the mode of exposure used in animal studies to that associated with human exposure.

4.0 Summary. The summary section of the risk assessment should provide a statement which encompasses answers to the following questions: (1) How likely is the agent to be a human carcinogen? (2) If the agent is a human carcinogen, what is the estimated impact on human health?

#### APPENDIX II

##### INTERIM GUIDELINE FOR ECONOMIC IMPACT ANALYSIS OF PROPOSED REGULATORY ACTIONS TO CONTROL CARCINOGENIC PESTICIDES

The purpose of this guideline is to define the factors to be considered and the procedures to be utilized in assessing the economic impact resulting from future regulatory actions, (as described below) affecting carcinogenic pesticides. Economic impact assessment for other regulatory actions to control environmental carcinogens will follow established agency procedures.

The principal concern in the economic analysis will be the assessment of economic impacts on pesticides users and on the consumers of the products of the users. The impacts on pesticide manufacturers are not germane to this type of regulatory decision, in which the risk of the use of a pesticide is compared to the benefit of those uses.

As used in this guideline the economic impact of the regulation is equated to the anticipated loss in benefit from use of the pesticide. For agricultural pesticides the analysis will focus on the impacts on farmers, farm productivity, and consumer costs associated with farm productivity. Similarly, analyses of other pesticides will focus on the impacts on other user groups and related effects on the economy.

Regulatory procedures. The purpose of this section of the guidelines is to define how the economic impact analysis fits into the regulatory framework for pesticide-related actions.

If a pesticide meets or exceeds criteria defined in 40 CFR 162.11, a Rebuttable Presumption Against Registration (RPAR) will be issued. The Agency will analyze any rebuttal information that is submitted; it may also take into account other available information to determine whether the RPAR has been rebutted. At the conclusion of this risk assessment, the Administrator will be presented with sufficient evidence to determine if the use of a pesticide poses the risk of a significant adverse effect. If such is the case, then the Administrator must determine what type of regulatory response is warranted.

In making that decision, 40 CFR 162.11 provides that the Administrator will be provided with a preliminary assessment of the benefits of the use of the pesticide. Furthermore, § 162.11 essentially provides: (1) That if the risks appear to outweigh the benefits, the Administrator will issue a notice of intent to cancel, which may lead to a full adjudicatory hearing on the question of whether the pesticide causes or will cause unreasonable adverse effects on the environment, or (2) if the benefits appear to outweigh the risks, the Administrator will either issue a notice of intent to hold a hearing (adjudicatory or non-adjudicatory) or a notice of intent to register. Such notice of intent to register provides an opportunity for a hearing upon request (accompanied by submission of a statement of factual reasons) of an interested party that a hearing is warranted. The decision to cancel reached at this time will not result in the removal of a product from the market if the decision is contested. Instead, any such regulatory action will be preceded by a hearing to weigh fully the risks and benefits of the uses of a product.

The benefit evidence provided to the Administrator at this stage is by definition a preliminary staff analysis. A specific effort will be made by the Agency to contact parties that have an interest in the use of the pesticide and to attempt to solicit their comments on the benefits of the pesticide under review. In particular, EPA intends that the U.S. Department of Agriculture will be heavily relied upon from the earliest stages of review to provide its special expertise and data resources on uses.

Because of the many variables surrounding the multiple uses of different pesticides, the benefit or economic impact analysis must of necessity be done on a case-by-case basis. All relevant economic considerations raised in criticisms of the preliminary benefit analysis will be addressed prior to final action.

#### Content of the economic impact analyses

Based upon all the available information, a preliminary analysis will be developed. Such analysis will be organized in the following manner:

1. Identification of the major uses of the pesticide, including estimated quantities used by crop or other application.

2. Preliminary identification of the minor uses of the pesticide, including estimated quantities used by category such as lawn and garden uses and household uses.

3. Identification of registered alternative products for the uses set forth in (1) and (2) above, including an estimate of their availability.

4. Determination of the change in costs to the use of providing equivalent pesticide treatment with any available substitute products.

5. Assessment of regulation impact upon user productivity (e.g., yield per acre and/or total output) from using available substitute pesticides or from using no other pesticide.

6. If the impacts upon either user costs or productivity are significant, a qualitative assessment of the regulation's impact on production of major agricultural commodities and retail food prices of such commodities.

[FRL 547-8; PP4G1495; T59]

#### RENEWAL OF A TEMPORARY TOLERANCE

##### 2-Ethoxy-2,3-Dihydro-3,3-Dimethyl-5-Benzofuranyl Methanesulfonate

On March 11, 1976, the Environmental Protection Agency (EPA) announced (41 FR 10476) that in response to a request from the Fisons Corp., Agricultural Chemicals Div., Two Preston Court, Bedford MA 01730, the temporary tolerances which were established in response to pesticide petition (PP 4G1495) (40 FR 6389) for combined residues of the herbicide 2-ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate and its metabolites 2-hydroxy-2,3-dihydro-3,3-dimethyl-5-benzofuranyl methanesulfonate and 2,3-dihydro-3,3-dimethyl-2-oxo-5-benzofuranyl methanesulfonate (both calculated as the parent compound) in or on the raw agricultural commodities sugarbeet tops at 1 part per million (ppm), sugarbeet roots at 0.1 ppm, and in the meat, fat, and meat by-products cattle, goats, hogs, horses, and sheep at 0.03 ppm, were extended until April 4, 1976.

Fisons Corp. has requested a one-year renewal of these temporary tolerances both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodities treated in accordance with three experimental use permits, the original temporary permit that is being renewed as an experimental use permit, and two which are to be issued, concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act.

An evaluation of the scientific data reported and other relevant material has shown that these tolerances are adequate to cover residues resulting from the proposed experimental use and that a renewal of these temporary tolerances will protect the public health.

It has been concluded, therefore, that the temporary tolerances should be renewed on condition that the pesticide be used in accordance with the experimental use permits with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permits.

2. Fisons Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of EPA or the Food and Drug Administration.

These temporary tolerances expire May 17, 1977. Residues not in excess of 1 ppm in or on sugarbeet tops, 0.1 ppm in or on sugarbeet roots, and 0.03 ppm in the meat, fat and meat byproducts of cattle, goats, hogs, horses, and sheep remaining after this expiration date will not be considered to be actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permits and temporary tolerances. These temporary tolerances may be revoked if the experimental use permits are revoked or if any scientific data or experience with this pesticide indicate that such revocation is necessary to protect the public health.

(Sec. 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j)).)

Dated: May 17, 1976.

JOHN B. RITCH, Jr.,  
Director,  
Registration Division.

#### ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION MARINE DEVELOPMENT GROUP LTD. Intent To Grant Exclusive Patent License

Notice is hereby given of an intent to grant to Marine Development Group Ltd. of Toronto, Canada, an exclusive license to manufacture, use, and sell in the United States the invention described in U.S. Patent No. 3,687,804, entitled "Compact and Safe Nuclear Reactor", issued

August 29, 1972 to the United States of America as represented by the U.S. Atomic Energy Commission, now the U.S. Energy Research and Development Administration. A copy of the subject patent can be obtained from the U.S. Patent and Trademark Office, Washington, D.C. 20231. The proposed license will have a duration of five years, will be royalty bearing, and will contain other terms and conditions to be negotiated by the parties in accordance with Energy Research and Development Administration patent licensing regulations, Title 10 CFR Part 781. ERDA will grant the license unless within sixty days of this Notice the Assistant General Counsel for Patents, Energy Research and Development Administration, Washington, D.C. 20545, receives in writing any of the following together with supporting documents:

(i) A statement from any person setting forth reasons why it would not be in the best interest of the United States to grant the proposed license; or  
(ii) An application for a nonexclusive license to manufacture, use, or sell the invention in the United States in accordance with Title 10 CFR 781, in which applicant states that he has already brought the invention to practical application or is likely to bring the invention to practical application expeditiously.

The Assistant General Counsel for Patents will review all written responses to this Notice and will provide opportunity for a hearing before granting the exclusive license.

Dated at Germantown, Maryland, this 10th day of May, 1976.

JAMES E. DENNY,  
Assistant General Counsel  
for Patents.

[FR Doc. 76-15153 Filed 5-24-76; 8:45 am]

#### NATIONAL PLAN FOR ENERGY RESEARCH, DEVELOPMENT AND DEMONSTRATION Public Meetings

The Energy Research and Development Administration (ERDA) announces the second in a series of public meetings on its 1976 National Plan for Energy Research, Development and Demonstration, Creating Energy Choices for the Future (ERDA 76-1). The meeting will be held June 21-22, in Chicago, Illinois, at the Palmer House Hotel with the sessions beginning at 8:30 a.m. on both days.

The purpose of the public meetings is to acquaint the public with ERDA's long-term comprehensive energy plan and to elicit public comment on all aspects of Federal energy research, development and demonstration, including emerging energy technologies. It is ERDA's intent to conduct a meaningful dialogue with local, state and regional groups and citizens concerning regional energy issues. These meetings are a major element in that process. Public meetings in San Francisco and Boston are planned for later this year. Details, times and locations of these additional public meetings will be announced in future notices.

The format of the public meetings is designed to assure a meaningful dialogue between ERDA and the concerned public in the various regions. A panel composed primarily of ERDA Assistant Administrators responsible for the energy production, environment and safety, and conservation technologies described in the National Plan will be present at each public meeting to explain the purpose and content of the Plan and to receive the comments of the public. The moderator for the sessions will be announced prior to each public meeting.

Single copies of the Plan may be obtained free of charge by writing US-ERDA, Technical Information Center, P.O. Box 62, Oak Ridge, Tennessee 37830. Copies will also be available for inspection at ERDA Headquarters (20 Massachusetts Avenue, N.W., Washington, D.C.) and at all ERDA Operations Offices.

A notice of intent to make a presentation at the Chicago meeting should be addressed to Mr. R. E. Shannon, Energy Research and Development Administration, Chicago Operations Office, 9800 South Cass Avenue, Argonne, Illinois 60439.

This notice of intent should set forth:

1. The name and address of the participant;  
2. The nature of the participant's interest in the National Plan, and the participant's organizational affiliation, if any;  
3. The length of time requested for the presentation; and  
4. Where practicable, the text of any statements to be presented, or a reasonably detailed summary thereof.

The notice to make a presentation must be received no later than one week in advance of the meeting to ensure scheduling. An effort will be made to schedule the full time requested, but, in order to assure all participants a fair opportunity to present their views within the time constraints, the presentations may be limited in length. Interested persons who have not filed a timely notice of intent to make a presentation may notify the moderator during the meeting of their desire to become participants. If time permits, the moderator will allow these persons the opportunity to make formal presentations.

Time will also be allotted during each public meeting to permit members of the audience to pose appropriate questions to the panel. Persons who do not wish to make an oral presentation, or whose schedules do not permit appearance at the meeting may submit a written statement to ERDA for consideration. The statements should be sent to the aforementioned address.

Dated at Washington, D.C., the 17th day of May 1976.

For the Energy Research and Development Administration.

RAYMOND G. ROMATOWSKI,  
Assistant Administrator

#### FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20798, File No. 1530-C5-P-72;  
Docket No. 20799, File No. 3284-C5-P-72]

#### DAYTON COMMUNICATIONS CORP. AND BUCKEYE CABLEVISION, INC.

##### Construction Permits

In re the applications of Dayton Communications Corp. and Buckeye Cablevision, Inc. For construction permits in the Multipoint Distribution Service for a new station at Toledo, Ohio.

1. The Commission has before it the above-referenced applications of Dayton Communications Corporation (Dayton), filed on September 22, 1971, and Buckeye Cablevision, Inc. (Buckeye), filed on December 3, 1971. Both applications propose Channel 1 operation in the Multipoint Distribution Service (MDS) in the Toledo, Ohio area, and thus are mutually exclusive and require comparative consideration. Both applications have been amended as a result of informal requests of the Commission staff for additional information, and no petitions to deny or other objections to any of the applications have been received.

2. Dayton holds MDS construction permits in Cincinnati, Columbus, and Dayton, Ohio, and Lexington, Kentucky and is providing MDS service in Dayton and Cincinnati, Ohio. Buckeye, wholly-owned by the Toledo Blade Company, which owns newspapers in Toledo and is licensee of WLIO(TV) in Lima, Ohio, owns and operates a CATV system in Toledo, Ohio.

3. Upon review of the captioned applications, we find that both the applicants are legally, technically, financially and otherwise qualified to provide the services which they propose and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.

4. Accordingly, it is hereby ordered, That pursuant to Section 309(e) of the Communications Act of 1934 and Section 0.291 of the Commission's Rules, the above-captioned applications are designated for hearing, in a consolidated proceeding, at the Commission's offices in Washington, D.C., on a date and before an Administrative Law Judge to be specified by later order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience, and necessity. In making such a determination, the following factors shall be considered:

1. Consideration of these factors shall be made in light of the Commission's discussion in Peabody Telephone Answering Service, et al., 55 F.C.C. 2d 626 (1975)

(a) The relative merits of each proposal with respect to service area and efficient frequency use;

(b) The nature of the services and facilities proposed, and whether they will satisfy service requirements known to exist or likely to exist in the Toledo, Ohio area.

(c) The anticipated quality and reliability of the service proposed, including selection of equipment, installation, subscriber security, and maintenance.

(d) The charges, regulations and conditions of the service to be rendered and their relation to the nature, quality and costs of service; and

(e) The managerial and entrepreneurial qualifications of the applicants.

5. It is further ordered, That Dayton Communications Corporation and Buckeye Cablevision, Inc., and the Chief, Common Carrier Bureau are made parties to this proceeding.

6. It is further ordered, That parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of Section 1.221 of the Commission's Rules.

Adopted: April 29, 1976.

Released: May 18, 1976.

JOSEPH A. MARINO,  
Deputy Chief for Chief,  
Common Carrier Bureau.

[FR Doc. 76-15187 Filed 5-24-76; 8:45 am]

[FCC-76-438]

#### FM RULES RELATING TO POWER VS. HEIGHT

##### Interim Policy Adoption

May 19, 1976.

In concluding our rulemaking which culminated in the adoption of revised FM field strength curves, Report and Order in Dockets 16004 and 18052, 53 FCC 2d 855, 34 RR 2d 361 (1975), we did not amend figure 3 of section 73.333 of our rules. Figure 3 contains power versus height curves for class A, B, and C FM stations and governs the reductions in power arising from the use of tall towers. We are presently preparing a replacement for figure 3 which takes into account the effect of the new field strength curves. Until such time as figure 3 is replaced, we will follow a policy of processing and granting applications with the average of the heights above average terrain for the eight radials greater than the maximum for the class of station provided that the distance to the 1 mV/m (60 dBu) contour is no greater than would occur if the station operated with the maximum power and height for the class of station. These determinations are, of course, made with the newly-adopted F(50,50) field

strength curves. Thus, proposals with average heights above average terrain greater than the following values may propose powers such that the distance to the proposed 60 dBu contour does not exceed the specified distances:

Class	Height Feet	Distance Miles
A	300	14.5
B	500	32.5
C	2,000	57.5

While this reflects a new Commission policy, this does not eliminate the necessity of complying with our agreements with Canada and Mexico. Thus, stations within 250 miles of the Canadian-United States border must comply with the Working Arrangement for Allocation of FM Broadcasting Stations on Channels 221-300 under the Canada-United States FM Agreement of 1947. And stations within 199 miles of the Mexican-United States border must comply with the Agreement Between the United States of America and the United Mexican States Concerning Frequency Modulation Broadcasting in the 88 to 108 MHz Band.

Stations within the border areas which must operate with less than maximum power and height for the class of station in accordance with section 73.213 because they are short-spaced with domestic stations may utilize the policy we adopt here to increase power provided that the limits in our agreements with Canada and Mexico are not exceeded.

Stations whose 60 dBu contours presently exceed the specified distances do not fall under this interim policy.

When the new figure 3 is finally adopted, stations which were authorized increased facilities under this interim policy may be required to slightly reduce power to bring them into accordance with the new figure 3.

This policy does not apply to television applications. The Commission is presently considering an interim policy concerning television applications; it will be released at a later date.

Action by the Commission May 11, 1976. Commissioners Willey (Chairman), Lee, Hooks, Quello, Washburn and Robinson.

FEDERAL COMMUNICATIONS  
COMMISSION,

[SEAL] VINCENT J. MULLINS,  
Secretary.

## RCA GLOBAL COMMUNICATIONS, INC. AND WESTERN UNION TELEGRAPH CO. FCC Opens NASA Request for Declaratory Ruling to Public Comment

MAY 17, 1976.

On May 5, 1976, the National Aeronautics and Space Administration (NASA) filed a request for declaratory ruling on whether RCA Global Communications, Inc. and The Western Union Telegraph Company may provide NASA with services from a Tracking and Data Relay Satellite System (TDRSS) pursuant to a long-term fixed-rate contract rather than pursuant to a tariff filed under Section 203 of the Communications Act of 1934, as amended.

Inasmuch as NASA's request raises significant issues affected with the public interest, the Chief, Common Carrier Bureau, pursuant to Section 0.91 of the Commission's Rules, hereby affords all interested persons the opportunity to file comments on NASA's request within thirty (30) days of the publication date of this notice in the FEDERAL REGISTER. Replies to the comments must be filed within ten (10) days after the last day on which comments may be filed.

NASA's request for declaratory ruling is available for inspection at the Commission's Offices, 1919 M Street NW., Washington, D.C.

## [Report No. I-232] SATELLITE COMMUNICATIONS SERVICES International and Satellite Radio Applications Accepted for Filing MAY 17, 1976.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications if, upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies. Final action will not be taken on any of these applications earlier than 31 days from the date of this notice. Section 309(d) (1).

FEDERAL COMMUNICATIONS  
COMMISSION,  
VINCENT J. MULLINS,  
Secretary.

### SATELLITE COMMUNICATIONS SERVICES

- 313-DSE-P/L-76, Cablevision of Augusta, Inc., Augusta, Georgia. For authority to construct and operate a Domestic Communications satellite earth station at this location. (Receive-Only). Lat. 33°28'18", Long. 82°01'40". Rec. freq: 3700-4200 MHz. Emission of 36000F9. Using a 10 meter antenna.
- 315-DSE-P/L-76, Harris Corporation Electronic Systems Division, Palm Bay, Florida. For authority to construct and operate a domestic communications satellite earth station at this location. Lat. 28°01'57", Long. 80°35'50". Rec. freq: 3700-4200 GHz. Trans. freq: 5925-6425 GHz. Emission of 36000F9. Using an 11 meter antenna.

316-DSE-P/L-76, Trans-AM Communications Company, a Division of the Eastern Oklahoma Co., Inc., Ada, Oklahoma. For authority to construct and operate a Domestic Communications Satellite Earth Station at this location. (Receive-Only). Lat. 34°46'53", Long. 96°39'18". Rec. freq: 3700-4200 MHz. Emission of 36000F9. Using an 11 meter antenna.

317-DSE-P/L-76, RCA Alaska Communications, Inc., Minto, Alaska. For authority to construct a communications satellite earth station at this location for operation with a domestic communications satellite system. Lat. 65°09'25", Long. 149°19'48". Rec. freq: 3700-4200 MHz. Trans. freq: 5925-6425 MHz. Emission of 25.7F9. Using a 4.5 meter antenna.

318-DSE-P/L-76, RCA Alaska Communications, Inc., Manley Hot Springs, Alaska. For authority to construct a communications satellite earth station at this location for operation with a domestic communications satellite system. Lat. 65°00'00", Long. 150°38'10". Rec. freq: 3700-4200 MHz. Trans. freq: 5925-6425 MHz. Emission of 25.7F9. Using a 4.5 meter antenna.

319-DSE-P/L-76, RCA Alaska Communications, Inc., Nelson Lagoon, Alaska. For authority to construct a communications satellite earth station at this location for operation with a domestic communications satellite system. Lat. 56°00'04", Long. 161°12'03". Rec. freq: 3700-4200 MHz. Trans. freq: 5925-6425 MHz. Emission of 25.7F9. Using a 4.5 meter antenna.

320-DSE-P/L-76, RCA Alaska Communications, Inc., Perryville, Alaska. For authority to construct a communications satellite earth station at this location for operation with a domestic communications satellite system. Lat. 55°54'45", Long. 159°-08'34". Rec. freq: 3700-4200 MHz. Trans. freq: 5925-6425 MHz. Emission of 25.7F9. Using a 4.5 meter antenna.

321-DSE-P/L-76, RCA Alaska Communications, Inc., Transportable Fixed Location. For authority to construct a transportable communications satellite earth station for operation with a domestic communications satellite system at temporary fixed locations within the State of Alaska. Rec. freq: 3700-4200 MHz. Trans. freq: 5925-6425 MHz. Emissions 45F9, 40F3 and 36000F5 (TV receive Only). Using a 4.5 meter antenna.

322-DSE-P-76, CPI Satellite Telecommunications, Inc., N. Little Rock, Arkansas. For authority to construct and operate a domestic communications satellite Receive-Only earth station at this location. Lat. 34°48'59", Long. 92°17'56". Rec. freq: 3700-4200 MHz. Emission of 36000F9. Using a 10 meter antenna.

323-DSE-P/L-76, Sunflower Cablevision, a Division of The World Company, Lawrence, Kansas. For authority to construct, own and operate a domestic communications satellite Receive-Only earth station at this location. Lat. 38°57'21", Long. 95°12'28". Rec. freq: 3700-4200 MHz. Emission 36000F9. Using a 10 meter antenna.

324-DSE-P/L-76, Hobbs Cablevision, Inc., Hobbs, New Mexico. For authority to construct and operate a domestic communications Receive-Only satellite earth station at this location. Lat. 32°42'07", Long. 103°05'21". Rec. freq: 3700-4200 GHz. Emission of 34000F9. Using a 10 meter antenna.

3331-DSE-AL-76, Hayward Cable Television, Inc., (KB66), Hayward, California. For authority of Consent to Assignment of License from Hayward Cable Television, Inc. (Assignor) to Satellite Transmission and Receiving Company (United Cable Television Corporation and Teleprompter Corporation) (Assignee) for a Receive-Only earth station.

## FEDERAL ENERGY ADMINISTRATION

### CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of May 7 Through May 14, 1976

Notice is hereby given that during the week of May 7 through May 14, 1976 the appeals and applications for exception or other relief listed in the Appendix to this notice were filed with the Federal Energy Administration's Office of Exceptions and Appeals.

Under the FEA's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the FEA action sought in such cases may file with the FEA written comments of the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first.

DAVID G. WILSON,  
Acting General Counsel.

[FR Doc.76 15192 Filed 5-24-76;8:45 am]

MAY 20, 1976.

APPENDIX. List of cases received by the Office of Exceptions and Appeals—May 7 to 14, 1976

Date	Name and location of applicant	Case No.	Type of submission
May 7, 1976	Placid Oil Co., Washington, D.C. (If granted: FEA's Apr. 9, 1976, decision and order would be rescinded and Placid Oil Co. would be permitted to retain crude oil which the firm is presently required to sell to other refiners.)	FEA-6825	Appeal of FEA's exception decision and order. Placid Oil Co., 3 FEA par. 83,168 (Apr. 9, 1976).
Do.	Union Oil Co. of California, Los Angeles, Calif. (If granted: Union Oil Co. of California would receive an exception from 10 CFR 212.75(d) with respect to its Trading Bay unit.)	FEF 2461	Crude oil price exception (see 212.75).
May 10, 1976	Burnah Oil & Gas Co. (Alene), Houston, Tex. (If granted: Burnah Oil & Gas Co. would be permitted to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of \$0.005/gal.)	FEF 2465	Price exception (see 212.74).
Do.	Burnah Oil & Gas Co. (Fox), Houston, Tex. (If granted: Burnah Oil & Gas Co. would be permitted to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of \$0.005/gal.)	FEF 2466	Do.
Do.	Burnah Oil & Gas Co. (Huntington Beach), Houston, Tex. (If granted: Burnah Oil & Gas Co. would be permitted to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of \$0.005/gal.)	FEF 2467	Do.
Do.	Burnah Oil & Gas Co. (Inglewood), Houston, Tex. (If granted: Burnah Oil & Gas Co. would be permitted to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of \$0.005/gal.)	FEF 2468	Do.
Do.	Burnah Oil & Gas Co. (O'Keene), Houston, Tex. (If granted: Burnah Oil & Gas Co. would be permitted to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of \$0.005/gal.)	FEF 2469	Do.
Do.	Burnah Oil & Gas Co. (Tulsa), Houston, Tex. (If granted: Burnah Oil & Gas Co. would be permitted to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of \$0.005/gal.)	FEF 2470	Do.
Do.	Burnah Oil & Gas Co. (Tigra), Houston, Tex. (If granted: Burnah Oil & Gas Co. would be permitted to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of \$0.005/gal.)	FEF 2471	Do.
Do.	Frank H. McGhee, Natchez, Miss. (If granted: Crude oil produced from the Board of Supervisors 2-27 well would be sold at market clearing prices.)	FEF 2462	Price exception (see 212.74).
Do.	Sun Oil Co. (O'Keene), Dallas, Tex. (If granted: FEA's Mar. 31, 1976, decision and order would be modified and Sun Oil Co. would be permitted to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of \$0.005/gal at its O'Keene plant.)	FEA 6827	Appeal of FEA's exception decision and order. Sun Oil Co., 3 FEA par. 83,153 (Mar. 31, 1976).
Do.	Sun Oil Co. (Pledger), Dallas, Tex. (If granted: FEA's Mar. 31, 1976, decision and order would be modified and Sun Oil Co. would be permitted to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of \$0.005/gal at its Pledger plant.)	FEA 6828	Do.

Date	Name and location of applicant	Case No.	Type of submission
Do....	Dale Tapp, Seguin, Tex. (If granted: Dale Tapp, a royalty owner of crude oil produced from the Player No. 1 Hridwell well, would be permitted to receive upper-tier crude oil prices.)	FEA-0829	Appeal of FEA's exception decision and Order. William H. Player & Associates, 3 FEA par. 83, 161 (Apr. 9, 1976).
Do....	Texas, Inc., vs. Arrow Petroleum Co., Chicago, Ill. (If granted: FEA's Mar. 3, 1976, remedial order and FEA's Oct. 6, 1975, decision and order requiring Texas to supply Arrow Petroleum Co. with motor gasoline would be modified.)	EMR-0050	Modification of FEA's remedial order and decision and order. Texaco, Inc., 2 FEA par. 80, 701 (Oct. 6, 1975).
Do....	Wesley Martin Oil Co., Inc., Las Cruces, N. Mex. (If granted: Wesley Martin Oil Co., Inc., would be permitted to retroactively increase its May 15, 1973, prices in computing its maximum permissible selling prices for No. 2 diesel fuel.)	FEE-2463	Price exception (sec. 212.92).
Do....	Wesley Martin Oil Co., Inc., Las Cruces, N. Mex. (If granted: Wesley Martin Oil Co., Inc., would be permitted to retroactively increase its May 15, 1973, prices in computing its maximum permissible selling prices for No. 2 diesel fuel sold to its retail dealers, if class.)	FEE-2464	Do.
May 11, 1976	Callahan Oil Co., Washington, D.C. (If granted: FEA's Apr. 22, 1976, information request denial would be rescinded and Callahan Oil Co. would receive access to documents pertaining to allocation orders issued on July 31, 1975.)	FEA-0830	Appeal of FEA's information request denial.
Do....	Detroit Public Lighting Department, Detroit, Mich. (If granted: Detroit Public Lighting Department would receive an extension of the exception relief from pt. 215 granted in FEA's Aug. 1, 1975, decision and order.)	FEE-2473	Extension of FEA's exception relief. Detroit Public Lighting Department, 2 FEA par. 83, 256 (Aug. 1, 1975).
Do....	Exxon Co., U.S.A., Houston, Tex. (If granted: Exxon Co., U.S.A., would not be required to supply Saveray Gas & Appliance, Inc., with its base-period use of propane.)	FEA-0832	Appeal of FEA's exception decision and order. Saveray Gas & Appliance, Inc., 3 FEA par. 83, 159 (Mar. 31, 1976).
Do....	Potomac Gas Co., Washington, D.C. (If granted: The appeal decision issued to Potomac Gas Co. on May 4, 1976, would be modified.)	FEE-0042	Supplemental order. Potomac Gas Co., 3 FEA par. .... (May 4, 1976).
Do....	Readygas, Inc., Elbon, Mo. (If granted: FEA's Apr. 2, 1977, decision and order would be rescinded and Readygas, Inc., would be assigned a new, lower priced supplier of propane.)	FEA-0831	Appeal of FEA's exception decision and order. Readygas Propane Service, Inc., 3 FEA par. 83, 119 (Apr. 2, 1976).
Do....	Sav-A-Ton, Inc., Augusta, Ga. (If granted: Sav-A-Ton, Inc., would receive an increase in its base-period use of motor gasoline.)	FEE-2472	Allocation exception.
May 12, 1976	Atlantic Richfield Co., Los Angeles, Calif. (If granted: FEA's Apr. 14, 1976, remedial order pertaining to the prices charged by Atlantic Richfield in sales to Fleet Supplies, Inc., would be rescinded.)	FEA-0833 FES-0833	Appeal of FEA's Apr. 14, 1976, remedial order. Stay requested.
Do....	Boston Gas Co., Boston, Mass. (If granted: The proposed rescission of FEA region I's Mar. 8, 1974, exception decision would be stayed pending a final determination on a request for interpretation which Boston Gas Co. filed with FEA's Office of General Counsel on Apr. 30, 1976.)	FES-0001	Request for a stay pending issuance of a supplemental order.
Do....	Louisiana Land & Exploration Co., New Orleans, La. (If granted: Louisiana Land & Exploration Co. would receive retroactive exception relief for the month of December 1975 from the provisions of 10 CFR 212.82, 212.83, and 212.87, which were in effect prior to Apr. 6, 1976.)	FEE-2474	Price exception (sec. 212.82).
Do....	McIntosh Propane, McIntosh, S. Dak. (If granted: McIntosh Propane would be assigned a new, lower priced supplier of propane to replace its base-period supplier, Petro-Lane Intermountain Supply.)	FEE-2475	Exception to change suppliers.
May 13, 1976	Bay City Airport, Bay City, Mich. (If granted: Bay City Airport would be permitted to increase its prices for aviation fuel above the maximum level permitted under 10 CFR 212.92.)	FEE-2476	Price exception (sec. 212.92).
Do....	Double U Oil Co., San Antonio, Tex. (If granted: Double U Oil Co. would be permitted to retain crude oil which it is currently required to supply to Tesoro Petroleum Corp.)	FEE-2477	Allocation exception (sec. 211.63).
Do....	Texas Asphalt & Refining Co., Houston, Tex. (If granted: Texas Asphalt & Refining Co. would be permitted to charge a handling fee of \$0.30/bbl on crude-oil sales pending action on Texas Asphalt's application for exception.)	FEE-2478 FST-2478	Allocation exception.
May 14, 1976	Beacon Oil Co., Washington, D.C. (If granted: FEA's Mar. 1976, decision and order would be rescinded and Beacon Oil Co. would be permitted to increase its May 15, 1973, selling prices for refined petroleum products.)	FMR-0001	Request for modification of FEA's decision and order. Beacon Oil Co., 3 FEA par. 83, 140 (Mar. 18, 1976).

[FR Doc.76-15202 Filed 5-20-76; 3:01 pm]

## FEDERAL RESERVE SYSTEM

## ADAIR INSURANCE AGENCY, INC.

## Order Approving Formation of Bank Holding Company and Engaging in Insurance Agency Activities

Adair Insurance Agency, Inc., Adair, Iowa, has applied for approval under Section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through the acquisition of 100 percent of the voting shares (less directors' qualifying shares), of Exchange State Bank, Adair, Iowa ("Bank"). Applicant has also applied, pursuant to Section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)) and Section 225.4(b)(2) of the Board's Regulation Y, for permission to engage in general insurance agency activities through the acquisition of a general insurance agency in the town of Adair, Iowa, a community with a population of less than 5,000. The operation by a bank holding company of a general insurance agency in a community with a population not exceeding 5,000 persons is an activity that the Board has previously determined to be closely related to banking (12 CFR 225.4(a)(9)(iii)(a)).

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with Sections 3 and 4 of the Act. The time for filing comments and views has expired and the Federal Reserve Bank of Chicago has considered the applications and all comments received in light of the factors set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)), and the considerations specified in Section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)).

Applicant, a nonoperating company, was organized to become a bank holding company with respect to Bank and to engage in the business of a general insurance agency. Bank, with deposits of \$7.5 million<sup>1</sup> accounts for less than 0.1 percent of the deposits in all commercial banks in Iowa and for approximately 8.7 percent of such deposits in the Atlantic, Iowa, banking market.<sup>2</sup> Bank is the smallest of five banks in the market and the only bank in Adair. Since Applicant has no banking subsidiaries and the proposal represents the acquisition of only one bank, consummation of the transaction would have no adverse effects on existing or potential competition.

<sup>1</sup> All banking data are as of June 30, 1975.  
<sup>2</sup> The Atlantic banking market is composed of portions of Cass, Adair, and Guthrie Counties, Iowa.

The financial and managerial resources and future prospects of Applicant and Bank are generally satisfactory. Bank's current and projected earnings are regarded as adequate to service the acquisition debt incurred in the transaction without impairing Bank's capital. Therefore, banking factors are regarded as being consistent with approval of the application. In addition, considerations relating to the convenience and needs of the community to be served are consistent with approval of the application. It is the judgment of this Reserve Bank that the proposed formation of the bank holding company would be in the public interest, and that the application should be approved.

Application has also applied to acquire the business of a general insurance agency conducting activities from Bank's office. There is no evidence to indicate that acquisition of the insurance agency business would result in an undue concentration of resources, decreased or unfair competition, conflicts of interest, unsound banking practices or any other adverse effects on the public interest. On the contrary, acquisition of the business of the agency would insure that a convenient source of insurance services would remain available to consumers in the Adair area. Therefore, the acquisition appears to be in the public interest.

Based on the foregoing and other considerations reflected in the record, the Federal Reserve Bank of Chicago, acting pursuant to delegated authority, has determined that the considerations affecting the competitive factors under Section 3(c) of the Act and the balance of the public interest factors set forth in Section 4(c)(8) both favor approval of Applicant's proposals.

Accordingly, the Federal Reserve Bank of Chicago approves the applications for the reasons summarized above. The acquisition of Bank shall not be made before the thirtieth calendar day following the effective date of this Order, and neither the acquisition of Bank nor the acquisition of the insurance agency should be made later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Chicago, pursuant to delegated authority. The determination as to Applicant's insurance activities is subject to the conditions set forth in Section 225.4(c) of Regulation Y and to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries, and to require such modifications as termination of the activities of a bank holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Federal Reserve Bank of Chicago, acting pursuant to delegated authority for the Board of Governors, effective May 13, 1976.

ROBERT P. MAYO,  
President.

[FR Doc.76-15148 Filed 5-24-76; 8:45 am]

## DAKOTA BANCORPORATION

## Order Approving Retention of Insurance Agency Activities

Dakota Bancorporation, Rapid City, South Dakota ("Applicant"), a bank holding company within the meaning of the Bank Holding Company Act ("Act"), has applied for the Board's approval, under section 4(c)(8) of the Act (12 U.S.C. § 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 C.F.R. § 225.4(b)(2)), to continue to engage in the activity of a general insurance agency, through Columbus Insurance Agency ("Company"), in Columbus, North Dakota, a community having a population not exceeding 5,000. Such activity has been determined by the Board to be closely related to banking (12 CFR § 225.4(a)(9)(iii)(a)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (41 Federal Register 11363). The time for filing comments and views has expired, and the Board has considered the application and all comments received in the light of the public interest factors set forth in section 4(c)(8) of the Act.

The Board regards the standards of section 4(c)(8) to be as applicable to the retention of a "ten year grandfathered" activity as to a proposed section 4(c)(8) acquisition.

Applicant controls one banking subsidiary, Columbus National Bank, with deposits of \$3.1 million, representing approximately 0.1 of one per cent of the total commercial bank deposits in North Dakota.<sup>2</sup> Upon Applicant's formation in November 1968, Company was acquired by Applicant. Presently, Company competes with several other insurance agencies located in the relevant market which is approximated by the northern half of Burke County and the northeastern corner of Divide County. Follow-

ing its acquisitions of Forthun Agency and Darras Agency. Company became the only general insurance agency in Columbus. However, the evidence of record shows that at the time of acquisition Forthun Agency and Darras Agency were small in the relevant market and they were not particularly strong competitors. Thus, it is the Board's judgment that whatever slight adverse competitive effects might have resulted, these are outweighed by the public benefits resulting from Applicant's retention of Company which would assure the residents of Columbus of the continued availability of a convenient source of general insurance agency activities. The Board's review of the record of the affiliation indicates that the benefits have continued to outweigh such slight adverse effects.

There is no evidence in the record indicating that retention of Company would result in any undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices or other adverse effects on the public interest.

In accord with the Board's position with respect to violations of the Act, the Board has scrutinized the underlying facts surrounding the acquisition of the assets of Forthun Agency and Darras Agency without the Board's prior approval. Upon an examination of all the facts of record, the Board believes that the facts surrounding the violations in this case are not such as would call for denial of this application.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in section 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,<sup>3</sup> effective May 17, 1976.

GRIFFITH L. GARWOOD,  
Assistant Secretary  
of the Board.

[FR Doc.76-15149 Filed 5-24-76; 8:45 am]

## M&amp;S BANCORP

## Acquisition of Bank

M&S Bancorp, Janesville, Wisconsin, has applied for the Board's approval

<sup>3</sup> Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, Jackson and Partee.

under § 3(a)(3) of the Bank Holding Company Act, 12 U.S.C. § 1842(a)(3) to acquire 98.83 per cent of the voting shares of Merchants Bank of Evansville, Evansville, Wisconsin. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(d)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than June 17, 1976.

Board of Governors of the Federal Reserve System, May 18, 1976.

GRIFFITH L. GARWOOD,  
Assistant Secretary  
of the Board.

[FR Doc. 76-15150 Filed 5-24-76; 8:45 am]

#### REPUBLIC OF TEXAS CORP.

##### Order Approving Retention of the Howard Corporation With Respect to Its Lending Activities Only

Republic of Texas Corporation, Dallas, Texas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to continue the lending activities of its trusted affiliate, The Howard Corporation, Dallas, Texas ("Howard"). Such activities have been determined by the Board to be closely related to banking (12 CFR § 225.4(a)(1)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (41 F.R. 1331). The time for filing comments and views has expired, and the Board has considered the application and all comments received in the light of the public interest factors set forth in section 4(c)(8) of the Act (12 U.S.C. § 1843(c)).

By Order dated October 25, 1973, the Board approved the formation of Applicant for the purpose of becoming a bank holding company through the acquisition of Republic National Bank of Dallas, Dallas, Texas ("Republic Bank").<sup>1</sup> Republic Bank was itself a bank holding company by virtue of the 1970 Amendments to the Act and owned various bank and nonbank interests. At the time of its formation, Applicant also obtained indirect control of The Howard Corporation. The Board has previously ruled that Applicant would not be a successor to the grandfather privileges of Republic Bank, and Applicant has committed, and is required to dispose of the nonpermissible activities within the statutory period prescribed in § 4(a)(2) of the Act or, in the alternative, to apply to the Board for approval to retain them. In this proposal, Applicant has applied to

retain the lending activities of Howard. The Board regards the standards under § 4(c)(8) of the Act to continue to engage in activities to be the same as the standards for a proposed acquisition.

Applicant, the 4th largest banking organization in Texas, controls three subsidiary banks with aggregate deposits of approximately \$2.8 billion, representing approximately 6.5 per cent of the total deposits in commercial banks in the State.<sup>2</sup> Applicant received approval from the Federal Reserve Bank of Dallas, acting pursuant to § 25.4(b)(1) of the Board's Regulation Y (12 CFR 225), to engage *de novo* in direct lending activities on August 19, 1974. Effective with that date, Howard began reducing its loan and commitment activity and has, in fact, ceased making any new loans and commitments.

Howard, a group of companies held in trust for the sole benefit of Applicant, engages in a wide range of activities.<sup>3</sup> A substantial portion of Howard's assets is subject to divestiture under the provisions of § 4(a)(2) of the Act. This application seeks Board approval for Howard to retain certain loans made prior to 1974 and maturing not later than September, 1983. Howard's current loan portfolio consists of secured real estate loans, interim construction loans, home mortgages, secured and unsecured commercial loans, working capital loans, and personal loans. Since Howard has already ceased making any new loans and is no longer an active competitor in any relevant market, approval of this application would have no adverse effects on existing or potential competition in any market. Approval of this application should enable Applicant to arrange an orderly disposition of the loans previously made by Howard. There is no evidence in the record to indicate that the proposed continuation of Howard's lending activities would lead to an undue concentration of resources, unfair competition, conflicts of interests, unsound banking practices, or other adverse effects.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under § 4(c)(8) is favorable, and the application should be approved. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in section 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of

<sup>1</sup> Banking data are as of June 30, 1975.

<sup>2</sup> These activities include ownership of royalty, net profits, working and other interests in oil and gas properties; ownership of minority interests in several Dallas-area banks; direct lending activities; and ownership of a number of nonbank subsidiaries conducting activities such as credit life and disability insurance, the sale of money orders and travelers checks, and mortgage banking. For a full discussion of Howard's activities, see the Board's determination of Applicant's grandfather privileges dated September 10, 1973, 59 Federal Reserve Bulletin 768 (October, 1973).

its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof. By order of the Board of Governors, effective May 18, 1976.

GRIFFITH L. GARWOOD,  
Assistant Secretary  
of the Board.

#### FEDERAL TRADE COMMISSION

##### FAILURE TO POST MINIMUM OCTANE NUMBERS ON GASOLINE DISPENSING PUMPS

###### Environmental Impact Statement

###### Correction

In FR Doc. 76-14125, appearing on page 20017, in the issue for Friday, May 14, 1976 the following changes should be made:

On page 20019, in paragraph "(1)" of the second column, the line "stringent future emission standards", should be inserted after the third line.

On page 20019, in the sixth complete paragraph, the footnote designation now reading "16", should read "46".

On page 20020, the second line from the bottom of column two, now reading "octane numbers of the pump, and the", should read "octane numbers on the pump, and the".

On page 20021, in the first column, the first line of footnote 6 should read "482 F.2d 672 (D.C. Cir.1973) Cert. denied."

On page 20021, in the second column, the first line of footnote 26 should read "Id. at 14; see also P.I.C. Petition, page 6, par. 10".

On page 20021, in the third column, the footnote designation now reading "46" which immediately follows footnote designation "44", should read "45".

#### MARINE MAMMAL COMMISSION

##### PRIVACY ACT OF 1974

###### Amendment to Notice of Systems of Records

Notice is hereby given that the Marine Mammal Commission, in accordance with Sections a(7), e(4) and e(11) of the Privacy Act of 1974, 5 U.S.C. § 552a, proposes to amend the Notice of Systems of Records published in the FEDERAL REGISTER of 21 October 1975 (40 Fed. Reg. 49283), in order to establish an additional routine use by inserting, immediately after the sixth paragraph of the Appendix thereto, the following language:

"Disclosure may be made, as a routine use, to a Congressional office from the record of an individual contained in any of the Commission's systems in response to an inquiry from the Congressional office made at the request of that individual."

<sup>1</sup> Voting for this action: Chairman Burns and Governors Gardner, Wallich, Coldwell, Jackson, and Partee.

#### NATIONAL SCIENCE FOUNDATION NEUROBIOLOGY AND PSYCHOBIOLOGY ADVISORY PANELS

##### Notice of Joint Meeting

In accordance with the Federal Advisory Committee Act, P.L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Panels for Neurobiology and Psychobiology.

Date and time: June 10 and 11, 1976—9:00 a.m. each day.

Place: Room 421, National Science Foundation, 1800 G Street, N.W., Washington, D.C.

Type of meeting: Closed.

Contact person: Dr. James H. Brown, Program Director, Neurobiology Program, Rm. 333, telephone (202) 634-4036, or Dr. Robert Sorkin, Program Director, Psychobiology Program, Rm. 333, telephone (202) 632-4264, National Science Foundation, Washington, D.C. 20550.

Purpose of panel: To provide advice and recommendations concerning support for research in Neurobiology and Psychobiology. Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for closing: The proposals and projects being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals and projects. These matters are within exemptions (4) and (6) of 5 U.S.C. 522(b), Freedom of Information Act. The rendering of advice by the panel is considered to be a part of the Foundation's deliberative process and is thus subject to exemption (5) of the Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of P.L. 92-463. The Committee Management Officer was delegated the authority to make determinations by the Director, NSF, on February 11, 1976.

Dated: May 20, 1976.

M. REBECCA WINKLER,  
Acting Committee  
Management Officer.

[FR Doc. 76-15158 Filed 5-24-76; 8:45 am]

#### SUBGROUP ON FOOD AND NUTRITION Meeting

In accordance with the Federal Advisory Committee Act, P.L. 92-463, the National Science Foundation announces the following meeting:

Name: Subgroup on Food and Nutrition of the Advisory Groups on Contributions of Technology to Economic Strength, and Anticipated Advances in Science and Technology.

Date: June 14, 1976.

Time: 8:00 AM to 12:45 PM.

Place: Committee Room in Building 200, Ames Research Center, Moffett Field, California.

Type of meeting: Open.

Contact person: Dr. Richard C. Staples, Policy Research and Analysis Division, National Science Foundation, Washington, D.C. 20550, telephone (202) 632-7800.

The operation of this routine use will obviate the need for the written consent of constituents in cases where they request assistance of a Member of Congress that would entail the disclosure of information pertaining to them. In cases where a Congressional inquiry indicates that the request is being made on behalf of a person other than the individual whose record is to be disclosed, the Commission will advise the Congressional office that the written consent of the subject of the record is required.

Any person interested in this notice may submit written comments to the Marine Mammal Commission, Room 307, 1625 Eye Street, N.W., Washington, D.C. 20006 on or before 25 June 1976. All written comments received through that date will be considered before publication of the final notice of amendment. Comments received will be available for public inspection at the above address between the hours of 9 a.m. and 5 p.m. Monday through Friday.

Dated: May 17, 1976.

JOHN R. TWISS, Jr.,  
Executive Director.

[FR Doc. 76-15143 Filed 5-24-76; 8:45 am]

#### NATIONAL CREDIT UNION ADMINISTRATION

##### NATIONAL CREDIT UNION BOARD

###### Meeting and Agenda

Pursuant to the provisions of the Federal Advisory Committee Act, Public Law 92-463, 86 Stat. 770, notice is hereby given that the National Credit Union Board will hold its quarterly meeting on June 10-11, 1976, at the offices of the National Credit Union Administration, 2025 M Street, N.W., Washington, D.C. 20456. The meetings will commence at 9:00 a.m. daily in Room 4210.

The agenda for this meeting will consist of an update briefing regarding the activities of the several offices of the National Credit Union Administration, a briefing on share insurance activities, and other aspects of the Administration. Matters for discussion will include legislative activities.

This meeting of the National Credit Union Board will be open to the public. Members of the public may file written statements with the Board either before or after the meeting. To the extent that time permits, interested persons may be permitted to present oral statements to the Board only on items listed in the aforementioned agenda. Requests to present such oral statements must be approved in advance by the Chairman of the Board. Such requests should be directed to the Chairman, National Credit Union Board, National Credit Union Administration, Washington, D.C. 20456.

HERMAN NICKERSON, Jr.,  
Administrator.

MAY 18, 1976.

[FR Doc. 76-15147 Filed 5-24-76; 8:45 am]

Summary minutes: May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management Room 248, National Science Foundation, Washington, D.C. 20550.

Purpose of meeting: To review the comments of the Consultants on the list of most important potential policy recommendations made to the two advisory groups on Science and Technology in the area of food and nutrition. We will also review the recommendations and discuss the need to take other actions. For this purpose, the committee will again focus on the policies or commitments that this country has either consciously or unconsciously followed in the fields of food production and distribution especially with regard to our ability to feed ourselves, to help the rest of the world to feed itself, to help to relieve acute famines elsewhere in the world and to improve our financial and political position in the world.

Agenda: 8:00—Remarks by the Chairman. 10:15—Subgroup discussion of major issues. 12:45—Adjournment.

Dated: May 20, 1976.

M. REBECCA WINKLER,  
Acting Committee  
Management Officer.

[FR Doc. 76-15159 Filed 5-24-76; 8:45 am]

#### NATIONAL SCIENCE BOARD REGIONAL FORUMS

##### Southeastern Region

The National Science Board is planning a series of regional forums in response to language in the NSF Authorization Act.

Specifically, the Foundation was asked . . . to prepare a comprehensive plan to facilitate the participation of members of the public in the formulation, development, and conduct of the National Science Foundation's programs, policies, and priorities.

The primary objective of the forums is to encourage the expression of views by the general public on scientific and science education issues. Several Members of the National Science Board will participate in each forum; participation is invited from business, state and local government, academe, public interest and citizen groups, and the community at large. Ideas exchanged at the forum will help the Board expand its information base and assist in its policy-making role for the National Science Foundation.

Topics selected for discussion at this forum were generated from a regionally based citizen planning group. Topics for the first forum which will focus on the southeastern region are:

1. Energy—the effects on economic activity with particular reference to employment consequences, and the effect of energy policy on individual values and lifestyles.
2. Food systems—with a food and fibre production orientation, but including institutions (e.g. distributive systems), in the context of regional growth strategy choices.
3. Natural systems—water, soil, natural areas, and air; to be considered in the context of regional growth, and its impacts.
4. Education and knowledge—the role of scientific and technical information in public decision-making, and the information needs of the lay population.

<sup>1</sup> 38 F.R. 30480 (November 6, 1973).

The first NSB Regional Forum is scheduled for June 21, 1976, at the Space Science Building, Georgia Institute of Technology, Atlanta, Georgia, and will begin at 9:00 a.m. Further information may be obtained from the Community Affairs Branch, Room 527, National Science Foundation, 1800 G Street, N.W., Washington, D.C. 20550.

Interested citizens who cannot attend the Forum are invited to send written comments on science policy issues to the above NSF address by July 15, 1976.

THEODORE W. WIRTHS,  
Director, Office of  
Government & Public Programs.

MAY 20, 1976.

[FR Doc. 76-15360 Filed 5-24-76; 8:45 am]

## OFFICE OF MANAGEMENT AND BUDGET

### CLEARANCE OF REPORTS

#### List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the office of management and budget on May 18, 1976 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB and an indication of who will be respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the clearance office, office of management and budget, Washington, D.C. 20503, 202-394-4529, or from the reviewer listed.

[Notice No. 64]

## MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MAY 18, 1976.

**IMPORTANT NOTICE:** The following are notices of filing of applications for temporary authority under Section 210a (a) of the Interstate Commerce Act provided for under the provisions of 49 CFR § 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than June 9, 1976. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

#### MOTOR CARRIERS OF PROPERTY

No. MC 7523 (Sub-No. 15TA), filed May 7, 1976. Applicant: VENTURA TRANSFER COMPANY, 3440 East South St., Long Beach, Calif. 90805. Applicant's representative: Warren S. Goodman, 2418 E. 223rd St., Long Beach, Calif. 90810. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Catalyst*, in bulk, from Richmond, Calif., to El Paso, Tex., for 180 days. Supporting

Shipper: Standard Oil Co. of California, 575 Market St., Room 2510, San Francisco, Calif. 94120. Send protests to: Philip Yallowitz, District Supervisor, Bureau of Operations, Room 3121 Federal Bldg., 300 North Los Angeles St., Los Angeles, Calif. 90012.

No. MC 50069 (Sub-No. 507TA), filed May 7, 1976. Applicant: REFINERS TRANSPORT & TERMINAL CORPORATION, 445 Earlwood Ave., Oregon, Ohio 43616. Applicant's representative: Jack A. Gollan (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Liquid fertilizer solutions*, in bulk, in tank vehicles, from Kenton and Morall, Ohio, to Blissfield and Riggs, Mich., for 180 days. Supporting shipper: Smith Douglass, Div. of Borden Chemical, Borden, Inc., P.O. Box 8, Riggs, Mich. 49276. Send protests to: Keith D. Warner, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 313 Federal Office Bldg., 234 Summit St., Toledo, Ohio 43604.

No. MC 58738 (Sub-No. 4TA), filed May 10, 1976. Applicant: MONK'S EXPRESS, Phelps Street/Port Dickinson, Binghamton, N.Y. 13901. Applicant's representative: Herbert M. Canter, 305 Montgomery St., Syracuse, N.Y. 13202. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *General commodities*, with usual exceptions, consisting generally of rope, cordage, braided wire, rods, reels, and finishing line, from South Otselec (Chenango County), N.Y., to Homer (Cortland County), N.Y. Applicant will tack with its present authority from Cortland Co., N.Y. in MC 58738 Sub-No. 2, in order to render a service to Syracuse (Onondaga Co.), N.Y., and in MC 58738 Sub-No. 1, in order to render a service to Binghamton, N.Y. As noted above, interlines will be effected with line-haul carriers at both Binghamton and Syracuse, N.Y., for 180 days. Supporting shipper: Clifton W. Bowers, Traffic Manager, Gladding Corporation, South Otselec, N.Y. 13155. Send protests to: Morris H. Gross, District Supervisor, Interstate Commerce Commission, Room 104, 301 Erie Blvd., West, Syracuse, N.Y. 13202.

No. MC 97310 (Sub-No. 22TA), filed May 5, 1976. Applicant: SHARRON MOTOR LINES, INC., P.O. Box 31261, Birmingham, Ala. 35222. Applicant's representative: Virgil H. Smith, Suite 12, 1587 Phoenix Blvd., Atlanta, Ga. 30349. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities* (except Classes A and B explosives and commodities requiring special equipment or injurious to other lading), (1) Between Atlanta, Ga., and its Commercial Zone, and Prattville, Ala., serving the intermediate points of Langdale, Fairfax, Opelika, Auburn, Loachapoka, Natusulga, Tallahassee, and Wetumpka, Ala., and their Commercial Zones, also serving the off-route points of Shawmut,

Lanett, and Tuskegee, Ala., and their Commercial Zones; from Atlanta, Ga., over Interstate Highway 85 to junction of U.S. Highway 29 at a point one (1) mile west of the Georgia-Alabama State line and using U.S. Highway 29 and alternate U.S. Highway 27 for such portions of Interstate Highway 85, as are not yet completed in Georgia, thence over U.S. Highway 29 to junction of Alabama State Highway 14, thence over Alabama State Highway 14 to Prattville, Ala., and return over the same route, serving the off-route points over all available highways from U.S. Highways 29 and 14; (2) between Prattville, Ala., and Birmingham, Ala., and their Commercial Zones, serving the intermediate points of Verbena, Thorsby, Cooper, Clanton, Jamison, Ocampo, and Calera and their Commercial Zones, also serving the off-route points of Maplesville and Centreville, Ala., and their Commercial Zones; from Prattville, Ala., over U.S. Highway 31 to Birmingham, Ala., restricted against shipments originating at or destined to points on U.S. Highway 31, between Calera and Birmingham, Ala., and return over the same route, serving the off-route points over all available highways from U.S. Highway 31.

**NOTE.**—Applicant intends to tack the authority here applied for to its existing authority in MC-97310 and also intends to interline with other carriers at Atlanta, Ga., and Prattville and Birmingham, Ala., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority.

Supporting shipper: There are approximately 76 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Alan C. Tarrant, District Supervisor, Interstate Commerce Commission, Room 212, 145 East Amite Bldg., Jackson, Miss. 39201.

No. MC 107403 (Sub-No. 974TA), filed May 7, 1976. Applicant: MATLACK, INC., Ten West Baltimore Ave., Lansdowne, Pa. 19050. Applicant's representative: John Nelson (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Reclaiming oil*, in bulk, in tank vehicles, from Lorain, Ohio, to Lyons, Ill., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Gold Bond Building Products, Div. National Gypsum Co., 325 Delaware Ave., Buffalo, N.Y. 14020. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch St., Room 3238, Philadelphia, Pa. 19106.

No. MC 108341 (Sub-No. 46TA), filed May 7, 1976. Applicant: MOSS TRUCKING COMPANY, INC., P.O. Box 8409, Charlotte, N.C. 28208. Applicant's representative: Morton E. Kiel, 5 World Trade Center, Suite 6193, New York, N.Y. 10048. Authority sought to operate as a common carrier, by motor vehicle, over

irregular routes, transporting: *Buildings, building panels, building parts, and materials, accessories, and supplies*, used in the installation, erection, and construction of buildings, building panels, and building parts (except commodities in bulk), from the plantsite and storage facilities of Butler Manufacturing Company at Annville (Lebanon County), Pa., to points in Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Delaware, Maryland, Kentucky, West Virginia, Virginia, Tennessee, North Carolina, Ohio and the District of Columbia, restricted to traffic originating at the above-named plantsite and storage facilities of Butler Manufacturing Company, at Annville, Pa., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Butler Manufacturing Co., 400 North Weaver, P.O. Box F, Annville, Pa. 17003. Send protests to: Terrell Price, District Supervisor, 800 Briar Creek Rd., Room C516, Mart Office Bldg., Charlotte, N.C. 28205.

No. MC 112184 (Sub-No. 49TA), filed May 10, 1976. Applicant: THE MANFREDI MOTOR TRANSIT COMPANY, 11250 Kinsman Road, Newbury, Ohio 44065. Applicant's representative: John P. McMahon, 100 East Broad St., Columbus, Ohio 43215. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: *Corn products and blends containing corn products* (except corn oil, feed products, and blends containing corn oil and feed products), in bulk, from the plantsite or warehouse facilities of Cargill, Inc., located at or near Memphis, Tenn., to points in Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina and Texas, under a continuing contract with Cargill, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Cargill, Incorporated, P.O. Box 13368, Memphis, Tenn. 38113. Send protests to: James Johnson, Interstate Commerce Commission, Bureau of Operations, 181 Federal Office Bldg., 1240 East Ninth St., Cleveland, Ohio 44189.

No. MC 121607 (Sub-No. 6TA), filed May 6, 1976. Applicant: COLUMBIA-PACIFIC TRANSPORT CO., 208 N. Gum St., P.O. Box 6377, Kennewick, Wash. 99336. Applicant's representative: George R. LaBissoniere, 1100 North Bldg., Seattle, Wash. 98104. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Commodities*, which because of their size or weight require the use of special cranes for loading and unloading, between points in Benton and Franklin County, Wash., on the one hand, and points in Oregon, Idaho, Montana and California on the other, for 180 days. Supporting shippers: There are approximately 15 statements of support attached to the application, which may be examined at the Interstate Commerce

may be examined at the field office named below. Send protests to: Max Gorenstein, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 150 Causeway St., Boston, Mass. 02114.

## APPLICATION OF PASSENGERS

No. MC 124935 (Sub-No. 7TA), filed May 5, 1976. Applicant: ALMEIDA BUS LINES, INC., 1091 Kempton St., New Bedford, Mass. 02741. Applicant's representative: Mary E. Kelley, 11 Riverside Ave., Medford, Mass. 02155. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in special operations beginning and ending at New Bedford, Wareham, Borne, Hyannis, Falmouth, Fall River, Taunton and Brockton, Mass., and extending to the Newport Jail-All Sports Theatre at Newport, R.I., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: There are approximately 111 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to:

tests to: Gerald H. Curry, District Supervisor, 24 Weybosset St., Providence, R.I. 02903.

No. W-1294 (Sub-No. 1TA), filed May 4, 1976. Applicant: SHORELINE BOATING SERVICE, INC., 144 Water St., South Norwalk, Conn. 06854. Applicant's representative: Thomas W. Murrett, 342 North Main St., West Hartford, Conn. 06117. Authority sought to operate as a *common carrier*, by water, in the transportation of: *Passengers and their baggage*, by self-propelled vessels, in scheduled, special and charter operations, between Norwalk, Conn., and Northport, Long Island, N.Y., for 180 days. Supporting shippers: There are approximately 48 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: C. D. Verrastro, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 324 U.S. Post Office Bldg., 135 High St., Hartford, Conn. 06101.

By the Commission.

[SEAL] ROBERT L. OSWALD,  
Secretary.

**NATIONAL FOUNDATION ON THE  
ARTS AND THE HUMANITIES  
ARCHITECTURE + ENVIRONMENTAL  
ARTS**

**Grant Program Guidelines**

The following are guidelines for Fellowship Grants made under the Architecture + Environmental Arts Program of the National Endowment for the Arts,

an independent agency of the Federal government which makes grants to organizations and individuals concerned with the arts throughout the United States.

The Architecture + Environmental Arts Application Deadlines and Grant Calendar is included. Interested persons should contact Bill Lacy, Director, Architecture + Environmental Arts Program, National Endowment for the Arts, Mail

Stop 503, Washington, D.C. 20506 (202) 634-4276, for further information and application forms.

Signed at Washington, D.C., on May 17, 1976.

ROBERT M. SIMS,  
*Administrative Officer, National  
Endowment for the Arts, Na-  
tional Foundation on the Arts  
and the Humanities.*

**Granting Activities Information Chart**

\*See "Submission of Applications" in the section Important Information for Applicants

Grant Category	Application Submission Postmark Date	Announcement of Rejection or Grant Award	Do Not Plan to Start Before This Date
To assist projects which will broaden public design awareness and participation in resolving design issues.	Public Education and Awareness	*June 2, 1976..... October 1976 ..... December 1976 *December 1, 1976..... June 1977 ..... August 1977	
To assist research projects conducted by professional schools, research organizations and other groups active in design fields, and qualified individuals who are normally associated with such organizations.	Academic and Professional Research	*June 2, 1976..... October 1976 ..... December 1976 *December 1, 1976..... June 1977 ..... August 1977	
To assist design programs conducted or initiated by state arts agencies or regional arts groups.	Assistance to State Arts Agencies	June 2, 1976	October 1976 December 1976
To assist planning for the conservation of historic structures, significant districts, and special landscapes. (No construction funds)	American Architectural Heritage	September 1, 1976	March 1977 May 1977
To assist communities in the planning and design of exemplary cultural facilities; to encourage the commitment of local public and private money for project implementation.	Cultural Facilities	September 1, 1976	March 1977 May 1977
To assist projects which improve the effectiveness of design related national professional membership organizations.	Services to the Field	December 1, 1976	June 1977 August 1977
To assist practicing professional designers of exceptional talent who wish to engage in special independent activity.	Design Fellowships	December 1, 1976	June 1977 August 1977
To encourage national emphasis on important opportunities for design and to provide positive influence on our built environment.	National Theme Program	NO APPLICATIONS WILL BE CONSIDERED IN THIS CATEGORY DURING THE CURRENT FISCAL YEAR

## Architecture + Environmental Arts Program

## Scope

The National Endowment for the Arts, an independent Federal agency, was established in 1965. The major goals of the Endowment are to make the arts more widely available to Americans, to strengthen cultural organizations, to preserve our rich cultural heritage for present and future generations, and to encourage the creative development of our nation's finest talent.

The Architecture + Environmental Arts Program, which constitutes one of twelve Endowment program areas, is concerned primarily with the improvement of the visible characteristics of our built surroundings. Thus, the scope of the program is subject to broad interpretation. It is perhaps useful to associate the program's activity with the related design professions, typically: architecture, landscape architecture, urban design, city and regional planning, interior design, and industrial design. The program attempts to encourage invention and innovation and to bring the very best design into the experience of every citizen.

**PLEASE DO NOT ATTEMPT TO COMPLETE AN APPLICATION FORM BEFORE READING THE GUIDELINES THOROUGHLY.**

## Grant Categories

## Public Education and Awareness

To assist projects which will broaden public design awareness and participation in resolving design issues.

A nation's beauty reflects the attitude of its people. Therefore, the improvement of our country's physical fabric depends upon awareness, concern, and participation of all citizens. Many who are not professional designers are confronted daily with decisions which have important design consequences: consumers in their choice of goods and services, clients in working with professional designers, and persons engaged in the building industry.

The objective of this program is to assist projects which are directed to these ends: to provide information on design issues; to advance public appreciation of beauty in the man-made world; and to provide assistance for groups or individuals as they seek ways to improve the quality of their surroundings.

## Project Type

Grants in this category will be awarded for preparation of publishable material, films, video-tapes, exhibits, critical journalism, and other forms of public communication. Generally, funds will not be granted for work which should be supported by a publisher or broadcasting organization.

## Evaluation Criteria and Priorities

Priority will be given to proposals which can:

- identify a specific audience clearly
- describe a well-defined means for broad dissemination
- initiate further action
- involve groups or communities which have had little previous exposure to good design.

## Special Requirements

All applications for funding of films, books, exhibits, etc. must clearly indicate methods for distribution of finished work.

Professionals in the field of communication must submit evidence of their qualifications. Examples are filmmakers, conference directors, and writers.

## Academic and Professional Research

To assist research projects conducted by professional schools, research organizations, and other groups active in design fields, and qualified individuals who are normally associated with such organizations.

The National Endowment for the Arts, through the program for Academic and Professional Research, provides assistance for exploratory activity in design. Emphasis is placed on design as an aesthetic concern and not on technological projects. Since the total amount of money available is relatively small, special attention is given to this distinction.

Highest priority is given projects that develop new approaches to design which show promise of significant influence on the future quality of our surroundings. Also considered are those which seek to extend the state of knowledge in the field, assuming current design approaches. Proposals in any of the following professional areas are appropriate: architecture, landscape architecture, urban design, city and regional planning, graphic design, interior design, and industrial design.

## Special Requirements

Applicants should:

- employ language common to lay usage
- clearly explain the project's value to the applicable field of design.

## Eligibility: Special Note

Grants are available to universities, professional degree granting institutions, and other qualified nonprofit, tax exempt organizations. Exceptionally talented individuals in the academic community are eligible for individual grants under this category.

## Assistance to State Arts Agencies

To assist design programs conducted or initiated by state arts agencies or regional arts groups.

Grants under this program are intended to give state arts agencies or regional arts groups the means for expanding the audience for good design in the states, to promote increased citizen awareness and participation. Grants are also awarded to state arts agencies to initiate state agency activity in architecture and related design fields. These grants are intended to encourage initiative by the design professions within the states, to engage in projects of statewide significance, and to stimulate interest in research which addresses particular local design needs and opportunities.

Proposals for the addition of professional staff will be considered in collaboration with the Federal-State Partnership Program. Although applications and grants will be administered by Architecture + Environmental Arts, funds will be made available through Federal-State Program Development.

## Eligibility: Special Note

Grants are available only to officially designated state arts agencies and regional arts groups. They may apply on their own behalf or on behalf of local metropolitan or community-wide arts agencies or appropriate government agencies in the state.

## American Architectural Heritage

To assist planning for the conservation of historic structures, significant districts, and special landscapes. (No construction funds)

The preservation of America's architectural heritage has long been a subject of major interest to the Architecture + Environmental Arts Program. While the program encourages historic preservation, the primary interest is not to preserve or restore individual historic structures, but rather in the sympathetic adaptation of buildings and districts to create new vitality in communities.

In Fiscal Year 1977, funding for the area will again concentrate on the conservation of older neighborhoods, both residential and commercial, and the coalescence of diverse civic interests needed to make these places active centers for today's residents. In addition, emphasis will be placed upon merging urban design, city and town planning, and preservation objectives in the process of conserving these areas.

## Evaluation Criteria and Priorities

Priority will be placed on:

- support of professional personnel and purchase of materials rather than general administrative costs or equipment
- action-oriented projects offering promise for implementation
- integration of neighborhood conservation objectives into the broader framework of community development policies and programs.

## Eligibility: Special Note

Applicant organizations must possess broad community support and demonstrated capability for implementation.

Projects for the identification and evaluation of architectural resources within areas of special character may be considered.

## Cultural Facilities

To assist communities in the planning and design of exemplary cultural facilities; to encourage the commitment of local public and private money for project implementation.

Architecture + Environmental Arts recognizes the necessity for the development and use of cultural facilities to satisfy an increasing public interest and participation in the arts.

A small program of design and planning assistance is available in instances of compelling need to establish, replace, or alter cultural facilities. While the greatest needs are for financial assistance to support construction costs and professional design fees, limited resources restrict the Endowment's ability to respond to requests of this nature. It is also Endowment policy not to provide money for acquisition of real estate, construction, or renovation of buildings.

## Special Requirements

In addition to the normal requirements for an application submitted by an organization, the following must be included:

- evidence of facility need
- a full description of the activity to be accommodated in the proposed project, its context in a plan for the community, the background of groups involved in the project, and location of the site
- indication that the scale of the proposed facility will meet the demonstrated need
- visual evidence of designer capabilities
- evidence that a grant would attract local funds for project implementation or realize adequate revenues
- evidence of property or facility ownership
- clear visual illustration of any existing or planned structure related to the proposed project.

## Project Type

Grants are available for the following:

- research on design, planning, and use of facilities for the arts
- reports and reference materials resulting from research on arts facilities
- studies of adaptive uses for significant older buildings as arts facilities
- research on special arts facility requirements such as lighting, acoustics, climate control, security
- feasibility studies; studies of technical requirements for specific proposed arts facilities
- preparation of fund-raising campaign materials for arts facilities
- architectural design studies and competitions for specific arts facilities.

## Evaluation Criteria and Priorities

Priority is placed upon projects benefiting communities:

- which have lost their arts facilities due to disaster or which otherwise suffer from severely limited arts facilities
- where arts programs are related to plans for economic and social revitalization
- which seek to institute design competitions to assure a high standard of design.

## Services to the Field

*To assist projects which improve the effectiveness of design-related national professional membership organizations.*

In recognition of the responsibility of the national professional organizations for advancing the cause of good design, the Endowment has set aside funds to assist such groups. It is intended that the Endowment support only programs of highest national priority and most enduring benefit to the widest membership.

**Evaluation Criteria**

Projects are appropriate which would:

- result in expanded long-term organizational effectiveness in efforts to improve the quality of design in our surroundings and assist the membership in accomplishing this same goal
- operate potentially on a self-supporting basis (continued Endowment support for any single project cannot be assured)
- request support for specific projects rather than general operating costs
- request support for continuing and strengthening existing projects.

**Special Requirements**

The application submitted must:

- clearly document a need
- give indication of membership benefit and support.

**Eligibility: Special Note**

This grant category is open to the established national membership organizations of the design professions: architecture, landscape architecture, city and regional planning, interior design, and industrial design.

## Design Fellowships

*To assist practicing professional designers of exceptional talent who wish to engage in special independent activity.*

The Architecture + Environmental Arts Program seeks to encourage especially talented persons to engage in independent projects or studies which will improve their capabilities in design. Professionals who could benefit in this way from an intensive "office sabbatical" are considered. The grants are intended for professionals with sufficient experience and maturity in their own design work as well as a broad understanding of the field. Grantees will be required to commit an appropriate portion of normal professional practice time to the project over a period of 6 to 12 months.

**Project Types**

Fellowships are:

- for the opportunity for independent work which broadens or deepens the Fellow's professional awareness and capability
- not intended to support graduate study or purchases of special equipment.

**Evaluation Criteria and Priorities**

Priority will be given to proposals which show potential:

- for assisting applicant's further professional development
- for impact on the profession.

## National Theme Program

**Special Requirements**

Include with the application form:

- documentation by professionals who are licensed which indicates state in which license was issued and license number
- documentation of the actual relationship between the applicant and employer or practice during the period of the project
- a comprehensive statement of past experience including information on educational background, professional experience, honors, travel, and publications
- three letters of endorsement which attest to the applicant's professional qualifications, his ability to execute the proposed project in an exemplary manner, and the value of the project for the individual and the profession. It is preferred that only persons who are fully aware of the nature of the applicant's proposal submit these letters.
- a description of the proposed activity explaining the objectives of the applicant, proposed work schedule, procedures, and a statement of anticipated benefit to the applicant and the profession. This must be contained in the "Project Description" portion of the application form. The applicant may send supplementary material, but it will not be returned.

**Eligibility: Special Note**

Applicants must have been active as practicing professionals continuously in any one of the design fields for the immediate past five years: architecture, landscape architecture, city and regional planning, urban design, interior design, and industrial design. They must have received at least a bachelor's degree or the equivalent in an accredited professional curriculum, and must hold a license for practice, if it is required in the applicant's profession. Others whose contribution to the design fields is exceptional will also be considered.

**Persons who are associated primarily with a professional school must apply under the Academic and Professional Research category.**

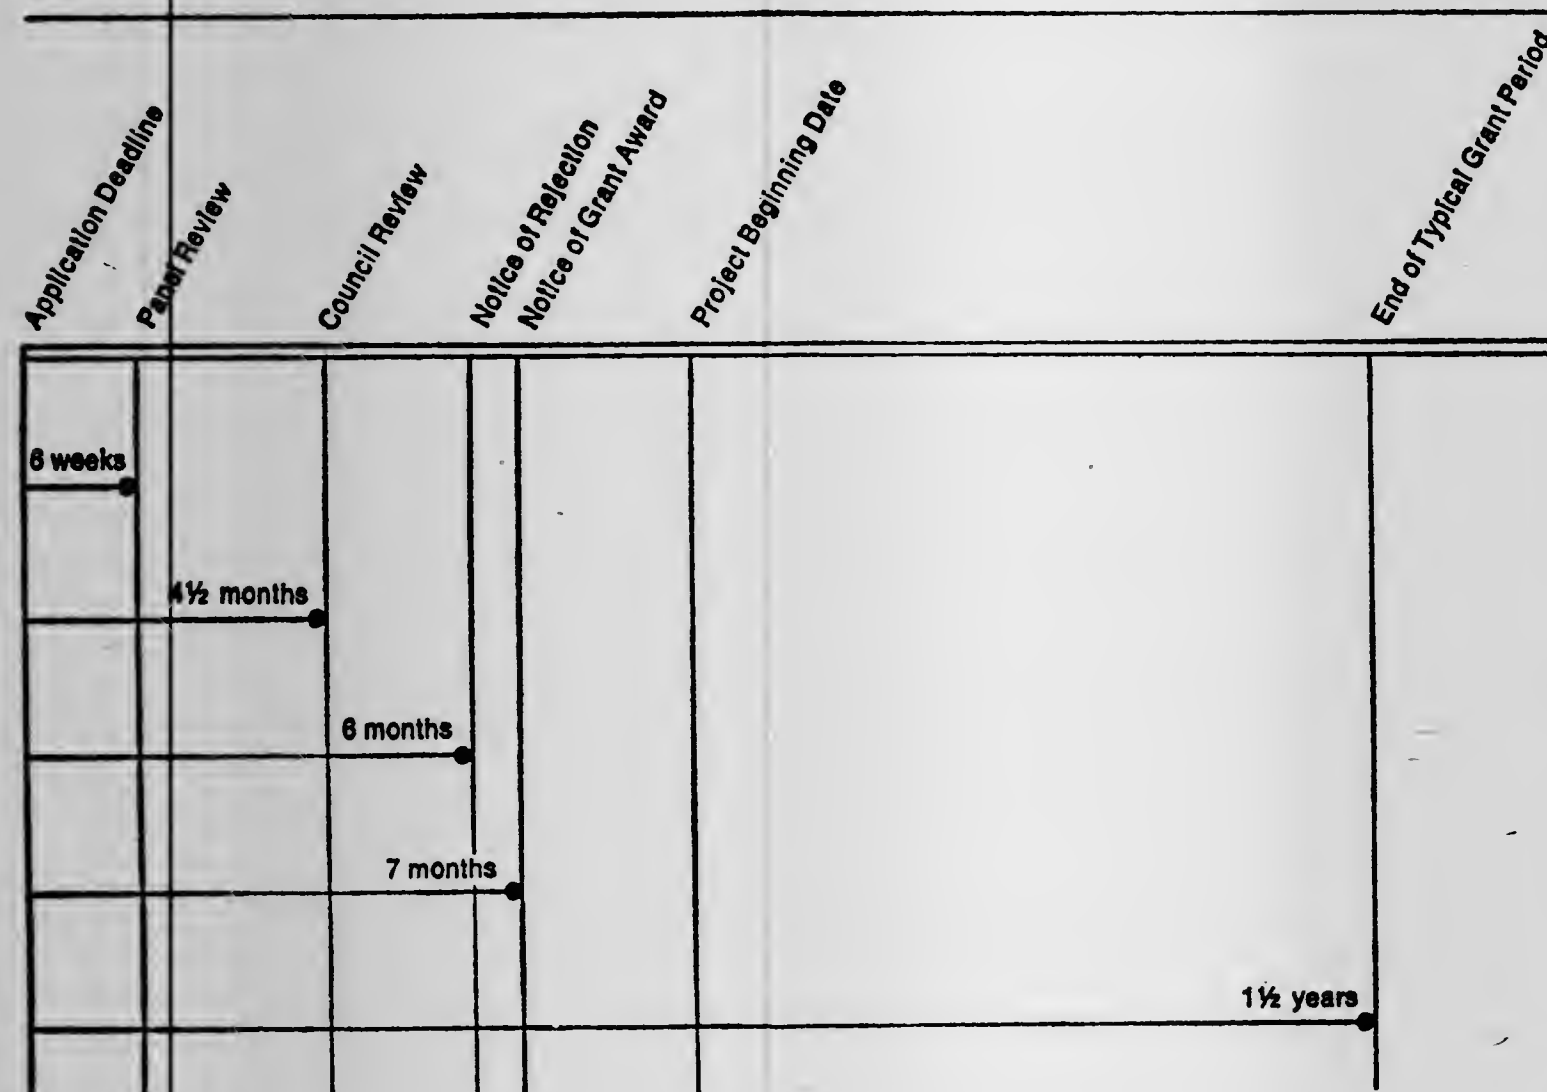

*To encourage national emphasis on important opportunities for design and to provide positive influence on our built environment.*

The National Theme Program, first initiated in 1973, gives special attention to important specific areas for creative design. The first program theme, "City Edges," emphasized boundary conditions within the inhabited landscape. The second, "City Options," was concerned with alternatives for the development of settings in our communities which impart a unique quality. "Cityscale," the current program theme, points to the small human scale features of our communities which bring them vitality and appeal.

**No applications will be considered in this category during the current year.**

## Grantmaking Procedure: Diagram

## Important Information for Applicants

11

## Definitions

## Grants to Individuals

These grants are available for amounts up to \$10,000 and require no matching funds. By statute, Endowment grants may be awarded only to individuals "of exceptional talent."

Applications for grants to individuals must be submitted in the name of one person. Although modest use of consultants is permitted if essential for successful completion, it is intended that the individual applying carry out most of the work under any grant which may be awarded. Applications involving substantial participation of more than one person or which include an organization must be submitted by a *qualified organization and require matching funds.*

Grants are awarded only to citizens or permanent residents of the United States.

## Grants to Organizations

Grants to state and local government entities, or other nonprofit, tax exempt organizations generally extend to a maximum of \$20,000. The applicant organization must provide an amount at least equal to the amount requested from the Endowment in matching funds. This matching amount must be expended only on the specific project for which the grant is made, as budgeted, and entirely within the period specified in the grant.

Where two or more organizations are involved, one single organizational entity must be designated the "applicant organization," which in turn would become the legal recipient of any eventual grant. It is the responsibility of this entity to comply with all Endowment requests and regulations concerning the application, and to inform any co-sponsors or consultants of the status of the application and any eventual grant.

In the case of universities, applications must be submitted under the signature of the appropriate university-designated authorizing official.

By statute, the National Endowment for the Arts is limited to the support of organizations which meet the following criteria:

a) organizations in which no part of net earnings inures to the benefit of a private stockholder or individual and to which donations are allowable as a charitable contribution under Section 170(c) of the Internal Revenue Code of 1954, as amended. Two copies of the Internal Revenue Service Determination letter for tax-exempt status must be submitted with each application.

b) applicants receiving National Endowment for the Arts support must conduct their operations in accordance with the requirements of Title VI of the Civil Rights Act of 1964 and the Rehabilitation Act of 1973, as amended, which bar discrimination in Federally assisted projects on the basis of race, color, national origin, or handicap. Applicants receiving support from the National Endowment for the Arts who will be making payments for services to any person other than the grantee must comply with these requirements. Such grantees are required to file with the Grants Office, an Assurance of Compliance form. The form on page 23 may be removed and completed for this purpose. Please enclose the completed form with your application and mail to: Grants Office (Mail Stop 500), National Endowment for the Arts, Washington, DC 20506. If the applicant has filed an Assurance of Compliance form with the Arts Endowment within the last five years, it is not necessary to complete another form at this time.

c) organizations which compensate all professional performers, related or supporting professional personnel, laborers, and mechanics at the prevailing minimum compensation level or on the basis of negotiated agreements which would satisfy the requirements of Parts 3, 5, and 505 of Title 29 of the Code of Federal Regulations for the duration of any project supported in whole or in part by the National Endowment for the Arts.

## Duration of Grants

Grants are awarded for a specified period of time, rarely exceeding one year in length.

## Project Location

Generally all projects supported by the Endowment must be performed within the fifty states, the District of Columbia, Puerto Rico, Guam, American Samoa, or the Virgin Islands. Full justification in terms of benefits accruing to the United States must accompany any request for an exception.

## Methods of Funding

## Program Funds

Generally, grants to qualified organizations will be made on at least a dollar-for-dollar matching basis. Applicants requesting assistance from Program Funds must present evidence in the proper space (Section X) on the application (Organization Grant Application/NEA-3 Rev.) that at least one-half of the total cost of the project will be provided by the applicant. Anticipated sources of matching must be identified. Budgeted funds, as well as newly raised funds, may be used for matching in all programs.

## Example:

If an applicant requests from the Endowment	\$20,000
then applicant lists match of at least	\$20,000
and total project budget reflects at least	\$40,000

In order to ensure budgetary flexibility, funds have been set aside to enable the Architecture + Environmental Arts Program to respond to new developments in the field of design.

## Treasury Fund

For more information see Appendix I "Treasury Fund Method of Matching Grants" or contact the Office of General Counsel, National Endowment for the Arts, Washington, DC 20506.

## Grantmaking Procedure: Explanation

**Selection Procedure**

Architecture + Environmental Arts staff refer all applications to an advisory committee composed of persons who are outstanding representatives of the design and planning fields. The recommendations of this committee are submitted to the National Council on the Arts, an advisory group of twenty-six persons appointed by the President of the United States. The National Council reviews and makes recommendation on applications to the Chairman of the National Endowment for the Arts. Following this, applicants are notified of approval or rejection in writing.

**Evaluation Criteria**

Preference will be given applications in any grant category which meet the following criteria:

- clear response to a public need
- assurance of favorable impact on the community in terms of aesthetic and economic benefit
- demonstration of broad community, academic, or professional endorsement
- evidence that objectives can be achieved within the framework of realistic methodology, budget, and time while meeting the highest standards
- participation of persons whose professional qualifications are clearly well suited to the successful achievement of project goals
- provision of matching funds in the form of cash rather than services, overhead, etc.
- minimum emphasis on equipment, travel, or, in the case of manuscripts, those costs which might be borne by a publisher
- assurance that the proposed project will not duplicate the efforts of others
- evidence that Endowment funds are essential to the project.

Additional evaluation criteria specifically applicable to a particular grant category are included in the description of the grant category.

**Notification**

Applicants are to understand that the grant process requires more than six months to complete and should plan their projects accordingly. An estimate of the announcement date is given for each grant category in the Granting Activities Information Chart. Applicants are notified of rejection or approval of proposed projects in writing. Applicants are requested not to seek information about the status of their applications prior to this notification. In compliance with the Privacy Act of 1974, we wish to furnish you with the following information:

Section (5) of the National Foundation on the Arts and the Humanities Act of 1965, as amended (20 U.S.C. 954) authorizes the Endowment to solicit the requested information. This information is needed to process your grant application and for statistical research and analysis of trends. The routine uses for which this information can be used and the purposes of such use are general administration of grant review process, statistical research, congressional oversight and analysis of trends.

Failure to provide the requested information could result in rejection of your application due to lack of sufficient facts for determining either your eligibility for a grant or the amount which should be awarded.

## Appendix I

## The Treasury Fund Method of Matching Grants

When the National Endowment for the Arts was created, Congress included a unique provision in its enabling legislation. This provision allows the Endowment to work in partnership with private and other non-Federal sources of funding for the arts. Designed to encourage and stimulate increased private funding for the arts, the Treasury Fund allows non-Federal contributors to join the Endowment in the grant-making process, generally for projects supported by the Endowment under the established program guidelines.

The Endowment encourages use of the Treasury Fund method as an especially effective way of combining federal and private support, and as an encouragement to all potential donors, particularly those representing new or substantially increased sources of funds.

The Endowment may accept gifts in the form of money and other property. Bequests may be made to the Endowment as well. Gifts to the Endowment are generally deductible for Federal income, estate, and gift tax purposes.

Gifts may be made to the Endowment for the support of a nonprofit, tax exempt, cultural organization which has been notified that the Endowment intends to award it a grant under its regular program guidelines—organizations such as a museum, a symphony orchestra, a dance, opera, or theatre company—or for an Endowment program such as fellowships, touring, conferences, or workshops.

When a restricted gift is received it frees an equal amount from the Treasury Fund, which is then made available to the grantee in accordance with the amount and conditions of the grant, as recommended by the National Council on the Arts and approved by the Chairman.

The Endowment also accepts unrestricted gifts to be used for projects recommended to the Chairman by the National Council on the Arts.

**How a Treasury Fund Grant Is Arranged**  
Those interested in giving for a specific purpose should note the step by step process described below. We will use an orchestra as an example.

1. If the project is eligible for consideration (under the Orchestra Program guidelines), the orchestra submits to the Endowment a formal application, which may include a list of potential donors.

2. The application is reviewed first by the appropriate Advisory Panel (in this case the Music Advisory Panel) and then by the National Council on the Arts and is recommended for approval or rejection. Based on these recommendations, the Chairman makes the final determination and notification is sent to the orchestra.

3. If the grant award is approved, the orchestra officials then request that the donors forward their gifts to the National Endowment for the Arts in the form of a gift transmittal letter specifying the amount and restricted purpose of the donation (i.e., the name of the orchestra and specific project supported), and date by which payment will be made to the grantee organization.

Handling Procedures

In order to simplify handling procedures for restricted donations which are to be matched by the Treasury Fund, grant recipients will receive payment directly from the donor (in cash or negotiable securities) on all restricted Treasury Fund gifts to the Endowment. Under this method, the following procedures apply:

1. Gift transmittal letter is received by the Endowment from donor with above specified information.

2. Upon receipt of payment on the gifts, grantee provides the Endowment with evidence of receipt of such payment as follows:

- In the case of individual gifts of less than \$5,000, grantee will forward to the Endowment a list of donors' names, addresses, and amounts received, certified by an official of the organization and notarized.

- In the case of individual gifts of \$5,000 or more, grantee will forward to the Endowment, within the grant period, a photostatic copy of the instrument of payment, i.e., the check or negotiable securities, with a covering letter.

3. In cases where benefit proceeds are to be utilized for purposes of the Treasury Fund, evidence such as benefit announcement circulars, invitations, posters, etc. (which indicate donors had prior knowledge that their contributions would be used for the Treasury Fund) must be retained by grantee as evidence of donors' intent.

In these cases, the grantee organization will forward to the Endowment, within the grant period, a notarized letter requesting release of the Treasury matching funds, signed by an appropriate official, certifying that the benefit was held on a specified date, yielded a specified sum for Treasury Fund gift purposes related to the grant in question, and that evidence of the benefit will be retained by grantee organization in its files.

4. In all cases, donors are to make payment on gifts at least 60 days prior to termination of the grant period, and grantee organizations will provide the Endowment with evidence of receipt of payment on gifts at least 30 days prior to the termination of the grant period.

The Process in Terms of Money

\$10,000 Donor's contribution(s) to Endowment

\$10,000 Endowment match from the Treasury Fund

\$20,000

\$20,000 Total Endowment grant

\$20,000 Grantee's additional project cost

\$40,000 Minimum total budget of project

For further information, contact the Office of General Counsel, National Endowment for the Arts, Washington, D.C. 20506.

SBA: Concord District Advisory Council, 6-10-76..... 21531

Detroit District Advisory Council, 6-15-76..... 21531

VA: Wage Committee, 7-1, 7-15, 8-12, 8-26, and 9-9-76..... 21532

#### RELOCATED MEETINGS—

HEW/FDA: Neurologic Drugs Advisory Committee, 6-21 and 6-22-76..... 21501

CONTINUED INSIDE

## HIGHLIGHTS—Continued

## RESCHEDULED MEETINGS—

DOD/AF: USAF Scientific Advisory Board Ad Hoc Committee on Cruise Missile Technology, 6-14 thru 6-17-76..... 21495  
SBA: Albuquerque District Advisory Council, 6-15-76..... 21531

## PART II:

## FEDERAL ELECTION CAMPAIGN ACT

FEC proposes regulations and hearings; comments by 6-14-76..... 21571

## PART III:

## CREDIT

FRS issues regulations pertaining to OTC margin stock lists..... 21607

## PART IV:

## PRIVACY ACT OF 1974

Arms Control and Disarmament Agency describes systems of records; comments by 6-25-76..... 21623

## AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

Ten agencies have agreed to a six-month trial period based on the assignment of two days a week beginning February 9 and ending August 6 (See 41 FR 5453). The participating agencies and the days assigned are as follows:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
	CSC			CSC
	LABOR			LABOR

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this trial program are invited. Comments should be submitted to the Director of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

**ATTENTION:** Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202-523-5286. For information on obtaining extra copies, please call 202-523-5240. To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202-523-5022.

federal register

Phone 523-5240

Area Code 202

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Matchbooks; safety standards; comments by 6-1-76..... 14120; 4-1-76

#### DEFENSE DEPARTMENT

Engineers Corps—  
Navigation regulations; Chesapeake and Delaware Canal, Delaware and Maryland; comments by 6-4-76.  
18517; 5-5-76  
ENVIRONMENTAL PROTECTION AGENCY  
Bacillus thuringiensis, Berliner; exemption from requirement of a tolerance; comments by 6-1-76.  
17945; 4-29-76  
Inert ingredients in pesticide formulations; exemption from tolerance requirement; comments by 6-1-76.  
17946; 4-29-76  
Virginia State implementation plan revision; comments by 6-3-76.  
18431; 5-4-76

#### FEDERAL COMMUNICATIONS COMMISSION

FM broadcast stations, table of assignments:

Arkansas; comments by 6-4-76.  
17788; 4-28-76  
California; comments by 6-3-76.  
17786; 4-28-76  
Colorado; comments by 6-3-76.  
17787; 4-28-76  
Maine; comments by 6-3-76.  
17783; 4-28-76  
North Carolina; comments by 6-3-76..... 17782; 4-28-76  
Texas; comments by 6-3-76.  
17784; 4-28-76  
TV broadcast stations, table of assignments: Alabama; comments by 6-3-76..... 17785; 4-28-76  
UHF television tuning; improvement requirements; extension of comment period to 6-2-76..... 12039; 3-23-76

#### GENERAL SERVICES ADMINISTRATION

Automated data and telecommunications service; comments by 6-1-76.  
14196; 4-2-76  
Conduct on Federal property; comments by 6-1-76..... 13378; 3-30-76

#### HEALTH, EDUCATION, AND WELFARE DEPARTMENT

Food and Drug Administration—  
Submission of data and reports, dealer and distributor records, certification labels; comments by 6-1-76..... 13367; 3-30-76

### List of Public Laws

This is a continuing numerical listing of public bills which have become law, together with the law number, the title, the date of approval, and the U.S. Statutes citation. The list is kept current in the FEDERAL REGISTER and copies of the laws may be obtained from the U.S. Government Printing Office.

S. 3031..... Pub. Law 94-287  
An act to authorize the erection of the statute of Bernardo de Galvez on public grounds in the District of Columbia (May 21, 1976; 90 Stat. 519)

H.R. 12018..... Pub. Law 94-288  
An act to amend the Rehabilitation Act of 1973 to provide that the center for deaf-blind youths and adults established by such Act shall be known as the Helen Keller National Center for Deaf-Blind Youths and Adults

(May 21, 1976; 90 Stat. 520)

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture  
CHAPTER I—AGRICULTURAL MARKETING  
SERVICE (STANDARDS, INSPECTION,  
MARKETING PRACTICES), DEPART-  
MENT OF AGRICULTURE

PART 28—COTTON CLASSING,  
TESTING AND STANDARDS

Revision in Fees

Correction

In FR Doc. 76-14839 appearing on page 20680 in the issue of Thursday, May 20, 1976, the following corrections should be made:

1. On page 20682 in the second column, in item no. 5 the third line should read, "method for either zero or" and the seventh line should read "six specimens from a blended".
2. On page 20683, in item no. 24(a) in the third column the third line should read, "100-gram specimen".

Title 10—Energy

CHAPTER III—ENERGY RESEARCH AND  
DEVELOPMENT ADMINISTRATION

PART 790—GEOTHERMAL ENERGY RE-  
SEARCH, DEVELOPMENT, DEMONSTRATION  
AND PRODUCTION

Federal Guarantees on Loans

On October 28, 1975, the Energy Research and Development Administration (ERDA) published in the FEDERAL REGISTER (40 FR 50100) a proposed regulation concerned with enabling lenders to obtain Federal guarantees on loans to qualified borrowers for purposes related to the commercial development of practical means to produce electric power and other forms of useful energy from geothermal resources in an environmentally acceptable manner.

Generally, the proposed regulation provided priorities and criteria which ERDA intends to apply to the consideration of applications for, and granting or denial of, Federal loan guarantees. Further the regulation provided illustrations of information to be developed by the borrower and the lender, and to be supplied to ERDA, including a detailed description of the project for which the and guaranty are required and an affirmation by the lender supporting the necessity for the Federal guaranty.

In addition, the regulation contained illustrations of cost items which would be acceptable for inclusion in the computation of the aggregate cost of a project.

Interested persons and Federal agencies were asked to comment and a period extending from the date of publication of the proposed regulation to December 12, 1975, was allocated for such purpose. Ap-

proximately sixty responses to the request for comments were received from the public and other Federal agencies. Generally, these comments were directed to the subject of eligible loans and priorities; definitions; loan guaranty criteria; supporting information; project costs illustrations; and, environmental considerations.
